

Gacha 128

128 Gacha Time

"Hmm, Let use my Premium Ticket First. I have 15 tickets. Okay the first 5xDraws."

As usual, the delivery box appears in front of him. He opened It and check the five Gacha balls.

[Attribute Orb (SR) Acquired]

[Silk Boots (UC) Acquired]

[Rainbow Robe (R) Acquired]

[Metal Gauntlet (UC) Acquired]

[Iron Sword (C) Acquired]

It seems that his luck, this time is a bit low. He checked the items one by one starting from the lowest grade. He skipped the Iron Sword since it was a normal Iron Sword. He then moves to the Metal Gauntlet. It is your usual Metal Gauntlet that can be equipped in the system. But he already has a rare rank glove equipped on his hands, so he didn't need this one. The same with Silk Boots, because he already has a rare rank Safety Shoes, he didn't need it too. As for the Rainbow Robe, it was literally Rainbow colored Robe. But this robe can also be equipped to the System.

Alex took out the Rainbow Robe, the red color starts from the left sleeve and end with purple color in the right sleeve. Alex tried it on, the Rainbow Robe make him sparkle. He facepalmed. Alex was too embarrassed about the clothes. He is fortunate to have the equip function in the system. He can put this on without displaying the robe itself. After equipping the robe to the system. The Robe becomes invisible.

After that, he looked at the last item. The last item is SR rank item, Attribute Orb.

[Attribute Orb (SR)]

Use: Enhancing Tools with a random element.]

Alex was confused. "System, any explanation for this orb?"

[Host can enhance tools with It, it can be your sword, spear, cauldron, etc. For example, if you enhance it to your sword, it will generate a random attribute for the sword, if Host gets a water element, then your sword will become a water element sword. If you got a dark element, then it might get a chance to inflict curse to your opponent. This one is a random orb. You can get a Special Attribute Orb such as Fire Attribute Orb or Water Element Orb. The orb attribute had already fixed.

Or another thing that you can get is Special Attribute Orb. It has all the elements within it. That means when you enhance it to your sword. It will generate a random attribute every time you attack your opponent. In other words, your first attack might create a fire element attack while your second attack might generate a water or ice element attack. The Enhance Function still locked. It will be unlocked after you reached the upper world.]

"I see. What is this element all about? How many elements are there?"

[There are six elements in total. Fire, Water, Earth, Thunder, Light, and Dark]

"Well, if I get a Fire Attribute Orb and enhance it to my Sword. It can enhance my fire attribute attack with a sword such as my Elemental Sanguin Sword Art." But something is bugging him, "What about this curse?"

[If you got a dark attribute, There is a possibility for you to inflict a curse on your opponent. It can be Slowness, Fatigue, Blindness, poison, etc. in other words, you can slow your opponent down, or make their stamina go down faster, and so on, depending on the curse it generates. The light orb is the opposite. It will give the user a certain chance to inflict a status on yourself. It might enhance your strength, speed, etc.]

"Hmm, it seems that the Light and Dark orb is the most useful. While Element such as fire might enhance my elemental attack, but compared to the curse or blessing... Let's not think about that at the moment. This Attribute Orb will give a random element. I still don't know which attribute it is."

"Whatever, I can't enhance it for now anyway. Even if I can, I need a spare sword if I get an element that I can't use. So I will hold it for now until I get a good spare. Alright. Next draw"

[Raikou Bow (SR) Acquired]

[Master Stage Monster Skin (R) Acquired]

[Red Lavender (UC) Acquired]

[Summon Ticket x10 (UR) Acquired]

[Nonu Root (R) Acquired]

He was surprised that he got a UR. But...

"Summon Ticket?"

[Host can't get the Summon Ticket directly. It also applied to another Special Ticket too except Dart]

"So, I can only get Premium Ticket while I need to get a special ticket such as Summon Ticket from the Premium Ticket?"

[Yes. But because Host only has Summon Ticket as one of the special tickets, it will only generate those tickets]

"That means there will be many gacha variation later?"

