

Fortune 504

Chapter 504: Escape from the Black Dragon Secret Realm, Obtain Python Dragon Vajra Pill_2

A Nascent Soul cultivator of the Zhao Family was enraged beyond measure.

Earlier, he sensed the disturbance from Zhao Hui and others' deaths, so he hurried over immediately.

No one could have predicted, he still arrived too late.

Not only was he unable to save Zhao Hui and the others, even the murderer had vanished without a trace.

Boom~~

A powerful Nascent Soul spiritual sense swept across all directions, covering a thousand miles, attempting to find clues in the area.

Anyone suspicious would be apprehended immediately.

"Who exactly killed Zhao Hui and the others, dare to offend our Zhao Family, this is courting death?"

"Was it the Demon Race cultivators?"

"No, it wasn't the Demon Race cultivators. Judging by the power of the bloodline curse, it was a human cultivator."

"Damn, which bastard did this, how dare you kill our Zhao Family's Golden Core, do you think our Zhao Family is weak now? So eager to rise up?"

The faces of many Zhao Family Nascent Souls were gloomy.

Honestly speaking, the death of three Zhao Family Golden Core cultivators doesn't amount to much, but their biggest concern is the inability to suppress those noble families under them, the inability to suppress those ambitious conspirators.

If the other side saw that Zhao Family's Divinity Transformation had issues, they might swarm up and divide the Zhao Family.

They absolutely won't allow these servant families to cause chaos.

Undoubtedly, the deaths of these three Zhao Family Golden Core cultivators today proved just this.

Those servant families seeing Zhao Family's Divinity Transformation trouble, are already restless, trying to challenge Zhao Family's authority.

"We must find the murderer, make sure to tear him into pieces as a warning to others."

The Zhao Family Nascent Soul gritted his teeth.

Unfortunately, Jiang Fan had long left the Black Dragon Secret Realm.

No matter how thoroughly they search, they won't find any trace of Jiang Fan.

At this moment, Jiang Fan had returned to the original Nameless Island through the Gate of the Void.

Just after returning here, he immediately felt a sense of discomfort.

Because the Heaven and Earth Spiritual Qi around was simply too sparse.

It was like coming from a place with good environment to a place where the air was polluted.

Thus making him extremely uncomfortable.

"The Black Dragon Secret Realm is indeed a Cultivation Holy Land, no other place can compare."

Jiang Fan sighed deeply.

Clearly, after leaving the Black Dragon Secret Realm, he could no longer enjoy the feeling of such dense Spiritual Qi.

While staying in the Black Dragon Secret Realm, he didn't need to operate the cultivation technique at all, the vast Spiritual Qi would flow into his body, absorbed by his Primordial Golden Core.

But outside, he needed to operate the cultivation technique to ingest the Heaven and Earth Spiritual Qi.

One is passive, the other is active, the difference between the two is too great.

However, the Black Dragon Secret Realm is a place with Tier Five Spirit Vein, naturally unmatched by outside cultivation environments.

Boom~~

At this moment, a message suddenly surged into the depths of his consciousness sea: "You encountered the assassination of the three Golden Core cultivators from Zhao Family's Divinity Transformation. Through a desperate fight, you finally killed them, and promptly fled, leaving the Black Dragon Secret

Realm, escaping the pursuit of Nascent Soul cultivator, luckily avoiding disaster. You received 200,000 Luck Points and a Fifth-Grade Opportunity."

"This."

Sensing this message, Jiang Fan's eyes widened, his heart astonished beyond measure.

Although he knew that he overcame this ordeal, the rewards would definitely be substantial, but he never imagined that he would receive as much as 200,000 Luck Points, which was simply too incredible.

Previously he had overcome many trials, at most obtaining over ten thousand worth of Luck, now suddenly gaining 200,000, enough to prove how perilous the situation was.

If not for the power of the Gate of the Void, he probably couldn't have evaded the Nascent Soul cultivator's pursuit.

Might have been eliminated by the Zhao Family Nascent Soul long ago.

Of course, gaining so much Luck probably isn't just because of this.

It's likely also related to those several Golden Core cultivators being members of the Zhao Family.

The other party, as members of Divinity Transformation Zhao Family, must carry vast Destiny.

Now they were killed by him, their Destiny was completely plundered.

Adding up all these factors, it's no wonder he gained 200,000 Luck Points.

And the Fifth-Grade Opportunity he had already obtained, was that mysterious Space Ring.

Swoosh!

Thinking of this, Jiang Fan moved his mind, immediately took out the Space Ring, then opened it, sensing there was only a white Jade Bottle inside the Space Ring, containing a round, golden elixir.

Just opened the Jade Bottle, inside immediately released an extremely dense medicinal aroma.

Meanwhile, this elixir glowed with a faint golden light, seemingly peculiar runes appeared on its surface.

These were completely different from the elixirs he had seen before.

"My heavens, Master, this should be the Tier Four Elixir, Python Dragon Vajra Pill."

"This is a precious Body Tempering Elixir from the Buddhist Sect."

"Its value is simply immeasurable, it's a Body Tempering Spirit Pill only usable by Tier Four Body Cultivators."

"To refine such an elixir, it needs Dragon Blood, Thousand-Year Vajra Flower and many rare materials."

"This is an almost extinct Tier Four Elixir."

The Ten Thousand Transformations Pill Furnace, seeing this elixir, immediately cried out in disbelief at the scene it saw.

It completely didn't expect its master would actually obtain a Tier Four Elixir, and it's a Body Tempering Spirit Pill.

"Tier Four Elixir? Is it very precious?"

Jiang Fan curiously asked, though he knew Tier Four Elixirs were indeed rare, only Nascent Soul cultivators were qualified to consume, and quantities were scarce, but how precious it was he didn't know, nor did he have the concept.
