Chapter 881: First-Layer Divinity Transformation, The Path of Divinity Transformation Cultivation (2)

This can be said to be one of his greatest supports.

It's rather unfortunate that he has presently only obtained six pieces and hasn't been able to unleash the full power of this secret treasure.

If he could obtain nine pieces, perhaps even a Mahayana Cultivator might not be able to detect his presence.

Nevertheless, the power of the six Celestial Cicada Spirit Leaves is more than sufficient for now.

After all, meeting a cultivator above the Integration stage is not an easy occurrence.

Whoosh!

As he thought of this, Jiang Fan activated the Celestial Cicada Spirit Leaves, concealing his entire aura, even transforming his body into nothingness. He quickly vanished from the spot.

At this moment, numerous cultivators rushed over to the tribulation area.

Unfortunately, no matter what they did, they couldn't find any trace of Jiang Fan.

Even when the Void Refining Cultivators intervened, it remained the same.

They were quite regretful at being unable to meet such an extraordinary genius.

However, they also understood that the other party did not wish to meet them, so they were helpless.

After only half a day of searching, these cultivators stationed in the Fengming Mountains quickly left.

Nonetheless, this event spread throughout Fengming City and even to other cities. An extraordinary prodigy had once crossed the tribulation in the Fengming Mountains, summoning 108 strands of Divinity Transformation Celestial Thunder.

But this matter had little to do with Jiang Fan anymore.

He remained within the Fengming Mountains, arbitrarily finding a cave to hide in and began secluded training again.

A day later.

Jiang Fan completely solidified his First-Layer Divinity Transformation cultivation, and the Fengming Mountains also returned to their former calm.

At this time, he became familiar with the abilities possessed by a Divinity Transformation Cultivator.

Although he had previously learned much from ancient texts, it couldn't compare to personal experience.

"After advancing to Divinity Transformation, the first thing to transform is the power of the Law Domain."

"Now I have already mastered the Divinity Transformation Law Domain."

Jiang Fan's eyes gleamed with a sharp light.

With a thought, a vast power of the Law Domain effortlessly enveloped twenty thousand kilometers in all directions.

Within the region covered by the Law Domain, he was like a deity, entirely controlling every wisp of the power of heaven and earth.

Even a single thought could unleash terrifying divine might.

While the Law Domain of Nascent Soul Cultivators merely stimulated a portion of the power of heaven and earth, the Law Domain of Divinity Transformation Cultivators was complete mastery, even perfect mastery.

If a Divinity Transformation Cultivator were willing, they could utterly crush a Nascent Soul Cultivator, preventing them from mobilizing any power of heaven and earth, making the gap between the two as vast as heaven and earth, utterly incomparable.

"A Divinity Transformation Cultivator can perfectly control the power of heaven and earth because of the Primordial Spirit."

"After nurturing the Primordial Spirit, one can achieve Soul Fusion with Heaven and Earth."

"The immense soul power becomes a part of heaven and earth, naturally enabling perfect control."

Jiang Fan clenched his fist.

He activated his Primordial Spirit's power, enveloping all directions, with boundless soul energy merging into the twenty-thousand-kilometer area. At this moment, he seemed to become the lord of this region, capable of easily mobilizing every wisp of the power of heaven and earth.

Moreover, the stronger the Primordial Spirit's power, the more mighty the power mobilized.

Thus, every gesture of a Divinity Transformation Cultivator exudes divine might.

In the current era of the Void Realm, Divinity Transformation Cultivators are absolute overlords.

No matter how many cultivators besiege them, it's challenging to shake a Divinity Transformation, which is the primary reason.

"This is the power of the Primordial Spirit, reaching the extent of interfering with reality."

"However, its utility is not limited to combat alone."

"In times of danger, one can also perform a Primordial Spirit Emergence."

"Moreover, possessing a Primordial Spirit greatly enhances comprehension and memory."

Jiang Fan earnestly pondered the power of the Primordial Spirit.

Undoubtedly, after advancing to Divinity Transformation, his power underwent an earth-shattering transformation compared to before.

"Kid, I believe you are beginning to understand the various wonders of Divinity Transformation Cultivators."

"After advancing to Divinity Transformation, cultivation differs significantly from before."

"If cultivation before Divinity Transformation belonged to the Qi Cultivation tier, then after Divinity Transformation, it belongs to the Refining God tier."

"In the Divinity Transformation Nine Layers, the ascension in each realm is a process of strengthening the Primordial Spirit."

The Primordial Talisman Pen began to expound the mysteries of Divinity Transformation Realm cultivation.

"Strengthening the Primordial Spirit?"

Jiang Fan also knew that the Primordial Talisman Pen was an Inheritance Dao Artifact, akin to a personal elder, thoroughly aware of cultivation in Divinity Transformation, Void Refining, Integration, and so on.

No matter how many ancient texts he read, they couldn't compare to the countless years of experiential cultivation shared by numerous cultivators through the Primordial Talisman Pen.

As long as the Primordial Talisman Pen remained alive, the sect's inheritance would be unbroken.

"Indeed, it's about strengthening the Primordial Spirit."

"The most crucial trait of Early Stage Divinity Transformation cultivators is multitasking."

"Advancing to the First-Layer Divinity Transformation, one can achieve multitasking to ten, allowing one to divide their consciousness into ten, understanding different methods, without conflict within the mind."

"Reaching the Second-Layer Divinity Transformation, one can achieve multitasking to a hundred, breaking through layers, simultaneously understanding tools, arrays, methods, talisman arts, and other techniques, with efficiency that doesn't compare to before."

"Upon reaching the Third-Layer Divinity Transformation, one can achieve multitasking to a thousand, with computational ability reaching an astounding and unimaginable level."

"Precisely because of this, cultivators of the Ancient Era would not overly delve into various cultivation techniques in the Low Tier realm, quickly elevating their cultivation to the Divinity Transformation level."

"Once one becomes a Divinity Transformation Cultivator, one can multitask, researching multiple cultivation techniques with an efficiency thousands of times better. Thus, many Divinity Transformation Cultivators are versatile, with a basic understanding of various cultivation techniques."

The Primordial Talisman Pen explained.

"This."

Jiang Fan's pupils constricted, internally shocked, having underestimated the strength of Divinity Transformation Cultivators.

The combat ability of cultivators at this level was not just godlike; their learning ability too was godlike, representing a comprehensive evolution, not the same species as before.

No wonder during the Ancient Era, the major sects regarded Divinity Transformation Cultivators as truly elite.

Perhaps only after advancing to Divinity Transformation, could one claim to have a preliminary grasp of the secrets of cultivation.

One has preliminarily started evolving towards the direction of the Immortal, possessing some non-human traits.

"If advancing to Mid-stage Divinity Transformation, the Primordial Spirit will further transform, nurturing soul tendrils."

"For example, a Fourth-Layer Divinity Transformation cultivator can condense up to a thousand soul tendrils, extending them from the center of the body, sensing surrounding situations more clearly than the eye can see, even observing matter structures."

"A Fifth-Layer Divinity Transformation cultivator can condense three thousand soul tendrils."

"A Sixth-Layer Divinity Transformation cultivator can condense ten thousand soul tendrils."

"Furthermore, these soul tendrils or the thoughts of the Primordial Spirit can split off, remain on other cultivators, monitoring their every move."

The Primordial Talisman Pen continued.

Upon hearing this, Jiang Fan was speechless, unsure of what to say.

Monsters, indeed, Divinity Transformation Cultivators are monsters; this has become a non-human existence.

He knew the Refining God tier was exceptionally terrifying but didn't expect it to be to such a degree—it's terrifying.

This ability far surpasses that of Nascent Soul Cultivators.

No wonder Divinity Transformation Cultivators are high above in the Void Realm, truly resembling deities.

"If advancing to the Later Stage of Divinity Transformation, the Primordial Spirit will continue to transform, gaining the ability to seize souls."

"This means that when tens of thousands of tendrils and thoughts extend, entering another's body, they can suppress their thoughts and control their bodies. Upon reaching this level, the thoughts of Divinity Transformation Cultivators can walk among humans, extremely terrifying."

"If a Late Stage Divinity Transformation Cultivator wants to take over a mortal's body, it would be a trifling matter."

"However, it's not possible to randomly seize a body."

"Because the power of the Primordial Spirit is so immense, an ordinary cultivator's body cannot withstand the power of the Primordial Spirit."

"Even if the body takeover is successful, the body might shatter and die."

