Chapter 419: Obtaining Golden Core Spirit Medicine, 3 Stages of Core Formation_2

Anyway, similar things are everywhere in the Ten Thousand Beasts Mountain Range.

Not long after Jiang Fan and Su Weiwei left, the cultivators from the Great Sun Sword Sect arrived late.

They saw the situation at the scene but could not find any clues at all.

In the end, they could only choose to give up looking.

After all, the Great Sun Sword Sect's situation was not good during this period and couldn't handle more disruptions.

...

That night.

Jiang Fan and Su Weiwei did not arrive in Sun City but instead went to a cave on a nearby ordinary mountain to rest for a while.

Of course, they did not stay inside the cave but entered the internal space of the Exquisite Tower.

After all, the inner world of the Exquisite Tower is safer, without worries of being attacked in the wild.

Then, he started checking his gains meticulously.

Clearly, the cultivators from the Great Sun Sword Sect couldn't compare to the Golden Core Demon Cultivator he encountered previously in the Lunar Secret Realm.

He only found five hundred thousand spirit stones from these storage bags.

Besides that, he just found some ordinary refining materials and common spirit medicine.

There was no particularly big gain.

"Wait, what's this?"

Suddenly, Jiang Fan found a special spirit medicine from the storage bag of a Foundation Establishment Sword Cultivator. It was a red spirit fruit, as bright as blood, with dragon whiskers growing on it and mysterious patterns appearing on its surface. It was permeated with a rich medicinal fragrance, enticing to the senses.

He instinctively took out this spirit fruit.

"Master, this is the Golden Core Spirit Medicine Dragon Beard Vermilion Fruit."

"You've struck rich, Master, you've really struck rich this time."

"How could you be so lucky?"

The Ten Thousand Transformations Pill Furnace exclaimed excitedly upon seeing the spirit fruit, showing a look of disbelief, unable to accept how its master could easily acquire Golden Core Spirit Medicine, which was truly extraordinary.

"Golden Core Spirit Medicine Dragon Beard Vermilion Fruit? What exactly does it do?"

Jiang Fan squinted his eyes.

He naturally knows how precious Golden Core Spirit Medicine is, incomparable to ordinary spirit medicines.

Naming something Golden Core Spirit Medicine means it can help a cultivator at Foundation Establishment Perfection break through, ascending to the Golden Core Realm.

Therefore, this type of spirit medicine costs ten times more than other spirit medicines.

And even if one has money, it may not be purchasable.

Even Foundation Establishment Spirit Medicine can cause a group of loose cultivators to fight over it, while Golden Core Spirit Medicine can drive sect cultivators mad, even leading to wars.

After all, one Golden Core Spirit Medicine can increase the probability of ascending to Golden Core by ten to twenty percent, showing its preciousness.

For ordinary Golden Core sects, it represents heritage, potentially leading to the birth of a Golden Core cultivator.

This could extend the sect's destiny by five hundred years.

He never expected that the Foundation Establishment Sword Cultivator had Golden Core Spirit Medicine; it was indeed extraordinary.

Oh.

No wonder the Tier Two Golden-Scaled Beast was chasing after the Foundation Establishment Sword Cultivator, presumably to seize this Golden Core Spirit Medicine.

Otherwise, given the cautious nature of the Tier Two Demon Beast, how could it recklessly attack so many human cultivators?!

Undoubtedly, this Golden Core Spirit Medicine is his Sixth-Grade Opportunity.

"Master, every Golden Core Spirit Medicine can help Foundation Establishment cultivators ascend to Golden Core Realm."

"To know, a Foundation Establishment cultivator needs to overcome three barriers to condense a Golden Core, reaching Golden Core Realm."

"The first barrier is naturally the Spiritual Power Barrier; if a Foundation Establishment cultivator's spiritual power is impure, it will result in a flawed Golden Core during condensation, leading to failure in becoming a Golden Core. Such a cultivator from the start is limited to Foundation Establishment, which is the case for most Foundation Establishment loose cultivators facing the first barrier.

But there's no other choice, as Foundation Establishment loose cultivators need to consume a large amount of elixirs, which leaves elixir poison in the body, making spiritual power impure, planting the seeds of disaster early.

Yet, there's a solution: finding Golden Core spiritual objects. The Dragon Beard Vermilion Fruit is such an object that, once consumed, can rapidly increase spiritual power and eliminate impurities, making

spiritual power pure. Without doubt, this is a dream Golden Core Spirit Medicine for countless Foundation Establishment loose cultivators.

However, this Golden Core Spirit Medicine is extremely rare, not easily found. If found, it is likely to be obtained by sect cultivators, never reaching loose cultivators."

The Ten Thousand Transformations Pill Furnace explained.

Evidently, it's precisely because of the purifying effect of the Dragon Beard Vermilion Fruit on spiritual power that it is labeled a Golden Core Spirit Medicine, pursued by countless Foundation Establishment cultivators, raising its price continuously.

Every time it appears at auctions, it sells for astronomical prices.

In the past, Daoist Wan Hua suffered greatly to acquire the Dragon Beard Vermilion Fruit.

Even after obtaining such Golden Core Spirit Medicine, he was pursued after sect cultivators learned of it.

Daoist Wan Hua exhausted great effort, surviving numerous deadly situations, just to escape safely.

But currently, this young man easily obtained the Dragon Beard Vermilion Fruit.

Moreover, without any safety concerns, the disparity in treatment between them is too vast.

"What's the second barrier?"

Jiang Fan continued to ask.

After all, he is now a Ninth-Layer Foundation Establishment cultivator, not far from the Golden Core Realm.
