

Gardevoir 149

Chapter 149 Then I will use all my strength to defeat you!

Yu Feng rolled up his sleeves to reveal the key stone on his gloves.

That's right, this is the secret weapon that Yu Feng borrowed from Fu Ningna last night.

Although his mother gave him the Mega Stone of Gardevoir, it is not known whether he wanted him to give it to his sister or evolve it himself, but his mother did not give him the Key Stone.

According to his mother, he should either go to the Alliance to buy one, or steal one from his father.

However, when Fu Ningna found him last night and asked him to fight Shirona with a serious attitude, he thought of this matter.

So I asked Fu Ningna in advance if she had the key stone, and coincidentally, Fu Ningna actually had it with her.

According to her, this key stone is for her second team's Swampert, but this time Swampert has not been brought here, and the level of tacit understanding between her and Swampert cannot reach the level of mega evolution for the time being.

It's okay to lend him the key stone temporarily. Even if he wants to take it away, it's not a big deal. Anyway, if she goes to the alliance to report that it's lost, the alliance will give her another one.

Of course, if it is a super evolution stone, it is not something that can be given to others casually.

Back to the present, although in the previous life one could mega evolve Pokémon by just getting these two stones, it still requires bonds and long-term training here.

However, Yu Feng believed that no matter which Gardevoir he was with, especially those he knew, the bond would definitely be full.

And now as a trainer, his physical strength is better than that of ordinary trainers, and he can sustain super evolution for a longer time.

"Respond to me! Gardevoir!"

Yu Feng placed the glove inlaid with the key stone on the center of his chest, echoing with the orange crystal on his chest.

In a corner that no one can see, the orange crystal slowly emits a soft light.

The key stone also emitted a dazzling white light at the same time as the crystal, and the symbol of the Mega Evolution Stone flashed on the body of the leader Gardevoir.

Then, a white beam of light shaped like a gene gushed out from the key stone and wrapped around the boss Gardevoir. In an instant, the white beam of light shrank inward and dyed the boss Gardevoir pure white.

The light of evolution suddenly appeared from the body of the leader Gardevoir, and just as the huge skirt slowly appeared, a red light was mixed in it, giving the mega evolution a hint of ominous meaning.

The white light explosion leader, Gardevoir, fell to her knees, gasping for breath, her face full of shock.

She clearly felt that she had evolved, but when she looked at her blue arms, it was obvious that this was a case of evolution failure.

"You failed. Your bond... It looks like this is your first time using Mega Evolution."

Shirona frowned as she looked at the leader Gardevoir that failed to mega evolve. She originally wanted to wonder if the bond between the two of them was not strong enough, but when she saw Yu Feng, whose movements were exactly the same as Gardevoir, Shirona overturned her idea.

After all, the skirt representing Mega Gardevoir has appeared, which means that the bond between the two is strong enough.

So why did this happen? Shirona was not a scholar who specialized in this, so she could only attribute this to Yu Feng being unfamiliar with his first super evolution.

Of course, Shirona didn't know, but Yu Feng was very clear. At that moment, there was a thought full of wildness that was trying to get closer to him.

They were immediately squeezed out by the protective super power, and then their super evolution failed.

But the question is, will super evolution cause such strange things? Or is it just their super evolution that will cause such problems?

Yu Feng was not sure, so he could only ask Shirona to give him another chance. This time he would try to accept this wild aura.

Fortunately, it was just a guidance battle, and Shirona was interested in a full battle, so she agreed to this request.

"Well, remember to open your mind and accept the Pokémon. After all, Mega Evolution can be said to represent the bond between you two."

As a senior, Shirona still gave some advice to Yu Feng, who was undergoing mega evolution for the first time. After all, mega evolution is ultimately a proof of the mutual understanding and companionship between Pokémon and humans.

If it comes to humans, it's probably equivalent to a very loving couple.

This time, Yu Feng calmed down and did the same thing as at the beginning.

The wild aura appeared again, and still approached him cautiously.

Yu Feng controlled his superpowers and did not counterattack against the breath approaching him. As the breath approached, Yu Feng actually felt the excitement coming from it.

The wild aura sank into Yu Feng's spiritual world like a swallow returning to its nest, and then it calmed down and stayed there quietly.

Without the disruption of the wild breath, the super evolution of the boss Gardevoir became unusually smooth, and the super Gardevoir in black skirt and black gloves appeared here.

At the same time, unknown changes occurred in Yu Feng's body. A white earring appeared on his ears. Fortunately, his ears were originally covered by his hair, and no one could see them except himself.

The crystal on the chest also changed from a complete piece to a dazzling one like an exposed crystal heart.

Yu Feng also completed his own super evolution in this process. There was no major change in his human form, except for the uncontrollable red light in his eyes, just like the boss Mega Gardevoir.

"this is!"

Xiaozhi in the stands was very excited because he heard from Yu Feng that Gardevoir was already its final evolution, but now Gardevoir's evolution again broke Xiaozhi's cognition.

"This, this is a Mega Evolution, which requires a Mega Evolution Stone and a Key Stone to evolve. Of course, you also need a strong bond with the Pokémon."

Professor Oak looked at the eager Xiaozhi and carefully explained to him the method of evolution called Mega Evolution.

"This kind of evolution usually only lasts for the duration of a battle, which is about ten minutes."

"The duration can be extended through continuous evolution training, or by improving the trainer's physique."

Dr. Mustard also added that although the target is not Satoshi, since Oak cares so much about this boy, it is not a bad thing to establish a good relationship with him.

"So Pikachu is..."

Xiaozhi is very much looking forward to the means of mega evolution. He has already imagined the scene where Pikachu mega evolves and challenges the champion together with him.

"It's a pity, Ash, but so far we've discovered that Pikachu isn't a Pokémon that can mega evolve."

"And Mega Evolutions are all Pokémon that have their final evolutions."

Soon, Xiaozhi's thoughts were ruthlessly interrupted by Professor Oak. After all, the Pokémon that were discovered to be able to mega evolve were all Pokémon that had completed the final evolution.

Xiaozhi currently has no Pokémon that can evolve, so after hearing what Professor Oak said, Xiaozhi temporarily put his thoughts aside.

.....

"So... then!"

Looking at the successfully evolved Super Gardevoir, Sirona smiled knowingly, took out her super lip gloss and gently applied it.

"I will use all my strength to defeat you!"
