Chapter 518: Thousand-year-old Spirit Medicine, Advancement to Fourth-Layer Golden Core_2

The intense fragrance of the medicine quickly filled the entire quiet room, shaking one's mind.

Evidently, it had grown into a thousand-year-old spirit medicine, reaching the peak of its growth potential.

No matter how much Immortal Dew was poured over it, it couldn't continue to grow.

"This Immortal Dew Bottle is truly extraordinary."

"It seems to possess the power to seize the creation of heaven and earth."

"To be able to instantly create a thousand-year-old spirit medicine."

Witnessing this scene, the Ten Thousand Transformations Pill Furnace was filled with amazement. Even though it had seen such occurrences before, no matter how many times it had witnessed it, the power of the Immortal Dew still seemed unfathomable.

It didn't know how this was done.

"With this thousand-year-old spirit medicine, the master's cultivation can once again advance rapidly."

"These two Golden Core Demon Cultivators have at least done one good deed."

The Demon-Vibrating Bell felt quite satisfied.

It's likely that was the only contribution the two Golden Core Demon Cultivators could make.

To be honest, cultivation resources in the current era's Cultivation Realm are indeed quite lacking.

But despite that, my master has progressed rapidly in his cultivation journey and has never lacked resources.

In a sense, this too is considered a miracle.

"By the way, Master."

"After this Thousand-Year-Old Snow Jade Bone Ginseng matures, there are still seven or eight seeds on it."

"By keeping these seeds, we can cultivate more Snow Jade Bone Ginseng."

"Perhaps we can plant them on a large scale."

The Ten Thousand Transformations Pill Furnace said excitedly.

It felt that it could completely utilize the power of the Immortal Dew Bottle to mass cultivate spirit medicines.

In this way, my master will never lack spirit medicine in the future.

"Mass planting, is it? It's indeed a nice idea."

Jiang Fan nodded.

However, he felt that the Immortal Dew he had was not enough. After all, there was only one drop per month, so large-scale use was naturally impossible. It could only be used where it was most needed.

But it doesn't matter, let's first plant these spirit medicine seeds.

If needed in the future, they can mature rapidly.

Whoosh!

With this thought, Jiang Fan took out the Snow Jade Ginseng seeds and planted them on the land of the Exquisite Tower.

When more Jade Dew is available, he would then mature these Snow Jade Bone Ginseng plants.

By then, he will have plenty of thousand-year-old spirit medicine.

...

It was late at night that day.

Jiang Fan and Su Weiwei conducted a cultivation session, merging Yin and Yang, their magical power intertwining.

The spiritual power within both of their bodies increased to varying degrees.

The proficiency of the Yin Yang Mandarin Duck Talisman was also continuously enhancing.

"Husband, your cultivation seems to have advanced again."

Su Weiwei was deeply moved, her beautiful eyes like water, her gaze enchanting.

She felt that, even though she possessed the Taiyin Virgin Body, she couldn't keep up with her husband's rate of progress.

Perhaps she needed some assistance.

"Don't worry, I happened to obtain a True Spirit Technique called the Jade Rabbit Scripture."

"If you can master it, you might acquire a true spirit bloodline."

"Your physique would also become stronger."

At this time, Jiang Fan took out an Inheritance Jade Scroll from himself and handed it to Su Weiwei.

"True Spirit Technique? Jade Rabbit Scripture?"

Upon hearing these words, Su Weiwei curiously took it.

Previously, she had tried cultivating the Soaring Snake Technique, but unfortunately, her comprehension wasn't enough to even reach the beginner level.

Now, she unexpectedly obtained another True Spirit Technique.

To be honest, she didn't have much confidence.

Boom~~

With this thought, she let her consciousness merge with the Inheritance Jade Scroll, and instantly, a vast amount of information poured into her body from the scroll.

Then she acquired all the content of this True Spirit Technique.

Vaguely, she seemed to see a Taiyin Jade Rabbit floating above the moon, exuding a terrifying Taiyin Qi, stepping on the Star of the Moon, with the surrounding space-time distorted.

It was clearly just a rabbit, but the divine might on its body was incomprehensibly powerful, like a formidable divine beast standing at the pinnacle of countless creatures.

"Husband, this technique is truly astonishing."

"But somehow, it seems highly compatible with my constitution."

"Perhaps I can really cultivate it."

Su Weiwei was overjoyed, instinctively sensing that this True Spirit Technique resonated greatly with her.

Just a minor attempt had already resulted in her comprehending part of its essence.

