

## Fortune 580

Chapter 580: Soaring Snake Technique Breakthrough, 10,000-Year Lifespan

Boom~~

In the blink of an eye, as Jiang Fan moved his thoughts, the Spiritual Sense on his body spread out, easily covering a radius of a thousand kilometers, demonstrating the Spiritual Power comparable to the Nascent Soul Ninth Layer.

Now, the area within a thousand kilometers was under his perception.

The sky, the earth, the soil, the weeds, the trees, the insects, and beasts, everything in the world was within his Spiritual Sense perception, and everything was detailed and meticulous, nothing could escape his perception.

Even the tiniest creatures were no exception.

More importantly, under the binding of the vast Spiritual Power, a powerful force was vividly formed.

This is the Nascent Soul Domain!

If this matter was spread out, it would surely frighten a large number of cultivators.

He was obviously just a Sixth-Layer Golden Core cultivator, yet he possessed the power of a Nascent Soul Domain.

This is truly beyond imagination.

"This is the power of the Nascent Soul Domain, truly powerful."

Jiang Fan sighed inwardly.

He felt that with just a thought, he could manipulate the infinite Power of Heaven and Earth.

Compared to before, the Nascent Soul Domain was at least dozens of times greater than the Golden Core Domain.

It's like the difference between dozens of times and one time the gravity.

Once the Nascent Soul Domain is unleashed, it could easily suppress Golden Core cultivators, rendering them unable to move.

Moreover, when facing a Nascent Soul, there were now means to resist.

At least it could break the binds of the Nascent Soul Domain, allowing for a calm escape.

"However, the Spiritual Power in the body hasn't transformed, so compared to a true Nascent Soul Domain, it's still somewhat lacking."

Jiang Fan's eyes flickered.

This is because upon promotion to Nascent Soul, the cultivator's Spiritual Power undergoes a transformation, turning into Magical Power.

It can be said that this is a qualitative change.

Only when the Magical Power and the Nascent Soul Spirit Sense are combined can the powerful Nascent Soul Domain be displayed.

So at present, he only possesses some of the features of the Nascent Soul Domain.

But even so, among Golden Core cultivators, this is considered an extremely powerful means.

It can completely crush many Golden Core cultivators, invincible in its path.

"The power of the Spiritual Sense has basically reached the limit of the Nascent Soul level."

"If I want to break through further, it would require a qualitative change, promotion to the Divinity Transformation level."

Jiang Fan realized that his sea of consciousness had reached the limit of the Nascent Soul level. If he wanted to further enhance his soul power, he would need to expand the sea of consciousness and make it transform.

However, this is not an easy thing to achieve.

It's equivalent to promoting from Primordial Spirit to Divinity Transformation.

So for any cultivator, this is a huge shackle.

But even so, for Jiang Fan, the Spiritual Sense comparable to the Nascent Soul Ninth Layer was immensely beneficial to him. Not only for its combat capability, but even just the capability to assist in cultivation was enough to make countless cultivators envious.

The powerful Spiritual Sense can effortlessly manipulate every strand of Golden Core Spiritual Power and perceive every part within the body. It can also speed up refining the medicinal power of elixirs and spirit medicines, which indeed provides numerous benefits.

Boom~~

Thinking of this, Jiang Fan had no hesitation and continued to refine this drop of True Spirit Essence Blood.

After all, what he had previously done was only to dispel the soul oppression of the True Spirit Essence Blood. The energy contained within the essence blood was the main part, and this energy could help his Soaring Snake Technique achieve a further breakthrough.

.....

In the blink of an eye, another year passed.

Over this year, Jiang Fan had been continuously refining this drop of Kui Ox Essence Blood, cultivating the Soaring Snake Technique.

To break through the Soaring Snake Technique and elevate his body cultivation realm to the Tier Three Late Stage, he needed to engrave one hundred and thirty-eight Soaring Serpent Runes on his bones.

To be honest, this is not an easy task.

Acquiring the Kui Ox Essence Blood merely accelerated the bone-healing process, but engraving the Soaring Serpent Runes still required a great amount of time to succeed. This is a delicate effort, and it could not significantly increase efficiency.

He also expended a large number of Luck Points to quickly understand these Soaring Serpent Runes.

But be that as it may, after a year, he still completed this difficult task.

Rumble~~

In an instant, Jiang Fan sensed that one hundred and thirty-eight bones on his body were engraved with Soaring Serpent Runes, each rune glowing with dark golden light, transforming the mortal bones into divine bones.

Moreover, the one hundred and thirty-eight Soaring Serpent Runes resonated, seemingly forming a small rune array.

"Finally reached Tier Three Mid-Stage Perfection."

"Just one step away from ascending to Tier Three Late Stage."

Jiang Fan's eyes revealed a flash of excitement. Spending a year finally allowed his cultivation to continuously improve and progress, but it was all worth it.

Because once breakthrough is made, it would be a qualitative improvement and evolution for his physique.

He operated the Soaring Snake Technique, stimulating the Qi and Blood Power within himself, triggering the Soaring Serpent Runes on his body.

Thump~~

An immense Bloodline Power surged and rushed toward the bottleneck of Tier Three Late Stage.

It was as if it had gone smoothly.

Vast Bloodline Power was merely a single impact, and the bottleneck of Tier Three Late Stage shattered in response.

Boom!

In an instant, Jiang Fan sensed that the Bloodline Power in his body underwent a qualitative change. Countless bloodlines within seemed to transform into a Soaring Snake, starting to roam freely through his entire body, tempering it over and over again.
