Chapter 23 Is she really a genius?

"Since you want to go Mega Charizard X, let me think of some skills I can teach you."

Yu Feng stroked his chin and thought about what skills he had that he could teach Charmander now.

Yu Feng flipped through his skill pool, many of which could be passed on to Charmander, but most of them were not suitable for Charmander now.

Million Ton Punch? No, no, Charmander's form is vulnerable to injury. Hold on? Sunny Day? These all take a long time to learn.

When thinking about his skill pool, Yu Feng inadvertently thought of a combination of skills, which was the three moves known as the "Farmer's Three Punches", and it happened that Charmander could learn two of them.

And after all, this is the real world, who says Charmander can't learn the Frost Punch? If Charmander can learn these three skills, it can expand the attack range of Charmander. In addition, there are quick methods at home, so when the time comes, I can ask my aunt and others to help train it.

"Then let's learn the simpler Fire Fist first."

Yu Feng raised a finger and said excitedly to the Charmander.

"Hi!"

Charmander also cheered along with Yu Feng's actions. Although she didn't know what the Fire Fist was, she was happy as long as her trainer was happy.

"Chirrut.... (These two guys...)"

A drop of sweat dripped from Shiny Kirlia's forehead as he looked at the two people who were inexplicably happy. It was true that there was a certain kind of Pokémon for every trainer.

Yu Feng ignited flames on the fingers he raised in front of Charmander, and Charmander clapped his hands in surprise.

He stretched out his hand to see if he could ignite a flame, but no matter how he tried, the flame on his tail became stronger, but it did not burn like Yu Feng's.

Charmander couldn't help but feel a little frustrated. He couldn't do it and felt like a complete failure.

"Hahaha! It's okay. I've been practicing for four or five years. It's normal that you just started learning and can't use it."

Yu Feng touched the somewhat frustrated Charmander. It took him several days to learn how to do it.

After all, not everyone is a little idiot who spits out seed bombs and seed machine guns.

Oh yeah, and it can move at high speed, so Xiaozhi is more like a Pokémon than him! !

"Hi!"

Hearing Yu Feng's comfort, Charmander made a cheering gesture to encourage himself.

"Well, when you normally use sparks, don't you gather the energy of fire in your mouth?"

"Gather it in your hands and try it. It might work."

Yu Feng brought up what he did when he was learning the Fire Fist. Of course, it wasn't as easy for him to learn as it was for Charmander. After all, he wasn't a fire-type Pokémon, so he still needed a lot of Fire Stones to assist in his learning.

And haha, during that time, there was always a smell of barbecue around him.

The little fire dragon stopped Yu Feng from talking, nodded thoughtfully, and then stared at his right hand, as if brewing something.

.....

"boom!!!"

As Charmander's expression gradually became ferocious, the flame on its tail grew bigger and bigger, and finally seemed to reach a critical point, and the flame instantly ignited Charmander's body.

“Li! Li! Li! Li! Li!!”

Charmander noticed that he was on fire, and was so frightened that he looked everywhere for water to put out the flames on his body.

Seeing Charmander like this, Kirlia had to wave her hand. A cloud that just covered Charmander appeared above her head. The rain fell like a waterfall and instantly extinguished the flames on Charmander's body, and then disappeared.

"Li."

The little fire dragon, whose flames were extinguished, wiped the water drops on his forehead and breathed a sigh of relief. He almost became a roasted lizard.

Then he lowered his head and pulled Yu Feng's pants, as if apologizing for his stupidity.

"Hiss, sister, do you think that move just now was Flash Flame Charge or Charged Flame Attack?"

Yu Feng took a breath, he just wanted Charmander to practice his fire fist, he didn't need to learn these two moves, right?

"Chirrut. (It should be a charged flame attack. You can see there is no sign of burning on his body.)"

Shining Kirlia observed Charmander's body and found that it had no injuries and that it ran a little faster than usual. He told Yu Feng his opinion.

"What you said makes sense. That should be the charged flame attack."

Yu Feng pinched Charmander's legs and found that the muscles were now tense, which was consistent with the theory that the speed was increased by using the charged flame attack.

"Charmander, try to gather the strength in your hands according to the feeling just now."

Although Charmander can use Charged Flame Attack, this is just a pleasant surprise and it will not change the training plan Yu Feng designed for Charmander.

"Li."

Charmander obediently did as Yu Feng said and gathered all her strength in her hands, but unfortunately it did not have any other reaction other than making her mind confused.

The angry Charmander sent sparks at his hand.

"This is it? Is she really a genius?"

Yu Feng was a little shocked when he saw Charmander's actions. Could he use his skills like this?

Yes, the sparks spit out by Charmander did not cause any harm to her. Instead, it was like throwing a spark into a pot of hot oil.

It instantly ignited Charmander's arm, causing a raging flame on her arm.

Although in the eyes of Yu Feng and Shining Kiriliao, it was just a show-off, and when it hit others, it was not as painful as the reaction force.

But it's good news after all. After all, it's looking good and the next step will be a natural progression.

But learning the flaming fist in this way always made him and his sister look a little stupid, because it took them three days to get started.

However, considering that Charmander is a Fire-type Pokémon, it is normal for it to learn Fire-type skills faster than them, and Yu Feng felt balanced again.

"Li! Li!"

The little fire dragon waved his burning arms, as if he wanted Yu Feng to praise him.

"Yes, yes, you are very good. Use the flaming fist at that target."

Yu Feng was not stingy with his praise. After all, Pokémon needed to maintain a good condition and mentality so that their combat capabilities would not fluctuate too much.

Then he commanded Charmander to use the fire fist he had just mastered towards the place where they usually practiced telekinesis.

"Hi!"

Charmander spit out sparks at his hands, wrapping his arms in blazing flames, and then punched the target.

"boom..."

The target hadn't changed at all, it was still as perfect as new, and Charmander's flaming fist didn't leave even a trace of black burnt marks.

"Like! QAQ"

No, it still works. Charmander put his hand in his mouth in pain, as if this could relieve the pain.

"Sure enough, it's just for show."

"Chirrut (Yes.)"

Yu Feng and Shining Kiria made the same forehead-holding gesture, and it was just as they had guessed, it just looked like that but no attribute energy was injected.
