

## **Fortune 531**

### Chapter 531: Primordial Reincarnation Array, Gaining Fourth-Grade Opportunity\_2

Meanwhile, this place occasionally erupts with demonic disasters, leading to significant casualties.

No power dares to station themselves here.

Of course, this also provides loose cultivators the opportunity to enter the ancient ruins to obtain treasures.

At this moment, a large number of cultivators are flocking to this place.

Their cultivation is also extraordinarily high, at least at the Foundation Establishment Realm, with plenty of Golden Core cultivators around.

Among the crowd, one can even spot Nascent Soul cultivators.

Evidently, the opening of Secret Realm No. 5 has attracted many cultivators to this place.

"Isn't there supposed to be nine secret realms in the Primordial Ruins?"

"If that's the case, how do we get to Secret Realm No. 5?"

Jiang Fan used spiritual sense to ask Yuan Hongming.

"Master."

"The nine secret realm worlds of the Primordial Ruins are not static; they can constantly move."

"This time, Secret Realm No. 5 has moved to the entrance, so we can enter it."

"So there's no need to search for Secret Realm No. 5; entering it means entering Secret Realm No. 5."

Yuan Hongming explained.

"A moving secret realm world?"

Hearing this, Jiang Fan was slightly surprised.

He has entered quite a few secret realm worlds, yet he never imagined that there might be nine secret realm worlds here.

Moreover, the fact that these nine worlds are moving is truly unbelievable.

"This is the might of our Primordial Talisman Sect."

"In ancient times, our Primordial Talisman Sect controlled the nine secret realm worlds."

"And using these nine worlds, we arranged the Tier Eight Array, the Primordial Reincarnation Array."

"With this Tier Eight array, our Primordial Talisman Sect stood undefeated."

"Any force attempting to invade returned without success."

"Even though it became ruins, this Tier Eight array still retains part of its power."

"Even Divinity Transformation cultivators who attempt to force their way in would perish."

"Therefore, our Primordial Talisman Sect's inheritance land is deep within the core of the nine secret realm worlds."

"Unless one controls this array, no one can enter the inheritance land or the core area."

The Primordial Talisman Pen proudly declared.

"I see."

Jiang Fan was deeply shocked internally; the ancient ruins had once been arranged with a Tier Eight Array, which is truly beyond imagination.

No wonder it was an ancient era sect, whose foundation is indeed unfathomable.

Yet, even so, the Primordial Talisman Sect was still exterminated.

One can only imagine how terrifying the calamities of the ancient era must have been.

Something that is simply unattainable for himself now.

"Let's go inside too."

At this time, Golden Core cultivator Ni Sihai spoke up.

Swish, swish, swish!!!

Immediately, a group of people flew in, following the large group, entering Secret Realm No. 5.

Boom~~

The next second, everyone entered the secret realm world.

"Hmm?!"

Jiang Fan found himself seemingly entering a barbaric jungle world, with undulating mountains in the distance and towering trees growing all around.

Originally, he thought the secret realm world had become ruins, where no plants would grow, but unexpectedly it was lush and vibrant.

"This is very normal."

"In the beginning, the secret realm world was indeed a ruin."

"However, the endless years can erase all scars."

"Over time, the secret realm world began to regain the vitality of the past."

"Large numbers of trees and spirit plants started growing here."

"Over time, the secret realm world became akin to a barbaric world, with no traces of the past ruins."

"Yet, even so, this place is not suitable for ordinary cultivators to cultivate."

The Primordial Talisman Pen sensed what was on Jiang Fan's mind and spoke up immediately.

After all, none knew the situation of the Primordial Ruins better than it.

"This place isn't suitable for cultivation?"

"Indeed, the spiritual qi here seems mixed with demonic qi."

"If absorbed into the body, it could be corroded by demonic qi."

At this point, Jiang Fan also noticed this. He felt the surrounding atmosphere contained massive demonic qi, as if he had entered a legendary demon world.

Such an atmosphere may be fine for demons.

But for ordinary cultivators, it's akin to a poisonous atmosphere.

Living in such an environment for long can easily lead to becoming a fallen demon.

"Seems you've noticed it."

"Though endless years have passed, those fallen demons have merged with this land."

"Thus transforming this land into demon-infested soil, with vast demon origins buried deep in the ground."

"Because of this, demons in the nine secret realm worlds are endlessly regenerated."

"Even if a large batch is slain, they are constantly reborn, making the number of demons here endless."

The Primordial Talisman Pen said helplessly.

It didn't anticipate that the territory of the Primordial Talisman Sect would be polluted by demonic power, transforming into demon soil.

Hence, the nine secret realm worlds became a paradise for demons.

Ordinary cultivators entering this place will face attacks from numerous demons.

Simultaneously, many cultivators cannot linger long in the Primordial Ruins.

Because staying too long may lead to corrosion by demonic qi, assimilation, and transformation into demons.

"It's incredible how dangerous the Primordial Ruins are; it's no wonder there's still so many treasures in these secret realms despite the passing of years, almost like an inexhaustible treasure trove."

Jiang Fan suddenly realized.

Indeed, if this place wasn't so dangerous, the treasures of the Primordial Ruins would have been excavated cleanly by the various Divinity Transformation Holy Lands long ago, leaving no chance for other loose cultivators.
