

Fortune 492

Chapter 492: Advancement to Third-Layer Golden Core_2

By casually doing fortune-telling once, I've unexpectedly found such a powerful ally.

It's as if even the heavens are helping me.

With the protection of this powerful ally, Lu Youyou's growth will definitely be smooth, at least she won't meet an untimely end along the way.

She will also have a chance for rebirth.

For her, the most important thing right now is to grow steadily and securely.

Even if it means becoming someone's lackey, it's no big deal.

"Lu Youyou, come over quickly, help me dissect this Tier Three Demon Beast."

"We have our dinner sorted for tonight."

At this moment, Su Weiwei called out to Lu Youyou.

She was already used to such things, obtaining demon beast carcasses from time to time.

The task of dissecting the demon beast carcasses was often left to her to handle.

So now she was already proficient in this type of task.

"Yes, Ms. Su."

Upon hearing this, Lu Youyou's beautiful eyes lit up immediately, feeling very excited.

She felt that she had definitely chosen the right powerful ally.

To be able to casually eat Tier Three Demon Beast Meat, even the treatment of the Nascent Soul Lu Family wasn't much better.

Moreover, this wasn't an ordinary Tier Three Demon Beast, but a Dragon Beast containing dragon lineage.

The benefits for a cultivator are self-evident.

If one can eat some of it, one's cultivation will surely improve quickly, which is a rare opportunity.

She wouldn't miss it for anything.

Immediately, the two women began excitedly dissecting the Tier Three Demon Beast carcass.

...

In the dead of night.

Jiang Fan sat cross-legged in a cave within a Nameless Valley, a place he had transformed into a temporary cave dwelling.

At this time, the Tier Three Purple Gold Jade Marrow Fruit had been completely refined by the Ten Thousand Transformations Pill Furnace, turning into drops of purple-golden medicinal liquid.

Each drop of purple-golden medicinal liquid exuded a rich fragrance.

Clearly, the impurities had been completely excluded by the Ten Thousand Transformations Pill Furnace, leaving only the essence, without any toxins.

"Master, this Purple Gold Jade Marrow Fruit is indeed a quite powerful Tier Three Spirit Medicine."

"Because it grew in the Black Dragon Secret Realm, its medicinal power has reached its peak."

"If Master can completely refine it, you will surely promote to the Third-Layer Golden Core."

The Ten Thousand Transformations Pill Furnace said with much emotion.

To be honest, this was its first time entering the Mystical Transformation Realm.

In the past, while accompanying Daoist Wan Hua, it could at most enter a Nascent Soul Level Secret Realm.

It had never entered such a Mystical Transformation Realm like the Black Dragon Secret Realm.

This wasn't because Daoist Wan Hua was unlucky.

It was truly the case of not having the resources to make use of.

After all, the Southern Continent simply didn't have a Mystical Transformation Realm. Even if Daoist Wan Hua wanted to enter, there was no way.

Of course, the Yiling Secret Realm might be the legendary Mystical Transformation Realm.

But the resources contained inside were too few, nowhere near comparable to the Black Dragon Secret Realm.

To compare, it was like a poor Mystical Transformation and a rich Mystical Transformation, a world of difference.

"If we can loot the resources in this secret realm, we will definitely gain a lot of spirit medicines."

The Exquisite Tower also agreed on this point.

It could sense a lot of spirit medicines growing all around.

Moreover, each spirit medicine had abundant medicinal power, and there were many in number.

This was likely because they hadn't been overdeveloped by human cultivators.

If it were outside, the spirit medicines here would have long been scavenged clean by those greedy cultivators.

Not even a hair would be left.

But because of the Black Dragon Secret Realm not being easily accessible to ordinary cultivators, a lot of spirit medicines were left here.

Thus, each time a cultivator entered the Black Dragon Secret Realm, they would gain a lot.

"No hurry, first enhance your cultivation."

"Opportunities are not something you can get by rushing."

Jiang Fan waved his hand, speaking calmly.

He did not continue chatting with other artifact spirits but instead entered a state of cultivation, immediately consuming a drop of purple-golden medicinal liquid.

Immediately, when the medicinal liquid entered, it erupted like a volcano.

It was instantly devoured and absorbed by his Primordial Golden Core.

A vast amount of primordial spiritual power was refined.

"So rich in medicinal power."

Feeling this abundance of medicinal power, Jiang Fan became excited, noticing his cultivation improving rapidly at a visible speed, far surpassing numerous times his rate of arduous cultivation.

