Chapter 460: Escaping Ten Thousand Beasts Mountain Range, Black Dragon Sea Region_2

"Impossible, who exactly is this human Golden Core cultivator?"

"How can this human cultivator be so fast?"

The Tier Three Golden-Scaled Sea Serpent was instantly stunned. It hadn't anticipated that this human Golden Core cultivator's speed would be so terrifying. The opponent instantly appeared by its side, giving it no time to react.

With just a single punch, its demonic body was pierced through.

Even if it wanted to fight back, there was no way to do so.

It stared at Jiang Fan, seemingly wanting to say something, but unable to utter a word.

Immediately, its life force dissipated.

The enormous demon body fell to the ground, splashing a large amount of water.

At the same time, massive amounts of blood turned this area of the sea red.

The eyes of the Tier Three Golden-Scaled Sea Serpent were wide open, evidently dying with grievances.

"The master's combat power is increasingly abnormal."

"Having a divine ability like Shrinking Earth into Inches, combined with other attack methods, is simply invincible."

"Able to kill a Tier Three Demon Beast with just a single move."

The Ten Thousand Transformations Pill Furnace exclaimed in wonder, feeling that its master was becoming more and more extraordinary.

Even though it had seen many talented cultivators, they were incomparable to its current master.

This situation was inevitable.

Because a spatial-type divine ability like Shrinking Earth into Inches is too unfair.

Among the world's magic, speed prevails over all.

Moreover, most cultivators have high attack but low defense.

Once they are approached and can't protect themselves, they can only be instantly killed.

"Not bad."

Jiang Fan clenched his fist, feeling very satisfied.

Earlier, he was merely testing his skills.

The renowned Tier Three Golden-Scaled Sea Serpent died in his hands in an instant.

It can be imagined that his current combat power is considered invincible among those of his rank.

Of course, he didn't intend to have a lengthy battle with the opponent.

After all, this was a battle of life and death, not the time to engage in a back-and-forth fight with the opponent.

If he can kill them instantly, he will do so without giving the opponent any chance to counter.

Giving the enemy a chance would merely be courting death.

"It seems I'll have to use the divine ability Shrinking Earth into Inches more often."

"If utilized correctly, the enemy could be defeated with just one punch each."

Jiang Fan also felt that the advantages of the divine ability Shrinking Earth into Inches were immense. After all, this space-type divine ability is typically grasped by Nascent Soul cultivators at the very least.

Yet, he mastered it as a Golden Core, naturally able to crush many Golden Cores.

The Tier Three Golden-Scaled Sea Serpent did not realize this, its strong combat prowess unable to be displayed, and was punched to death by him.

Boom~~

At that moment, a message entered the depths of his consciousness sea: "You encountered a Tier Three Golden-Scaled Sea Serpent and engaged in a fierce battle, triumphing despite the odds and counter-killing the Tier Three Demon Beast. You gain fifty thousand Luck Points and a Sixth-Grade Opportunity."

Undoubtedly, after killing this Tier Three Demon Beast, he easily overcame a catastrophe.

Moreover, this time the harvest was abundant.

"Is the Sixth-Grade Opportunity the corpse of this Golden-Scaled Sea Serpent?"

"No, it should be inside the Golden-Scaled Sea Serpent."

Jiang Fan touched his chin.

Although the corpse of a Tier Three Demon Beast is valuable, considered a Sixth-Grade Opportunity, the true Sixth-Grade Opportunity seems to have been swallowed by the Tier Three Golden-Scaled Sea Beast and resides in its stomach.

Nonetheless, he didn't have time to inspect what treasure lay inside.

With a wave of his hand, he immediately placed the corpse of the Golden-Scaled Sea Serpent into the internal space of the Exquisite Tower.

After he deals with this group of local cultivators, he will have time to slowly examine the Sixth-Grade Opportunity.

.....

At this moment, inside the Tier Two spaceship.

Leading were the Great Elder Zhu Bin and others from the Zhu Family, faces ashen.

They had never imagined that they, merely transporting a batch of goods, would be pursued by a Tier Three Golden-Scaled Sea Serpent, a Demon Beast on par with a Golden Core Zhenren, something they stood no chance against.

If this continues, they will definitely become food in the belly of the Tier Three Golden-Scaled Sea Serpent.

Originally, the Zhu Family was already on the brink of disaster, and if they died, it would spell the end for the Zhu Family entirely.

"Wait, a Golden Core Zhenren has intervened."

