

Fortune 559

Chapter 559: Promoted to Sixth-Layer Golden Core, White Tiger Geng Gold Talisman_2

Dong!

With just a gentle collision, the vast river of spiritual power struck the bottleneck, and the bottleneck of the Sixth-Layer Golden Core shattered in response, unable to withstand even a single breath's time.

A brand new acupoint was thus easily opened.

Sixth-Layer Golden Core!

Without a doubt, Jiang Fan has effortlessly advanced to the realm of the Sixth-Layer Golden Core.

The Primordial Golden Core deep within the elixir field and sea of Qi began to rapidly expand, at least a third larger than before, simultaneously emitting a faint golden light, like a blazing sun.

At the same time, his spiritual power also rapidly improved, equivalent to the Sixth-Layer Nascent Soul level.

For a Golden Core cultivator, merely having spiritual power at Nascent Soul level in the Golden Core realm is undoubtedly a miracle.

Because the gap between the two is unbelievably vast.

However, this is also because of his exceptional talent; his soul power is innately formidable.

So each enhancement in cultivation also promotes soul growth and increases spiritual sense.

"Not bad, finally advanced to the Sixth-Layer Golden Core."

Jiang Fan clenched his fists, feeling the abundant primordial spiritual power within his body and his strong physique.

An inconceivable force surged from within his body.

It seemed that with a single thought, he could summon endless power of heaven and earth to unleash terrifying might.

Compared to before, his combat power increased by at least a third.

After all, this is an advancement of a small realm, and such an increase is quite astonishing.

"Broken through again?"

Sensing the change in Jiang Fan's cultivation, the primordial talisman pen remained silent, unsure of what to say.

It had witnessed this young man's talent before.

But even so, it was deeply shocked internally.

Because this is no longer the ancient era but a time of spiritual energy decline.

Normally, even a celestial spirit root cultivator could not possibly cultivate this fast.

However, obviously, this young man is not an ordinary celestial spirit root cultivator; he not only possesses astonishing talent but also incredible comprehension, practically a hexagonal cultivator with no dead angles.

It believes that in the cultivation realm, sometimes comprehension is much more important than spiritual root talent.

Especially after advancing to Nascent Soul, the help spiritual root provides to cultivation is far less compared to the help comprehension offers.

So in the ancient era, many sects greatly valued the comprehension of their cultivators.

But in this era, things are different.

Most often, spiritual root talent dominates everything.

This is an inevitable situation.

Because this era is lacking in resources, which also amplifies the advantages of high-level spirit root cultivators.

Having a high-level spirit root means possessing superior cultivation speed, representing the consumption of fewer resources.

No matter how exceptional your comprehension is, no matter how powerful a Qi Cultivation Stage cultivator is, they cannot defeat a Foundation Establishment cultivator.

This is the current realm theory of the cultivation realm.

But in the ancient era, due to abundant resources, various thousand-year-old spirit medicines were everywhere.

Even cultivators with inferior spirit roots could rapidly enhance their cultivation by consuming resources.

Thus, initially, the superiority of spirit root talent could not manifest effectively.

"The master truly is a monster."

The Ten Thousand Transformations Pill Furnace was also astounded.

It thought of the past cultivation of Daoist Wan Hua, which pales in comparison to its current master.

Back then, Daoist Wan Hua's cultivation in the Golden Core realm was extremely arduous.

To find tier three spirit medicine and tier three elixir, who knows how much effort and time were expended.

Even to compete for resources, he fought fiercely with other Golden Core cultivators, offending many forces.

Thus, Daoist Wan Hua was surrounded by enemies everywhere.

How can its current master be so terrifying?

It seems he doesn't need to search for resources as numerous treasures come to him automatically.

The difference between people is truly too vast.

"Since he has advanced to the Sixth-Layer Golden Core, it is time to engrave a new Life Talisman."

Jiang Fan sat cross-legged on the ground, pondering his next Life Talisman.

Previously, he had engraved two kinds of Four Symbols Spirit Talismans, the Cyan Dragon Armor Wood Talisman, and the Vermilion Bird Heaven-Burning Talisman.

Next is the third kind of Four Symbols Spirit Talisman—the White Tiger Geng Gold Talisman.