[Yes. System hope for Host does his best to upgrade me]

"...Alright. But why I can't get Dart from Premium Ticket?"

[As Host had experienced it. Dart Roulette is the easiest way for Host to get a UR item. That's why, for Dart Roulette, you can only get them from Hidden Mission. Ah, please don't ask me about the Hidden Mission, it is called Hidden Mission because it's Hidden]

"..." Well, what the system said is true. He can easily get a UR item like Box of Time in Dart Roulette.

"Hidden Mission, huh... Can only hope for luck."

"Let's check the other items first. There are two Medicinal Herbs. I didn't have any use for Red Lavender, but this Nonu Root... It is one of the ingredients for the rank 2 Pill (Martial Master Pill)." After Maxwell clarified him with pill knowledge. He didn't say any rank 1 restoration or rank 2 restoration pill anymore. Because the actual rank of pills is equal to Cultivation Stage. That means Rank 1 pill equal to Foundation Stage Pill, Rank 2 pill equal to Master Stage Pill, Rank 3 pill equal to Grandmaster Stage Pill and so on. This ranking also applied to array and weapon/armor. Each rank divided into three grades, Low grade, Middle Grade, and High Grade. For Example, Rank 1 restoration pill and rank 2 restoration pill are equal to Low-Grade rank 1 pill and Middle-Grade rank 1 pill respectively.

"As for the Master Stage Monster Skin, I can make it into an array plate. I think I will plant a rank 2 array on it. It will be a defensive plate which might prove to be useful for me later. But I still haven't reached rank 2 Array Master, so I will hold this for now" Then he looked at the SR Raikou Bow

[Raikou Bow

Description: A rank 3 weapon (Grandmaster Level Weapon)]

"Hmm... I don't use a bow. Maybe I can pawn it off later when I got to Upper World to get a fund for myself. As for the last summoning ticket...I will use the remaining Premium Ticket first."

[Teleportation Array Plate (SR) Acquired]

[Forging Hammer (R) Acquired]

[Milky Flower (R) Acquired]

[Iron Helmet (C) Acquired]

[Reign Impaler (SR) Acquired]

Alex was astonished. He didn't bother with the Iron Helmet and Forging Hammer since he didn't need them. But this Milky Flower is beneficial to his eyes. He needs to extract it and dripping it to his eyes. It will enhance his eyes. This would be very useful if he wanted to learn about Spirit Eyes Technique that he got from Gacha back then. As for the teleportation array...

[Teleportation Array Plate

Description: Teleport (200 Meter)]

A simple description is the best. Alex took out the Array Plate. It was made from Grandmaster Stage Monster Skin. Maxwell taught him that this array can only be made by an array master who possesses the space element. The power of this array depends on the Monster Skin that used. A Master Stage monster skin can teleport you up to 50 meters, While Grandmaster Stage monster skin can teleport you up to 200 meters. He heard from Maxwell. A Martial Lord Stage monster skin can teleport you up to 100 kilometers. This array is handy.

Maxwell said an array plate like this is rare. Array Master is scarce, but Space Element Array Master is scarcer. This Teleportation Array basically equal to another life. Many top powers want an Array Master with a Space element. But his master also warned him not to disclose his identity as a Space Element Array Master until he had the power to protect himself. After all, even though they are distinguished, if

a Space Element Array Master didn't have any strength or status, many top powers will give them some 'curse' to make them completely obedient and do their bidding.

Alex then check the last item. It is an SR rank spear. From the description, it is a Rank 3 Spear, it means a Grandmaster rank Spear. It is the same as his SR sword. Now that he also has the spear. With two SR in his hands, will he fear any Martial Masters? The answer is he doesn't know. He never meets any of them. So how can he know the answer...

"Huft... Finally, I finished them all. Now, it's time for the Summon Ticket."

He opened the Summoning Gacha. There are two choices for the summoning gacha. 'Summon' and 'Summon 10+1'. He was surprised when he saw there is '2x drop' written on them. He wanted to check first.

"System, this 2x drop... are there any special events like in the game?"

