

Fortune 583

Chapter 583: Gaining the Human Race's Destiny, Again Seeking Fortune and Avoiding Evil_2

It's probably all created by those great human powers.

Even some powerful loose cultivators have to recruit disciples and establish sects to escape karma and ascend to the Immortal Realm.

Moreover, ordinary disciples probably cannot bear the karma of great human powers.

It must be those exceptionally talented disciples, and they are not easily found.

"Indeed, that is the case."

"The earliest human sects were born this way."

"Otherwise, why would some of the selfish great powers be willing to create sects and waste their time."

"But this isn't necessarily a bad thing for the entire human race."

"With each generation passing their legacy down, it forms an ancient heritage and a massive sect strength."

The Primordial Talisman Pen sighed.

In short, this method of escaping karma is simply to pass the responsibility onto one's disciples, then the second generation disciples pass it to the third generation.

In total, it's a generation passing to the next, and this is the method to break free from karma.

"I see."

Jiang Fan nodded, no wonder fortune guided him to the Western Continent. It's probably not just because it contains immense cultivation resources, but also because it's a good place to establish the Primordial Talisman Sect.

If he wants to ascend to the Immortal Realm in the future, he'll certainly need to be rid of all sorts of karmic ties.

And the many disciples of the Primordial Talisman Sect can just bear his karma.

Though he currently doesn't even know how distant his ascension to the Immortal Realm is.

But anything done requires preparation.

Otherwise, when things finally happen, it would be too late.

"Seems like it's still necessary to find a safer place to settle these common people."

Jiang Fan stroked his chin.

To be honest, Peach Blossom Valley still isn't safe enough.

Although this place does have a Tier Three Array, which can resist Tier Three Demon Cultivators, if they have bad luck and face a Tier Four Demon Cultivator, the common people here might all perish.

Even if encountering a Tier Four Demon Cultivator is unlikely, one cannot be too careful.

Sometimes, when calamity strikes, anything can happen.

Only by finding a completely safe place can he have peace of mind.

"If it's an absolutely safe place, it would probably be the Secret Realm World."

The Primordial Talisman Pen spoke.

"Secret Realm World? It is indeed very safe."

"But the timing of opening and closing of the Secret Realm World isn't fixed."

"This might not be suitable as the headquarters of a sect."

Jiang Fan said.

"No, no, what you're talking about are the secret realms left from the Ancient Era, or some special secret realms."

"These secret realms have special rules or have been refined by arrays, hence these problems arise."

"But if you find some newly born secret realms, it's entirely different."

"Secret Realms like this can be opened and closed at will, making them very suitable as the headquarters for a major power."

"In fact, during ancient times, many ancient powers would place their headquarters within Secret Realm Worlds."

"That way, the headquarters of the power would be extremely safe, and enemies would find it difficult to locate them."

"However, in this era, finding such newly born secret realms is incredibly difficult."

The Primordial Talisman Pen explained.

Newly born Secret Realm?!

Upon hearing this, Jiang Fan's eyes flickered. Finding a newly born Secret Realm for an ordinary cultivator is nearly impossible, but with his heaven-defying luck, it might not be unattainable.

The pity is he has no idea when he might find it.

It could be days from now, or maybe years or even decades.

But if it's found too late, it might not be of much use.

If only there was a way to quickly find a newly born Secret Realm, that would be great.

Boom~~

In an instant, Jiang Fan sensed his Luck Points being rapidly consumed.

Ten thousand Luck Points, thirty thousand Luck Points, fifty thousand Luck Points, and finally a total of one hundred thousand Luck Points consumed.

"What's going on?"

Jiang Fan was dumbfounded. He didn't even know what happened, why so many Luck Points were suddenly used up.

But he soon realized why it happened, as a piece of information penetrated deep into his Sea of Consciousness.

A mysterious power tugged at the threads of destiny.

He sensed that in the not-too-distant future, he is certain to find a newly born Secret Realm.

"I see."

"Luck Points not only can be used for cultivating techniques, cultivating Life Talismans."

"They can also be used to make wishes, allowing one's heart's desire to come true, to fulfill one's wishes."

Jiang Fan's eyes sparkled with a glint, and deep in his heart, waves surged.

