Chapter 540: Tier Five Spirit Vein, Advancing to Fifth-Layer Golden Core_2

The Nascent Soul Demon Cultivator Kang Xiyuan furrowed his brow.

He knew that it was impossible for him to know all the Nascent Soul Cultivators on the Eastern Continent.

After all, those renowned and righteous sects are all immensely cunning and would never lay all their strengths bare.

Each force hides some power to varying degrees in secret.

Therefore, the appearance of some unknown Nascent Souls is a very normal occurrence.

"My lord, what should we do now? Do you think they might have discovered the plan of our Primordial Demon Sect?"

The Golden Core Demon Cultivator said nervously.

The reason so many demon cultivators from the Primordial Demon Sect emerged in Secret Realm No. 5 was due to a top-secret plan.

For this plan, they had spent a thousand years preparing countless resources.

Seeing that the plan was nearing its end, they did not want it to fail.

If it were to fail, all demon cultivators involved in the plan would face severe punishment from the Divinity Transformation Ancestor.

Thinking of the punishments of the Primordial Demon Sect, they shivered with fear, it was truly worse than death.

"It's unclear, but we must remain vigilant."

"For now, we should refrain from acting recklessly."

"This plan is the most crucial."

"If the plan fails, we'll all die."

"We cannot let the recklessness of a few fools doom us."

The Nascent Soul Demon Cultivator Kang Xiyuan squinted his eyes.

Originally, he wanted to personally investigate the cause of those deaths.

But he realized he couldn't act rashly, considering the responsibility he bore.

Perhaps the enemy was trying to lure him out by attracting attention.

So, under no circumstances could he fall for the trap.

"Yes, Elder."

All the demon cultivators nodded unanimously. After all, Qi Dayong and his companions were dead, but they could not let their demise drag them down.

...

Soon after, Jiang Fan quietly returned to his original cave.

He immediately entered the First Layer of the Exquisite Tower.

"Such dense Heaven and Earth Spiritual Qi."

Upon entering the Exquisite Tower, Jiang Fan immediately sensed an abundance of Heaven and Earth Spiritual Qi to the extreme, feeling as if he had returned to the Black Dragon Secret Realm.

This made him feel immensely joyous, as if every pore of his body was opening wide.

With each breath, he could inhale large amounts of Heaven and Earth Spiritual Qi.

This caused his Primordial Spiritual Power to increase bit by bit.

The cultivation efficiency was vastly improved compared to before.

"Haha, this is the might of the Tier Five Spiritual Eye Spring."

"While it may not cover as large an area as a true Tier Five Spirit Vein."

"But for personal use, it's completely sufficient."

"Besides, being merely a Golden Core Cultivator, using this Tier Five Spiritual Eye Spring is quite extravagant."

The Primordial Talisman Pen remarked sincerely.

In the Ancient Era, such a Tier Five Spiritual Eye Spring would be unattainable by a Golden Core Cultivator like Jiang Fan, requiring someone of Divinity Transformation, or even higher, qualification.

Thus, Jiang Fan obtaining such a treasure was undoubtedly great destiny.

"Comparable to the spiritual energy concentration of a Tier Five Spirit Vein? Truly lives up to its reputation."

Jiang Fan gazed far ahead.

He saw the Spiritual Eye Spring transported to the central location by the Exquisite Tower, a pool that seemed to meld into the earth's depths, continuously erupting Spiritual Liquid.

A great amount of pure Spiritual Liquid sprayed forth, immediately vaporizing into countless Heaven and Earth Spiritual Qi.

This Heaven and Earth Spiritual Qi permeated the surrounding air, filling the entire First Layer world of the Exquisite Tower.

If it were outside, adequate Spirit Gathering Array arrangements would be necessary to prevent the free flow of spiritual energy.

However, within the inner world of the Exquisite Tower, the spiritual energy could not escape and was absorbed instead, raising the area's spiritual energy concentration continuously.

"With such concentrated Heaven and Earth Spiritual Qi, my advancement to the Fifth-Layer Golden Core will likely speed up."

Thinking this, Jiang Fan immediately returned to the quiet room, sat cross-legged on the ground, and activated the Mixed Element Talisman Scripture.

Boom~~

Instantly, a massive Spiritual Energy Vortex formed around his body, as countless spiritual energy surged into his body, devoured and absorbed by his Primordial Golden Core.

Honestly, when using the Tier Three Spirit Vein previously, there was a slight sense of insufficiency.

