

Fortune 565

Chapter 565: Secret Treasure from the Immortal Realm, Celestial Cicada Spirit Leaf_2

After all, such talismans only conceal one's aura, not completely hide one's figure.

However, the Nine Cicada Spirit Leaves are different; they not only conceal aura but can also hide one's figure and even reduce one's presence.

One can only imagine the formidable nature of this secret treasure.

"If I could obtain three Nine Cicada Spirit Leaves, then the concealing ability would be elevated to a new level, undergoing a qualitative change."

"First, the sense of presence would change."

"If desired, any creatures with whom you have formed a causal relationship would naturally forget your existence."

"It would seem as if you've completely vanished from the world."

Jiang Fan rubbed his chin.

To be honest, a single Nine Cicada Spirit Leaf isn't much, but reaching three would indeed be a qualitative enhancement.

By that time, walking through the mortal world, as long as one wishes, even if an unfamiliar cultivator meets and speaks with me, they would forget my existence, with memories of me erased from their mind.

"If six Celestial Cicada Spirit Leaves could be found, the power would further advance."

"Not only could it conceal aura, but also sever causality, and even evade celestial tribulations."

"This is what's known as being unbound by causality."

Jiang Fan knew how difficult it was for a cultivator to evade celestial tribulations. Once locked onto by a tribulation, there's no escape, but with six Celestial Cicada Spirit Leaves, it becomes possible to dodge a celestial tribulation.

He surmised that perhaps the Immortals from the Immortal Realm used the power of the Celestial Cicada Spirit Leaves to conceal themselves in the mortal world.

"If nine Celestial Cicada Spirit Leaves could be found, achieving the integration of nine leaves, then one could use their power to conceal within the void, as if in another dimension."

"In that case, no matter how strong the attack, it wouldn't harm the true form."

"This is indeed the ultimate protective secret treasure."

Jiang Fan clenched his fist.

He felt a deep yearning inside; if he could find nine Celestial Cicada Spirit Leaves, he'd be in an invincible position within the Void Realm.

Even if he encountered a Divinity Transformation Cultivator, they probably wouldn't be able to harm him at all.

This secret treasure from the Immortal Realm isn't easily damaged either.

They are likely scattered across the Void Realm now.

Aside from him, probably no one else in the entire Void Realm has the chance to completely find all nine Celestial Cicada Spirit Leaves.

"The master has actually managed to obtain such a precious treasure again; what incredible luck."

The Ten Thousand Transformations Pill Furnace and other ancient treasures were filled with admiration.

Their extraordinary knowledge made them well aware of how remarkable the Celestial Cicada Spirit Leaf was.

Yet their master never left the house, and still, people brought treasures to him—it truly was a great destiny.

Now, they felt utterly numb, feeling as if their master were Daoist Duobao, always accumulating endless treasures.

If the outside cultivators ever found out, who knows how many would go completely mad.

"Who would have thought that such a treasure could be obtained from this Golden Core Cultivator."

"Truly, whether a loose cultivator or a sect cultivator, they could have different levels of unexpected encounters."

"Sometimes certain loose cultivators might be extremely lucky and obtain some opportunity, soaring to great heights."

Jiang Fan's eyes flickered.

He was quite satisfied with this harvest.

Fortunately, he didn't leave Huaming City, choosing instead to remain within the city.

If he had indeed used the Gate of the Void to leave the Eastern Continent, he probably wouldn't have gotten this Fifth-Grade Opportunity.

If he truly missed this opportunity, he likely wouldn't have obtained this Nine Cicada Spirit Leaf.

It can only be said that the Fallen Immortal Mountain Range is indeed teeming with opportunities.

Even the Golden Core Cultivator may possess significant fortunes and treasures.

One must not underestimate any cultivator's gains.

Rumble~~

At this moment, Jiang Fan waved his hand, instantly collecting the corpses of the three Golden Core Cultivators.

Of course, their storage bags were also put into the Exquisite Tower space.

"Husband, what happened just now?"

Su Weiwei seemed to sense the spiritual power fluctuation outside, and walked out with curiosity, asking.

"Nothing, just a few small thieves."

Jiang Fan waved his hand, simply recounting what had just happened.

"Golden Core Cultivators actually invaded?"

