Chapter 508: Internal Conflict in the Divinity Transformation Zhao Family, Great Calamity Approaches

"Only twenty-five thousand Luck Points left?"

Jiang Fan looked at the data on the Virtual Panel and found that he had only twenty-five thousand Luck Points remaining.

Although he had previously gained a full two hundred thousand Luck Points, he had consumed a hundred thousand to cultivate the Soaring Snake Technique, leaving him with just this amount.

However, as long as it could enhance his cultivation, it was all worth it.

Meanwhile, the number of spirit stones he had amassed reached ten million.

The reason for such an increase was because he had slain three Golden Core cultivators from the Zhao family, acquiring resources worth millions of spirit stones from them, thus boosting his wealth to ten million.

Honestly, even the wealth of a Nascent Soul cultivator was hardly different.

If his wealth were to be leaked, it would certainly attract a lot of Nascent Soul cultivators eager to hunt him down.

"Is the cultivation progress already at 60%? Seems good enough."

Jiang Fan was quite satisfied with his cultivation progress, considering he had spent most of the year vigorously practicing the Soaring Snake Technique and rarely cultivating the Mixed Element Talisman Scripture.

Yet, even so, his cultivation advanced rapidly.

This was thanks to the three Purple Gold Jade Marrow Fruits.

If not for these three spirit fruits, relying solely on his diligent practice wouldn't have resulted in such rapid spiritual power growth.

Moreover, another year had passed, and the Immortal Dew Bottle had accumulated twelve drops of Immortal Dew.

Using these Immortal Dew drops, he could fully obtain a Thousand-year-old Spirit Medicine.

He no longer wished to continue consuming Purple Gold Jade Marrow Fruits.

Because excessive intake of such spirit fruits led to diminishing effects.

Clearly, consuming too much of the same type of spirit medicine would similarly result in resistance.

Honestly, it's precisely for this reason that cultivators must acquire different spirit medicines and elixirs to quickly boost their cultivation.

This also greatly hinders the progress of cultivation.

"It seems I need to find some Tier Four and Tier Five Spiritual Medicine Seeds."

Jiang Fan stroked his chin.

It's known that spirit medicines have rank differences; some can only grow for a hundred years, becoming Centennial Spirit Medicines—this is the limit for such spirit medicine and it's nearly impossible to surpass. Once matured, they'll quickly wither.

There are also spirit medicines that can grow for three hundred years, five hundred years, a thousand years, and so on.

In short, spirit medicines, just like human cultivators, have their own lifespan limits.

Once their lifespan is exhausted, they will completely wither, turning into dust.

Not all spirit medicines can become Thousand-year-old Spirit Medicines.

It's for this reason that spirit medicine seeds have differences.

...

Several days later.

After consolidating his cultivation, Jiang Fan emerged from his quiet chamber.

But at this moment, the Foundation Establishment Elder Zhu Bin and others from the Zhu Family came to him, their faces heavy with concern as if something dire had happened, the situation was quite serious.

"What happened?"

Jiang Fan asked succinctly.

He instinctively sensed that perhaps some change had occurred; otherwise, these Foundation Establishment Elders wouldn't have come looking for him.

"Ancestor, a major event has happened this time."

"The Divinity Transformation Ancestor Zhao Xuan and the demon race's Divinity Transformation Five Poison Flood Dragon engaged in a grand battle."

"Due to the intense battle, they created a space rift."

"As a result, both fell into the space rift and are now missing."

Foundation Establishment Elder Zhu Bin solemnly conveyed this astounding news.

Honestly, cultivators across the whole region were focused on this Divinity Transformation grand battle, which essentially determined the future of the two major races.

Whoever emerges victorious will become the absolute dominion of this sea region.

Therefore, the simultaneous disappearance of the two Divinity Transformation cultivators immediately shocked the entire Black Dragon Sea Region, as no one anticipated their sudden vanishing.

This event would also influence the power structure of the entire Black Dragon Sea Region, causing endless ripples and storms.

"Did they actually fall into a space rift?"

Upon hearing this, Jiang Fan's eyes glimmered; he naturally knew what this signified.

Truth be told, there are too many possibilities; falling into a space rift could mean dying in the space storm or potentially being transported to other places.

No matter which possibility, these two Divinity Transformation cultivators are unlikely to appear in the Black Dragon Sea Region anytime soon.

If both perished, the situation might be even more severe.

"However, this matter doesn't have much to do with us, does it?"

"If the sky collapses, the tall people will bear it. It's the Zhao Family who should worry."

Jiang Fan said gravely.

The disappearance of Divinity Transformation cultivators certainly had far-reaching impacts, but it wouldn't affect the Golden Core clans.

After all, Golden Core clans in this sea region at most count as middle-tier forces; the true top-tier forces are the Nascent Soul clans—they're the ones wielding authority.

So, regardless of changes among Divinity Transformation cultivators, the Zhu Family as a Golden Core clan can only drift along, unable to influence the situation.

"If it's just that, it naturally doesn't matter much to our Zhu Family."

"The issue is that after Divinity Transformation Ancestor Zhao Xuan disappeared, the Divinity Transformation Zhao Family encountered major problems."

"They actually started an internal strife, and there were even battles within the Zhao Family."

"It's rumored that nine late-stage Nascent Soul great cultivators from the Zhao Family boldly acted, attempting to seize a Zhao Family treasure."

Foundation Establishment Elder Zhu Bin lamented.

He completely didn't expect the Divinity Transformation Zhao Family, which was at its zenith, to experience internal conflict, which was truly unimaginable.

Without a doubt, the Zhao Family's internal strife will impact every family cultivator, every force in this sea region.

"Zhao Family internal strife? Zhao Family treasure?"
