Chapter 434: Soaring Serpent Golden Core Chapter, Nurturing the Golden Core Domain_2

"Soaring Serpent Golden Core Chapter!"

At this moment, the contents of the Soaring Serpent Golden Core Chapter emerged in the depths of Jiang Fan's sea of consciousness. A massive amount of information had been thoroughly comprehended by him, and he had completely understood how to cultivate the next stages of the Soaring Serpent Technique.

If the Foundation Establishment Chapter of the Soaring Serpent Technique is comparable to the Skin Tempering Chapter, then the Golden Core Chapter is akin to the Bone Forging Chapter.

If one wants to step into the Tier Three level, then it is necessary to engrave Soaring Serpent Runes on every bone within the body, transforming the bones of mortals into the bones of the Soaring Serpent, evolving from Mortal Bone to Immortal Bone, which is a tremendous transformation.

Moreover, the human body in this world possesses a total of 207 bones.

So a total of 207 Soaring Serpent Runes need to be engraved, and these are runes belonging to the Golden Core Level.

The complexity is far greater than that of the Foundation Establishment Chapter.

Even in Ancient Times, some cultivators who managed to step into the Golden Core Level found it difficult to continue.

After all, if one didn't comprehend the Soaring Serpent Runes of the Golden Core Level, it was impossible to continue cultivation.

However, for Jiang Fan, he was completely untroubled by these issues.

He could easily comprehend the mysteries of these Soaring Serpent Runes.

"Let's begin."

Thinking of this, Jiang Fan did not hesitate. He immediately drank the remaining potion of Dragon Blood Grass, and the rest of the potion instantly exploded with a huge amount of energy.

This made his body seem as if it were bathed in dragon blood.

Every part of his body devoured a large amount of energy, gaining immense vitality.

When he operated the Soaring Serpent Technique, every piece of flesh, every inch of skin on his body radiated dark golden light, myriad runes began to resonate, merging with each other.

A mysterious energy gathered, seemingly transforming into a Soaring Snake, beginning to roam through his body.

Boom~~

At this moment, Jiang Fan felt the strange Qi and Blood Power within his body start to roam inside, launching an assault on the Tier Three level. Thanks to the help of Dragon Blood Grass, this Qi and Blood Power was extraordinarily mighty.

Because the foundation of his body was so perfect, it was nearly flawless.

Just one impact, he immediately felt the bottleneck of Tier Three shatter in response.

The massive Qi and Blood Power and mysterious energy instantly surged into each of the bones within his body.

More importantly, the runes integrated into his flesh, the runes embedded in his skin also formed a whole, forming a Grand Array, seemingly communicating with the heavens and earth, absorbing mysterious energy from the depths of the void.

Tier Three Body Cultivator!

Instantly, Jiang Fan immediately perceived his Body Cultivation Realm breaking through, advancing from Tier Two Late Stage to Tier Three level, which was simply a qualitative change and improvement.

He felt his life's level had leapt at this moment, and the life energy within him had elevated exponentially.

The Qi and Blood within him erupted like a volcano.

Rumbling~~~

An invisible pressure burst from him, not only shrouding Purple Spirit Peak, but even easily enveloping a radius of ten miles.

Any being within this area felt a vague pressure, which was a soul oppression.

Just like a higher-level existence.

Some weaker creatures couldn't withstand such pressure, fainting one after another, already unconscious.

...

Su Weiwei, residing in another place on Purple Spirit Peak, naturally was the first to feel this pressure.

She was practicing cultivation at first, but was suddenly awakened by this pressure.

But due to her relationship with Jiang Fan, they had long fused into one through the power of the Yin Yang Mandarin Duck Talisman.

She did not feel afraid of the soul pressure; instead, she felt bursts of safety.

"Has my husband broken through?"

Perceiving this aura and power, Su Weiwei immediately felt immense joy.

She naturally knew that in the past half-year, her man had been cultivating the Soaring Serpent Technique all along, seemingly intending to break through from Tier Two level to Tier Three.

This is equivalent to advancing from Foundation Establishment Realm to Golden Core Realm.

One could say this is simply a qualitative change, and the difficulty can only be imagined.