"Due to this, Late Stage Divinity Transformation Cultivators needing to take over due to severe injury must carefully select to succeed."

The Primordial Talisman Pen stated solemnly.

Chapter 882: Celestial-Fighting Axe Talisman, Another Destiny Prompt

"If that's the case, how can one strengthen their Primordial Spirit?"

Jiang Fan asked.

Undoubtedly, strengthening the Primordial Spirit is the path of Divinity Transformation Cultivators and the most important cultivation method.

"In fact, different cultivators have different methods to strengthen their Primordial Spirit."

"For example, Technique Cultivators, Sword Cultivators, and other battle types of cultivators can rapidly enhance their Primordial Spirit through special visualization charts or battles."

"As for Pill Cultivators, they promote their Primordial Spirit by refining pills, and each successful refinement of a Tier Five Treasure Pill can strengthen the Primordial Spirit. The process of alchemy is actually the process of tempering the Primordial Spirit."

"Considering us Talisman Cultivators, we strengthen our Primordial Spirit by refining talismans, especially high-tier talismans. By observing the patterns of talismans and comprehending various profound laws, we can quickly enhance the power of the Primordial Spirit. Every talisman making is essentially an exercise in tempering the Primordial Spirit."

"Of course, the same applies to Array Cultivators and Artifact Cultivators."

"Why does the Cultivation Realm only have four orthodox Cultivation Techniques: pill, talisman, artifact, and array?"

"All other techniques are considered unorthodox."

"It's not just because they are crucial to cultivators, but also because these techniques greatly assist in cultivation. The higher the cultivation, the greater the assistance."

The Primordial Talisman Pen explained.

"I see."

Jiang Fan suddenly understood.

No wonder the Cultivation Realm so highly regards the four techniques; it's not simply because they are vital to cultivators.

More important is that these techniques become increasingly beneficial in the later stages.

But those unorthodox techniques, such as controlling insects, refining corpses, divination, curses, puppetry, etc., provide great help to cultivators during early stages, swiftly boosting their combat power.

However, in later stages, they struggle to enhance the cultivators' Primordial Spirit.

Or rather, the degree of enhancement doesn't match that of the four Cultivation Techniques.

Delving deeply into them leads to a dead end, with the path narrowing.

That's why in the Ancient Era, cultivators considered these techniques unorthodox.

They simply couldn't compare to the bright paths of pill, talisman, array, and artifact, which only expand as researched further.

"Then how does the Mixed Element Talisman Scripture cultivate the Primordial Spirit?"

Jiang Fan continued to ask.

"It's actually simple; engraving the Life Talisman is the key."

"The process of engraving the Life Talisman is indeed the process of tempering the Primordial Spirit."

"The Divinity Transformation Cultivators of the Ancient Era's Primordial Talisman Sect followed this method."

"Talented cultivators naturally engrave the Thirty-Three Celestial Spirit Talisman."

"While those with ordinary talent engrave regular talismans."

"You should have realized already."

"At the Nascent Soul Level, you engraved nine Thirty-Three Celestial Spirit Talismans, tremendously benefiting your soul and rapidly boosting your Soul Power."

"Reaching the Divinity Transformation Level, your cultivation speed will increase even more."

The Primordial Talisman Pen explained.

It was quite emotional that Jiang Fan's previous cultivation had laid incredibly solid foundations over and above the Divinity Transformation level.

Ordinary cultivators find their cultivation speed drastically slowing after reaching Divinity Transformation.

Without much progress, hundreds of years could pass.

But Jiang Fan's cultivation speed would continually accelerate.

That's the huge benefit of having a strong foundation.

"Hmm."

Jiang Fan nodded.

His next cultivation was simple—engraving new Thirty-Three Celestial Spirit Talismans.

Having advanced to the First-Layer Divinity Transformation, he could engrave new talismans.

He also decided on the name for his new Life Talisman: the Celestial-Fighting Axe Talisman.

This talisman originated from the Immortal Artifact Celestial-Fighting Axe.

Unlike other Immortal Artifacts like the Heaven-destroying Sword and Heaven-Dominating Saber, the Celestial-Fighting Axe's capability is straightforward—strength, unmatched power against any enemy.

Holding the Celestial-Fighting Axe means wielding the authority of strength, akin to embodying an ancient giant god, unleashing earth-shattering power with a single axe swing.

Once mastering this talisman, he will possess unrivaled power capable of shattering array barriers and overcoming any siege.

Immediately, he immersed himself in comprehending the mysteries of the Celestial-Fighting Axe Talisman, as only with thorough grasp of its mysteries could he successfully engrave it.

.....

In the blink of an eye, a month swiftly passed.

"Succeeded."

Sitting cross-legged on the ground, Jiang Fan's face showed slight smiles and joy.

He expended a substantial amount of Luck Points to enhance his comprehension, successfully unlocking the mysteries of the Celestial-Fighting Axe Talisman and seamlessly integrating it into his Primordial Spirit.

Within his Primordial Spirit, a new talisman emerged, containing countless law lines elegantly woven together, forming a giant axe.

As if the projection of the Immortal Celestial-Fighting Axe Talisman was imprinted here, radiating an intimidating sharpness.

With a thought, he activated the talisman.

Instantly, a giant axe appeared in his hand, as his body felt a mighty power rising visibly, with each cell enveloping awe-inspiring energy.

Wielding the axe, he unleashed destructive force, resembling an ancient giant god capable of earth-shattering power—extreme prowess of the Celestial-Fighting Axe Talisman.

A single axe swing could obliterate all laws.

Even activating the talisman imbued his heart with endless battle spirit, immune to any Illusion Technique threatening his will.

Chapter 883: Celestial-Fighting Axe Talisman, Another Fate Prompt_2

Without a doubt, the emergence of this Life Talisman will become another trump card for him.

At this thought, Jiang Fan's heart moved, and he immediately opened the virtual panel on his body.

[Name: Jiang Fan]

[Life Chart: Great Blessings Equal to Heaven, Attribute: Survive Great Calamities, Future Blessings Await]

[Lifespan: 150,000 years]

[Spirit Root: Celestial Spirit Root]

[Luck Points: 20 million]

[Wealth: 12 billion Spirit Stones]

[Cultivation Technique: Soaring Snake Technique, Divinity Transformation Chapter (Tier Five Early Stage)]

[Cultivation Technique: Mixed Element Talisman Scripture, Fifth Layer]

[Innate Divine Techniques: Emperor's Gaze, Shrinking Earth into Inches, Palm Wind, Water Control, Soul Devourer, Seeing Me as Heaven]

[Life Talisman: Yin Yang Mandarin Duck Talisman (Great Success), Heaven-Suppressing Ring Talisman (Beginner), Heaven-Covering Wheel Talisman (Beginner), Heaven-Destroying Sword Talisman (Beginner), Heaven-Dominating Blade Talisman (Beginner), Heaven-Transforming Staff Talisman (Beginner), Heaven-Dependent Spear Talisman (Beginner), Heaven-Reaching Bridge Talisman (Beginner), Heavenly Glory]

Bracelet Talisman (Beginner), Venerable Heaven Crown Talisman (Beginner), Celestial-Fighting Axe Talisman (Beginner)]

[Realm: First-Layer Divinity Transformation (55%)]

[Profession: Tier Five Low Grade Talisman Master (30%)]

Without a doubt, compared to before, the data on his body has improved tremendously.

First and foremost, of course, is the lifespan. After advancing to the First-Layer Divinity Transformation, his lifespan has increased significantly, reaching a level of 150,000 years, which is an exceedingly long life.

If word got out, it would shock countless Human Race cultivators.

Even these great powers of the Human Race, taking large amounts of life-extending elixirs and spirit medicines, couldn't achieve such long lifespans.

"Is it only 20 million Luck Points remaining?"

"Indeed, I consumed a lot of Luck Points before."

Jiang Fan touched his chin.

Previously, he crossed a tribulation and gained quite a few Luck Points.

However, because of helping other cultivators activate their Life Charts and comprehending the Celestial-Fighting Axe Talisman, he consumed a large amount of Luck Points, so now, only 20 million are left.

Of course, compared to before, this is already an enormous amount of Luck Points.

However, after advancing to the Divinity Transformation Realm, the consumption of Luck Points will undoubtedly become more terrifying.

By then, 20 million Luck Points would be negligible.

Moreover, he would never think he has too much Luck.

Such mysterious energy as Luck is, naturally, the more, the better.

"However, the progress of the First-Layer Divinity Transformation is already at 55%, huh?"