"It seems Huaming City is becoming more chaotic; previously, no cultivators dared invade the Blood Saber Mansion."

Su Weiwei's beautiful eyes were very grave.

Clearly, the siege of Huaming City by five Nascent Soul Cultivations had caused the entire city's security to deteriorate.

After all, the higher-ups in Huaming City had no time to manage the lower-level security issues now.

The bolder tribulation cultivators saw this as a great opportunity to rob and would make their move.

Without adequate strength, a cultivator would likely encounter disaster.

"It's okay, the more tribulation cultivators come, the more will die."

"Daring to come to the Blood Saber Mansion is simply seeking death."

Jiang Fan wrapped his arms around Su Weiwei's slender waist.

"Hmm."

Su Weiwei gave this rogue a sidelong glance, her face a shade of red.

The two of them entered the bedroom like this, ignoring the world's trials and tribulations.

...

Several days passed.

Cloud Daoist and the other five Nascent Souls continued to besiege Huaming City, occasionally launching attacks.

However, faced with the Tier Four High-grade Array, the Five Elements Lotus Array, they always failed to make any progress.

Against this Tier Four Array, even Nascent Soul Cultivators were powerless.

After all, human effort contending against natural power is still too challenging.

Not to mention, there are Nascent Soul Cultivators controlling the array, which naturally makes the array's power even more formidable.

But for the Blood Saber Immortal Alliance, it remained relatively safe for now.

Because so many Golden Core Cultivators were gathered here, no fool would dare invade.

Unless a Nascent Soul Cultivator made a move, the Blood Saber Immortal Alliance wouldn't face too much trouble.

Therefore, Jiang Fan and others were quite content to stay in the Blood Saber Mansion for cultivation.

Of course, the security in other parts of Huaming City had notably worsened.

Rumors frequently circulated about the falls of Foundation Establishment Cultivators and Golden Core Cultivators.

But at this time, the high-ups in Huaming City were preoccupied, naturally having no time to catch the culprits.

At this moment, outside Huaming City.

Cloud Daoist and the other five Nascent Souls stood in mid-air, overlooking the masses.

"Cloud Daoist, do you have any means to break this Tier Four Array?"

"If there's no way to break it, we're not interested in staying here wasting time."

"Also, the reward you provided earlier, we won't be returning that."

A white-haired Nascent Soul spoke up.

They were friends with Cloud Daoist, but to have them take action, it certainly required Cloud Daoist to pay a significant price. However, even so, as Nascent Soul Cultivators, they also had time costs.

If there was no hope of breaking through Huaming City, they wouldn't continue to stay.

After all, it'd simply be wasting time.

"Don't worry, since I dared to attack Huaming City, how could I not have thought of that."

"In fact, I previously bought a Tier Four Array-Breaking Talisman from the Celestial Secret Mansion."

"I believe soon a cultivator from the Celestial Secret Mansion will bring this Tier Four Array-Breaking Talisman."

"By then, no matter how strong the Five Elements Lotus Array is, it won't withstand the Tier Four Array-Breaking Talisman."

Cloud Daoist spoke proudly, revealing his ace.

"A Tier Four Array-Breaking Talisman? Such a talisman is extremely precious."

"Very few cultivators can refine such talismans."

"Even if they can refine it, they won't sell it externally, usually saving it for internal use."

"You actually found a cultivator from the Celestial Secret Mansion to buy such a talisman?"

Hearing this, the other four Nascent Soul Cultivators were taken aback, not expecting Cloud Daoist to have such connections; it must have cost him greatly.

"Hehe, previously an elder from the Celestial Secret Mansion owed me many favors."

"He's merely repaying a favor now."

"I've paid such a huge price this time, so Flower Nether Daoist has nowhere to escape."

Cloud Daoist clenched his fist, speaking murderously.

To deal with Flower Nether Daoist, he had expended much effort and many favors.

If he failed this time, it would mean total bankruptcy for him.

So no matter what, he must succeed this time, eliminate Flower Nether Daoist, and seize the treasure from him.

"Understood."

The other four Nascent Souls nodded, knowing Cloud Daoist had high confidence. Waiting a little longer wouldn't hurt, after all, it was just a matter of days, hardly anything.

Clearly, a massive disaster loomed over Huaming City, with boundless dark clouds enveloping the sky, harbingers of doom spread.
