Chapter 451: Smooth Crossing the Tribulation, First-Layer Golden Core_2

Other low-tier cultivators who have just entered the Golden Core Realm might find it extremely difficult to manipulate Golden Core Spiritual Power.

But for him, it's as simple as eating or drinking water.

At the same time, he can also absorb more Heaven and Earth Spiritual Qi.

With just a thought, surging Spiritual Qi would be devoured into his body, seemingly forming a Spiritual Qi black hole.

Obviously, the breakthrough in Spiritual Sense is of immense benefit to a cultivator.

"The surrounding Spiritual Qi is still not enough."

"We need as much Spiritual Qi as possible to accelerate the solidification of the Golden Core."

At this moment, Jiang Fan also knew that this was the limit of the Tier Three Spirit Vein, and there was no way to have more Spiritual Qi. If there were a Tier Four Spirit Vein, it might increase the concentration of Spiritual Qi.

But he also had other solutions, that was to devour Spirit Stones.

Because the energy contained within Spirit Stones is the purest.

It can provide immense help to a cultivator at crucial moments, temporarily increasing the concentration of Spiritual Qi.

In any case, he currently had several million Spirit Stones on him.

Spending a million Spirit Stones to thoroughly solidify the Primordial Golden Core was not an issue at all.

Rumble~~~

Thinking of this, Jiang Fan didn't hesitate and immediately took out over a million Spirit Stones.

These Spirit Stones were devoured and digested by him, quickly transforming into drops of Spiritual Liquid.

And these Spiritual Liquids all merged into the Primordial Golden Core within the Elixir Field and Sea of Qi, causing the illusory Primordial Golden Core to gradually solidify.

In the blink of an eye, another month passed.

At this moment, the Primordial Golden Core was completely saturated and could no longer absorb a trace of Heaven and Earth Spiritual Qi.

It radiated a golden light, extremely bright, like a great sun, floating in the Elixir Field and Sea of Qi.

And this Primordial Golden Core slowly rotated, like a spinning sun.

Eighteen Life Talismans appeared on its surface, resembling lines of Talisman patterns, containing incredible power. Each rotation could invoke infinite Power of Heaven and Earth.

There was no doubt that from now on, he was a Golden Core Zhenren.

"It's done, finally done."

Jiang Fan laughed, feeling immensely joyful.

Obviously, the Primordial Golden Core was fully solidified, with no risk of regression.

Rumble~~

At this moment, the entire valley trembled, buzzing.

The Spirit Veins within a hundred kilometers trembled, with infinite Heaven and Earth Spiritual Qi surging in.

Heavenly Baptism!

This was the gift from the heavens after advancing to the Golden Core Realm.

Strands of mysterious energy seeped in from the void, like a flood, entering his body.

In an instant, Jiang Fan sensed his body absorbing vast mysterious energy, seemingly a substance of longevity.

It's precisely because of this longevity substance that cultivators have such long lifespans.

This energy tempered every corner of Jiang Fan's body, causing an evolution in his physique.

Evidently, this was the last barrier in advancing to the Golden Core Realm, the Physique Barrier.

If a cultivator's physique was not strong enough, it couldn't bear the heaven's gifts.

There would be a situation of the body being weak and unable to withstand the supplement.

At the same time, a fragile physique could hardly endure such a brutal energy baptism, which might lead to shattered internal organs and death.

But this was not a concern for Jiang Fan.

Because he was already a Tier Three Body Cultivator, with a physique of extraordinary strength.

What was aggressive energy for other cultivators was gentle for Jiang Fan, with his body greedily absorbing every strand of mysterious energy.

This also led to a visible evolution of his physical form.

"Is this the realm of the first layer of the Golden Core?"

Jiang Fan sat cross-legged on the ground, carefully feeling the changes after advancing to the first layer of the Golden Core.

His Elixir Field and Sea of Qi had a floating Primordial Golden Core, slowly rotating.

Strands of Golden Core Spiritual Power began circulating throughout his body.

Obviously, Golden Core Spiritual Power was more than ten times stronger than Foundation Establishment Spiritual Power.

Comparatively, the difference between the two was like steel and tofu.

Even a strand of Golden Core Spiritual Power could effortlessly crush dozens of strands of Foundation Establishment Spiritual Power.

