Chapter 95: Destroy the Li Family, Avenge the Fishermen

"Not sure."

"When I arrived at the Li Family residence, I found they had disappeared."

"Even after searching the basement, it was a complete blank."

"I only know there must have been a fierce fight inside."

"The result is that Li Lei and the others have vanished."

"They were likely destroyed by someone."

A Li Family scout immediately said.

He strongly suspected that Li Lei and the others were already dead, and the reason no bodies were found is likely because someone used Corpse-Dissolving Water to destroy them, leaving only traces of blood in the residence.

After all, similar incidents were not uncommon even within the Li Family.

Now, it has finally happened to the Li Family.

"Impossible."

"The Bat King Yang Qin is a Martial Artist in the Refining Organ Realm, with formidable strength."

"He's said to be just one step away from becoming a Martial Arts Grandmaster."

"If enemies came to kill, Yang Qin's strength should be able to resist somewhat."

"Why has even Yang Qin disappeared now?"

"Could it be that Yang Qin fell into a state of madness and killed Li Lei and the others?"

A Li Family Elder was very suspicious that the Bat King Yang Qin had gone mad from practicing martial arts and killed Li Lei and others, otherwise such absurd things would not have happened.

Given Yang Qin's strength, even if he could not win against enemies, he should have no problem escaping.

"It couldn't have been Yang Qin."

"What benefit would he have from doing this to himself?"

"Even if he was mad and lost control, resulting in killing?"

"Still, it's impossible for a madman to make the bodies disappear like in the entire residence."

"So it must be someone who entered the residence and took out Yang Qin and the others."

Li Haoran's face was very grave.

He knew they had certainly encountered an expert, otherwise Yang Qin and the others would not have died without reason.

But if this is true, then the Li Family might have invited big trouble.

Because if even Yang Qin and the others are no match, they are unlikely to be enemies.

If they are slightly careless, the Li Family might face disaster.

"No way, those with the power to take down Yang Qin are few in Yunze City."

"At least they would have to be Martial Arts Grandmasters."

"Could it be the masters from the three great families struck?"

Many Li Family Elders were terrified; they thought of fleeing.

Because if the relationship between the Red Eyebrow Army and the Li Family is exposed, the Li Family would be doomed.

They would surely be executed entirely.

No one would tolerate traitors after all.

"Don't worry, it couldn't be the masters from the three great families."

"If they were really the masters from the three families, they would have attacked the Li Family long ago."

"It can't be that there's still no movement till now."

Li Haoran also dismissed this possibility.

Because the entire Yunze City is controlled by the three great families, if they knew of the Li Family's betrayal, they wouldn't need a day's time to dispatch armies on their borders.

By then, it would be impossible to escape.

"If not the masters from the three great families, then who did it?"

"These are Martial Arts Grandmasters; besides the three great families, who else could possess such power?"

Another Li Family elder was very puzzled, finding the matter incredibly complex.

They simply didn't know who took down Yang Qin and the others.

"If I guessed correctly, it might be a master from the civilian sector."

"As incredible as it seems, there are so many people in Yunze City."

"There might be some top Martial Artists hiding among them."

"Before, we captured many Blood Slaves."

"We might have been unlucky and got discovered by a civilian grandmaster, thus bringing catastrophe."

"So Yang Qin and the others faced such a disaster."

Li Haoran shared his guess, feeling that Yang Qin and others might have been killed by a civilian master. After all, there are hidden talents among the civilians, and no one knows how many experts are hidden there.

"A grandmaster from the civilian sector?"

Upon hearing this, many Li Family Elders had complicated expressions.

They found this guess hard to believe, but considering various intelligence, though unlikely, it was most likely to happen.

After all, this kind of incident does happen occasionally.

Some martial artists with a sense of justice might also act bravely.

"Damn it, how could our Li Family be so unlucky as to encounter a civilian grandmaster?"

"Just capturing some lowly people, why would a civilian grandmaster intervene?"

"Indeed, no connection between the sides, yet they intervened, totally insane."

"The worst part is if this drags the Li Family into it."

"Exactly. Who knows if this civilian grandmaster is a madman, what to do if they find our Li Family?"

Many Li Family Elders were chattering, gritting their teeth.

They thought this civilian grandmaster was simply meddling.

Capturing some lowly people as Blood Slaves was all they did.

With so many lowly people, what's the harm if a few died?

Anyway, in this era, human lives were as insignificant as grass.

For the lives of lowly people, killing Li Lei and others was simply preposterous.

This made them extremely annoyed.

After all, their lives couldn't be compared to those lowly people!

"Your Li Family people are indeed clever."

"Just a few words and you've already guessed the truth."

"But being too clever might not be a good thing."

Just then, a voice suddenly came out, reaching every Li Family elder's ears.

Immediately, a figure walked out from the shadows.
