Chapter 49 Are You Really Human?

"Tell me what it is!"

Xiaozhi was very excited to hear Wu Neng's words. After all, he really wanted to defeat Xiaogang now.

"Come with me."

Looking at Xiaozhi's expression, Wu Neng paused, then took Xiaozhi to another path.

Xiaozhi also excitedly followed Wu Neng, wanting to see what could make Pikachu realize his potential.

Wu Neng led Xiaozhi along a small path and came to a river that was almost dry. There was a small wooden house on the river bank.

"Where is this place?"

Xiaozhi looked around but still couldn't figure out where this place was. He was really curious about how this place could allow Pikachu to realize its potential, so he couldn't help it and looked at Wu Neng in confusion, hoping that he could explain it.

"The waterwheel power station is used to provide Pikachu with a large amount of electricity. If the power it stores is increased, its power will naturally increase."

Wu Neng looked at Xiaozhi and said seriously that this was a little trick he summed up. Although it would be gone once the electricity was consumed, it was still a good idea.

"Uncle Wu Neng, your idea is really great!"

"But why do you know so much about Pokémon?"

After hearing Wu Neng's explanation, Xiaozhi suddenly became alert. Why didn't he think of it? But he suddenly realized that Uncle Wu Neng was just a stone seller, so why did he know so much about Pokémon?

For some reason, Wu Neng suddenly became very nervous, his movements became exaggerated, and he couldn't help but raise his voice a few degrees while touching the back of his head: "No, how should I put it, I just think this is fine!"

"Alright! Pikachu, let's do some charging training!"

"Pikachu~~"

Xiaozhi is worthy of being Xiaozhi. When others fooled him, he ignored the unreasonableness of it and turned to look at Pikachu.

Pikachu also cooperated very well with Xiaozhi and patted his round body to indicate that he was ready.

"But there is no water in the river now."

Just when Xiaozhi and Pikachu were full of confidence, Wu Neng looked at the somewhat dry river and delivered a fatal blow.

The morale that Pikachu and Xiaozhi had just built up was immediately dissipated by Wu Neng's words. Both Pikachu and Pikachu staggered and almost fell to the ground.

"Will this mean that we won't be able to generate electricity?"

Xiaozhi finally recovered. If there is no water, then there will be no electricity. What should he do? Xiaozhi looked at the omnipotent Uncle Wu Neng with some confusion, hoping that he could come up with a solution.

"It's not impossible."

Wu Neng looked at Xiaozhi with a smile. In fact, he actually had a plan that could not be called a plan.

The scene changed, and Xiaozhi was already standing on the waterwheel, and Wu Neng also helped Pikachu connect to the generator.

"I said, do you really want to do this?"

"It might be dangerous to do this."

Yu Feng's voice came from the shadows. He didn't know how long he had been standing there. After all, Pikachu was different from Pichu. He could generate and store electricity by himself.

What Xiaozhi and the others are doing is undoubtedly forcibly expanding Pikachu's energy storage, which will indeed increase its power in the short term, but during this period, Pikachu is like an explosive barrel that can explode at any time.

"Xiao Feng? When did you come?"

Xiaozhi was startled by Yu Feng's sudden appearance and almost fell off the waterwheel.

"Have you forgotten that I have super powers? And you haven't answered my question yet."

Yu Feng pointed to his head, indicating that he had used his superpowers to help him more than once.

Seeing Xiaozhi's sudden realization, Yu Feng reminded him that he hadn't answered his question yet, so he shouldn't just ask him why he was here.

"Of course we have to do it. We have to defeat Brock on our own, right Pikachu!"

"Pikachu!"

Xiaozhi said excitedly, and Pikachu responded to Yu Feng with full energy. He also hoped to defeat Xiaogang.

"Then I have no objection, you guys continue."

Seeing that Pikachu agreed, Yu Feng had no reason to stop them from continuing the special training, even if it was an emergency training.

"Then I'm ready here."

Looking at the martial arts that the two had already discussed, he made an OK gesture to Xiaozhi, indicating that he was ready.

After receiving Wu Neng's signal, Xiaozhi began to step hard on the waterwheel under his feet, and the indicator on the generator began to rise gradually.

一格

两格

.....

六格

The generator's indicator soon showed full bars, which was really unacceptable to Yu Feng who was watching from the side.

He could accept stepping on the wooden waterwheel to generate electricity, after all, he could do it. But wasn't it a bit too much for Xiaozhi to step on the power of the generator to the maximum?

What kind of strange power is this? !

At this moment, Yu Feng really wanted to ask Xiaozhi, are you really not a fighting-type Pokémon?

As the battery level increased, Pikachu began to feel unwell and closed his eyes, with golden electric light appearing on his cheeks from time to time.

"You have to be patient. At first, you will feel pain when the electricity input exceeds your physical strength, but over time your body will begin to adapt to the high-voltage current."

"Hey, hey, hey, Xiaozhi, please don't torture Pikachu with this quick method, okay? Wouldn't it be better to just ask me to help you?"

Misty appeared in the river below at some point. She couldn't bear to see Ash torturing Pikachu like this, so she suggested again that Ash could borrow her Pokémon to defeat Brock.

"I can still win even without your help."

As expected of Ash, he once again refused Misty's help. Misty turned around and left angrily. She didn't understand Ash either. When it came to Pokémon battles, Ash was as stubborn as a donkey, the kind that five horses couldn't pull back.

"I want to cultivate Pokémon with my own strength to get the badge."

Xiaozhi didn't know who he was talking to, but he quickened his movements as he spoke, and Pikachu also endured an electric current that exceeded its current level in order to respond to Xiaozhi's expectations.

"what?"

Suddenly Wu Neng seemed to notice something and turned to look at the generator.

No one knew when the generator had begun to glow golden, and the energy bar on the indicator panel had turned bright red. Wisps of black smoke could be vaguely seen coming out of the generator, as if it was severely overloaded.

Looking from outside the house, dazzling golden light burst out from this dilapidated waterwheel power station, illuminating this small area like daytime.

Yu Feng used his superpowers to take Wu Neng away from Pikachu. After all, not everyone is a pervert like Xiaozhi who can withstand 100,000 volts with his physical body.

"What kind of potential is this? Is it really something a Pikachu can do?"

Wu Neng had traveled for a long time after all, but he had never seen the situation nowadays. Are kids nowadays so strong?

So should he let Xiaogang go out for a walk as well?