"I didn't expect the cultivation speed to be this fast."

"But this is thanks to the gift from the Heavenly Dao."

"Without the gift from the Heavenly Dao, it wouldn't have improved so rapidly."

"Of course, it is also greatly related to the cultivation environment of this world."

"If it were the Void Realm, it probably wouldn't have ascended so quickly either."

Jiang Fan was quite satisfied with his cultivation progress.

Undoubtedly, leaving the Void Realm was indeed to avoid tribulations, but in some way, stepping outside the shackles of the Void Realm instead hastened his cultivation progress.

This Spirit Ruins Realm is indeed a Land of Blessings for him.

Leveraging various opportunities in this world will surely allow him to ascend to a higher realm.

Boom~~

At this moment, a piece of information suddenly entered the depths of his sea of consciousness.

"Your actions have already profoundly influenced the future of this world. The five Divinity Transformation Demon Cultivators you previously slew were moles planted by the Demon Race in the Fengming Mountain Range, simultaneously serving as the catastrophe for the Child of Destiny, Ye Linglong.

But due to your intervention, which resulted in the deaths of these five Divinity Transformation Demon Cultivators, Ye Linglong smoothly entered the Fengming Secret Realm, allowing her to easily obtain the immortal's inheritance within."

However, her actions utterly infuriated the Demon Race, prompting them to decide to launch an all-out war against the Human Race. The war between the Human Race and the Demon Race is about to break out, and a Demon Cave will descend upon the Fengming Mountain Range. There will be endless demon creatures flooding this area."

"Destiny will grant you guidance."

"Destiny Hint One: Run, swiftly leave the Fengming Mountain Range, and flee a million kilometers southwest. This place is about to become a battlefield between the Human Race and the Demon Race. At that time, there will be great powers of Refining Void and even Integration. Any slight mistake will lead to complete demise. There's no need to remain here and seek death."

"Destiny Hint Two: As the saying goes, the bigger the storm, the more valuable the fish. In this unprecedented war between humans and demons, you can still find a hint of fortune.

Fly ten thousand kilometers southwest, and you will arrive at a White Tiger Mountain. At that time, a cultivator at Divinity Transformation Perfection named Xu Ling will appear there.

However, he is a spy for the Demon Race, and his identity was long discovered by the Great Xuan Dynasty. He will be severely injured by a Refining Void cultivator of the Great Xuan Dynasty, but he will still use a Great Teleportation Talisman to instantly escape from Fengming City, reaching White Tiger Mountain.

You can personally take action to kill this Demon Race spy, who carries treasures accumulated over years. If you kill him, you can obtain great fortune."

Perceiving this message, Jiang Fan was momentarily stunned and quite speechless.

This was simply an unexpected disaster, practicing peacefully in the Fengming Mountain Range but unexpectedly facing such a terrifying disaster, and it's a war between the Human Race and the Demon Race.

The source of the disaster was the Child of Destiny, Ye Linglong.

As the Child of Destiny, and simultaneously the Child of Calamity, such individuals invariably stir up enormous waves wherever they go, just like now.

However, without these massive calamities, she couldn't rapidly rise, as calamity and fortune are essentially one, containing precious opportunities within the greatest calamities.

Yet he didn't expect Ye Linglong, having just activated her Life Chart, to immediately encounter such a precious opportunity and even obtain an immortal inheritance; it was indeed an exaggeration.

Without a doubt, Ye Linglong will swiftly rise and become unstoppable after receiving this inheritance.

"But this matter does have something to do with me, one way or another."

"If I hadn't killed those several Divinity Transformation Demon Cultivators, Ye Linglong would have needed time to obtain this precious inheritance."

"But with the fall of those Divinity Transformation Demon Cultivators, it essentially helped Ye Linglong resolve her calamities ahead of time, instead leading her to some mid-stage encounters."

"Such encounters will naturally accelerate Ye Linglong's growth but also bring about greater calamities."

Jiang Fan narrowed his eyes.

He felt destiny was indeed unfathomably mysterious, with everyone's choices bringing endless variables to the future; this is the capricious nature of destiny, not even immortals can control it.

But his innate divine technique can.

If this spreads, it could shake even immortals.

"However, this change isn't necessarily a bad thing for me."

"Indeed, the greater the storm, the more valuable the fish."

"Without this change, how could I ambush and kill Fengming City Lord Xu Ling?"

"I didn't expect this individual to actually be a Demon Race spy."

Jiang Fan touched his chin.

Having stayed in Fengming City for many days, he naturally gathered quite a bit of intelligence on the city.

Among them, Xu Ling, as the city lord of Fengming City, is renowned.

According to local rumors, this person is a refined gentleman, loves his people as his own children, is very amicable, and never holds grudges with others; in short, a good man.

Unexpectedly, this was merely a facade, with him secretly being a Demon Race spy.

His identity was even already detected by the Great Xuan Dynasty.

The reason they hadn't acted was merely to set a long trap to catch a big fish.

This is the game between the Human Race and the Demon Race.

Without a doubt, the covert schemes are far more than he imagined, and much more terrifying.

"Is it only safe to head southwest?"

"That place seems to be where Donglu City is located."

After acquiring knowledge during this period, Jiang Fan also became somewhat familiar with the Great Xuan Dynasty.

The place he was at was a large province called Donglu Province, with Fengming City being a city within it.

The state city is Donglu City, ruled by Donglu Marquis Yue Peng, a Ninth-Layer Void Refining cultivator.

Compared to the state city, Fengming City is just a small speck.

Residing in Donglu City could certainly secure a large amount of cultivation resources.

This would surely be greatly beneficial for his upcoming cultivation journey.

"Fengming City Lord Xu Ling, huh? I must kill him."

Thinking of this, Jiang Fan's figure flashed, quickly tidying up everything, and flew off in the direction of White Tiger Mountain.

Chapter 884: Inheriting the Immortal's Legacy, the Rise of the Child of Destiny
Fengming City Lord's Mansion.

At this moment, a middle-aged man in a black robe with a goatee appeared in the garden.

He was the City Lord Xu Ling.

His eyes revealed a profound gaze, as if containing endless secrets.

Whoosh whoosh whoosh!!!

The next second, numerous figures appeared in the garden, surrounding Xu Ling tightly.

"When did you discover me?"

Xu Ling spoke indifferently, looking at these suddenly appeared figures, most of whom were Divinity Transformation Perfection cultivators, but the leader was a Void Refining Cultivator.

And the other side must be the Hidden Guard of the Great Xuan Dynasty.

As long as they appeared here, it meant that he was completely exposed.

"About ten years ago."

"You've done many things, thinking they were flawless."

"But you were unaware that every move you made was in our sight."

The elder leading spoke, he was Hidden Guard Sima Li, a Void Refining Cultivator.

"Were my every move truly in your sight?"

"If that were true, then do you know that a Demon Cave is about to appear in the Fengming Mountain Range?"

Xu Ling smiled faintly, appearing confident and poised.

Demon Cave?!

With those words, the faces of many Hidden Guards changed drastically, showing expressions of disbelief.

Of course, they knew how terrifying a Demon Cave was.

It is said that Demon Cave is part of a powerful demon's body from the Demon Race, capable of spawning innumerable demons, and also becoming a Void passage, connecting to other Demon Caves.

In other words, once a Demon Cave appears, it becomes a stronghold for the Demon Race, from which countless demons will emerge.

Unless the Demon Cave is destroyed, these demons and demons will continuously corrupt the surrounding areas.

By then, areas corrupted by the Demon Cave will be unfit for human habitation.

Even with the strength of the Great Xuan Dynasty, eliminating a Demon Cave would require a tremendous price.

They completely didn't anticipate a Demon Cave appearing in the Fengming Mountain Range.

For the humans of this grand state, this news is akin to the end of the world.

"It's not just Fengming City; Demon Caves will appear in many grand states of the Great Xuan Dynasty."

"This is a full-scale offensive by the Demon Race against the Human Race."

"If we can't hold them off, the Human Race will completely perish in the Spirit Ruins Realm."

Xu Ling said indifferently.

"You're simply insane; why would you betray the Human Race like this?"

A Hidden Guard, shocked and furious, stared angrily at Xu Ling, wishing to tear him apart.

Bringing the Demon Cave into the Fengming Mountain Range is outright treacherous, unforgivable.

"Every man for himself, or heaven and earth extinguish."

"On the surface, the Great Xuan Dynasty is the dynasty of the Human Race, but the true power lies with you Noble Families."

