Chapter 581: Breakthrough in the Soaring Snake Technique, 10,000-Year Lifespan_2

Every cell in his body greedily devoured threads of longevity material from the depths of the void.

This also allowed his lifespan to gain a tremendous boost.

Why do those demon beasts live longer than humans? It's because the physique of demon beasts contains more longevity material, whereas the human physique is weak and contains less.

If a human does not cultivate, a lifespan of a hundred years might be the limit.

But if one engages in cultivation, humans can break the limits of their bodies time and again through cultivation.

Every breakthrough in realm is actually an evolution of life, allowing for more longevity material to be contained.

And the Soaring Snake Technique he practiced made his physique evolve continuously towards that of a divine beast.

As a result, the longevity material his body could contain naturally couldn't be compared to that of ordinary humans.

Thus, now his longevity is incredibly long, far beyond what other human cultivators could imagine.

"Finally broke through."

Jiang Fan sensed his vast bloodline power and vigorous life aura within, feeling quite satisfied.

For him, the greatest function of the Soaring Snake Technique was naturally to help him break the human lifespan limit and achieve a longer life.

However, the energy contained in this drop of Kui Ox Essence Blood was truly immense.

Even after helping him break through to the Tier Three Late Stage, it only consumed a small portion of the energy.

If he were to refine it completely, it could at least help him cultivate to the Tier Three Perfection level.

It can only be said that True Spirit Essence Blood is indeed a supreme treasure, not something easily obtained.

"The Soaring Snake Technique broke through again? It's so fast."

The Primordial Talisman Pen marveled at the powerful true spirit aura emanating from Jiang Fan.

It had heard that the cultivation of True Spirit Techniques was extremely difficult, much harder than general body cultivation techniques by who knows how many times.

After all, this technique can break the lifespan limit, just thinking about it reveals the level of difficulty.

Moreover, Jiang Fan did not have the support of True Spirit Bloodline.

In this case, the cultivation difficulty reached its peak.

Of course, the benefits of success were also enormous.

Not only does the physique become incredibly strong, but most importantly, it also gains a long lifespan.

This is something any cultivator dreams of.

After all, in the ancient era, every true spirit had a lifespan far longer than human great powers.

The two were not even in the same category.

This is why True Spirit Family is so powerful, because true spirits live for such a long time.

But as for human great powers, a large number would fall after some time, essentially there is no comparison.

"Master, if this cultivation continues, couldn't it really transform into a true spirit?"

"To transform into an innate true spirit from a human body, is such a thing really possible?"

The Ten Thousand Transformations Pill Furnace was full of amazement.

It had seen many body cultivation techniques, but none could compare to the Soaring Snake Technique.

A strong physique is one thing, but a lifespan far beyond that of human cultivators of the same tier, it's simply a heaven-defying technique.

If it were to spread out, who knows how many cultivators would go crazy over it.

Of course, the cultivation difficulty is also extremely astonishing.

Even if this technique were taught, it's likely that very few cultivators would succeed, possibly none.

Because the more powerful a technique, the more restrictions and higher the threshold.

"Generally, true spirits are innate, powerful beings nurtured by heaven and earth."

"But for a postnatal being to cultivate to the level of an innate true spirit, it's truly unimaginable."

"Although I don't know if it can be done, it's not a bad thing for the master."

The Demon-Vibrating Bell said indifferently.

It felt that there was nothing impossible in this world.

Because there were simply too many miracles.

Perhaps its master was one of this world's miracles; otherwise, such feats would not be possible.

"If he could transform into an innate true spirit, he might truly achieve immortality."

The Exquisite Tower was very excited.

Because if one achieves the Dao, everyone around them benefits.

If its master could achieve immortality, then perhaps it could follow its master and ascend to the Immortal Realm.

For it, that would be an immense opportunity.

But Jiang Fan didn't concern himself with what his ancient treasures thought, and with a thought, he immediately opened the virtual panel on himself, revealing a series of data.

[Name: Jiang Fan]

[Life Chart: Great Blessings Equal to Heaven, Attribute: Great Difficulty without Perishing, Blessings Arise]

[Realm: Sixth-Layer Golden Core (80%)]

[Profession: Tier Three Middle Grade Rune Master (85%)]

"A ten-thousand-year lifespan? Indeed, lifespan has made a huge breakthrough."

Upon seeing the data above, Jiang Fan felt immense joy.

He had known that by breaking through to the Tier Three Late Stage, his life force received a huge boost, and his lifespan certainly increased significantly, but he hadn't imagined it increased to a whole ten thousand years at once.

Compared to before, it increased by a full two thousand years.

Undoubtedly, a true spirit technique like the Soaring Snake Technique becomes more difficult to cultivate as it progresses to later stages.

Correspondingly, each small realm breakthrough brings a substantial increase in lifespan.

Just like now, ascending from the Tier Three Middle Stage to the Tier Three Late Stage increased his lifespan by two thousand years.

Few cultivators would believe such a thing if told.

Because there's no spirit medicine in the Cultivation Realm that can help a cultivator increase so much lifespan at once.

Even without any cultivation level improvement, he could easily live ten thousand years today.

Such a long lifespan is comparable to that of a Divinity Transformation Cultivator.

"But it did consume a lot of luck points too."

Jiang Fan looked at the luck points data; currently, there were only a million luck points left.

However, he had received three hundred thousand luck points after overcoming a tribulation.

It was easy to imagine how much destiny was consumed.

But all of this was worth it; otherwise, his Soaring Snake Technique wouldn't have broken through so quickly to the Tier Three Late Stage, and his lifespan wouldn't have increased so substantially.

Besides luck points, his wealth skyrocketed to twenty-five million spirit stones.

The reason for such wealth was because he had looted the treasures of the Iron-winged Sparrow Race, obtaining a large amount of rare resources and spirit stones from them.

This was indeed an overnight fortune.

This also proved that the Western Continent's resources were extremely rich.

Otherwise, a remote Golden Core Demon Race wouldn't possess so many spirit stones and cultivation resources.

It's easy to imagine how terrifying the wealth of Nascent Soul Demon Race or Divinity Transformation Demon Race must be.

"Has the cultivation progress also reached 80%?"

"It seems that reaching Seventh-Layer Golden Core is not far away either."

Jiang Fan felt quite satisfied with his cultivation progress; refining the Kui Ox Essence Blood, while most energy worked on his physique,

a small portion of energy promoted his spiritual energy growth, increasing his cultivation progress to 80%. It's estimated that with a little more cultivation, he could break through to the Seventh-Layer Golden Core.

By then, he would be a late-stage Golden Core cultivator.

For him, naturally, the faster the cultivation progress, the better.

After all, only with strong power can one survive better in the Cultivation Realm.

Boom~~

At this moment, Jiang Fan shifted his mind, and his spiritual sense enveloped the entire Peach Blossom Valley.

He suddenly discovered that compared to a year ago, Peach Blossom Valley was much livelier, with many wooden houses built, and the population had surpassed one hundred thousand.

"How come there are so many humans?"

Jiang Fan blinked and curiously asked.

Because while he was in seclusion cultivating in the Exquisite Tower, the population of Peach Blossom Valley was just over ten thousand people.

But now, it had surpassed one hundred thousand, indeed incredible, where exactly did they come from?
