Chapter 533: Great Harvest, Acquiring the Heaven-Reaching Spiritual Treasure

"Damn it."

Ni Sihai and the others' faces changed dramatically. They felt a deadly crisis; if they continued like this, they would surely die with no chance of victory.

Unfortunately, in the face of the power of the Exquisite Tower, their struggles were utterly futile.

Boom~~~

In the next second, golden light burst out from the Exquisite Tower, instantly swallowing these six Golden Core Cultivators into the Second Layer of the Exquisite Tower.

And the Second Layer is the Fire World, surrounded by the Exquisite Tribulation Fire.

"What is this place?"

Ni Sihai and the other Golden Core Cultivators looked at each other in dismay, their hearts filled with endless fear. They originally thought the opponent was a sheep, but suddenly they turned into a tiger, completely beyond their imagination.

Dong!

Before they could react, the power of the Exquisite Tribulation Fire enveloped them.

These six Golden Core Cultivators seemed like they had entered Tai Shang Laojun's Eight Trigrams Furnace, being scorched by immense flames.

"Ahhhh~~~"

Immediately, the six Golden Core Cultivators let out miserable screams, enduring indescribable pain, and no matter how they struggled, it was all in vain.

Especially the three Golden Core Demon Cultivators, they couldn't even withstand a second before being burned to ashes, eventually becoming fertilizer deep within the earth.

In the blink of an eye, these six Golden Core Cultivators turned to dust.

Only six Storage Bags were left on them.

The treasures of these six Golden Core Cultivators naturally belonged to Jiang Fan.

"I'm sorry, Master. I didn't expect Ni Sihai and the others to harbor malicious intent, even colluding with Demon Cultivators."

Yuan Hongming said fearfully.

Originally, he thought this was an opportunity to gain a chance, but who could have known it almost led to danger.

Fortunately, his master was powerful, counter-killing this group of Demon Cultivators.

Otherwise, he would have been dead for sure this time, even implicating his master.

"This isn't your fault, but why are these Demon Cultivators here?"

"The Secret Realm No. 5 had just opened."

Jiang Fan was very puzzled about this.

"Master, although the demonic qi of the Primordial Ruins is poisonous to ordinary Cultivators,"

"to Demon Cultivators, it's greatly beneficial instead."

"So when the Secret Realm World closes, these Demon Cultivators don't have to leave."

"Instead, they deliberately stay here to cultivate."

"That's why, when we enter these Secret Realm Worlds, we also need to watch out for ambushes from these Demon Cultivators."

Yuan Hongming explained.

Without a doubt, the Nine Great Secret Realm Worlds of the Primordial Ruins are dangerous not only due to demons but also because of these Demon Cultivators.

If you're even slightly careless, you might die from an ambush by these Demon Cultivators.

"So the Secret Realm Worlds of the Primordial Ruins aren't very friendly to ordinary Cultivators."

Jiang Fan frowned.

"Indeed, that's true. But those Demon Cultivators aren't much better off either."

"When the Secret Realm World closes, the density of demonic qi will increase more than tenfold."

"If these Demon Cultivators aren't mentally strong enough, they could be corrupted by demonic qi, turning completely into demons."

"So only a few Demon Cultivators dare to stay in the Secret Realm World to cultivate."

Yuan Hongming said.

Boom~~

At this moment, a piece of information instantly entered the depths of Jiang Fan's sea of consciousness: "You entered the Primordial Ruins, faced betrayal from companions and an attack by Demon Cultivators, but after a life-and-death struggle, you luckily survived and gained 150,000 Luck Points, a Fourth-Grade Opportunity."

Undoubtedly, he finally overcame this ordeal and gained considerable rewards.

"The Fourth-Grade Opportunity wasn't in the valley, but on these Demon Cultivators?"

"Turns out I had already obtained this Fourth-Grade Opportunity."

Jiang Fan's eyes flickered as he sensed the information of the Fourth-Grade Opportunity, which was right inside one of the Storage Bags.

Swoosh!

The next moment, he discovered this Fourth-Grade Opportunity, a palm-sized cluster of five-colored clouds.

However, it seemed to be polluted by demonic qi, penetrated by it, losing its spirituality.

"Wait, isn't this the low-grade Celestial Spiritual Treasure, Taiyi Five Smoke Net?"

The Primordial Talisman Pen exclaimed in shock, almost in disbelief.

"You recognize this Magical Treasure?"

Jiang Fan asked curiously, noticing that the Primordial Talisman Pen seemed familiar with this Magical Treasure.

"Of course I recognize it. During the Ancient Era, it was once wielded by an Elder of the Primordial Talisman Sect."

"This Magical Treasure can release five-colored clouds and smoke, limitless in size, enveloping all around, unfearing attacks from any Magical Treasures or Flying Swords. It's an extremely defensive Celestial Spiritual Treasure."

"I thought it had been destroyed long ago in the great battle, but to think it survived."

"And it was picked up by these Golden Core Demon Cultivators."

The Primordial Talisman Pen sighed, never expecting to encounter the former low-grade Celestial Spiritual Treasure, Taiyi Five Smoke Net, again. Despite not measuring up to itself, it was still renowned.

As long as the five-colored clouds and smoke appear, nothing can penetrate them.

No matter how the enemy attacks, you remain safe and sound.

"Really?"

Upon hearing this, Jiang Fan's eyes lit up with excitement.

It's no wonder that a Fourth-Grade Opportunity turned out to be a low-grade Celestial Spiritual Treasure, truly unbelievable.

Although he already had quite a few Magical Treasures, who would complain about having too many?

Even if he couldn't use it, letting his Dao Companion Su Weiwei use it was actually a good choice.

After all, such a defensive Celestial Spiritual Treasure would make even Divinity Transformation Cultivators covet it.