"How can commoner-born cultivators like us ever have our day?"

"All high-tier resources are monopolized by you families."

"Even if I wish to obtain a Void Shattering Xuanhuang Pill, you preclude me with baseless charges."

"Moreover, my lifespan is about to run out, yet I refuse to die, so naturally, I can only take refuge with the Demon Race."

"So I'm no longer human, I'm becoming a demon now."

Xu Ling sneered coldly.

"Utter nonsense! A Void Shattering Xuanhuang Pill, a Tier Six Elixir, even we struggle to obtain, let alone you."

"Pretending to be oppressed by us Noble Families; if we really oppressed you, could you have become City Lord?"

"A purely selfish scoundrel, stop your act here."

A Hidden Guard said furiously, itching to tear him to shreds.

"I'll first capture you, then conduct a Soul Search to see what you truly know."

Void Refining Cultivator Sima Li spoke murderously, his large hand reached out, resonating with the surrounding void, and a Void hand grabbed towards Xu Ling.

At this moment, the void for hundreds of miles was frozen, and the surrounding cultivators couldn't move.

This is the power of a Void Refining Cultivator, able to manipulate Void Power, incomparable to Divinity Transformation.

"Hmph, attempt to kill me? It's not that simple."

Xu Ling had long anticipated this; he instantly took out a high-tier talisman from his body — the Grand Shift Talisman.

This talisman ignited instantly, transforming into a surge of Void Energy, enveloping him entirely.

"Tier Six Talisman, Grand Shift Talisman, where on earth did you acquire such a precious talisman?"

Seeing this, Void Refining Cultivator Sima Li's face changed dramatically.

He sensed Xu Ling's body escaping his control.

Boom!

In an instant, Xu Ling's body departed Fengming City, his entire form escaping into the void.

Although Sima Li's hand struck Xu Ling, the terrifying force attempted to permeate his body, causing Xu Ling to spit blood, sustaining severe injury.

Even so, he only sustained severe injury.

Soon, the power of the Grand Shift Talisman whisked him away, whereabouts unknown.

"I fear Xu Ling knew he was exposed all along, and so he went with the plan."

"This time, we've been fooled."

Void Refining Cultivator Sima Li's face turned incredibly grim, to be tricked by a mere Divinity Transformation Cultivator was infuriating, leaving him unsure how to report to his superiors.

After all, Xu Ling was a major criminal and key figure, yet he escaped right under his nose, destined for severe punishment.

But the power of the Grand Shift Talisman was exceedingly strong, instantly allowing a cultivator to flee hundreds of thousands of kilometers.

Chapter 885: Inheriting the Immortal's Legacy, the Rise of the Child of Destiny (Part 2)

Additionally, with the Demon Cave about to appear, he also lacks the ability to track the opponent.

"My lord, it's said that a significant event happened in the Phoenix Cry Mountain Range."

"Someone obtained the Immortal's inheritance inside the Secret Realm of Phoenix Cry."

"It's precisely because of this event that the demons of the Phoenix Cry Mountain Range were stirred up."

"They want to kill the cultivator who received the Immortal's inheritance."

A Hidden Guard spoke up, explaining the ins and outs of the matter.

Initially, the Demon Cave's plan was not to detonate so soon because the timing was not yet fully ripe.

But they discovered that a cultivator had obtained the Immortal's inheritance.

If that person were to fully grow, it would be an unimaginably great threat to the Demon Race.

Therefore, they were compelled to initiate their plan ahead of schedule, attempting to unleash a magical disaster to kill the cultivator who received the inheritance.

"Who exactly obtained the Immortal's inheritance?"

Void Refining cultivator Sima Li immediately inquired.

"A Foundation Establishment cultivator named Ye Linglong."

"It's said this was during a trial held by Fengming City Dao Academy, in which many academy students participated."

"Unexpectedly, this Foundation Establishment cultivator Ye Linglong was favored by destiny and during the trial received the Immortal's recognition, obtaining the Immortal's inheritance, which led to a series of incidents."

A Hidden Guard briefly explained the matter; it was all because of a Foundation Establishment female cultivator named Ye Linglong that such a significant event occurred.

"A Foundation Establishment female cultivator actually received the Immortal's inheritance?"

Upon hearing this, Void Refining cultivator Sima Li was stunned. He also did not expect a mere Foundation Establishment cultivator to receive the Immortal's recognition. To be honest, the existence of Immortal's inheritance in the Phoenix Cry Secret Realm was known to some high-tier cultivators.

Unfortunately, many people attempted to obtain it but all failed.

Originally, he thought no one could obtain the Immortal's inheritance in the short term, but the appearance of this Foundation Establishment cultivator Ye Linglong changed everything; it was truly incredible.

"Where is Ye Linglong, why hasn't she been brought here immediately?"

Void Refining cultivator Sima Li's eyes showed a glimmer, and he immediately spoke out.

There was no doubt that Ye Linglong must be a peerless prodigy; if properly nurtured, she might have a chance to become an Integration or even Mahayana cultivator in the future, and she was a seed of the Immortal.

More importantly, she possessed the Immortal's inheritance and might have treasures left by the Immortal.

This was a huge temptation for a Void Refining cultivator like him.

Although high-tier cultivators like him seizing the opportunity of a Foundation Establishment cultivator would indeed harm his reputation, this was the Immortal's inheritance, and some reputation counted for little.

"She has already been taken away by Lord Dongfang Rui."

A Hidden Guard said helplessly.

This Dongfang Rui is also a Hidden Guard and a Void Refining cultivator, with a status no lower than Sima Li's.

"What? Taken away by that Dongfang Rui guy?"

"How does he have the gall for that?"

Upon hearing this, Sima Li was furious, eager to immediately confront him.

He thought this Dongfang Rui was surely like him, wanting to seize the Immortal's opportunity from the Foundation Establishment cultivator.

"Because Ye Linglong is not simple, her body bears royal blood."

"She is possibly a princess lost among the commoners."

A Hidden Guard spoke solemnly.

"How could it be?"

Sima Li was stunned, involuntarily shivering, for if she truly was a princess of the Great Xuan Dynasty, then all his schemes would be useless.

Even dukes and princes could not dare to seize a princess's Immortal inheritance unless they sought death.

"Initially, we also had doubts."

"However, our Hidden Guards have means to detect royal blood."

"Additionally, the princess's bloodline is incredibly dense, possibly being direct lineage."

"After knowing this, Lord Dongfang Rui personally took action to bring her back and plans to take her to the imperial capital."

A Hidden Guard explained.

"I see."

Sima Li nodded, having no further thoughts.

He instinctively felt that Ye Linglong carried immense trouble on her shoulders; a princess lost among commoners with royal blood was a terrifying tempest just thinking about it.

Should he get involved, no number of lives would suffice to survive.

He would rather think about how to cope with the upcoming disaster from the Demon Cave.

.....

Whoosh!

At this time, White Tiger Mountain.

Suddenly, a black hole appeared near this mountain, and then a figure fell from the black hole, crashing heavily onto the ground and creating a large pit.

This person was Xu Ling, the City Lord of Fengming City.

He used the Great Teleport Talisman to escape from Fengming City.

But before leaving, he had suffered a strike from a Void Refining cultivator, his body severely wounded.

"Damn Sima Li, just wait; I will surely repay this humiliation in the future."

"Who would have thought a Void Refining cultivator would be so terrifying, nearly killing me with just one strike."

"Without the Great Teleport Talisman, I might have truly died."

"It seems the gap between Divinity Transformation and Void Refining is just too great to bridge."

"However, this time I obtained great merit, possibly receiving rewards from the Demon Race to help me advance to Void Refining. Once advanced, my lifespan and strength would soar."

"Wait, why are there other cultivators here?"

Xu Ling clenched his fist, his eyes filled with endless ambition and desire.

But soon, he realized that near this unknown mountain peak, appeared a Divinity Transformation cultivator, who looked like a young man, yet his cultivation was deep and immeasurable.

And the other party immediately discovered him, seemingly waiting for him here.

But he used the Great Teleport Talisman for random teleportation; how could this person know where he would appear?

"Damn, scared me! I thought it was Hidden Guards ambushing here."

"Didn't expect it's just a First-Layer Divinity Transformation cultivator."

"Almost scared me to death."

"You damn brat."

But Xu Ling quickly discovered the young cultivator in front of him was only at First-Layer Divinity Transformation, while he himself was at Divinity Transformation Perfection. Even though severely injured, he was not someone this guy could challenge.