[No Host. Because you didn't get any tickets for this special gacha. There is a 2x drop for the first summon]

"Hmm... I see. And I don't know why I'm so lucky to get 10 summoning tickets. If I didn't get them, I might need to wait since it is a one time chance."

He immediately used the 'Summon 10+1' without hesitation. There are ten cards in front of him along with a mysterious card with '?' on it. It seems that he needs to tap it first before it revealed what kind of card it is. Alex decided to check the first ten cards.

[Exp Card (R)

Leoz (UR)

Wright (SR)

Green Slime (C)

Werewolf (UC)

Stallion (C)

Minotaur (UC)

Exp Card (R)

Exp Card (UC)]

Alex looked at the single UR. He never expected that he got two UR in one day. But he immediately speechless when he opened the last mystery card.

[Anna (UR)]

Another UR appeared in front of him. He can't help but excited. It took him a while to calm himself down.

"It seems that except the Exp Card, all of them can be summoned."

Alex inspects the Exp Card first.

[Exp Card (UC): Exp+10000]

[Exp Card (R): Exp+100000]

"System, what do I need Exp card for? Exp is useless for me."

[Please Inspect the unit card first]

"Unit Card?"

[It is the card that can be summoned. They are called 'Unit Card']

"Hmm..." Alex checked the two UR cards.

[Leoz (Thunder)

Level: 1/10

Exp: 0/1000

HP: 1000

ATK: 5

DEF: 5]

[Anna (Dark)

Level: 1/10

Exp: 0/1000

HP: 800

ATK: 8

DEF: 3]

"So, the Exp cards were for them. But, what is this level all about? Only ten levels? And this Thunder and Dark?"

[Thunder and Dark is their element. The system is the same as the Six Elements. Every unit card you got will have one element on it. As for the Level, because of the world's limit can only hold up to Martial Master Stage. That is the limit. It means Each of their level is equal to one small stage for Cultivation. That means if they reached the max level. They will be similar to a Peak Rank 9 in this world. After you go to the upper world. It will be updated. Level 11 will be equal to 1-Star Martial Master Stage and so on]

Alex nodded. He checked the other units.

[Wright (Dark)

Level: 1/10

Exp: 0/1000

HP: 700

ATK: 8

DEF: 1]

[Green Slime (Earth)

Level: 1/10

Exp: 0/1000

HP: 50

ATK: 1

DEF: 1]

[Werewolf (Earth)

Level: 1/10

Exp: 0/1000

HP: 300

ATK: 3

DEF: 1]

[Stallion (Fire)

Level: 1/10

Exp: 0/1000

HP: 100

ATK: 1

DEF: 1]

[Minotaur (Thunder)

Level: 1/10

Exp: 0/1000

HP: 400

ATK: 5

DEF: 0]

From his observation, it seems that the higher their rank, the higher their power from their HP, ATK, and DEF.

"System, aren't the one that uses only those SR or above?"

[If they are reached Max Level, they will be useful, Host. Don't worry, there will be another update for Summoning Gacha. It will be the same as Gacha Ticket and Premium Ticket. There will be a normal Summoning Ticket called Honor Ticket. The comparison is the same as Gacha Ticket with Premium Ticket. The maximum rank of Honor Ticket is Rare. If Host can get the same card, you can sacrifice one of them, and the other will increase one level. It is the same no matter how high their level. This is also applied to SR or Above monster]

"..." Alex was speechless, what a black system. It was like when playing a game, and the company releases the Premium first, so they need to buy before releasing the Free one where P2P player can get.

For now, he decided to use SR or UR units first. If he can get many same card for Rare units or below and make their level high enough. He will use them too. After all, A Grandmaster Stage Slime still can kill a Martial Master, right? Since their level equal to Cultivation Stage. But... It really feels weird when you can't level up. Instead, it was the others around you that can level up.

"Alright. System, how can I summon them?"

[Host hold the card and say 'Summon']

Alex chose Leoz as his first card. He holds the card and...

"Summon"