For an ordinary cultivator, even painstaking cultivation for dozens of years is a very normal thing.

She had not expected that her man seemingly achieved a breakthrough in just a half-year.

Even if told, no one would believe it.

But at this moment, the Six-winged Poison Bees around her were trembling, as if facing a natural enemy. They all hid near Su Weiwei's body.

Although they are indeed Ancient Strange Insects, they are far behind compared to a Divine Beast like the Soaring Serpent.

Facing soul pressure on par with the Golden Core, they were simply powerless.

"Don't be afraid, it's my husband's power."

Su Weiwei immediately used telepathy to comfort the Six-winged Poison Bees, telling them not to be frightened.

Since advancing to Second-Layer Foundation Establishment, the number of Six-winged Poison Bees on her body had increased to 108, and it's still growing.

If she could advance to Foundation Establishment Perfection, the number of Six-winged Poison Bees could probably reach a thousand.

If she could reach the Golden Core Level, the number could reach tens of thousands.

Without a doubt, the higher the cultivation of Six-winged Poison Bees, the more terrifying their combat power would be.

Low-tier Six-winged Poison Bees don't show the ancient strange insect's might.

At this moment, hearing these words, the Six-winged Poison Bees nodded, completely calming down.

They hadn't expected that their male master was so fearsome.

Though he appeared amiable usually, the soul pressure he possessed was so terrifying.

"Husband's progress is still too fast."

"I must work hard to cultivate as well, I can't let my husband's cultivation far surpass mine."

Su Weiwei clenched her pink fists.

She was also very confident in her cultivation speed.

Because she previously consumed the Heavenly Flower, easily elevating her Spiritual Root Talent to Earth Spirit Root level.

Plus her special Spirit Body, she's not much different from a Celestial Spirit Root Cultivator.

To be honest, she couldn't match her husband's cultivation speed.

But other cultivators compared to her were left far behind.

It's not that she's not talented, it's just that her husband is purely a monster, incomparable.

"Too bad the Purple Lightning Mayfly still can't be hatched."

"Otherwise, the cultivation progress would surely be higher."

Su Weiwei felt a bit regretful.

But there's no help for it; to hatch the Purple Lightning Mayfly still requires patience.

...

At this moment, Jiang Fan was also quietly pondering the changes after advancing to Tier Three level, he felt incredibly excited; undoubtedly, this was a qualitative improvement.

"Strength, speed, and defense have improved several times over compared to before."

Jiang Fan clenched his fist.

He felt the surging strength and speed within his body; they couldn't be compared in the same breath.

Even with a light punch throwing out, the explosive force can easily shatter a great mountain.

Moreover, his body's speed, with just a light leap, could span hundreds of meters to thousands, matching the speed of sound.

Even with the speed of sound, it's insignificant; with his body strength, sound barriers cause no harm to his body.

Undoubtedly, he is now an out-and-out monster.

Even if the force of an ordinary Spiritual Artifact strikes his body, it would be resisted by his physique.

Not entirely without harm, but certainly unable to cause much damage.

This is because his skin has Soaring Serpent Runes integrated, forming the Soaring Snake Barrier.

To breach his defense, one would need to penetrate this barrier.

Otherwise, it's impossible to harm his body.

Even his skin can neutralize and slightly rebound the enemy's force.

Clearly, this is the strength of a Tier Three Body Cultivator, utterly incomparable to Tier Two Body Cultivators.

"But the true strength of Tier Three Body Cultivation doesn't lie in the power of the physique."

"It's the Golden Core Domain."

Jiang Fan's heart stirred, he sensed an invisible domain enveloping a radius of ten miles.

Under the shroud of this domain, all beings would feel a vague pressure, even becoming incapacitated and constrained.

Why do Golden Core Zhenren vastly exceed Foundation Establishment Cultivators and completely dominate them?

It's due to the presence of the Golden Core Domain.

Once becoming a Golden Core Zhenren, one can release a domain.

Under the scope of the domain, one can manipulate all Spiritual Qi of the world.

With a thought, it is easy to suppress other cultivators, rendering low-tier cultivators motionless.

With a single thought, the winds and clouds can change color.

And Tier Three Body Cultivators can achieve similar feats.