The gap between the two was so vast, simply incomparable.

Now, perhaps with one punch, he could easily cause a mountain to collapse, crushing it into rubble.

"The most important thing is the Golden Core Domain."

Jiang Fan's thought moved, and a Domain spread from his body, effortlessly covering dozens of miles around.

Under the Domain's cover, the operation of all Heaven and Earth Spiritual Qi was under his control.

It's known that Foundation Establishment cultivators can fly and soar in the sky by manipulating the power of Heaven and Earth Spiritual Qi.

But with the Golden Core Domain, the control over Spiritual Qi by Foundation Establishment cultivators could be isolated, effectively sealing their abilities, showing the strong power of the Domain.

For low-tier cultivators, it's simply a dimensional strike.

"The formation of the Golden Core Domain occurs with the union of Golden Core Spirit Sense and Spiritual Power."

"When Spiritual Power increases to a certain level, a Domain Field forms."

"This is how the Golden Core Domain comes to be."

Jiang Fan's eyes twinkled.

Of course, being just a Golden Core Cultivator, the Domain's power wasn't very strong, only in its rudimentary form.

If he could become a Nascent Soul Cultivator, it would evolve into a Nascent Soul Domain.

Then, with a single thought, he could change the color of the sky, causing phenomena.

That's why a Nascent Soul Ancestor is a local overlord, not just because of their millennium-long lifespan, but their mastered power is also invincible, like a demigod on Earth.

"Next, the cultivation in the Golden Core Realm is actually quite simple."

"That is to open eighty-one acupoints."

"Golden Core has nine layers, and opening nine acupoints can elevate it by one layer."

"Once all eighty-one acupoints within are opened, it will be Golden Core Perfection."

"Then you can promote to Nascent Soul."

Jiang Fan also reviewed the contents of the Mixed Element Talisman Scripture, as the Primordial Talisman Pen previously gave him all its contents, enough to cultivate to the Nascent Soul level.

So, he had no worries about lacking cultivation techniques in the future.

Truth be told, Golden Core Realm cultivation is quite challenging.

Practicing Golden Core Spiritual Power requires more time than a Foundation Establishment cultivator.

It might take decades, even a hundred years to break through.

Of course, there's a way to shorten the cultivation time, by obtaining a Tier Three Elixir or Tier Three Spirit Medicine.

The problem is that Tier Three and above Spirit Medicines are rare.

Ordinary markets can't purchase Spirit Medicines above Tier Three.

Even if they appear at auctions, they're priced astronomically.

Ordinary cultivators are in no position to buy them.

Because of this, most loose cultivators establish their own forces after advancing to the Golden Core,.

then use these forces to earn a large number of Spirit Stones, collect cultivation resources, etc.

If a Golden Core Zhenren relies solely on themselves to find cultivation resources, they'd accomplish little even if they exhaust their lifespan,

moreover, if they were all looking for cultivation resources, where would they find the time to cultivate?

"Huh? You achieved Core Formation?"

"How many years have I been asleep?"

"It must be one or two hundred years, right."

At this moment, a voice suddenly spoke up. It was the Primordial Talisman Pen, which had been asleep for a long time.

Due to Jiang Fan's advancement to the Golden Core Realm, the aura from the Golden Core completely awakened the Primordial Talisman Pen.

It sensed the aura on Jiang Fan, immediately delighted, never expecting that the last descendant of the Primordial Talisman Sect it found would successfully form a Core.

Moreover, he hadn't awakened it once during his journey.

This proved that his cultivation had been smooth during this time, without encountering any deadly danger.

"What one or two hundred years."

"You're confused, the master is in his prime, not even thirty years old."

The Ten Thousand Transformations Pill Furnace looked disdainfully at the Primordial Talisman Pen.

It was not satisfied with this guy saying its master's age was much older, who exactly were they belittling?

"Not even thirty? Is that true?"

"Wait, your body's life aura indeed feels very young, not even fifty."

"No, something's wrong. When did your Spirit Root Talent improve?"

"You, you actually upgraded the Earth Spirit Root to the Celestial Spirit Root level? How on earth did you do it?"

The Primordial Talisman Pen subconsciously scanned Jiang Fan's body and was utterly shocked by the findings.

It couldn't believe its senses, it was simply unbelievable.
