

Fortune 458

Chapter 458: Crossing the Tribulation with Ease, Gaining Another Sixth-Grade Opportunity_3

It is said that many Golden Core Zhenren venture to the Poisonous Mist Mountain Range in search of opportunities.

Of course, there are considerable dangers involved.

However, compared to the opportunities, taking some risks is worth it.

The problem is that the Ten Thousand Beasts Mountain Range is extremely far from the Shennong Sect.

Without a flying ship, even at the flying speed of a Golden Core Zhenren, it would take a long time to reach.

This is a major inconvenience in the Cultivation Realm.

The territory is simply too vast.

Even Nascent Soul Cultivators have to spend a lot of time traveling.

So many cultivators spend their entire lives in their own small area.

Very few venture into other territories.

"Right, the Gate of the Void."

"Perhaps I can use the power of the Gate of the Void."

Suddenly, Jiang Fan had a flash of inspiration and immediately thought of the Gate of the Void.

He instinctively felt that if he opened the Gate of the Void now, he would surely find a good place.

This was due to his intuition about opportunities.

Moreover, the Gate of the Void could ignore distance, effortlessly teleporting him anywhere.

Its only drawback is random teleportation, with no way to know where the destination is.

However, if successful once, a space coordinate can be left at the location.

Then next time, it would be possible to teleport freely between the two locations.

So far, he had already left space coordinates in two places.

One near the Seven Stars Peak, the other in a Secret Realm World of the East Continent.

Now, of course, a coordinate would be left in the Ten Thousand Beasts Mountain Range.

Thinking of this, Jiang Fan didn't hesitate and immediately took out the Gate of the Void within the cave.

A Bronze Gate appeared on the ground, seemingly merging with the surrounding void, containing unfathomable power.

"What kind of magical treasure is this?"

"Wait, could this be the legendary Gate of the Void?"

"This long-lost supreme treasure actually fell into your hands?"

The Primordial Talisman Pen also woke up, and upon seeing this Bronze Gate, it was thoroughly stunned.

It was internally shaken like a stormy sea.

Although it had long known Jiang Fan was extremely lucky, it never expected his luck to be this good.

This Gate of the Void is a supreme treasure, known as a Sub-Immortal Artifact.

Even I cannot compare to this supreme treasure.

Yet, this supreme treasure has fallen into Jiang Fan's hands, which is truly unbelievable.

If not witnessed firsthand, who would believe such a thing?

Rumble~~~

But Jiang Fan ignored the words of the Primordial Talisman Pen, and he activated the Gate of the Void, which then devoured a large number of spirit stones, consuming as many as 1.5 million spirit stones this time.

This significantly reduced his wealth.

Thud!

In an instant, the Gate of the Void opened once more, seemingly forming a passage with the distant void.

Zoom!

Without a second thought, Jiang Fan stepped into the Gate of the Void and immediately appeared in another location.

"Is this an island?!"

At this moment, Jiang Fan arrived at another location, and he quickly put away the Gate of the Void. He looked around and found himself on a deserted island, surrounded by an endless ocean.

But he instinctively felt he had not arrived at the Yiling Island Group.

Boom~~

At this moment, the Fortune-Telling Talisman in his Elixir Field and Sea of Qi began to vibrate, a message entered the depths of his Sea of Consciousness, as if a calamity was about to befall him.

He did not expect that just after arriving in this unfamiliar place, he would be facing a calamity.
