Chapter 485: Obtaining the Soaring Serpent Nascent Soul Chapter, Great Harvest _2

"Hmm?!"

Jiang Fan didn't hesitate and immediately took the storage bag. With a slight sweep of his Spiritual Sense, the treasures inside the storage bag instantly appeared deep in his consciousness sea.

It must be said, the treasures inside the storage bag were indeed dazzling, with over a million Spirit Stones stored inside.

Besides that, there were quite a few Tier Three Spirit Medicines and Tier Two Spirit Medicines.

At least they were all worth two to three million Spirit Stones.

It's undeniable that being from a Nascent Soul Clan, even small amounts of inheritance were enough for an ordinary cultivator to feast luxuriously.

However, even so, these treasures couldn't compare to a Fifth-Grade Opportunity.

"Wait, this jade fragment, why does it look so much like Soaring Snake Technique?"

At this moment, Jiang Fan's heart stirred, and he immediately took out this jade fragment.

Boom~~

In the next instant, the jade fragment resonated with the Soaring Snake Technique aura within him, bursting forth with golden light.

Mysterious texts and runes densely surfaced on it.

Soaring Snake Nascent Soul Chapter!

Sensing this information, Jiang Fan's heart trembled with immense joy.

Honestly, he never expected to find the Nascent Soul Chapter of the Soaring Snake Technique just like that.

He had no clue or any leads regarding the Nascent Soul Chapter.

Though the Golden Core Chapter was already enough for him to cultivate for a long period, obtaining the Nascent Soul Chapter of the Soaring Snake Technique was undoubtedly a better thing.

Obviously, gigantic destiny led him to the Black Dragon Sea Region, allowing him to acquire the Nascent Soul Chapter of the Soaring Snake Technique.

It could be said that the missing Chapters of the Soaring Snake Technique were being recovered by him one by one.

"What's happening?"

Lu Youyou was instantly stunned; she also saw the mysterious jade fragment in Jiang Fan's hand.

Truth be told, she had only casually taken it from the treasury.

She simply thought the mysterious jade fragment looked very pretty, which is why she carried it with her.

In fact, it didn't even count as a treasure; it remained in the treasury after Lu Family cultivators acquired it, with no one uncovering its secrets for a long time.

Originally, she just considered it a decoration.

Who would have thought that this mysterious jade fragment would undergo a change after falling into the hand of this Golden Core cultivator?

Could it be that only those with destiny could gain the recognition of this mysterious jade fragment?

She felt she might have lost a great opportunity.

But considering she had fallen into the hands of a Golden Core Zhenren, she was helpless.

After all, he could end her life with just a thought.

Earlier, the two Golden Core cultivators from Black Wind Double Evil couldn't last a single move against this man.

What was she, a mere Foundation Establishment cultivator, supposed to be worth?

"This time, I've struck it rich."

Jiang Fan clenched his fist, feeling very excited. It was indeed true that one could search endlessly across the earth only to find what they were looking for effortlessly.

He had merely been avoiding a disaster, yet he managed to gain the Nascent Soul Chapter of the Soaring Snake Technique.

Clearly, with the Golden Core Chapter and Nascent Soul Chapter in hand, there was no need to worry about his cultivation technique for a long time.

Furthermore, the Soaring Snake Technique could be considered one of his Lifebound Techniques, extremely important.

If there was a breakthrough in his realm, it would not only enhance his strength and cultivation but also extend his lifespan.

This couldn't be compared to ordinary techniques.

"Not bad, these treasures on you belong to me now."

"Let these treasures be the reward for saving you."

"You can leave now."

Jiang Fan said to Lu Youyou.

What?!

Upon hearing this, Lu Youyou was so angry her pretty face turned red; she was fuming with rage. This man was shameless to the extreme, taking all her treasures and still calling it her saving reward.

If it weren't for this man blocking her path, she wouldn't have been chased down by Black Wind Double Evil.

But she knew there was no reasoning in the Cultivation Realm.

The one with the bigger fist had the reason.

Moreover, a Golden Core cultivator like the man before her was considered good.

If it were an ordinary cultivator, they might directly kill to seize treasure and eradicate any trace, not letting her leave alive.

The problem was without these treasures, given her cultivation and strength, survival in this sea region was almost impossible.

Especially now with the Human Race and Demon Race at war in the sea region, chaos was everywhere.

She was just a little Foundation Establishment cultivator, liable to die at any moment.

"Senior, please don't drive me away."

"I am willing to be a servant if Senior can protect me."

At this moment, Lu Youyou pleaded to Jiang Fan, showing a pitiful appearance.

She instinctively sensed that the Golden Core cultivator before her was no ordinary loose cultivator.

Perhaps he was from a major power, a Golden Core cultivator with a strong background.

Otherwise, how could he possess such strength?

If she could gain his protection, perhaps she could grow safely.

Instead of dying in the various catastrophes of the Black Dragon Sea Region.

Though her aptitude was decent, in this vast sea, cultivators with excellent aptitude were countless, like fish crossing the river.

Yet how many could truly stand out?

Thus, clinging to a thick thigh was the foundation for a cultivator's stability.

In the past, she leaned on the Nascent Soul Ancestor's thigh in the Lu Family, living comfortably.

Now with the collapse of the Lu Family, that thigh disappeared, so she urgently needed a new patron.
