Chapter 433: Soaring Serpent Golden Core Chapter, Nurturing the Golden Core Domain

Boom~~

Thinking of this, Jiang Fan did not hesitate, he immediately placed the Dragon Blood Grass into the Ten Thousand Transformations Pill Furnace to rapidly refine this Spirit Grass.

Instantly, the Dragon Blood Grass was swiftly refined, impurities removed, leaving only the essence.

It didn't take long for a pool of Spiritual Liquid resembling blood to appear inside the Ten Thousand Transformations Pill Furnace, boiling like magma and containing extremely high temperatures, simultaneously releasing Long Wei, as if it were Dragon Blood.

This searing Blood Qi is simply unprecedented.

Even ordinary cultivators would be burned by this scalding heat if they got near.

Undoubtedly, not everyone can refine the Dragon Blood Grass.

If ordinary body cultivators with physiques that aren't strong enough dare to refine the Dragon Blood Grass, they'd be melted by this immense energy, and their whole body might be shattered.

Thus, the Spirit Medicine suitable for oneself is the best; it is not necessarily true that higher-tier Spirit Medicine is better.

But for Jiang Fan, who cultivates the Soaring Snake Technique, the medicinal power contained within the Dragon Blood Grass is just right.

After all, he is already a Tier Two Late Stage body cultivator, his physique many times stronger compared to ordinary body cultivators.

If it weren't for sufficiently high-tier Spirit Medicine, it probably wouldn't have any effect on his physique.

Thinking of this, Jiang Fan didn't hesitate either, he immediately took out a drop of crimson medicinal liquid and swallowed it.

Boom~

In an instant, when this drop of crimson medicinal liquid entered his stomach, it immediately produced unprecedented heat, like a volcanic eruption, burning every corner of his body like flames.

Bones, blood, skin, hair, internal organs, and so on, seemed to be burned by Dragon Fire.

His entire body seemed to be completely melted by this heat.

At this moment, Jiang Fan, without hesitation, immediately operated the Soaring Snake Technique, and the Soaring Serpent Runes on his body immediately lit up, connecting together to form a peculiar power.

To cultivate the Soaring Snake Technique to the Tier Two Perfection level, he needs to comprehend the Foundation Establishment Level Soaring Serpent Runes, engraving six hundred and sixty-six Soaring Serpent Runes onto his skin.

However, to achieve this, it requires a long time and also assistance from Spirit Medicine.

But now with the help of Dragon Blood Grass, the time for cultivation will naturally be greatly shortened.

All at once, he became immersed in the process of cultivating the Soaring Snake Technique, and one by one, Soaring Serpent Runes started appearing on his skin, emitting waves of peculiar breath.

It seemed like a Soaring Snake was lurking within his body.

...

Soon, half a year passed in the blink of an eye.

During this time, Jiang Fan stayed on Purple Spirit Peak to cultivate, without leaving.

As for worldly events, it had little to do with him.

Moreover, other cultivators also have no interest in the place of Purple Spirit Peak whatsoever, not planning to get close at all.

This allowed Jiang Fan and Su Weiwei to enjoy a very peaceful time without worrying about external threats.

At this very moment, in the quiet chamber.

Jiang Fan was sitting cross-legged on the ground, operating the Soaring Snake Technique.

The surface of his skin showed a number of Soaring Serpent Runes.

These Soaring Serpent Runes were connecting together, seemingly forming a peculiar force.

If looked closely, the Soaring Serpent Runes on the surface of the skin had already reached six hundred and sixty-five pieces.

Undoubtedly, after half a year's hard cultivation, his progress in the Soaring Snake Technique can be said to have made a giant leap forward.

He was only one Soaring Serpent Rune shy from Tier Two Perfection for the Soaring Serpent Foundation Establishment Chapter.

But the difficulty of this single Soaring Serpent Rune exceeds all others combined.

Because it's not just a simple rune, it's the finishing touch.

Once successful, then the six hundred and sixty-six pieces of Soaring Serpent Runes will merge into one, causing all skin to completely fuse together, forming a special Soaring Snake Barrier.

So the difficulty of the last rune can be imagined.

This was no longer something Spirit Medicine could aid with; only top tier comprehension could make it possible.

If the Soaring Snake Technique truly relied on Spirit Medicine to succeed in cultivation, in Ancient Times this cultivation technique would not have been so difficult, and those who succeeded were very few, counting only on one's fingers.

But for Jiang Fan, this wasn't too big a problem.

He also consumed a large amount of Luck Points.

A mysterious energy surged into the depths of his soul, granting his soul top-tier comprehension.

Which kept him in the Unity of Heaven and Man realm constantly, with no joy or sadness, undisturbed by anything.

Rumble~~

At this moment, Jiang Fan operated the Qi and Blood Power within his body, merging into the last Soaring Serpent Rune, everything seemed to proceed without any difficulty, like water flowing naturally.

Six hundred and sixty-six Soaring Serpent Runes!

This was like completing the last piece of a puzzle.

The surface of his body's skin immediately blossomed with dark golden light, these Soaring Serpent Runes merged together, making every inch of skin incredibly tough, yet even smoother, akin to a Soaring Snake Hide.

Simultaneously, a layer of Soaring Snake Barrier appeared on the skin's surface, containing dense Soaring Serpent Runes.

Ordinary power would be easily blocked when striking it.

Next, this peculiar energy spread throughout his body, frantically strengthening muscles, bones, and various parts at a speed visible to the naked eye.

His life's tier elevated at a geometric speed, the Qi and Blood within his body utterly erupted like a volcano.

It was as if a Soaring Snake awoke within his body.
