

Gardevoir 10

Chapter 10 The decision is yours

That night.

"Xiao Feng, I'll inconvenience you to stay in the guest room for now. I'll help you clean up a room in the next few days."

Hanako helped Yu Feng make the bed and spoke to him apologetically.

After all, Yu Feng is her godson now, so it is really helpless for him to sleep in the guest room.

"It's okay. We'll only be staying for a few days before going on a trip. There's no need to clean up a room for ourselves."

Yu Feng waved his hand to indicate that it was not necessary. He would only be staying for a few days and there was no need to clean up a room for him. That would be a waste.

"It's okay. Xiao Feng will come back to live with you in the future. It's not like you won't come back."

"Okay, go to bed early and go out with Xiaozhi tomorrow."

Hanako denied Yu Feng's statement. After all, they were a family, so how could they let family members stay in the guest room?

Then he didn't say anything more, walked out of the door and closed it with a smile on his face.

Yu Feng in the house was silent for a moment, and couldn't help but laugh. This way, he finally had a home.

But next, it's time to choose the initial elf.

Spread the list given by Professor Oak on the desk in the room.

The patterns of the 21 starter Pokémons from seven generations from Kanto to Alola are clearly printed on it.

They are Charmander, Bulbasaur, and Squirtle from the Kanto region.

Chikorita, Crocodile, and Fireball from the Johto region.

The Fire Chickadee, Water Leaper, and Wood Gecko from the Hoenn region.

Squirtle, Charmeleon, and Togaman from the Sinnoh region.

The vine snakes, warm pigs, and water otters in the Unova region.

The Halima, Fire Fox, and Frog in the Kalos region.

As well as Owleye, Litten, and Porgy from the Alola region.

Yu Feng was shocked when he saw the Starter Pokémon of the Alola region. After all, according to the timeline, there shouldn't be the Starter Pokémon of the Alola region before Ash started his journey.

But after thinking about it, it is impossible that Oak Shinobi, Professor Oak's cousin, was born temporarily. In this case, it is not surprising that Professor Oak can get the three major family trees in the Alola region.

But it's a pity that there is no Galar region and the latest Padiia region. Yu Feng still likes the Grass Master of Padiia's generation very much.

He remembered that his name was New Leaf Meow? I think that was the name. Before crossing over, he was busy killing the shiny boss Gardevoir in Arceus and had no time to care about the new game.

I just remember that Grass Lord is very cute. I hope it's not another Fiery Roaring Cat or something.

You are not allowed to become like this.jpg (pointing and pointing)

After the recollection, Yu Feng carefully thought about which of the current three major families would be a better choice.

At present, the three in the Johto area can be ruled out. They have no strength and no good looks.

The only cute chrysanthemum leaf will eventually evolve into a behemoth like the giant chrysanthemum.

Each other region has its own advantages, including the fossil Pokémon of the Hoenn region, the Cabbage Sister and the ancient special form of the Sinnoh region, the Chrysanthemum, Mei and Toru of the Unova region, the Mega Evolution of the Kalos region, and the Ultra Beasts of Alola.

Of course, except for Mega Evolution, these have little to do with which of the three starter Pokémon he chooses. Currently, the only ones that can affect the battle are Mega Evolution, Gigantamax and Gigantamax.

The only known ones that can mega evolve are the starter three from Kanto and Hoenn, and one Greninja.

All Pokémon can Gigantamax, but only a few can Gigantamax. Unfortunately, the starter Pokémon of Kanto can also do so.

In summary, it seems that the only choice is the three great families in Kanto? This makes Yu Feng a little distressed. As a person who values appearance above all else, it is really difficult for him to choose.

Shiny Kirlia came out of the Poké Ball again and helped her brother relax his frown.

"Chirrut (Is it so hard to choose? Just pick one at random.)"

Shiny Kirlia was a little confused. It was just a Pokémon. Why did it take so long to choose?

"It's not that simple. Regardless of the properties, it has to be useful at least."

"It seems like you and Miblim are actually the main team in the future."

"Little Fairy and Love Butler are mainly responsible for managing daily life. It would be a bit too much to ask them to fight."

Yu Feng was thinking about which of the three starter Pokémon to choose while answering Shiny Kirlia's question. After all, she was still young and inexperienced, and the bonus of a good Pokémon to a trainer was immeasurable.

"Chirrut. (Do you have a crush on someone? I can analyze it with you.)"

Shiny Kirlia waved her hands. She really didn't understand strength or anything like that. After all, she was just a Pokémon, but she could still help analyze it.

"What you said makes sense. Okay, let me tell you."

Yu Feng thought that what his sister said did make sense. What's more, it was a psychic-type Pokémon, which was different from a half-baked Pokémon like him.

At least his brain must be better than mine.

Yu Feng told Shining Kirliao all the currently known evolution methods and their pros and cons. The huge amount of information made Shining Kirliao frown like Yu Feng just now.

"Chirrut! (According to you, the best choice here should be Charmander.)"

"Chirrut. (It can super evolve in two directions, grow to gigantic size, and fly.)"

Shiny Kirlia summarized Yu Feng's statement. The most commonly used ones at present are the three starter Pokémons in Kanto, and the best one is Charmander, and any evolution method can be tried.

"Yes, it seems like it can touch anything at the moment, but I kind of want the Gryphon as well."

Although Charmander is very versatile, the bond with Greninja is also very cool!

Yu Feng really wasn't sure which one was better.

"Chirrut (I say, there are not many Grinyuu that can be Bond Evolved, Charmander is more stable.)"

Shining Kirlia thought about the information she learned from Yu Feng and shook her head. After all, there has only been one Ginny frog that can be bonded and evolved in thousands of years, so it is still a question whether the one given by the Professor can be bonded and evolved.

"What you said is indeed a problem. It's still a difficult decision."

After listening to his sister's analysis, he knew that Charmander was the best choice. Of course, the one with the best matching attributes was Fire Fox, and the final form was a demonic fire red fox with super powers.

But Charizard can carry people and fly, and it is also good at traveling. Yu Feng slumped over on the table. It was so difficult to choose. He wanted both of them.

"Chirrut. (Just pick the one you like best. The tribe leaders can help you with the others.)"

"Chirrut. (I caught all flavors of Frosty Milk Fairy so that you can eat better.)"

Shiny Kirlia was a little helpless. There were only a few Pokémon. If things didn't work out, the tribe leaders could just go out and cheat or communicate with those Pokémon tribes. They could always find them. Was there any need to worry so much?

"You are a Pokémon and don't understand. It only makes sense for a trainer to capture one himself."

Yu Feng rolled his eyes at his sister. It is fun to capture Pokémon by yourself. It would be no fun if someone else gave it to you.

"Chirrut. (Yes, yes, it's meaningless if it's given by others. I'm a Pokémon, I don't understand. It's like you're not a Pokémon.)"

"Chirrut. (Go to bed early. You still have to go out with Xiaozhi tomorrow.)"

Shiny Kirlia also rolled her eyes at her brother, saying, "Don't think that it's not a Pokémon just because it looks like a human."

Then he turned over and lay on the bed to rest, and before doing so he did not forget to ask his brother to go to bed early as well.

Yu Feng felt genuinely envious when he saw his sister falling asleep quickly after lying on the bed. He also wanted to be able to fall asleep as soon as he touched the pillow.

Then he looked at the list and finally made a decision after a long time.
