

## **Fortune 414**

### Chapter 414: Escape from Seven Stars Peak, Calamity Approaches

A few days later.

Jiang Fan had thoroughly consolidated his Ninth-Layer Foundation Establishment cultivation, and then walked out of the quiet room.

To celebrate the advancement, he and Su Weiwei spent a splendid night together.

The two of them fought fiercely until they were both satisfied.

After all, Jiang Fan had been in seclusion for a long time.

Between Dao companions, they also relished the experience.

This greatly increased the skill level of the Yin Yang Mandarin Duck Talisman.

Of course, the benefits for both were immense.

"Heavenly Flower? A spirit medicine that can enhance Spirit Root talent?"

"My husband has actually obtained such a rare spirit medicine?"

At this moment, Su Weiwei's beautiful eyes widened, she never expected her husband to have acquired such a rare spiritual object.

Now she was no longer the naive in the Cultivation Realm.

After all, she was already a Foundation Establishment Cultivator, and had learned a lot about cultivation.

She naturally understood how difficult it was to improve Spirit Root talent.

Even Nascent Soul Cultivators wanting to enhance their Spirit Root talent is practically impossible.

Though indeed some spiritual objects in the Cultivation Realm can improve Spirit Root talent, they are almost extinct, and not even Nascent Soul Cultivators can obtain them.

She never imagined her husband obtained such rare spiritual objects, truly unimaginable.

If such rare spiritual objects were auctioned, it would surely fetch a sky-high price.

Even Golden Core, and possibly Nascent Soul cultivators, would try to seize it.

"That's right."

"Once you consume it, you should be able to elevate your high-grade spirit root to earth spirit root."

"At that time, your cultivation efficiency will definitely improve significantly."

Jiang Fan nodded.

Now, the Heavenly Flower was practically of no further use to him.

After all, he already had Celestial Spirit Root talent, and couldn't further improve it.

Continuing to use the Heavenly Flower would only be a waste.

So Su Weiwei was the most suitable person to consume the Heavenly Flower.

With earth spirit root talent and a special spirit body, she would definitely be on par with any Celestial Spirit Root Cultivator.

"Thank you, husband."

Su Weiwei's beautiful eyes were moist, feeling incredibly sweet and grateful inside.

She knew just how precious the Heavenly Flower, such a rare spiritual object, truly was.

Yet her husband still gave it to her, which showed how much he cherished her.

"Has the Profound Celestial Sword Sect had any issues recently?"

Jiang Fan asked.

Because he spent the recent period in seclusion and cultivation, advancing to Ninth-Layer Foundation Establishment, he was completely unaware of external events, nor knew what happened to the Profound Celestial Sword Sect, whether it was safe or chaotic.

"Husband, the Profound Celestial Sword Sect has become increasingly chaotic lately."

"Though the demon cultivators who escaped from the Profound Celestial Sword Sect headquarters did not stay here, but fled to the Mist Mountain Range."

"However, those demon cultivators spread a large number of demonic secret manuals within the Profound Celestial Sword Sect before fleeing."

"These demonic secret manuals were picked up by some loose cultivators."

"Unable to resist the temptation of cultivating demonic secret manuals, they fell into the Demon Dao, becoming demon cultivators."

"Thus, magical disasters have occurred frequently within the Profound Celestial Sword Sect, news of demon cultivators massacring other loose cultivators appears from time to time."

"In an effort to eliminate these demon cultivators, the Profound Celestial Sword Sect is facing great difficulty."

Su Weiwei sighed.

Undoubtedly, the impact caused by the breaking of the Demon Suppression Tower, and the escape of many demon cultivators, is just beginning to show.

Especially the spreading of demonic secret manuals, it's practically hitting the Profound Celestial Sword Sect's weakest point.

Because there are too many loose cultivators in this area.

And many of these loose cultivators have low talent, trapped at bottlenecks for a long time, some are even close to exhausting their lifespan.

Now they actually have a chance to break through bottlenecks and extend their lifespans, these loose cultivators will surely go mad.

Though few loose cultivators are willing to fall into the Demon Dao.

But as long as a few dozen or hundreds do, it can cause enormous chaos and destruction.

Plus, demon cultivators like these are practically impossible to eliminate entirely.

"Is there really such a thing?"

Hearing this, Jiang Fan was a bit surprised, he originally thought Seven Stars Peak was calm and peaceful, and there shouldn't have been many problems. Unexpectedly, there was an undercurrent long ago.

Moreover, it's only just beginning.

If more time passes, as the demonic secret manuals continue to spread, more loose cultivators will fall into the Demon Dao, even greater problems may arise, at that time magical disasters might blossom everywhere.

He wondered if the Profound Celestial Sword Sect, with its power, could withstand this magical disaster.

He also realized the terrifying nature of the Demon Dao, it's almost like a plague.

Once one appears, it spreads in clusters, fundamentally impossible to stop or eradicate.

It's like the cancer of the Cultivation Realm, which can only be controlled, not eliminated.

"And it seems the Yiling Island Group isn't faring well either."

"Ever since that mysterious Nascent Soul appeared in the Yiling Island Group, all major Golden Core influences have been unified."

"It's rumored that all cultivators have been enslaved by the Nascent Soul, dispatched everywhere to search for Red Whale Daoist."

"Luckily, we escaped quickly, otherwise we would have been enslaved by the Nascent Soul too."

Su Weiwei sighed.

She also specifically gathered some intelligence on the Yiling Island Group.

As a result, many loose cultivators fled back from the Yiling Island Group.

Because ever since the appearance of the mysterious Nascent Soul, the situation in that sea region has undergone profound changes.

Loose cultivators are no longer as free as before.

It's said that some Foundation Establishment and Golden Core cultivators were captured by the mysterious Nascent Soul and had restrictions imposed on them.

Unless the Red Whale Daoist is found, they couldn't lift the restriction.
