Chapter 516: A Great Harvest, Obtaining the Second True Spirit Technique\_3

To be honest, it knew that Jiang Fan had successfully cultivated the Soaring Snake Technique, and even reached the Golden Core Chapter, feeling quite shocked, as this was simply a miracle.

After all, in the Ancient Era, any cultivator who was able to cultivate True Spirit Technique naturally possessed True Spirit Bloodline, which made cultivation much more effective.

Those without True Spirit Bloodline found it extremely difficult to even begin cultivating True Spirit Technique.

Even if one could begin, to progress further was nearly impossible.

"Is the difficulty extremely high?"

Upon hearing this, Jiang Fan couldn't help but nod.

He naturally understood how difficult it was to cultivate the Soaring Snake Technique, with the biggest challenge being the comprehension of the Soaring Serpent Runes, which is impossible without sufficient insight.

And he was able to comprehend these Soaring Serpent Runes easily thanks to the power of Luck Points, which greatly enhanced his insight.

In the Ancient Era, however, those cultivators with True Spirit Bloodline possessed some of the True Spirit's power, making comprehension much more efficient.

This feeling is similar to the demon beasts constantly tapping into the power of their bloodline, leading to rapid evolution.

"Yes, indeed, True Spirits existed in the Ancient Era."

"With the help of True Spirits, the True Spirit Family was incredibly formidable."

Primordial Talisman Pen agreed with this, noting that the True Spirit Family's strength wasn't solely due to the True Spirit Bloodline, but also because they worshiped True Spirits, which granted them formidable protection.

A thriving True Spirit Clan was stronger than even those Super Sects.

Sadly, disaster struck, and these True Spirit Clans were obliterated, ceasing to exist.

"In other words, without the help of True Spirit Bloodline, successfully cultivating the Jade Rabbit Scripture is nearly impossible."

Jiang Fan frowned.

He originally wanted to pass on this cultivation technique to Su Weiwei, as the True Spirit Technique could greatly extend a cultivator's lifespan.

The benefits for Su Weiwei were evident.

But he hadn't expected the difficulty of cultivating the True Spirit Technique to be so high.

Ordinary cultivators basically have no chance of success.

"If it were other cultivators, successfully cultivating the Jade Rabbit Scripture would be essentially impossible."

"But the master's Dao Companion is a very special existence, she possesses the Taiyin Virgin Body."

"To be honest, this is a very unique physique, containing Taiyin Qi, perhaps sharing the same origin as the Taiyin Jade Rabbit."

"So trying to cultivate it is worth a shot."

"If successful, the benefits are numerous."

Exquisite Tower spoke in a solemn tone.

It believed that Su Weiwei might succeed in cultivating this True Spirit Technique.

Of course, if she couldn't, it wouldn't matter much, as there's hardly any loss.

Upon hearing this, Jiang Fan felt it made a lot of sense and decided to let Su Weiwei try it, hoping she might succeed.

Even this cultivation technique falling into his hands was due to Su Weiwei's destiny; otherwise, how could it be so coincidental?

"By the way, there's something I find very strange."

"According to what you said, the Ancient Era was incredibly powerful."

"There existed powerful Great Powers."

"Why is it that in this era, the strongest cultivators are only at the Divinity Transformation stage?"

Jiang Fan asked out of curiosity, looking at the many magical treasures on his body.

He always felt that the cultivators of the Ancient Era seemed far more powerful than those of the current era.