This is a gold attribute spirit talisman, similar to the Ten Thousand Swords Return to the Sect Talisman and the Golden Light Talisman.

So he was somewhat familiar with the White Tiger Geng Gold Talisman.

Hong~~

In an instant, Jiang Fan consumed a large number of Luck Points, a mysterious energy entered his soul, greatly enhancing his comprehension.

Suddenly, a wealth of information about the White Tiger Geng Gold Talisman poured into his sea of consciousness.

It was like a Divine Beast White Tiger appeared deep in his mind, with densely packed White Tiger symbols floating above.

Numerous White Tiger symbols gathered together, forming a law.

The Divine Beast White Tiger seemed to be the embodiment of this law.

"I see."

Jiang Fan's eyes revealed a flash of understanding; he grasped the White Tiger Geng Gold Talisman, a talisman derived from the script of the Divine Beast White Tiger, blending with Geng Gold symbols, belonging to gold talismans.

Because the White Tiger itself wields gold attribute power, controlling the power of warfare in the world.

Once he comprehends this talisman, it equates to understanding the power of gold and mastering the power of Geng Metal.

Dong!

The next moment, Jiang Fan operated the Primordial Golden Core deep within his elixir field and sea of Qi, engraving primordial spiritual power on its surface; each pattern came from the White Tiger Geng Gold Talisman.

Threads of gold attribute power converged between heaven and earth, merging into the Primordial Golden Core.

...

Another day and night passed.

Hong~~

At this time, Jiang Fan's body trembled as the final talisman pattern on the surface of the Primordial Golden Core fused within.

White Tiger Geng Gold Talisman, complete!

Suddenly, a White Tiger appeared on the Primordial Golden Core, as if standing on this planet, seemingly a divine beast emerging from the depths of the void, enveloped by endless Geng Metal power.

Centered around Jiang Fan's body, countless Geng Metal energies gathered, then coalesced into a golden talisman, seemingly formed by the convergence of countless sword qis.

With just a thought, a terrifying White Tiger Sword Intent would crush forward, containing the power to annihilate everything.

"Is this the White Tiger Geng Gold Talisman?"

"Truly worthy as one of the Four Symbols Spirit Talismans, it is exceedingly strong."

Jiang Fan's eyes flashed with brilliance.

His finger revealed a golden light, this was the sword light condensed from the White Tiger Geng Gold Talisman, and behind him seemed to emerge a phantom of the Divine Beast White Tiger.

Dong!

In the next second, he gently swung, this golden light shot forward, causing tremendous destruction.

Immediately, a terrifying crack appeared on the ground, extending for dozens of kilometers.

Where it reached, it could tear apart everything, even the earth could not withstand it.

"I didn't expect the entry level White Tiger Geng Gold Talisman to possess such power."

Jiang Fan was greatly astonished.

He sensed this Four Symbols Spirit Talisman gathers the Geng Metal power between heaven and earth, able to condense golden sword light, due to being merely at the entry level, it only contains the piercing trait.

That is to say, this golden sword light can pierce through many forces.

No matter whether it's a defensive magical treasure or a defense barrier, it can easily penetrate and then strike the enemy.

This talisman holds terrifying destructive power.

Of course, if the skill level of the White Tiger Geng Gold Talisman continues to increase, more traits will be acquired.

For example, if it can be increased to the skilled level, then the White Tiger Sword Light triggered will possess the toughness trait, making it impossible to be blocked or intercepted midway.

If it can be enhanced to mastery level, it will possess the shattering trait, allowing the White Tiger Sword Light to shatter various substances; even if a body cultivator is struck by the White Tiger Sword Light, their physique and even soul would be shattered.

Once elevated to great success, it will have the devouring trait, even a slight cut by the White Tiger Sword Light will cause the sword light to devour the enemy's life force until the opponent's life force is completely consumed.

If achieved perfection level, it becomes even more terrifying, possessing the tracking trait; once locking onto the enemy's breath, the White Tiger Sword Light will chase and strike until it hits the target, undoubtedly hitting every time.

Thus, in the ancient era, the power of the White Tiger Geng Gold Talisman was renowned.

However, there were not many cultivators who could successfully refine this talisman.