Soon, he revealed a ferocious expression, intending to kill this brat immediately.

The person waiting here for a long time was naturally Jiang Fan.

Seeing the sudden appearance of this Divinity Transformation cultivator, he knew his target finally emerged.

Thus, he had no hesitation, and immediately struck ruthlessly.

"Kill!"

Jiang Fan's eyes showed a cold glint, activating his Life Talisman—Celestial-Fighting Axe Talisman.

Instantly, the Celestial-Fighting Axe Talisman suspended in mid-air burst into dazzling golden light, with runes flowing like living creatures, transforming into a gigantic golden axe that covered the sky.

The axe bore ancient patterns from the dawn of chaos, with edges flowing like liquid lava, and the handle seemed tempered from myriad stars, faintly outlining the image of towering ancient divine beings.

Upon its formation, the void seemed crushed by divine power, emitting a dull hum, and a primordial domineering aura swept through the world—carrying the pressure of ancient deities creating the world.

Within the axe, a shadow of an ancient divine being wielding the gigantic axe condensed, its muscular lines bulging, with eyes blazing with fire of destruction and creation, every inch of its muscles containing the power to tear through space-time.

At this moment, Jiang Fan discovered his strength had increased exponentially, as if his body was empowered by ancient divine power, uncertain of to what extent his strength had risen.

Boom!

With an invisible roar, the giant axe charged towards Xu Ling with the force of ten thousand pounds.

As the axe blade sliced through the air, the space tore like fabric, a golden slashing beam stretched across the sky, disrupting the power of heaven and earth, with thunderbolts exploding at the axe wind's edges.

"How is this possible?!"

Xu Ling was utterly terrified, never expecting such fearsome power from a mere First-Layer Divinity Transformation cultivator, far beyond his imagination, especially when he was already heavily injured and couldn't exert much strength.

Unexpectedly unprepared, how could he defend?

"It's over, completely over."

Xu Ling was in utter despair, for despite being readied for everything, even facing Void Refining cultivators with confidence in surviving.

Who would expect a prodigy like him to someday meet his end at the hands of an unknown nobody, so disgraceful, so humiliating.

In mere moments, Xu Ling couldn't even utter a scream before being swallowed by ancient divine power, his body and soul reduced to dust in the golden light, leaving not a trace.

Chapter 886: Human Path Destiny, Recognition of the Heavenly Dao

Although Xu Ling was already dead, the residual power was relentless, the force of the giant axe striking heavily on the earth.

Mountains crumbled, thousand-foot high majestic mountain ranges were split like tofu, the two halves collapsing thunderously, fragments like a meteor shower cast into the sky, dust spreading tens of thousands of miles.

The earth veins shattered, the ground cracked abruptly at the point of impact, creating an abyssal chasm, fissures like a ferocious giant serpent spread in all directions, spanning thousands of miles in an instant, black core magma erupted in the cracks, steaming with pungent sulfuric vapors.

Where the giant axe struck, debris fell like a torrential rain, each piece enveloped in residual Ancient Divine Power, creating countless deep pits on the ground.

A gale swept up the sky full of dust, covering the heavens and blocking out the sun, taking a long time to gradually settle.

The previously vibrant earth, now only left with a terrifying crack spanning thousands of miles, the smooth mirror-like breaks on the mountain sides shimmered with the golden afterglow of divine patterns, as if recounting the earth-shattering strike.

In the void, the silhouette of the Ancient Divine Being slowly faded with the dispersal of the giant axe, yet the lingering divine pressure still silenced the world's living beings — this is the essence of the Celestial-Fighting Axe Talisman, using the talisman as a guide to transform into the supreme power of the Ancient Deity, one strike to vanquish gods, shattering earth and sky.

"Indeed, the Thirty-Three Celestial Spirit Talisman is truly powerful."

"Each Immortal Realm Spirit Talisman possesses different powers."

Jiang Fan clenched his fist.

Needless to say, this Celestial-Fighting Axe Talisman indeed consumed a significant amount of his magical power.

But it was all worth it.

The power of this Immortal Realm Spirit Talisman was indeed beyond imagination, another trump card for him.

"This."

The Primordial Talisman Pen beside him was also dumbfounded, for even it had never witnessed the power of the Celestial-Fighting Axe Talisman, after all, even in the Ancient Era's Primordial Talisman Sect, even the founding ancestors had not inscribed many of the Thirty-Three Celestial Spirit Talismans.

But now as for Jiang Fan, he had inscribed as many as ten Immortal Realm Spirit Talismans.

It could be said that every step Jiang Fan takes next is creating the history of the Primordial Talisman Sect.

No one can provide this kid any experience anymore, everything can only rely on himself.

"Hmm?!"

Jiang Fan raised his eyebrow.

He suddenly discovered that from the remains of the Divinity Transformation Cultivator Xu Ling, a wisp of bizarre black aura emerged, like a black worm, attempting to slip into the void and flee swiftly.

Perceiving this bizarre aura, he immediately felt a genuine sense of disgust.

"Bewitching Worm."

"This guy's body harbors a Bewitching Worm."

"No wonder this kid sought refuge with the Demon Race, it turns out he was influenced by the worm."

The voice of the Human Emperor Sword immediately rang out, filled with anger.

Boom~~

Before Jiang Fan could act, the Human Emperor Sword took initiative, a terrifying golden sword light locked onto the aura on the opponent's body, moving with an incomprehensible speed.

In just an instant, this golden sword light struck this worm.

"Ah!"

The worm immediately emitted a shrill scream, echoing for hundreds of miles, forming waves of soul ripples, making the scalp tingle; if it were ordinary humans, they wouldn't withstand such a scream.

Presumably, they'd be shaken to death in an instant.

However, the opponent couldn't withstand this sword either, instantly being obliterated, completely reduced to ashes.

"Human Emperor Sword, you can strike in this world?"

Jiang Fan curiously asked.

He knew the Human Emperor Sword was an Immortal Artifact exclusive to the Void Realm, naturally capable of unlimited power within the Void Realm, but when coming to other worlds, its power greatly diminishes.

Frankly, he hadn't expected the Human Emperor Sword to act of its own accord, it was truly unimaginable.

"Actually, I find it strange as well."

"When I first arrived in this world, I indeed couldn't act, as if my powers were sealed."

"But ever since you saved that little girl, I suddenly found the seal on myself lifted."

"I even sense infinite human destiny in the unseen realm."

"This feeling is like returning to the Void Realm, truly incredible."

The Human Emperor Sword also felt very peculiar, unsure of what had transpired.

Previously, its power was confined to the Void Realm, unable to transmit its force to other worlds.

But now, even when residing in other worlds, it seems able to use its power.

Even in the unseen realm, it could acquire the vast human destiny here, a feeling it had never experienced before.

"Something like this?"

Jiang Fan raised his eyebrow.

He thought it very likely related to his Life Chart.

After saving the Child of Destiny Ye Linglong and slaying a group of bizarre entities, he finally gained the recognition of this world's Heavenly Dao.

Simultaneously acquiring part of this world's Destiny.

Though not reaching the level of a Child of Destiny, he was already considered a Child of Fortune.

Even regarded by the Spirit Ruins Realm's Heavenly Dao as one of its own.

Perhaps it was because of this that the Human Emperor Sword's power could be used in this world.

"What is the Bewitching Worm?"

Jiang Fan inquired.

"The Bewitching Worm is a special existence of the bizarre race."

"They are formless and bodiless, can burrow into the depths of one's heart, ordinary cultivators find it hard to detect."

"This special worm can magnify the greed and malign thoughts deep within a cultivator's heart."

"If one is influenced by it for long, they will be irreversibly turned into its puppet."

"In the Ancient Era, when many Great Powers of the Void Realm suddenly betrayed and numerous traitors emerged, it was due to these Bewitching Worms."

Chapter 887: Human Destiny, Approval of the Heavenly Dao (Part 2)

The Human Emperor Sword spoke in anger.

If it weren't for these peculiar mind-controlling insects, the forces of the Void Realm wouldn't have crumbled so quickly.

After all, no matter how strong a fortress is, it's hard to withstand internal rebellion.

"So, this City Lord of Fengming City, Xu Ling, was influenced by the mind-controlling insects."

"No wonder he betrayed the Human Race so effortlessly."

Jiang Fan squinted his eyes.

He felt that if these mind-controlling insects were indeed widespread, then traitors would be everywhere.

Moreover, the Great Xuan Dynasty probably didn't have any means to identify these traitors.

