

Fortune 477

Chapter 477: Easily Crossing the Tribulation, Obtaining a Fourth-Grade Opportunity_2

But surprisingly, the two sides stood together, no, it should be said that the human Golden Core was standing amidst the Demon Race's camp.

This was quite a bizarre occurrence.

"Ancestor, this is quite normal."

"If I'm not mistaken, this human Golden Core is probably a human pet."

Foundation Establishment Elder Zhu Bin immediately responded.

"Human pet? What is that?"

Jiang Fan was full of confusion because he also didn't know what a human pet was.

"Ancestor, a human pet is a human pet of the Demon Race cultivators."

"It's just like how the Human Race can sign contracts with demon beasts, refining them into spirit beasts, spirit pets."

"Actually, the Demon Race is the same, they also master a corresponding contract that can refine humans into human pets."

"Such human pets are thoroughly controlled by the Demon Race contracts, they are loyal and never betray."

"However, since very few human cultivators have extremely high talent, generally they wouldn't be targeted by the Demon Race."

"But there are exceptions. If some possess special spirit bodies, or high-grade spirit roots, they would be targeted by the Demon Race and even abducted, forcibly signed into contracts, and refined into human pets."

"So occasionally, there would be incidents where the Demon Race attacks human geniuses and steals away them."

Many Zhu Family elders discussed fervently.

Evidently, such things are common in the Black Dragon Sea Region, and everyone is accustomed to it.

They occasionally encounter some human pets from the Demon Race.

Though they are indignant, they are helpless and unable to change it.

"There are actually things like this?!"

Jiang Fan felt quite amazed; he didn't expect that even human cultivators would be abducted by the Demon Race and forcibly refined into human pets, thereby becoming pets and slaves of the Demon Race.

However, in the cultivation realm, anything can happen, so it's not surprising.

The reason why such incidents are rare in the Southern Continent is because the Demon Race's forces aren't strong enough; if they were strong enough, perhaps they would also seize human geniuses to become human pets.

But in this case, the human Golden Core cultivator would be considered an enemy of the Human Race.

It's nearly impossible for both sides to coexist.

"Humans."

"Surrender immediately, you still have a chance to survive."

"If you dare to stubbornly resist, your nine clans will surely be exterminated, leaving no corpses."

"There is only one chance, grasp it well."

At this moment, a Tier Three demon beast shouted loudly, waves of sound rolled in, erupting terrifying evil Qi from its body, attempting to intimidate the cultivators of Zhu Family Island, aiming to subdue them without a fight.

Clearly, for them, forcibly attacking the human Tier Three island will certainly result in considerable losses.

If a single statement could make the human cultivators surrender, it would be a worthwhile deal.

After all, it's just a few words, and it's not worth anything, why not do it?

"Humans, becoming slaves of our Demon Race is your human honor."

"After all, this sea region belongs to our Demon Race."

"If you surrender now, you still have good days ahead."

"Otherwise, once your human Divinity Transformation Ancestor Zhao Xuan dies, your Human Race will surely disappear from this sea region."

Another Tier Three demon beast voiced intimidation.

Clearly, upon reaching Tier Three, the demon beasts' intelligence has greatly advanced, almost as comparable to human cultivators.

Some Tier Three demon beasts, after undergoing trials, might even be more cunning, vicious, and ruthless than ordinary human cultivators.

"Everyone shouldn't worry about anything bad happening if you become slaves of the Demon Race."

"You can see my treatment, I successfully became a Golden Core with my master's help."

"If you also join the Demon Race, you will surely have the same treatment."

"Our Human Race wanting to beat the Demon Race, that's simply impossible; we're so far off in terms of talent and combat prowess, resisting the Demon Race is purely seeking death."

"Only by becoming slaves of the Demon Race, can we Human Race have a chance at survival; my fellow compatriots, think well."

The human Golden Core pet also eagerly shouted, attempting to persuade many human cultivators, using himself as an example to try to have numerous human cultivators become Demon Race slaves.

If successful, it would be a great achievement for him.