This was a situation that hadn't occurred while practicing the Soaring Snake Technique before.

"Cultivating it would be good."

Jiang Fan nodded.

If Su Weiwei successfully cultivated the Jade Rabbit Scripture, her strength would probably reach new heights.

By then, she would not only be a Beast Master, but her inherent power could also rival that of a true spirit.

...

In the blink of an eye, half a year passed.

In a quiet room on Zhu Family Island.

Jiang Fan now sat with legs crossed on the ground, having ingested another drop of medicinal liquid from the Snow Jade Bone Ginseng. This thousand-year-old spirit medicine was refined into drops of potent liquid by the Ten Thousand Transformations Pill Furnace.

However, the medicinal power contained within a thousand-year-old spirit medicine was overwhelmingly immense.

Even for a Golden Core Cultivator, it was impossible to devour and absorb it all at once.

So Jiang Fan absorbed the liquid drop by drop, augmenting his primordial spiritual power.

After half a year of absorbing this medicinal liquid, his spiritual power had soared rapidly, reaching the Perfection Level of the Third Layer of the Golden Core, only one step away from advancing to the Fourth Layer of the Golden Core.

And he had merely digested a third of the liquid so far.

It was evident just how astonishing the medicinal power of this thousand-year-old spirit medicine was, far beyond ordinary spirit medicines.

"I've finally elevated my cultivation to the Perfection Level of the Third Layer of the Golden Core."

Jiang Fan, with a thought, sensed that within his body, he had opened up twenty-seven acupoints, each filled with primordial spiritual power, resonating with the Primordial Golden Core in the Elixir Field and Sea of Qi.

Just a faint movement, and the primordial spiritual power surged like a river, containing unimaginable might.

And between the Third Layer and Fourth Layer of the Golden Core, there's a minor bottleneck.

For ordinary Golden Core Cultivators, breaking through this bottleneck isn't an easy task.

To advance to the Fourth Layer of the Golden Core requires fully connecting twenty-seven acupoints, fusing the primordial spiritual power within them into a unified small energy cycle.

It would typically take an average Golden Core Cultivator about ten years to achieve this.

If the Golden Core Spiritual Power within isn't pure enough, it could be a lifetime struggle, trapped in the Third Layer.

In fact, in the Ten Thousand Beasts Mountain Range, most Golden Core Cultivators from Loose Cultivation backgrounds were stuck at the Third Layer, unable to break through to the Fourth Layer despite exhausting their lifespan.

But this couldn't be helped.

The root cause lied in the unstable foundation of Loose Cultivation Golden Core practitioners, resulting in the chaotic mix of spiritual power within.

This made further advancement costly and challenging.

Fortunately, this wasn't a problem for Jiang Fan.

His primordial spiritual power was inherently pure and without impurities.

Plus, he had been cultivating the Soaring Snake Technique, achieving a Tier Three Middle Stage physique.

All his meridians and acupoints could withstand repeated surges of primordial spiritual power.

"Let's get started."

With that thought, Jiang Fan did not hesitate, activating the Mixed Element Talisman Scripture.

In the depth of the Sea of Qi in his Dantian, the Primordial Golden Core began to rotate slowly.

The center of his body became the focal point, absorbing the Heaven and Earth Spiritual Qi from all directions, transforming the space into a Spiritual Energy Vortex.

The entire Tier Three Upper Grade Spirit Vein started to tremble, with countless spiritual qi rushing in.

Infiltrating deep into his body.

Massive primordial spiritual power began to operate, connecting one acupoint after another.

All twenty-seven acupoints were effortlessly connected by the primordial spiritual power, forming a perfect cycle.

And there was no obstacle at all.

"Indeed, a solid foundation makes breakthroughs much simpler."

"This is nothing but a natural progression."

Jiang Fan was thrilled.

Boom~~

At this moment, the primordial spiritual power of the twenty-seven acupoints vibrated, coming together like countless rivers merging into a boundless ocean.

This immense primordial spiritual power immediately charged toward the bottleneck of the Fourth Layer of the Golden Core.

Bang!

With just a slight collision, the bottleneck of the Fourth Layer of the Golden Core shattered and was easily penetrated.

Primordial spiritual power flowed into new acupoints.

The vast energy of Heaven and Earth was absorbed into his physique, resulting in great evolution and growth of his physique and spiritual sense.

Fourth Layer of the Golden Core!

Without a doubt, from now on, he's a cultivator at the Fourth Layer of the Golden Core, which is already at the Middle Stage of the Golden Core.
