

## **Fortune 91**

Chapter 91: Advancing to Grandmaster, Killing from Afar, Qi Enters Dantian\_5

However, he still calmed down temporarily, after all, his purpose for coming here was to search for the Seventh-Grade Opportunity.

Thinking of this, he entered one of the rooms.

This room was filled with various kinds of miscellaneous items.

The Li Family likely placed many daily necessities here for shelter.

The pots, bowls, and pans were all present.

In addition, there were many decorations, porcelain, and other items.

Among all the clutter, he found a seemingly ordinary ring.

"Space Ring."

"This is a treasure of the Cultivator."

Jiang Fan's eyes suddenly lit up, feeling very excited. As expected, just as he anticipated, any opportunity above the Seventh-Grade belonged to Cultivators, and it would inevitably lead to acquiring Immortal Treasures.

The Li Family had probably possessed this Space Ring for a long time.

But except for Cultivators, no one could open the space within the Space Ring.

Thus, up to now, the Li Family had only treated the ring as an ordinary decoration.

In fact, if Jiang Fan hadn't used the power of Luck Points, he probably wouldn't have been able to open the Space Ring for his own use.

Without strength, even treasures before one's eyes would be powerless.

The Li Family was exactly in such a position.

"Time to go back."

Thinking of this, after obtaining the Seventh-Grade Opportunity, Jiang Fan chose not to linger here and quickly returned home.

After all, staying in this residence might lead to encounters with members of the Li Family.

Before advancing to the Grandmaster Realm, he still did not want to alert them unnecessarily.

.....

Soon after, Jiang Fan returned home.

Shielded by the cover of night, no one realized he had left the residence.

No one detected his whereabouts.

Undoubtedly, the rewards from this operation were quite substantial.

Not only did he obtain the Seventh-Grade Opportunity, but also acquired six hundred Luck Points.

Clearing all obstacles for his advancement to the Grandmaster Realm.

At this moment, the path to becoming a Grandmaster was unimpeded.

"Let's begin."

Back in the Cultivation Room, Jiang Fan took a deep breath to calm his emotions.

Focused and tranquil.

With a thought, he immediately consumed a large number of Luck Points on his person.

In an instant, nine hundred Luck Points were consumed.

A mysterious energy emerged from the depths of his consciousness and rapidly spread throughout his body.

His skin, muscles, bones, meridians, internal organs, and other parts were strengthened.

And the enhancement was at a visibly frenetic pace.

Meanwhile, his blood energy within was rapidly increasing.

Almost in the blink of an eye, his blood energy surged to its peak.

This was akin to a series of Soaring Snakes roaming within him.

Boom~~~

Suddenly, Jiang Fan automatically activated the Soaring Snake Breathing Technique, as if he transformed into a Soaring Snake, drawing endless mysterious matter from the heavens and earth.

Every pore on his body inhaled and exhaled clouds.

Centered around his body, vast clouds expanded, filling the room with dense fog.

As if living in the sky.

It seemed he had also become a Soaring Snake soaring through the heavens.

Fortunately, this was his own house; if it were outside, it might be noticed by others due to such an anomaly.

It's uncertain how much time passed, but Jiang Fan perceived that every part of his body had been fortified to the extreme, instantly reaching the level of perfection in the Refining Organ Realm.

If relying on personal hard training, it's unknown how many years it would take to reach such a Realm.

Yet by consuming Luck Points, it was achieved instantly.

Saved an unknown amount of hard training time.

Bang!

Just at this moment, Jiang Fan's body trembled as he sensed a burst of mysterious power from deep within.

As if the inner blood energy and external mysterious force merged and transformed into a completely new power.

He recalled the Cultivation Secret Manual he had previously seen and instantly understood what this was.

Grandmaster's Qi Force!

This is the Qi Force naturally nurtured only when the blood energy within the body achieves perfection in the Refining Organ Realm.

Only by generating Qi Force internally can one be called a Martial Arts Grandmaster.

Before a Grandmaster, a Martial Artist could at most use physical strength.

But as a Grandmaster, fearsome Qi Force is cultivated within.

A punch can strike a fatal blow from meters away, killing an enemy.

Sometimes the fist hasn't even appeared, yet the Qi Force within explodes, hitting remotely with the Hundred-Step Divine Fist.

Even some Grandmasters have Qi Force permeate their entire bodies.

This is akin to having a layer of armor covering the body.

Ordinary swords, arrows, and other weapons would instantly bounce off upon hitting Qi Force.

This is why a Martial Arts Grandmaster can kill endlessly amidst armies yet remain unscathed.

"Strike!"

Instantly, Jiang Fan clenched his fist and stepped forward, sensing the Qi Force emanating from deep within his Elixir Field and Sea of Qi, explosively released, a terrifying Qi Force striking out remotely.

Seemingly forming a Soaring Snake, containing formidable destructive power.

Bang!

At that moment, the wall in front of him was instantly blasted with a large hole.

Stones shattered into pieces, scattering in all directions, along with a cloud of dust.

"So strong, this is the Grandmaster's Qi Force?"

Jiang Fan's eyes gleamed with a hint of brilliance, overwhelmed with excitement.

Compared to before, his combat power had increased several times over.