"It's really too noisy."

Jiang Fan glanced calmly at the three Golden Core cultivators; in a flash, he arrived in front of these three Golden Core cultivators.

Life Talisman — Cloud Dream Tracing Talisman.

A mass of white fog instantly enveloped tens of kilometers of the sea region, covering the sky and obscuring the sun.

He deployed the talisman not intending to cause them harm, purely to prevent other cultivators from perceiving his combat process, thereby exposing his cards.

Immediately, this sea region was shrouded in white fog, and no one could see what happened inside.

"Did the Zhu Family Golden Core cultivators actually leave their island? That's really foolish."

"Haha, if they stayed within the Tier Three array, we would probably spend a bit more effort, but since they've come out, it's simply seeking death."

"Foolish human Golden Core cultivators, if you don't die today, then who will? Once you're dead, this sea region will be ours."

These three Golden Core cultivators laughed heartily, both astonished and delighted, thinking this was a great opportunity, after dealing with the Human Race for so long, it's the first time encountering such a foolish human Golden Core.

Bang~~

But before they had finished speaking, an Exquisite Tower instantly appeared above their heads, an immense domain power crushed down, covering a radius of miles.

In an instant, these three Golden Core cultivators were dumbfounded, they felt unprecedented binding and pressure, as if gravity suddenly increased a thousandfold.

No matter what magical techniques or divine powers they used, they couldn't break free, were ineffective.

It was as if an invisible force confined their bodies, rendering them immobile.

And this was the realm constraint of the Ancient Treasure Exquisite Tower.

Once released, it could imprison every living being within the domain, making them immobile.

The Exquisite Tower used this trick in the past to suppress countless demons.

Since Jiang Fan ascended to Golden Core, his cultivation greatly increased, and he finally could activate a small portion of the Exquisite Tower's potency.

So, now he subdued the three Golden Core cultivators swiftly, leaving them powerless.

"Go die."

Jiang Fan had no intention of wasting words with these three Golden Core cultivators, he again took out another Ancient Treasure — Great Sun Buddha Mirror, a mysterious ancient treasure from the Great Sun Sword Sect, containing terrifying potency.

Although this treasure is particularly restraining against demons, as well as all ghostly illusions, its potency is still incredibly terrifying for ordinary cultivators.

Only to see him holding the Great Sun Buddha Mirror, with densely packed Great Sun Buddha runes on its frame, converging infinite True Sun Fire, forming a terrifying golden sea of flames.

Thud!

The next second, the Great Sun Buddha Mirror gently shone upon these three Golden Core cultivators, countless golden beams blasted forth.

Before these three Golden Core cultivators could react, the golden beams easily pierced their bodies, intense pain rapidly spread throughout.

"It's over, we're finished this time."

The three Golden Core cultivators widened their eyes, incredulous as they looked at Jiang Fan, now realizing they've hit a wall, encountering a terrifying human Golden Core.

But now it's too late for anything, the power of the True Sun Fire suddenly erupted.

Immediately, the bodies of these three Golden Core cultivators were engulfed by golden flames, turning into golden torches.

They couldn't even make a wail, becoming a pile of ashes.

The three imposing, arrogant Golden Core cultivators were thus slain instantly by Jiang Fan, without any chance to retaliate.

"This mirror is too abnormal."

"What kind of infamous reputation did it have in ancient times."

The Ten Thousand Transformations Pill Furnace looked utterly astonished; it found the Great Sun Buddha Mirror to be pure murder weapons, instruments of slaughter; it's a wonder it appeared as a Buddhist treasure, yet more ruthless than demonic treasures, burning all things.

"Not bad."

Jiang Fan felt very satisfied with these two ancient treasures, and he knows that after wiping out these three Golden Core cultivators, his fourth-grade opportunity was right in hand because the fourth-grade opportunity resides within these three Golden Core cultivators.

Honestly, he's very curious, what exactly is this fourth-grade opportunity, considering it equates to Divinity Transformation level opportunities, it's not something easily obtainable.