Boom~~

At this moment, a message instantly penetrated deep into Jiang Fan's sea of consciousness: "Facing the sudden attack of a Divinity Transformation Perfection level enemy, you did not lose your composure. Instead, you counterattacked fiercely, killed the enemy, and successfully survived a life-and-death crisis. You earned five million Luck Points and a Third-Grade Opportunity."

Perceiving this message, Jiang Fan immediately breathed a sigh of relief, having finally passed this calamity.

He had been worried that other disasters might continue to appear, but now there was nothing more to worry about.

However, he didn't expect to obtain a Third-Grade Opportunity.

That's an opportunity at the Void Refining level.

But thinking about it, Xu Ling was the City Lord of Fengming City, who knows how much wealth he had plundered.

And being a Demon Race spy, having a Void Refining opportunity wasn't entirely unexpected.

Swish!

Thinking of this, Jiang Fan waved his hand and immediately picked up the Storage Bag on the ground.

This Storage Bag was left behind by Xu Ling.

Since Xu Ling was dead, he could easily open this Storage Bag.

Boom~~

With a thought, Jiang Fan's vast divine sense scanned the Storage Bag, and the treasures inside were immediately revealed before him, which made him extremely excited.

"So many Spirit Stones!"

"There are at least two billion of them, right?"

"How much wealth did this guy embezzle?"

Jiang Fan was amazed.

He sensed that the Storage Bag was full of pure Spirit Stones. Even though resources in the Spirit Ruins Realm were abundant, for a Divinity Transformation Cultivator to possess two billion Spirit Stones was still an astounding wealth.

It's clear that during Xu Ling's tenure, he had no idea how much money he embezzled.

Apart from Spirit Stones, the Storage Bag also contained a full ten bottles of Tier Five Elixir—Soul Suppressing and Essence Stabilizing Pill.

This is a rather famous Tier Five Elixir.

After consumption, it can quickly enhance the power of the Primordial Spirit and is coveted by countless Divinity Transformation Cultivators.

But each bottle of this Tier Five Elixir is very expensive, not something an ordinary Divinity Transformation Cultivator can afford.

So the value of ten bottles of Soul Suppressing and Essence Stabilizing Pill is truly remarkable, practically a hard currency.

"Wait, Spiritual Eye Spring? Is this a Tier Six Spiritual Eye Spring?"

"Where did this guy get such a treasure from?"

Jiang Fan's pupils contracted.

He unexpectedly saw a unique treasure sealed inside the Storage Bag, the famed Spiritual Eye Spring.

Generally, Spirit Veins are hard to move, let alone carry around. Only the Spiritual Eye Spring can do this, becoming a portable Spirit Vein.

This means that with the Spiritual Eye Spring, regardless of where he goes, he can cultivate.

There's no need to worry about the concentration of Spiritual Qi being inadequate where he practices.

The higher-tier the Spiritual Eye Spring, the more incredible its value.

A Tier Five Spiritual Eye Spring is already quite precious, let alone a Tier Six Spiritual Eye Spring.

This is equivalent to having a Void Refining tier Spirit Vein.

If word got out, even Void Refining Cultivators would be envious to the point of wanting to snatch it.

"Tsk tsk, I'm really lucky this time."

"With this Tier Six Spiritual Eye Spring, the Spirit Vein of the Exquisite Tower can further enhance."

"The cultivation environment will also improve greatly."

Jiang Fan felt very excited.

Before, he also had a Spiritual Eye Spring, unfortunately only at Tier Five level.

If he were still at the Nascent Soul Stage, that tier of Spiritual Eye Spring would be usable.

The problem now is that he is a Divinity Transformation Cultivator, needing to devour at least ten times the amount of Spiritual Qi as before.

So the Tier Five Spiritual Eye Spring was slightly insufficient.

But he didn't expect that the City Lord of Fengming City, Xu Ling, brought him such a precious treasure, effectively solving a major problem for him, like sending charcoal in a snowstorm.

This Tier Six Spiritual Eye Spring alone is more than enough.

"Seems Xu Ling also had his share of opportunities."

"But this opportunity is now mine."

Jiang Fan stroked his chin.

Thinking of this, he immediately placed these treasures into the internal space of the Exquisite Tower.

Of course, the most important is the Tier Six Spiritual Eye Spring, which he placed in the central position.

Boom~~

In an instant, a large amount of Spiritual Liquid gushed out, rapidly enhancing the concentration of Spiritual Qi within the internal space of the Exquisite Tower, increasing it by at least tenfold.

Truly deserving of a Tier Six Spiritual Eye Spring, such concentration of Spiritual Qi could easily satisfy the daily cultivation of a Void Refining Cultivator, selling it would fetch an unknown amount of Spirit Stones.

Of course, more importantly, his cultivation in the short term wouldn't need to rely on other Tier Six Spirit Veins.

As long as there is the Exquisite Tower, no matter where he goes, he can cultivate without reducing his cultivation speed.

Thud!

Just then, the earth for a million kilometers around began to shake and rumble.

An endless black mist poured out from the depths of the Fengming Mountain Range, as if it came to life, covering the skies.

Many plants on the earth were quickly corroded by this Demonic Qi, and endless vitality was rapidly seized away.

Terrifying demons began to emerge from the Fengming Mountain Range, spreading out in all directions.

It probably won't take long before this area becomes a Demon Realm.

"How did it happen so fast?"

Jiang Fan squinted his eyes, sensing that the speed at which the Demon Cave was spreading was astonishing.

He hadn't fully left this dangerous area, and such a drastic change had already occurred.

Boom~~

In an instant, another message penetrated deep into his sea of consciousness.

"Fate is always so unpredictable. Sometimes a single thought or action can change the trajectory of destiny. Originally, according to your plan, after killing the City Lord of Fengming City, Xu Ling, you would swiftly fly towards Donglu City, avoiding this demonic disaster.

Without realizing, Xu Ling was favored by a Great Demon of the Demon Race, seeing great potential in him, thus investing many resources into him. Now that you have killed him, that demon is furious and has sensed your presence, quickly heading in your direction."

"Fate Prompt One: You can continue to fly towards Donglu City, but that mysterious demon possesses the combat power of an Integration Cultivator, capable of tearing through space and teleporting instantly.

No matter how fast you are, you wouldn't stand a chance against an Integration Level Demon, so before reaching Donglu City, you'll be caught and cut down, dying without a trace, with no chance of victory at all."

"Fate Prompt Two: For an ordinary cultivator, facing such a pursuit from an Integration Level Demon spells inevitable death. However, you are laden with treasures, including the supreme Treasure, the Gate of the Void.

Therefore, you can open the Gate of the Void, initiate a random teleportation, leaving the Fengming Mountain Range and completely avoiding the pursuit of this Integration Level Demon.

Due to the random nature of the teleportation, you won't know where you will be transported, but at least you can survive under the pursuit of the Integration Level Demon."

Sensing this message, Jiang Fan's pupils contracted, feeling speechless.

Indeed, this world is many times more dangerous than the Void Realm because there are too many High-tier Cultivators here.

Even an ordinary cultivator might have a significant background.

If you kill the small one, the big one might come.

If there were no fate prompts, having killed Xu Ling might have led to dying at the hands of an Integration Level Demon.

These demons have no sense of etiquette or morals and don't hesitate to bully the weak.

Whenever one falls into the hands of demons, death is inevitable.

But now that he knows the demon's intent, there is no need to panic.

Even being randomly teleported to an unknown place is better than dying at a demon's hands.

Boom~~

Thinking of this, Jiang Fan didn't hesitate, immediately opening the Gate of the Void, initiating random teleportation.

Swish!

He stepped into the Gate of the Void, disappearing from the Fengming Mountain Range in the blink of an eye.

However, unknown to him, a mysterious energy entered the Gate of the Void, slightly disturbing the spatial coordinates inside.

Instantly, he found himself in an unknown, mysterious place.

Chapter 888: The Future Empress, Ye Linglong's Fortuitous Encounter

Whoosh!

Just as Jiang Fan had left this area, a terrifying demon broke through the void and arrived in an instant.

It happened to appear above the area where Xu Ling died, the demonic aura around it swept through the Nine Heavens and Ten Lands, causing the void in this area to tremble.

As if just a glance was enough to bring death to countless living beings.

This is the terrifying demon in the Body Integration Realm, beyond the imagination of ordinary beings.

"Gone? How could they escape so quickly?"

"Who exactly killed my pawn?!"

This demon was outraged and furious.

