

Fortune 436

Chapter 436: New Bloodline Divine Techniques, 4000-Year Lifespan_2

Even if his cultivation couldn't break through to the Golden Core Realm, he could live for four thousand years.

To be honest, such a long time, who knows how many times the mundane dynasties could change.

Moreover, if his cultivation advanced to the Golden Core, his lifespan would definitely be significantly extended.

By that time, his lifespan would surely break through further.

"Are there only one hundred and eighty thousand Luck Points left?"

"It seems I consumed a lot of Luck before."

Jiang Fan thought that this was normal since he had consumed a large number of Luck Points to ensure the breakthrough of the Soaring Snake Technique to Tier Three level, thus succeeding.

But all of this was worth it.

Because as long as one is alive, Luck Points can be continually acquired by overcoming tribulations.

So, naturally, he was willing to exchange Luck Points for lifespan and strength.

"Tsk tsk, I actually have more than four million Spirit Stones stored up?!"

"Even the wealthier Golden Core Cultivators can't compare to my riches."

Jiang Fan saw his number of Spirit Stones and felt very satisfied.

Of course, most of these Spirit Stones were plundered from those demon cultivators, akin to black-commerce dealings.

Obtaining these Spirit Stones was equivalent to getting a reward for eliminating threats to the people.

With so many Spirit Stones, he could open the Gate of the Void once again.

"If I want to advance to the Golden Core, besides having a solid foundation, the most important thing is finding a Tier Three Spirit Vein."

"Perhaps I need the power of the Gate of the Void to help me find a Tier Three Spirit Vein."

Jiang Fan's eyes glimmered.

He had already started contemplating his path to advancing to the Golden Core.

As long as his cultivation reached the level of Foundation Establishment Perfection, he could naturally begin Core Formation on his own.

However, even so, without a suitable environment for Core Formation, failure is still possible.

Thus, finding a Tier Three Spirit Vein is imperative.

"Finding a reliable Tier Three Spirit Vein is not that easy."

Jiang Fan's eyes glimmered.

For ordinary loose cultivators, finding a trustworthy Tier Three Spirit Vein is incredibly difficult.

Because Tier Three Spirit Veins are basically monopolized by Golden Core Influences or Nascent Soul Influences.

If without their permission, using them is utterly impossible.

Even if granted permission, who knows if they might interfere at the crucial moment and sabotage the advancement.

In fact, such incidents have indeed occurred before.

Of course, it's said that deep within the Ten Thousand Beasts Mountain Range, there are still some ownerless Tier Three Spirit Veins.

But those places are rarely visited and full of demon beasts.

If one isn't careful, they might provoke a large number of demon beasts and face attacks.

In that case, things might go even worse.

Therefore, for loose cultivators at Foundation Establishment, finding a reliable and safe retreat for seclusion is tremendously difficult.

"Actually, the easiest place to find a Tier Three Spirit Vein is still the Yiling Secret Realm."

"Unfortunately, it's not suitable to return to the Yiling Island Group right now."

"I can only look for other methods."

Jiang Fan clenched his fists.

However, he felt there was no rush. As the saying goes, when the boat reaches the bridgehead, it will naturally straighten.

Perhaps the Spirit Vein issue will be easily resolved in the future.

For now, it's better to consolidate his Tier Three Body Cultivation Realm.

...

Another week passed quickly.

Jiang Fan thoroughly consolidated his cultivation in the Tier Three Body Cultivation Realm, perfectly controlling his explosive growth in strength and speed, while also becoming familiar with the Bloodline Divine Technique of Water Control.

He could effortlessly control the flow of water between heaven and earth.

Just like those Water Demons.

His affinity for the power of water was extremely high.

The bloodline within him was more intense than before, at least tenfold.

If he were to have a child with Su Weiwei now, the child's bloodline talent would also be higher.

Swoosh!

At this time, Jiang Fan walked out from the meditation room.

"Husband."

Seeing Jiang Fan's figure, Su Weiwei was very happy, knowing that this time her husband had successfully broken through in his cultivation, and she couldn't sense any powerful aura from Jiang Fan.

Undoubtedly, this was a sign of completely mastering his explosive strength.

Only by fully controlling one's strength, can one fully restrain their aura.

This is not an easy feat to achieve.

"My dear."

Jiang Fan couldn't control his excitement and approached immediately.

Being apart made them cherish the reunion even more, as they indulged in each other's company in the bedroom.

Another night passed.

Afterward.

"You bad boy, just out of seclusion and you start being naughty."

Su Weiwei reclined on Jiang Fan, her eyes sparkling with allure, giving this naughty man a sidelong glance.

"Hehe, I just missed you."

Jiang Fan chuckled, feeling immensely satisfied.

Clearly, the way of cultivation still requires the blending of yin and yang.

This sort of thing greatly pleased him, even more so than breaking through to become a Tier Three Body Cultivator.

"You scoundrel."

Su Weiwei blushed, but inside she felt a sense of joy, as it was a testament to her own charms.

No matter how high her man's cultivation was, he still fell at her feet.

"By the way, has there been anything happening with the Great Sun Sword Sect recently?"

Jiang Fan asked.

He knew Su Weiwei was very well-informed.

Since advancing to the Foundation Establishment Realm, Su Weiwei had control over one hundred and eight Six-winged Poison Bees, and as time passed, their numbers continued to grow.

Each Six-winged Poison Bee was incredibly fast and could monitor the surroundings, like mobile surveillance cameras.
