

Fortune 437

Chapter 437: New Bloodline Divine Techniques, 4000 Years Lifespan_3

The intelligence they gathered would be transmitted back to the queen bee through special spiritual sense, allowing Su Weiwei to know.

Therefore, anything happening in the area within several hundred kilometers could hardly escape Su Weiwei's eyes.

Even if she never leaves home, she can still gather a wealth of information.

In fact, this is also why the Six-winged Poison Bees are called Ancient Strange Insects.

They're not just numerous; they can also defend an area, possessing their own territory.

Any enemy stepping into the Six-winged Poison Bees' territory would be detected immediately.

Clearly now the area within several hundred kilometers around Purple Spirit Peak has become the territory of the Six-winged Poison Bees.

"Nothing major has happened."

"Since the Great Sun Sword Sect's Foundation Establishment Elder, Cen Bai Rui, took the Golden Liquid Jade Returning Pill, causing an internal conflict within the Great Sun Sword Sect with heavy losses, the Great Sun Sword Sect has been very low-key and hasn't done much of anything."

"It's said that Cen Bai Rui has hidden deep in the Ten Thousand Beasts Mountain Range. Many cultivators want to find Cen Bai Rui; even sect cultivators from other sects are looking for him, but unfortunately, all have come up empty-handed. Until now, no one has been able to find him."

Su Weiwei thought for a moment and immediately relayed all the information she knew.

There's no doubt that the Foundation Establishment Elder Cen Bai Rui is indeed quite remarkable.

Even when besieged by many cultivators, he could still escape with ease and not be found by other sect cultivators.

Moreover, after realizing there was no hope of recovering the Golden Liquid Jade Returning Pill, the acting Sect Leader of the Great Sun Sword Sect, Fei Haisheng, also completely gave up chasing him, choosing instead to tacitly acknowledge his success.

If Cen Bai Rui really could succeed in advancing to the Golden Core stage and return, then Cen Bai Rui would be the next Sect Leader of the Great Sun Sword Sect.

Clearly, this is the cruelty of the Cultivation Realm.

The so-called rules are prepared for the weak and not applicable to the strong.

This is also an inevitable situation.

"Sounds not too bad."

"I estimate this area should still be safe for some time."

Jiang Fan felt quite satisfied.

After all, he didn't want the Great Sun Sword Sect's area to fall into chaos.

If that's the case, perhaps he would need to find a new place to live again.

But that would mean living a wandering lifestyle again.

And also losing tens of thousands of Spirit Stones.

Of course, that amount of Spirit Stones doesn't mean much to him now.

"Oh no, my husband."

"This seems to be the aura of a Tier Three demon beast."

"And not just one Tier Three demon beast, but two."

Suddenly, Su Weiwei's face changed, as she sensed a group of Six-winged Poison Bees starting to become restless, and images were immediately transmitted from these Soldier Bees.

She suddenly saw two Tier Three demon birds, Azure Split Profound Eagles, appearing in the sky hundreds of kilometers away.

"What's wrong? What happened?"

Jiang Fan blinked in confusion, feeling very puzzled. Everything was fine just now, so how did the situation change so suddenly?

"Husband, just now two Tier Three Azure Split Profound Eagles flew towards the Great Sun Sword Sect."

"They seem to plan to attack the Great Sun Sword Sect."

"The Great Sun Sword Sect is likely doomed."

Su Weiwei's face was serious; as a Beast Master, she's very familiar with various spirit and demon beasts.

And the Azure Split Profound Eagle is a notorious Tier Three demon beast, much stronger than the average Tier Three demon beast.

Because their speed is incredibly fast.

There's a saying that they only attack enemies, and no enemies can attack them.

Thus, the Azure Split Profound Eagle is considered one of the most formidable Tier Three demon beasts in the Ten Thousand Beasts Mountain Range, definitely not to be provoked.

"Master, you jinx."

"Maybe the Great Sun Sword Sect is doomed because you jinxed it."

The Ten Thousand Transformations Pill Furnace looked at Jiang Fan helplessly.

It believed that the Great Sun Sword Sect was doomed.

Originally, the Great Sun Sword Sect's Golden Core Zhenren was heavily injured and lacked the Stabilizing Needle.

Now, with an attack by two Tier Three demon beasts, there's no way they could defend against it.
