Chapter 156: I can't do anything, I've done a lot of bad things (Today's won't be missing, I'll make

Honestly, after spending more time with Team Rocket, Yu Feng finally understood why Xiaozhi was annoyed with Team Rocket but didn't want to drive them away once and for all. (Are you sure he can't think of it?)

The Rockets sometimes always find something new to do with his boring trips.

Just like the scene before us, the Rockets, who raised their three cups of domestic vinegar, immediately had their speedboat smashed by the agate jellyfish who were retaliating.

That domestic three-cup vinegar...I don't know why a big bucket of it is called three-cup vinegar.

But when that thing was buckled onto an agate jellyfish, the light of evolution representing evolution enveloped the agate jellyfish.

Getting bigger, getting bigger, getting bigger!!!

The giant stinging jellyfish was born!!

"Oh my god, this is going to be a big deal."

Looking at the huge monster in front of him, Yu Huijun fell into autism. It was right that he was in seclusion now, right?

Why did he have to confront these things even after he came to Guandu?

Thinking back to the monsters he had faced in the past few years, Yu Huijun felt like he was having a myocardial infarction.

"Uncle Yu, wake up! This isn't the stuff you beat up, it's just a big fake one!"

Fu Ningna shook Yu Huijun, who had fallen into autism, and slapped him twice to wake him up, reminding him that he had met a fake who had grown so big for unknown reasons.

These two blows woke Yu Huijun up. This huge poisonous jellyfish had indeed evolved under his nose. Even if he didn't know why it turned out like this, what else could it do with its newly evolved body except relying on its strong body!

What's more, he is a jellyfish. What's the use of having a strong body?

Isn't it mostly water after all?

"That being said, his large size means that the waves he can create are even bigger. A wave that might have only flooded the first or second floor could now directly destroy a building."

"This.... we can only hope that no one is stupid enough to provoke the other party again."

Yu Feng couldn't help but sigh as he looked at the huge stinging jellyfish. The level of this stinging jellyfish might not be high after evolution due to the intervention of external forces, but the advantage of its large size was really obvious.

Even if it is a weak creature, the damage it causes will not be small as long as it is large enough.

Not to mention that this is not a 50-meter-long monster that is powerless. A small agate jellyfish can cause a tsunami.

This fifty-meter giant stinging jellyfish is...

It's a pity that there are always people who think they are very smart and do things that seem stupid to others.

"Then you are talking too late, mother-in-law. Mother-in-law's employees have already started."

Granny Silver was not as nervous as Yu Feng and the others. After all, Granny Silver had never seen a giant Pokémon, so she would not have thought about the damage that this super-giant Pokémon would cause.

People like the Afterglow Army, which often deals with sleeping ancient Pokémon, Satoshi and his crew, who have seen the horrific destruction caused by the giant Dragonite, and Sirona, who is recently learning about Gigantamaxing, all know the dangers of Pokémon of this size causing chaos.

Maybe in Granny Yin's eyes, no matter how big it is, it is still a jellyfish.

Granny Silver's employees have appeared on the coast fully armed, ready to cover the huge poisonous jellyfish that is destroying in the distance with firepower.

Xiaozhi's body always moves much faster than his brain. He instantly stood up and blocked the way of these employees who were armed with heavy firepower.

"Don't do that. The stinging jellyfish are only so angry because their habitat has been destroyed."

Xiaozhi's move made the employees around him hesitate. Many of them were aware that Granny Silver had lured them with huge bonuses, but raising Pokémon was very expensive.

They were also past the age where they could use the facilities at the Pokémon Center for free, and they couldn't take care of their entire family without finding a job.

"What are you doing, old lady? Open the fire, old lady!"

"I will double your salary to those who open fire first!"

Seeing that most of her employees began to hesitate, Granny Yin could no longer sit still. If she asked them to stop, how could she create a resort more luxurious than the city of Lanpulchi?

Seeing that the employees were still hesitating, Granny Silver, regardless of the fact that she was still held in the hands of Aledo, made up her mind and promised that as long as the person successfully drove away these agate jellyfish, she would double the salary.

"I advise you all to stay still and put down your weapons. I can consider letting you stay in prison for a few days less. Otherwise, even if you take the money, you will be stripped of your status as a trainer. Don't give up your future for this little money."

Seeing that some people were very tempted by the price offered by Granny Yin, Yu Huijun directly showed his alliance's inspector certificate to warn the people in front of him.

"Three times, I'll pay three times as much as the mother-in-law!"

Seeing that Granny Silver was still stubborn, Yu Huijun quickly signaled Aledo to seal her mouth with telekinesis to prevent her from saying anything else. After all, the treatment she had told them before, the threefold salary, even made him tempted.

But unfortunately, it is too late to shut up now. In Yu Feng's hometown, there is an old saying that goes "Wine makes people popular, money moves people's hearts." Triple the salary can make many people give up Pokémon and choose this.

As expected, some of them couldn't resist the temptation when they heard such a good reward. They looked at the sincere Xiaozhi in front of them, then gritted their teeth, closed their eyes, and slapped Xiaozhi away.

He pulled the trigger of the missile in his hand towards the huge stinging jellyfish in the distance, and dozens of missiles with long tail flames bombarded the huge stinging jellyfish.

Yu Feng started to use his superpowers to intercept, but someone was still firing. Yu Feng could not block too many rockets in a short time, and even with the help of two servants, he was unable to intercept all of them.

Still, a small number of missiles managed to escape their interception and hit the huge poisonous jellyfish that was causing destruction.

Unfortunately, the scene of the missile explosion defeating the giant stinging jellyfish as they had imagined did not occur. Instead, the kinetic energy of the missile was dissipated by the elastic skin of the giant stinging jellyfish.

One by one they fell into the seabed and disappeared.

Granny Yin stared with her eyes wide open at the missile that had no effect at all. Even if she made her already small brain work quickly, she still couldn't figure out why the missile had no effect at all.

Of course, this missile was not completely ineffective. It successfully attracted the attention of the huge poisonous jellyfish that was causing destruction to the small ants on the coast.

With the idea of revenge, the giant stinging jellyfish destroyed the wreckage of the hotel that had just been destroyed for half a day with one blow. With a wave of its huge tentacles, it signaled the agate jellyfish to create huge waves to attack human cities.
