

Gardevoir 46

Chapter 46: Huge vs. Huge

"So this match is considered a personal battle? Interesting. I agree."

Yu Feng thought about Xiao Gang's words for a moment and understood what he meant. The following battle would be a battle between individuals rather than a gym challenge.

The gray badge will be given regardless of winning or losing, so why not agree? Yu Feng loves watching giant creatures fight the most.

"Sana!!! (Just because you're not the one getting beaten, you just agree to others casually, right?)"

After all, Gardevoir and Yu Feng share the same consciousness, so Shiny Gardevoir can know what Yu Feng is thinking. This is even more outrageous than the so-called telepathy.

Pokémon with telepathic abilities can know what you are thinking without communicating, and will quickly understand what the trainer means, saving a lot of meaningless communication and command time.

But Yu Feng and Shiny Gardevoir are slightly different from this. In essence, they are the same person. That is, Yu Feng only needs a thought or even just thinks about Shiny Gardevoir to know what to do.

Of course, you will say that humans will not be able to keep up with the elves' fighting rhythm in the end, and they must streamline the command sentences so as not to miss the opportunity to fight.

This statement is not wrong, but the problem is that humans are not unable to keep up with the rhythm of the battle. On the contrary, humans are very good at grasping the rhythm of Pokémon battles, but in the end they can only simplify it to a few sentences.

Once you have thought it over and spoken it out, the situation on the field will change and others will counterattack based on your command.

People with super powers do not need to speak, so in combat, some pre-reading techniques and commands cannot be conveyed quickly enough to keep up with them.

Of course, there are not many people with super powers. At the end of the whole series, there are only four people with super powers. Of course, this specifically refers to super powers.

Cattleya, one of the Four Heavenly Kings of Unova, Kajika of the Hundred-moment Gym in Carlos, Nancy, the gym leader of the Golden Gym in the Kanto region, and her father.

Even the weakest one is a former gym leader, and superpowers are simply cheating when it comes to fighting.

"Let's begin, Onix, use the impact!"

Seeing that Yu Feng agreed to fight with him, Xiaogang regained the feeling when he first received the Pokémon.

After all, the battle was started in the name of an individual and did not have to follow the alliance's gym challenge rules. Xiaogang took the initiative without hesitation.

Onix twisted its huge body and charged towards Shining Gardevoir. Shining Gardevoir was not to be outdone and waved its densely packed magic leaves at the road ahead of Onix and him like bullets. At the same time, a blue-gray light flashed on its body from time to time.

"Roar!"

Onix came to Shiny Gardevoir with a magic leaf and rammed into her head. Even though Shiny Gardevoir was prepared to protect itself from the impact, its huge body was knocked back a few steps.

However, Shiny Gardevoir reacted quickly and grabbed Onix's horn instantly and started wrestling with it.

"Onix just ties it up like this!"

Hearing Xiaogang's command, Onix wrapped itself around Shining Gardevoir and tied up her lower body. It was not that Onix did not want to tie up Shining Gardevoir directly, but his head was already held in the hand of Shining Gardevoir, so he could not wrap around her upper body at all.

"Is this a real Pokémon battle?"

"Pikachu~"

Watching the two giant beasts fighting each other in the field, Xiaozhi envied that he would be able to have such a battle one day.

Pikachu sighed, thinking that his trainer was thinking too much and it was really too difficult for Pikachu.

On the field, Onix launched a rockfall that hit Shiny Gardevoir on the head. Shiny Gardevoir, feeling the pain, hit Onix's horn with a million-ton punch, breaking it in half.

"Shauna!!!"

Without horns as handles, Onix broke free from the grip of Shining Gardevoir and instantly wrapped Shining Gardevoir tightly around its body.

Shining Gardevoir held Onix's body with both hands to leave a little space for itself to breathe, but for some reason Onix didn't wrap around the chest, but skipped it and pressed directly on the neck. Maybe... it felt that it couldn't be tied completely tightly like this?

In short, the current situation on the field looks very bad for Shiny Gardevoir.

"If you don't have any cards, then it looks like you're going to lose."

Xiaogang looked at the situation on the field with some confusion. This was going so smoothly! It had never been so smooth before when dealing with psychic Pokémon.

Judging from the size of this Gardevoir, she is destined to be no weakling, but he has forgotten what the current situation is.

"Okay, stop playing. If you want to play, let's go somewhere with fewer people."

Yu Feng glanced at the Shining Gardevoir that seemed to be tied up and unable to move on the field and shook his head. It was just that it couldn't come out often. Was it necessary to play here?

"Sana! (You said it!)"

Hearing Yu Feng's promise to let her out more often in the future, Gardevoir instantly became energetic. Although she is Gardevoir, she and Yu Feng have the same consciousness. Yu Feng hates small places, and so does she.

Although the love ball made by her mother is very spacious, there is nothing inside and she can only sleep. She feels like her body is going to rust if she doesn't come out for a few days.

Under the temptation of being able to come out and play frequently, Shiny Gardevoir is finally ready to get serious, so that it can come out and play in the future!

The Shining Gardevoir, which originally had dead eyes, instantly became alert and its eyes became very serious.

The huge super power caused the entire venue to tremble, and even the giant Onix wrapped around her was taken off her body like taking off clothes. Looking closely, there was a hint of blush on Gardevoir's face.

"Onix, break free from the telekinesis!"

Looking at the scene in front of him, Xiaogang finally realized what he had not expected. Although the Shiny Gardevoir in front of him was fighting fiercely with Onix, if you think about it carefully, she has not used her psychic powers to fight Onix at all. Instead, she has been using other skills. As a psychic-type Pokémon, she didn't take it seriously at all.

Onix on the field was a different feeling. Onix was wrapped in superpowers, and the strong feeling of being blocked was like a sandshrew biting its tail, but as soon as it got rid of it, a Kodara ate the ore I had stored. What was going on? Xiaogang? Why did you just watch? Did you betray me too?

Help, give the next order, Xiaogang!

Onix looked at Brock with hope, only to receive the telekinetic command that he should break free of.

"Sana, Shana! (Hahahahahahahahaha! I will change everything!)"

Without paying attention to Onix's every move, a transparent psychic ball with a reflection of Onix appeared in Shiny Gardevoir's hand. In Onix's almost desperate gaze, Shiny Gardevoir crushed the psychic ball with a wild laugh. Onix in the distance seemed to have suffered a heavy blow and instantly lost its combat ability.

Yu Feng's face was tense and he almost lost his composure. Fortunately, he was the only one who could understand what Shiny Gardevoir was saying, otherwise he should have considered digging a hole and crawling into it.

Is he really that immature? Why did he, a Shiny Gardevoir, do such a thing, while he was so serious.

"Thank you for your hard work, Onix."

"There must be many powerful trainers in this vast world, so Xiao Feng, you have to become stronger and stronger!"

"You deserve this grey badge."

Xiaogang took out the Poké Ball and took back Onix that had lost its ability to fight. He walked to Yu Feng, took out the gray badge and handed it to him.

Yu Feng resisted the urge to do Xiaozhi's signature move and put the badge into the badge box.

"Okay, then it's your turn next, Xiaozhi."

After handing the gray badge to Yu Feng, Xiaogang looked at the people in the stands who were eager to try. Next, he should tell Xiaozhi that the gym battle is not just some small street fight.