Because Xu Ling was a pawn it had favored, intending to lure him into the Demon Dao and cultivate the Demon Technique.

Once this happened, upon Xu Ling advancing to Refining Void, he would be devoured, becoming nourishment for the demon.

Thus aiding its cultivation to progress further.

But now, an enemy had killed its pawn, effectively disrupting a plan it had devised over years.

The previous investments were gone, a failed attempt ending in vain.

So it immediately broke through the void, seeking to find the so-called thief, intending to shred them into pieces.

However, what it did not expect was that upon arriving here, the thief had long since disappeared, with not a trace for hundreds of thousands of kilometers around.

This only made it more madly furious.

But it had no means of action, even as a demon in the Body Integration Realm, it was helpless without a trace of the enemy, only able to vent its anger and leave.

Because it sensed that upon the emergence of the Demon Cave, the Integration Cultivators of the Great Xuan Dynasty had arrived.

The subsequent battle promised to be fierce.

However, the Demon Race had prepared for this day for a long time, and the Human Race could not easily eliminate the Demon Cave.

.....

Meanwhile, in the Great Xuan Dynasty, the imperial capital.

This place swarmed with experts, the core of the Human Race, housing an unknown number of Refining Void and Integration Cultivators.

Perhaps even hidden Mahayana Cultivators.

The entire imperial capital had a history of billions of years, never having fallen.

Thus the city gathered the peerless prodigies of the entire Human Race and amassed endless destiny.

In a certain princess's mansion.

At this moment, an exquisite woman appeared here, a single toe tapping the golden stairs as her skirt woven from peacock feathers fluttered with a ripple of gold.

Twelve strips of moon brocade layered into cloud-like shoulders, the silver thread adorned with pearls from the southern seas glimmered in the sunlight like a galaxy, each pearl echoed with the blood-red rubies on her earlobes, reflecting a scorching noble aura.

Her jade-like face was shrouded in a misty glow, beneath distant mountain brows lay amber pupils, the eyetails set with three bits of diamond sparkled as she glanced around, seeming to gather the stars into her gaze. Her crimson lips needed no enhancement, the dimples at the corners of her mouth held a hint of a smile yet still emanated the innate aloofness of royalty.

The emerald-studded belt on her waist defined a slim figure, the curves beneath silk moved with a ripple, the thin veil could not hide the snow-like skin contrasting starkly with the jewel-encrusted garment.

When she raised her hand to adjust the diamond-adorned golden hairpin beside her temples, the candles of the entire palace dimmed, leaving only her surrounded by breathtaking brilliance and majesty.

If Jiang Fan appeared here, he would surely recognize this woman as Ye Linglong.

Originally, she was just an orphan from the orphanage.

But somehow, it was detected that she possessed the royal bloodline, believed to be a princess of the Human Emperor lineage, lost outside, so she was brought back to the imperial capital by the dynasty's Hidden Guard.

After a series of verifications, her identity as a princess of the Great Xuan Dynasty was confirmed.

Because of this, Ye Linglong received a series of royal treatment and was granted a princess mansion.

The swift change in her life's fortune left her utterly astonished.

And all of this stemmed from meeting that mysterious man.

"Fengming Halberd, do you say I possess a special Life Chart?"

"Is the reason for having top talent due to the influence of the Life Chart?"

At this time, Ye Linglong spoke to the immortal artifact Fengming Halberd within her.

What the world did not know was that she not only received the immortal's legacy, but also obtained an immortal artifact Fengming Halberd, which contained immense power and was a protective artifact.

Also of high status.

Even though the Great Xuan Dynasty conducted multiple tests, it could not detect where this immortal artifact was hiding.

"Precisely."

"This matter in the Immortal Realm is common knowledge."

"However, in the Mortal World, certain cultivators with special talents are thought to have awakened a special Spirit Body."

"But in fact, it's just awakening a special Life Chart."

"Therefore, a Spirit Body cannot be inherited, only randomly obtained by different cultivators."

"The Life Chart you awakened is called Only I am Venerable, belonging to the Immortal Destiny."

"As long as you do not die, you will surely become an Immortal."

The immortal artifact Fengming Halberd explained.

To it, these were merely common knowledge, but in the Mortal World, these constituted highly confidential intelligence.

Few cultivators would know.

"So does this mean that when my siblings suddenly manifested special talents, it was actually due to awakening a Life Chart?" Ye Linglong asked.

Indeed, after Jiang Fan left, she discovered her siblings awakening different talents, initially worrying whether something adverse might occur.

Chapter 889: The Future Empress, Ye Linglong's Fortuitous Encounter (Part 2)

But now it seems that this is just the awakening of the Life Chart.

"That's right, but I didn't expect your younger brother and sister have also awakened their Life Charts."

"This is a very rare occurrence."

"But it might be that your Immortal Destiny attracted so many Life Charts to appear in your siblings."

The Immortal Artifact Phoenix Spear said.

It has also seen similar events, the appearance of an Immortal Destiny often attracts a gathering of numerous Life Charts.

So the birth of a Child of Destiny is always surrounded by many Child of Fortune, many prodigies.

This is like stars encircling the moon.

"But didn't you say that awakening the Life Chart is a very difficult thing?"

"It often requires some special conditions to awaken."

"Why did my siblings awaken so easily then?"

Ye Linglong continued to ask.

To have a Life Chart is a very rare thing, but to awaken many Life Charts at once is even rarer.

She suspected that it has a great relationship with that mysterious man.

"It probably relates to that mysterious cultivator you mentioned."

"The other party probably also sensed the presence of Immortal Destiny in you."

"And realized that your siblings possess Life Charts."

"Even mastered the means to awaken Life Charts."

"That cultivator is very special, probably got the Immortal's legacy, which might be a method from the Immortal Realm."

The Immortal Artifact Phoenix Spear said solemnly.

It thinks Mortal Cultivators basically cannot achieve this, only methods from the Immortal Realm could be possible.

Moreover, the Spirit Ruins Realm is very special.

This vast world is not merely an Immortal's legacy.

So it's quite normal for other cultivators to obtain an Immortal's legacy there.

"By the way, you have a special Communication Talisman on you, right?"

"This talisman is not simple, it should be the Cause and Effect Communication Immortal Talisman from the Immortal Realm."

"So it can ignore distance and environment, allowing communication without delay."

"Even in the Immortal Realm, such an Immortal Talisman is very hard to obtain."

"Of course, what you have obtained is a Sub-talisman, the Parent-talisman should be in the other party's possession."

The Immortal Artifact Phoenix Spear said seriously.

In fact, it was quite surprised when it saw the special talisman on Ye Linglong, unexpectedly this Mortal Female Cultivator had obtained an Immortal Realm talisman.

"So, I've only obtained a Sub-talisman?"

"If that's the case, doesn't the other party know all the messages on the Communication Talisman?"

"Do I need to discard this talisman?"

Ye Linglong furrowed her brows.

Honestly, she is quite grateful to that mysterious cultivator, after all, the other party indeed saved her life and fully activated her Life Chart, awakening her talents.

If it weren't for the other party, she wouldn't have had one strange encounter after another, nor obtained the Immortal's legacy.

But the other party is indeed too mysterious, and she doesn't know what the man's real intentions are.

So having some caution is quite normal.

"If the other party wishes, they can definitely know all your communication messages."

"But discarding it would be such a pity."

"Such a Communication Talisman that can ignore distance is truly one-of-a-kind in the Mortal World."

"If you discard it, you probably won't find another, and you'll lose an important tool."

"Moreover, you don't need to worry too much about this; truly important messages can be said in person, while ordinary messages can be communicated through this talisman."

The Immortal Artifact Phoenix Spear said.

"Indeed."

Ye Linglong couldn't help but nod, she agreed that Phoenix Spear's words made sense, even if the talisman had the risk of leaking her information, compared to its benefits, such minor flaws are insignificant.

She was reluctant to discard such a precious talisman.

After all, she knows how precious a talisman that can ignore distance, traverse the Endless Void, and communicate at any time is, even compared to a Heaven-Reaching Spiritual Treasure.

As long as she is cautious, and doesn't put truly important information on it, there won't be any problem.

"And that mysterious cultivator may not necessarily have ill intentions."

"The other party knows the presence of Life Chart, maybe just wants to make good relations with you in advance."

"Handling it well, the other party might become your supporting force."

"You worry that the mysterious cultivator might become a threat, just because you're too weak."

"Therefore you fear this and that."