It was like eating a meal where, due to a lack of dishes, one was only seventy percent full.

But things were different now.

Due to the Tier Five Spiritual Eye Spring, the Heaven and Earth Spiritual Qi in the vicinity reached the extreme in concentration.

Like a table filled with a variety of dishes, allowing you to eat to fullness in one go.

No, not just full to the brim, even to the point of being overstuffed, and still, the dishes remain abundant.

This increased his cultivation efficiency to the maximum, as if he were cultivating within the Divinity Transformation Holy Land.

"Comfortable."

Jiang Fan felt supremely comfortable, experiencing the satisfaction of being full for the first time, as his Celestial Spirit Root devoured Heaven and Earth Spiritual Qi unrestrainedly.

Like a sports car, whose genuine top speed is three hundred kilometers per hour, yet limited by laws and roads to merely one hundred, preventing its full potential.

But now, in an endless field, he could floor the pedal, unleashing the sports car's abilities and the Celestial Spirit Root's potential.

Soon, deep in his Elixir Field and Sea of Qi, strands of Primordial Spiritual Power emerged.

"Is this the cultivation efficiency of the Celestial Spirit Root? It's incredibly powerful."

"If you were born in the Ancient Era, you'd probably have become a Nascent Soul already."

The Ten Thousand Transformations Pill Furnace observed this scene and was deeply moved.

It had seen other Celestial Spirit Root cultivation scenarios before, but none as exaggerated.

Indeed, earlier, the cultivation environment had limited its owner's cultivation efficiency.

"Not just Nascent Soul."

"With cultivation from powerful forces, even Divinity Transformation would be feasible."

The Demon-Vibrating Bell also acknowledged this fact.

"Stop overhyping, this kid is still young."

"Achieving Golden Core Realm is already commendable."

"Truth be told, faster cultivation isn't always better. An unstable foundation could hinder future advancement."

The Primordial Talisman Pen remarked irritably, they were getting carried away, having been with the kid for such a short time, yet becoming sycophants.

...

In the blink of an eye, another half year passed.

During which Jiang Fan remained in the Exquisite Tower, staying within Secret Realm No. 5, engaging in cultivation.

Undoubtedly, his cultivation progressed at a tremendously rapid pace during this period, advancing swiftly.

"Finally reached the Perfection Level of Fourth-Layer Golden Core."

At this moment, Jiang Fan suddenly opened his eyes.

He realized that he had spent six months crazily enhancing the Primordial Spiritual Power within himself.

In just six months, his Primordial Spiritual Power reached the Perfection Level of Fourth-Layer Golden Core.

He fully opened thirty-six acupoints.

At this moment, these thirty-six acupoints contained massive amounts of Primordial Spiritual Power.

This also filled his Golden Core Spiritual Power to a significant degree.

Only a step further was needed to advance to the Fifth-Layer Golden Core.

It must be said that the rapid progress of his cultivation was largely thanks to the vast spiritual energy provided by the Tier Five Spiritual Eye Spring.

In essence, it was equivalent to cultivating near a Tier Five Spirit Vein.

Thus, the cultivation efficiency was multiplied many times.

Even without taking any elixirs or spirit medicines, his advancement was incredibly impressive.

"Let's begin."

At that instant, Jiang Fan made no hesitation and activated the Mixed Element Talisman Scripture.

His Primordial Golden Core at the depth of Elixir Field and Sea of Qi slowly rotated, mobilizing the large amount of Primordial Spiritual Power within.

This Primordial Spiritual Power rushed towards the bottleneck.

Boom~~

With just a single impact, the bottleneck of the Fifth-Layer Golden Core shattered.

The massive Primordial Spiritual Power effortlessly pierced a new acupoint.

Fifth-Layer Golden Core!

Clearly, now his cultivation finally advanced to the Fifth-Layer Golden Core level.

"No bottleneck indeed."

At this moment, Jiang Fan opened his eyes and displayed a joyful smile.

To him, advancing to the Fifth-Layer Golden Core wasn't particularly difficult. As long as the Primordial Spiritual Power within was sufficient, breakthrough would naturally occur with ease.

However, for other Golden Core Cultivators, advancing one layer is not so easy.

Merely this bottleneck can trouble those cultivators for years.

Sometimes even requiring special elixirs as aid to achieve breakthrough.

But Jiang Fan didn't need such complications, demonstrating the benefits of a strong foundation and exceptional aptitude.