No wonder the Tier Three Unicorn Dragon-Scaled Beast guarded this valley, fearing this spirit fruit would be snatched by other demon beasts, evidently knowing its preciousness.

If it could consume it, the benefits would be endless, greatly accelerating its cultivation speed.

...

In the blink of an eye, half a year had passed.

Jiang Fan basically remained in this Nameless Valley within the Black Dragon Secret Realm.

And indeed, as the Fortune-Telling Talisman predicted, this Nameless Valley was undisturbed by anyone.

It was as if it was an independent pure land.

Many high-tier demon beasts would not come here.

And demon beasts below Tier Three did not dare to approach this valley covered in white mist.

Therefore, he cultivated peacefully for half a year.

During this time, he finally completely digested the medicinal power of the Tier Three Purple Gold Jade Marrow Fruit, transforming it into a vast amount of primordial spiritual power, rapidly propelling his cultivation forward.

"Finally reached Golden Core Second-Layer Perfection."

Jiang Fan sat cross-legged on the ground, operating the Mixed Element Talisman Scripture, with the primordial golden core in the depths of the Elixir Field and Sea of Qi constantly rotating.

After half a year of arduous cultivation, he opened eighteen acupoints in total.

A vast amount of primordial spiritual power flowed into the eighteen acupoints.

This achievement pushed his cultivation to the Perfection Level of the Golden Core Second-Layer.

Once a breakthrough is achieved, he would be promoted to the Third-Layer Golden Core.

For ordinary Golden Core cultivators, even those of genius-level Golden Core Zhenren, it usually takes decades to move from Golden Core Second-Layer to Third-Layer.

But Jiang Fan, being a Celestial Spirit Root cultivator, combined with the assistance of the Purple Gold Jade Marrow Fruit, greatly accelerated the condensation speed of the Golden Core Spiritual Power, saving decades of arduous cultivation.

Thus, he could quickly advance to the Perfection Level of the Golden Core Second-Layer.

"For me, promoting to the Third-Layer Golden Core shouldn't pose a problem."

Jiang Fan was full of confidence.

After all, for Celestial Spirit Root cultivators, there are basically no bottlenecks before the promotion to Nascent Soul.

As long as the cultivation is sufficient, the breakthrough will happen naturally, without much effort or difficulty.

Moreover, his cultivation foundation was extremely solid and profound, incomparable to ordinary Golden Cores.

If even he couldn't breakthrough, then not many Golden Core cultivators in the world could.

Rumble~~~

At this moment, Jiang Fan operated the Mixed Element Talisman Scripture, and the primordial golden core within him continued rotating, with tremendous Heaven and Earth Spiritual Qi surging in, transforming this area into a massive Spiritual Energy Vortex.

He felt every pore of his body opening, greedily devouring strands of Heaven and Earth Spiritual Mechanism.

In truth, this also benefited from the cultivation environment of the Black Dragon Secret Realm.

As a place possessing a Tier Five Spirit Vein, the spiritual energy here was astonishingly dense, making it one of the Cultivation Realm's locations with the densest spiritual energy, truly a Grotto Heaven Blessed Land.

Currently, the spiritual energy in his location was relatively thin, compared to the core of the Black Dragon Secret Realm.

But compared to the spiritual energy contained in a Tier Three Spirit Vein, it was many times larger.

That's why, by casually breathing in and out the Heaven and Earth Spiritual Qi, vast spiritual energy would surge in.

This greatly enhanced his chances of breaking through.

Vast primordial spiritual power circulated within him, interconnecting all his meridians, flowing through the eighteen acupoints, causing the spiritual power of his entire body to resonate.

This spiritual power seemed to also transform into a primordial spirit snake, charging towards the bottleneck of the Third-Layer Golden Core.

Boom!

Just with a single impact, the bottleneck of the Third-Layer Golden Core shattered.

New acupoints were effortlessly opened up.

For other Golden Core cultivators, this would be considered a small bottleneck.

It would require grinding for a long time to break through.

But for Jiang Fan, it was merely a straightforward matter, hardly any difficulty.

"Finally promoted to the Third-Layer Golden Core."

Jiang Fan smiled slightly, revealing a trace of joy.

Though promoting to the Third-Layer Golden Core was only a small step on the path to longevity for him, any breakthrough is a joyful thing.

Cultivation is indeed like this, one step at a time.

It seems very slow, but if you keep walking, you've actually traveled quite a distance.