"If your cultivation rapidly rises to Refining Void, Integration, or even Mahayana Realm, then what does the other party count for? Your most important thing now is cultivation, increasing cultivation."

The Immortal Artifact Phoenix Spear said lightly.

"You're right, I'm indeed worrying too much."

"To me, no conspiracy matters."

"What's truly important is cultivation, is my own cultivation."

"Even if I'm a princess, in the Great Xuan Dynasty, what matters most is cultivation."

Ye Linglong couldn't help but nod, she agreed greatly with the Immortal Artifact Phoenix Spear's words.

"Normally if you were an ordinary cultivator, rapid growth would be nearly impossible."

"But you are a princess of the Great Xuan Dynasty, receiving royal treatment."

"For you, various rare cultivation resources are at your fingertips."

"With my help, entering Divinity Transformation within a hundred years shouldn't be much of a problem."

The Immortal Artifact Phoenix Spear smiled slightly.

"Mm."

Ye Linglong took a deep breath, she no longer paid attention to various schemes and plots.

Because now the Great Xuan Dynasty is facing tremendous trouble.

Within the Human Race territory thousands of Demon Caves have emerged.

These Demon Caves have appeared in the heartland of the Human Race, countless demons ravaged the Human Race lands, placing the Great Xuan Dynasty in an end-of-days scenario.

If slightly careless, the Human Race could perish because of this.

Thus, at this time, no scheme and plot matter, survival is what matters most.

Being used by others is sometimes good.

People without value won't be used by others.

.....

On the other hand, in some mysterious area.

Whoosh!

Jiang Fan passed through the Gate of the Void, finding himself in a strange location.

The sky wrapped in black mist showed only faint sunlight.

The surroundings filled with thick demonic qi, and all vegetation on the ground had wilted, leaving only lifeless soil where no plant could survive.

Various demon roars echoed nearby, chilling to the bone.

This place is full of hidden dangers, not suitable for human habitation.

"No way, where did the Gate of the Void teleport me?"

"Could it really teleport me to the Demon Realm?"

Jiang Fan furrowed his brows.

He knew the Gate of the Void's random teleportation is unreliable, as he didn't know where it would send him, if to a highly dangerous place, he would be doomed.

But it was necessary to avoid the pursuit of the Combined Demon at the Body Integration Realm.

If not, he would have already died at the hands of the Combined Demon.

So even if brought to a dangerous region, he feels it's worth it.

At this moment, he carefully surveyed the surroundings.

Honestly, now Jiang Fan increasingly feels he might be in the legendary area ruled by the Demon Race.

Only in a Demon Race controlled area would such dense demonic qi exist, surrounded by countless demons and one powerful demon after another.

Boom~~

At this time, a message instantaneously entered his sea of consciousness: "You successfully escaped the Combined Demon's pursuit through the Gate of the Void's random teleportation, overcoming a threat, gaining five million Luck Points."

Sensing this message, Jiang Fan was very satisfied.

Though this time he didn't gain any chance encounters, obtaining five million Luck Points was quite good.

After all, the energy contained in Luck Points is incredibly profound, achieving many unimaginable things.

He doesn't mind that his Luck Points continue to increase.

"Hmm?!"

"There are humans in this place too?"

In an instant, Jiang Fan's heart moved, his Spiritual Sense spread out, he spotted a group of humans being pursued by numerous demons a hundred miles away.

He didn't expect humans could survive in this Demon Race area.

Whoosh!

With this thought, Jiang Fan flickered and flew over, hoping to learn about this place and find out where he was through these humans.

...

Chapter 890: Turning Point of Fate, Heaven and Earth Spirit Plants

Lingxu Realm, Demon Domain, Demon Wolf Mountain.

This is one of the areas where the Blood-Eyed Demon Wolves reside.

At the same time, this place boasts a vast mountain range, with numerous peaks stretching endlessly, creating a very complex terrain.

Zhu Ming, who is the captain of the Green Willow Village hunting team.

This time, he led a large group of members to hunt demons outside.

However, he didn't expect to encounter a massive attack by Blood-Eyed Demon Wolves.

Even though he possesses Foundation Establishment cultivation, facing such a large number of Blood-Eyed Demon Wolves, he's still no match.

"How could there be so many Blood-Eyed Demon Wolves?"

Zhu Ming's face looked quite grim.

He hadn't expected to be so unlucky this time when venturing out to hunt.

He had been extremely cautious, avoiding places frequented by a large number of demons.

Who could have thought that they would still be targeted by these demons, and several hundred appeared.

It's as if even the heavens wanted them dead.

"Brother Zhu, what should we do?"

Many team members also looked ashen-faced, their cultivation even weaker, merely at the Qi Cultivation Stage.

Faced with these ferocious Blood-Eyed Demon Wolves, they are simply not opponents.

It's likely that after just one confrontation, they would die miserably at the hands of these demons.

In fact, coming out to hunt this time was also compelled by necessity.

Because with the increasing population of Green Willow Village, food within the village became more and more scarce.

To sustain the numerous people in the village, they had no choice but to take risks hunting demons outside.

Unfortunately, the heavens seemed unwilling to let them survive.

"I'll cover the rear, escape as much as you can back home."

"At least we cannot afford to have everyone wiped out here."

Zhu Ming took a deep breath.

Of course, he didn't want to die, but if he didn't cover the rear, no one present would make it back alive.

So he had to make this choice.

At least in this way, someone could return alive and notify the others.

Boom~~

Just as Zhu Ming was about to say something, a silhouette suddenly appeared in the sky above.

In the next second, a terrifying large hand descended, formed from infinite Heaven and Earth Spiritual Qi, like the hand of a deity, dropping down from the sky and ruthlessly striking this group of Blood-Eyed Demon Wolves.

Boom!

With just one palm, hundreds of Blood-Eyed Demon Wolves were instantly killed, dying on the spot.

The ground bore a horrific palm print stretching several kilometers, scattering stones, smoke, and dust rolling.

"This, this!"

"Immortal, could this be an Immortal?!"

Witnessing this scene, Zhu Ming and the others were dumbfounded, hardly able to believe their eyes.

They soon saw a young cultivator approaching them.

The aura around him was unfathomable, as if every movement contained the might of heaven and earth.

Just a thought could reduce this area to dust.

The newcomer was Jiang Fan.

He didn't wait for any critical life-and-death moment to act.

He spotted these demons and casually slapped them dead.

To him, the gratitude of these ordinary human cultivators meant nothing.

There was no need for any act of kindness.

He merely decided to save this group, so he did.

"Tell me, who exactly are you? Where are you from?"

Jiang Fan straightforwardly asked.

"Honorable one, we are villagers from Green Willow Village."

Sensing the terrifying aura from Jiang Fan, Zhu Ming dared not hide anything, and he promptly recounted everything he knew.

"I see, this place is indeed the Demon Domain."

Jiang Fan squinted his eyes.

It must be said, the villager Zhu Ming from Green Willow Village is quite remarkable, clearly well-read, knowing much history, hence recognizing this area as the Demon Domain.

In fact, originally, there were no demons in the Spirit Ruins Realm.

But billions of years ago, demons suddenly appeared in the Spirit Ruins Realm, rapidly expanding with a terrifying momentum, consuming territory that originally belonged to the myriad races of the Spirit Ruins Realm.

After billions of years of development, this area completely transformed into the Demon Domain.

The Human Race and the Demon Race also lost a substantial amount of territory, retreating to other regions.

However, humans originally residing in this area did not become extinct completely.

Because human beings have an incredibly tenacious life force.

Additionally, the terrain in this area is very complex, with numerous vast mountain ranges, countless lofty mountains and high ranges, and vast expanse.

No matter how abundant the demons' numbers are, they only occupy partial regions.

In fact, there are still large areas that demons cannot cover.

This also gave the surviving humans a chance to live.

Some surviving humans hide in the Secret Realm World, while others retreat to special locations, forming individual human habitats.

Green Willow Village is one such human survival point in the Demon Domain.

This village houses at least ten thousand inhabitants.

For realms like the Great Xuan Dynasty's human territory, ten thousand inhabitants are naturally insignificant.

But within the Demon Domain, it counts as a large village.

There are very few such large human villages.

"How do you resist the demonic qi here?"

Jiang Fan asked.

Normally, the pervasive demonic qi in the Demon Domain is challenging for humans to resist.

If living long-term in such an environment, not to mention mortals, even cultivators would quickly be demonized, turning into mindless demons and even demons.

But he sensed that these human cultivators' cultivation was weak, at most in the Qi Cultivation Stage.