Undoubtedly, the power of luck is more mysterious and unfathomable than he previously imagined; it's not that simple.

Although not all wishes can be fulfilled, most can be.

For example, if you want to find a particular spirit medicine, a certain treasure, or a specific person, the power of luck will guide you to them, even bringing treasures naturally to your side.

This is a miraculous power that makes wishes come true.

However, you can't just make wishes casually; each wish consumes a great deal of luck.

So this power can't be used often.

Otherwise, with luck quickly exhausted, you'll be beset by misfortunes.

Boom~~

In an instant, with a thought, under the blessing of Fortune-Telling, Jiang Fan's Spiritual Sense spread out, covering an area of a thousand miles, encompassing nearby mountains.

He sensed that deep in a distant valley, a spirit medicine was being nurtured.

It was indeed a thousand-year-old Spirit Medicine — the Seven-Colored Moon Orchid.

It glowed with seven colors, the seven hues continuously flowing, exuding a rich medicinal fragrance that spread over an area of hundreds of kilometers.

This rich fragrance attracted Demon Beasts from all directions, forming a beast tide, surging in.

Undoubtedly, it's on the verge of maturity.

For the nearby Demon Beasts, once this thousand-year-old Spirit Medicine matures, if they consume it, the benefits are unimaginable, surely causing their cultivation to undergo a transformation, creating earth-shaking changes.

"Is there a thousand-year-old Spirit Medicine about to mature?"

Jiang Fan raised his eyebrow, he didn't expect a nearly-mature thousand-year Spirit Medicine to appear near Peach Blossom Valley. To be honest, this is a very rare occurrence.

And he was also delighted in his heart.

If he could consume this thousand-year-old Spirit Medicine, his cultivation would certainly make great strides, making advancement to the Seventh Layer of the Golden Core a matter of course.

Simultaneously, it's not only Demon Beasts appearing in that valley but also several Golden Core Demon Cultivators.

They seemed to sense the fragrance of the thousand-year Spirit Medicine and rushed over.

At least a dozen Golden Core Demon Cultivators appeared, making it an unprecedented scene.

Boom!

At this time, Jiang Fan sensed his Fortune-Telling suddenly vibrating, and a message instantly penetrated into his Sea of Consciousness.

"The Spirit Medicine matures, fortune descends, if heaven gives it and you do not take, you'll regret it."

"Go to the valley to seize the thousand-year-old Spirit Medicine Seven-Colored Moon Orchid, eradicate all enemies, and you will obtain a Fifth-Grade Opportunity, with no subsequent hidden dangers, and no risk, very auspicious."

"Watch the changes quietly, neither fighting nor seizing, observing, gaining nothing, achieving nothing, but subsequently bringing calamity to Peach Blossom Valley, perhaps leading to a life-threatening situation, very ominous."

"Seize the Spirit Medicine Seven-Colored Moon Orchid, but leave a fish that escapes the net, obtain a Fifth-Grade Opportunity, but leave hidden dangers, possibly exposing Peach Blossom Valley, very ominous."

Sensing this information, Jiang Fan's eyes sparkled, and countless thoughts surged in his mind.

No doubt, the maturity of the thousand-year-old Spirit Medicine Seven-Colored Moon Orchid is both an opportunity and a great calamity.

Because it matures near Peach Blossom Valley.

This will attract a multitude of demons to come.

With so many demons gathering at this place, it would easily expose Peach Blossom Valley.

Clearly, if any one of these demons passes through Peach Blossom Valley, they would discover something amiss.

They might even discover that numerous humans inhabit this place.

This is why the Fortune-Telling Talisman warns of great hidden dangers, bringing massive calamity to Peach Blossom Valley.

"It's clear there's only one path now, which is to kill all these demon cultivators."

"If even one escapes, the news might spread."

"By then, the location of Peach Blossom Valley would be exposed, inviting massive disaster."

"After all, the Demon Race remains immensely wary of the Human Race."

"If they find out the Human Race has formed a force again, they might come in countless numbers to annihilate humans."

Jiang Fan's eyes glowed with a cold light, and a faint killing aura enveloped him.

This opportunity, if left unseized, would undoubtedly leave massive hidden dangers and risks.

And that's when heaven gives and not taking results in regret.
