Chapter 535: Creating the Dragon Vein, the Calamity Arrives

"No wonder this place is a realm of purity."

"It turns out there's a hidden Dragon Vein here."

"That's why it can purify the demonic Qi in the surrounding air."

"Unfortunately, this Dragon Vein is on the brink of extinction, almost about to vanish."

Jiang Fan suddenly understood.

He now also understood why the safety zones of the Primordial Ruins in these Secret Realm Worlds existed.

Most likely, it's all due to the Dragon Vein.

In the Ancient Era, there were countless Great Powers, strong individuals as numerous as clouds, naturally, there was no shortage of those who practiced the Dragon Vein House Charm to the Perfection Level, and they would enlighten Spirit Veins, forming Dragon Veins.

Once a Dragon Vein is formed, whether it is for the nation, the family, or the sect, it brings great benefits.

After all, a Dragon Vein can expel evil and resist demons, making it impervious to all magic.

As long as the destiny remains unbroken, the Dragon Vein can protect a region, offering endless advantages.

"Perhaps I can restore the spirituality of this Dragon Vein."

Jiang Fan had a sudden idea.

He took out the Primordial Talisman Pen and infused it with his vast Primordial Spiritual Power.

Void Talisman!

In an instant, he effortlessly drew the Dragon Vein House Charm, seemingly branding it into the void, showcasing the unique ability of the Primordial Talisman Pen.

The next moment, under Jiang Fan's control, the talisman instantly merged into the Spirit Vein deep within the earth.

No, it didn't just merge into the Spirit Vein, it also integrated into the Dragon Vein.

Boom~~

Immediately, the sleeping Dragon Vein absorbed the Dragon Vein House Charm, and its entire body emitted a golden glow.

The originally shattered body was instantly restored.

Like shattered glass quickly mending, a rich spirituality was released in an instant.

Soon after, this Dragon Vein suddenly opened its eyes, exuding endless majesty. The surrounding area of dozens of kilometers was shaken, as if an earthquake had occurred, resembling the turning of a dragon within the earth.

Spiritual Qi from all directions surged in, converging into the Dragon Vein.

This caused the Spiritual Qi concentration in the entire cave to soar geometrically.

It instantly reached the concentration of a Tier Three Upper Grade Spirit Vein.

No, not just the concentration of Spiritual Qi increased.

Even the range enveloped by the Spiritual Qi expanded, no longer confined to this small cave.

This invisible Dragon Vein Barrier now covered an area of one kilometer around.

If any demonic Qi tried to penetrate the barrier, it would be purified by the power of the Dragon Vein.

Any demonic Qi would not dare invade inside.

"Indeed, it has been restored."

Perceiving this scene, Jiang Fan was overjoyed. He initially intended to try it out and didn't expect it to succeed.

It can only be said that the Perfection Level Dragon Vein House Charm is indeed extremely powerful.

Even in the Ancient Era, possessing this talisman would grant significant status.

Dong~~

In an instant, Jiang Fan felt his soul being drawn by a force, merging with this Dragon Vein as if his soul and the Dragon Vein had become one.

Subsequently, his range of Spiritual Sense rapidly expanded with the flow of the Dragon Vein.

Not only did it cover a few hundred kilometers, but it expanded to thousands, even tens of thousands of kilometers, encompassing the entire Secret Realm No. 5.

It felt as if at that moment, his soul was floating above Secret Realm No. 5, overlooking this Secret Realm World.

The entire Secret Realm World was fully visible.

"This Secret Realm World has already been polluted by demonic forces."

Jiang Fan's pupils contracted as he saw the depths of Secret Realm No. 5 infused with giant demon corpses.

Even though these demons were dead, their corpses seemed to possess an immortal presence.

Despite countless years, these corpses showed no signs of decay.

Simultaneously, these demon corpses were releasing vast demonic Qi and death energy, containing curses, death, poison, and other energies, which infiltrated the Secret Realm World's Spirit Vein.

It was like a large amount of black pollutants flowing into a river.

Even if this river was originally clear, due to these pollutants, it became contaminated, turning black with a foul smell.

As a result, the Secret Realm No. 5 was filled with dense demonic Qi.

This Secret Realm World had long been polluted by demon corpses.

Unless these demon corpses were dealt with, the Spirit Veins of this world could not be purified.

"These things are not something I can handle now."

"It's better to cultivate diligently and improve my cultivation."

At this moment, Jiang Fan had a thought and retracted his Spiritual Sense.

His soul's perspective quickly returned to his body.

However, the feeling just now was indeed incredibly wondrous.

This was possible only by harnessing the power of the Dragon Vein, offering such an amazing perspective.

Of course, it also made him more familiar with this Ancient Ruins land.

"But it must be said, Secret Realm No. 5 indeed contains numerous treasures."

"Yet these treasures are buried in various places, and it's impossible for me to obtain them alone."

"It seems necessary to stay here for a while to see if there's a chance to gain more opportunities."

Jiang Fan's eyes sparkled.

Anyway, Secret Realm No. 5 remains open for a year. As long as I leave within this year, there won't be a problem.

Moreover, I can also leave spatial coordinates here.

In this way, through the Gate of the Void, I can enter Secret Realm No. 5 of the Primordial Ruins at any time without going through the Ancient Ruins portal, reducing many hassles.
