Chapter 16 Is this toucan crazy?

Just as Yu Feng and Shining Kirlia were discussing how to get the two of them back to the Super Power Forest.

Xiaozhi rushed in from the door in his pajamas, and without even saying hello to Yu Feng, he ran towards Professor Oak's laboratory.

Now Yu Feng had no mood to discuss anything with Kirlia.

If you don't leave quickly, you'll be hit by a 100,000-volt bullet.

Sure enough, shortly after they left, Professor Oak's yard was struck by a dazzling lightning.

God knows how this Pikachu learned 100,000 volts.

In the Evergreen Forest

"Chirrut. (I won't leave no matter what you say. Why did you have to come to this forest?)"

Shining Kirlia lay on a rock with her tongue hanging out, not wanting to move forward any further.

"Well, just experience the joy of traveling. Travelers are accompanied by nature, with the ground as their bed and the sky as their blanket. What a beautiful scene."

Of course Yu Feng couldn't say that if he stayed here today there was a high probability that he would see the Phoenix King flying over here. Without mentioning whether his sister would think he was crazy if he said that.

If they really meet Ho-Oh, they will be more curious about why Yu Feng knows the whereabouts of the mythical beast.

Although you will learn the buggy skill of predicting the future later, there is no way to accurately predict the future to a certain time period directly.

It can only be a fragment without time and place.

Or it is simply to predict the enemy's attacks in the next period of time.

So forget about talking about being able to see mythical beasts or something like that, just say you want to experience the joy of traveling.

After hearing Yu Feng's answer, Flash Kirlia looked at Yu Feng in disbelief.

He used his superpowers to lift himself to the same height as Yu Feng, touched Yu Feng's forehead with his cold little hands, and then touched himself.

"Chirrut? (You don't have a fever either?)"

Flash Kirlia not only measured Yu Feng's temperature, but also used her superpowers to resonate with him, but did not find anything wrong with him.

"Huh? What are you talking about? Do I look sick to you?"

Seeing that Kirlia did so much just to see if she had a fever, Yu Feng was confused.

After slapping away the flash, Kirlia was speechless. What kind of physique did he have that made him catch a fever so easily?

"Chirrut? (What do you mean by resting in the forest when you don't have a fever?)"

If there had not been nothing unusual about his mental power when he was resonating with Yu Feng, Shining Kirlia would have really thought that he was seriously ill.

"Isn't it strange? Isn't it just to experience the life of a traveler?"

Yu Feng rolled his eyes, seeming dissatisfied with Shiny Kirlia making such a fuss.

No matter what she wanted to say, releasing the butler was to prepare the tools for camping.

"Chirrut. (Haven't you experienced enough in the past few years? Please, you grew up in the forest.)"

Shining Kirlia was puzzled by Yu Feng's statement that he wanted to experience the feeling of a traveler.

The two siblings grew up in the forest and were endowed with powerful superpowers by the forest (not really).

This feeling makes me want to vomit, so this guy must be hiding something from me.

I have to say that Shining Kirlia's feeling was very accurate. Yu Feng was indeed hiding something from her, and it was something big that would shock her.

But now he wanted to stay here and rest, so she had no objection.

Without saying much, Yu Feng released Ai Guanshi, and with the help of him and Shining Kirlia, they set up camp near the water source.

"Chirrut? (What are you going to do next?)"

After finishing everything, Shining Kirlia wiped her hair and looked at Yu Feng, as if waiting for him to explain something.

"Just wait, it must be a big deal. Oh, and we need to put up the rain shelter as well."

Yu Feng showed a mysterious smile when talking about this matter. This kind of thing would not be so shocking if it was told in advance.

But he remembered that there would be a sudden rainstorm soon, so if he didn't want the tent to get wet, he'd better set up a awning.

"Chirrut. (Don't you think it's ridiculous? Doesn't it look like it's going to rain?)"

Shining Kirlia could no longer stand her brother and pointed to the blue sky, where there was not even a cloud.

The old man actually told her that it was going to rain? When it really rained, she flashed and Kirlia ate the awning on the spot.

Yu Feng didn't answer her. He turned around and pulled Ai Guanshi towards the river. After all, it was still early and there was still some time before the Ho-Oh appeared, so he might as well go fishing for Pokémon.

If there is a Pokémon that looks good, he will also capture it. After all, it is easy to be targeted if you specialize in one type, such as a certain Dodo.

Seeing that his brother did not respond, Shining Kirlia did not say anything more. He found a relatively clean stone and began to meditate.

After all, they have lived together for so many years and know each other very well. She has never known things that her brother didn't want her to know before they happened.

But if that wasn't shocking enough, her brother should consider which of the 'three farmer's punches' doesn't hurt.

Time passed in the meditation of Shining Kirlia.

Suddenly, Kirlia's eyes flashed and opened, and her azure telekinesis locked onto a toucan that was about to attack Yu Feng.

"Nice job, sis."

Yu Feng turned his back to Shining Kirlia and continued fishing calmly, with no intention of turning around.

Shining Kirlia didn't care about her brother's compliment. She stared at the Toucan who was still struggling in her telekinesis.

It's not that she has never seen Toucan. On the contrary, there are many Pokémon like Psyche Forest Toucan and Pidgeot.

They do have a hot temper, but my aunt can always control them.

Ahem, that's off topic. Although toucans do have a bad temper, there is no reason for them to attack people who have not provoked them at all.

It is indeed rare to attack others for no reason like this. Did someone provoke the toucan?

This was the first thought that popped into Shining Kirlia's mind, but she immediately put the idea out of her mind.

Are you kidding? Even she knows to avoid provoking Pokémon like Spearow as much as possible. Just try not to touch them.

This is the territory of that lecherous old professor. There should be some rules about dangerous Pokémon and safety. There can't be anyone stupid enough to provoke Spearow, right?

While Shiny Kirlia was thinking, more and more Toucans attacked them.

"Chiru~~ (Get out of here!)"

The endless stream of toucans really annoyed Shiny Kirlia. There was the Riddler brother in front and these annoying stinky birds coming from behind.

A red light representing danger appeared in her eyes. She took a deep breath and a biting cold wind blew out of the mouth of Shining Kirlia, which was the freezing wind.