"The Tier Three Golden-Scaled Sea Serpent was killed."

At this time, a Zhu Family cultivator shouted excitedly, hardly believing his eyes.

"No way, is it true or false."

"Oh my god, the Tier Three Golden-Scaled Sea Serpent is actually dead."

"With just one move, it killed the Tier Three Demon Beast; this senior is incredibly strong."

"I'm afraid even our Zhu Family's Golden Core Ancestor cannot compare."

The many Zhu Family cultivators discussed fervently.

They all felt a sense of survival after a disaster.

Earlier, they had thought they were doomed, with no hope of survival.

Who would have imagined that a stranger, a Golden Core Zhenren, would intervene and save their lives?

"Quiet."

"This is a Golden Core elder."

"Don't bring disgrace to our Zhu Family here."

The Zhu Family's Great Elder Zhu Bin was also extremely excited, but as a Foundation Establishment Perfection cultivator at the age of two hundred and twenty, and the most experienced person on the ship, he quickly calmed down.

Although this Golden Core elder chose to save them, clearly he harbors goodwill toward them; otherwise, he wouldn't have intervened but would have watched them perish.

However, if they respond inappropriately and provoke this Golden Core elder, disaster may befall them.

"Yes."

The many Zhu Family cultivators all nodded in agreement.

Their deep-rooted fear of high-tier cultivators was already ingrained.

A powerful cultivator holds the power of life and death over weaker cultivators.

If they upset the other party, none of them could even dream of surviving.

Swoosh, swoosh, swoosh!!!

In the next moment, the Zhu Family's Great Elder Zhu Bin and others flew out from the spaceship, respectfully coming before Jiang Fan.

"Elder, we are members of the Golden Core Zhu Family."

"Thank you, elder, for saving our lives."

"We will repay this great favor with utmost devotion, even to the point of sacrificing ourselves."

Great Elder Zhu Bin's attitude was very humble, placing himself in a subservient position.

The other Zhu Family cultivators did the same.

"Golden Core Zhu Family?"

"What kind of family is this?"

"I'm a Golden Core cultivator from elsewhere, not very familiar with this area."

"What sea region is this?"

Jiang Fan spoke straightforwardly without ceremony.

Hearing this, Great Elder Zhu Bin and others' eyes immediately lit up, and their expressions seemed to become increasingly excited.

They hadn't imagined that this mysterious cultivator was indeed an outsider Golden Core.

If that's the case, then their Zhu Family might truly be saved.

"Elder, this is the Black Dragon Sea Region."

Great Elder Zhu Bin didn't hold back, explaining the situation here truthfully.

With the help of local cultivators, Jiang Fan quickly understood where this sea region was.

"I see."

Jiang Fan nodded. From the words of the Zhu Family's Great Elder Zhu Bin, the Black Dragon Sea Region is indeed in the Void Realm, and moreover, it is located in the depths of the ocean in the Void Realm, far removed from the other four continents.

This sea region is filled with densely packed islands.

Simultaneously, a vast number of powerful and terrifying sea beasts grow here.

The reason this sea region is called the Black Dragon Sea Region.

It's because it was once ruled by a black dragon.

The opposite party's cultivation was mightily powerful, suppressing this sea region for at least ten thousand years.

Of course, due to an unknown incident, this black dragon vanished.

Thus, without the black dragon's pressure, human cultivators quickly rose up and occupied island after island.

Though the black dragon is gone, deep within the ocean remains numerous strong sea beasts and demon beasts.

It can be said that the conflict between them has lasted tens of thousands of years, even persisting up to the present day.

The force that controls this sea region is the Divinity Transformation Clan Zhao Family.

This clan possesses a Divinity Transformation Ancestor.

Their elevated status allows them to rule over all human islands.

All islands must pay allegiance and tribute to the Zhao Family.

"You mean to say, the Black Dragon Sea Region only has clans, not sects?"

Jiang Fan immediately noticed a peculiarity about this sea region, namely the absence of cultivation sects.

"That's correct."

"The Black Dragon Sea Region only consists of cultivation clans."

"All cultivators are under the rule of their clans."

"Foundation Establishment Clans occupy Tier Two islands, Golden Core Clans occupy Tier Three islands, Nascent Soul Clans occupy Tier Four islands, etc."

"If a cultivator isn't of clan origin, they must serve as slaves or servants, proving their loyalty, to obtain cultivation techniques."

Great Elder Zhu Bin explained matter-of-factly.
