Chapter 432: Obtaining Dragon Blood Grass, Opportunity for Soaring Snake Technique Breakthrough_3

"Hmm, what's this?"

Suddenly, Jiang Fan discovered that one of the storage bags contained a scarlet spirit grass the size of a palm, with special patterns on it, and faintly, a dragon's shadow appeared.

This spirit grass even contained an inexplicable spiritual pressure.

It was the first time he had discovered such a spirit grass, truly incredible.

Thinking of this, he took out the scarlet spirit grass and let the Ten Thousand Transformations Pill Furnace identify it.

"Master, this is Dragon Blood Grass."

"This is the renowned Body Tempering Spirit Medicine, Dragon Blood Grass."

"It is said that this spirit grass contains the power of dragon blood."

"It is hailed as the holy medicine for body cultivators, worth a fortune."

"If a body cultivator consumes Dragon Blood Grass, it will undoubtedly lead to a huge improvement in cultivation."

"Where did these Foundation Establishment Demon Cultivators get Dragon Blood Grass?"

The Ten Thousand Transformations Pill Furnace exclaimed in surprise; it didn't expect to actually see Dragon Blood Grass, which is a legendary spirit medicine, incredibly precious.

Once consumed, it's like bathing in dragon blood, the physique will be comprehensively enhanced.

In the past, Daoist Wan Hua also wanted to obtain Dragon Blood Grass, but unfortunately, no matter what he did, he couldn't find it.

It can only be said that he was not destined for Dragon Blood Grass.

However, this legendary spirit grass has actually been obtained by its current master.

Even though it knows Jiang Fan's destiny is extraordinary, often getting opportunities, this is still too exaggerated.

"Dragon Blood Grass? It seems like this time I've truly obtained a big opportunity."

Upon hearing this, Jiang Fan's eyes suddenly lit up.

To be honest, his Soaring Snake Technique had reached a bottleneck stage, progressing very slowly.

But this was merely due to a lack of Body Tempering Spirit Medicine.

Previously, the consumption of Golden-Scaled Beast's flesh and Tier Two Spirit Rice indeed accelerated the progress of his Soaring Snake Technique.

But compared to the effect of Body Tempering Spirit Medicine, it was still far behind.

Now he has actually obtained the renowned Dragon Blood Grass; it's like a pie falling from the sky.

If he can fully refine the medicinal power of Dragon Blood Grass, he might be able to cultivate the Soaring Snake Technique to the tier two perfection stage or even advance to the tier three body cultivator; it may not be impossible.

"I originally thought I could get the Golden Liquid Jade Returning Pill, but Dragon Blood Grass isn't bad either."

Jiang Fan felt quite satisfied.

At first, he thought the sixth-grade opportunity he obtained this time might be the Golden Liquid Jade Returning Pill, perhaps the elixir taken by Cen Bai Rui would end up in his hands.

If that were true, he would be completely successful, effortlessly obtaining rare elixirs that many cultivators seek, but now it seems it won't be that simple.

After all, Cen Bai Rui is very cautious and deeply scheming; other cultivators wanting to seize the Golden Liquid Jade Returning Pill from him would not be simple either, and a slight carelessness could even lead to a counter-kill by the opponent.

However, even so, compared to the Golden Liquid Jade Returning Pill, he actually prefers to obtain Dragon Blood Grass.

Because this Body Tempering Spirit Medicine can accelerate the cultivation progress of Soaring Snake Technique.

For Jiang Fan, the Soaring Snake Technique is of utmost importance, as the breakthrough of this cultivation technique not only signifies the evolution of the physique but also represents an extension of lifespan.

His lifespan had already been extended to two thousand years due to the Soaring Snake Technique.

If further breakthrough occurs, he doesn't know to what extent his lifespan will be extended.

At that time, even the lifespan of a Divinity Transformation Cultivator might not be comparable to his.
