

Genius 2031

Chapter 2031 - Three-eyed Viper! (2)

The Little Mink is an extremely domineering Snow Fox Ferret, with very powerful venom, and speed as quick as lightning. Its strength is almost not inferior to an ordinary Grandmaster Peak Strongman.

Of course, only in relatively narrow places can the Snow Fox Ferret exert such terrifying strength. If the surrounding space is too large, then it's somewhat lacking.

However, the Little Mink is mainly used for sneak attacks... It's not considered as a regular weapon to use, so there's not much worry.

But Qin Fang has tamed this Snow Fox Ferret, and with all the benefits given, the hope is for it to grow into a Spiritual Beast, right?

Only when a creature becomes a Spiritual Beast can it be considered truly strong.

If one day it does not become a Spiritual Beast, then it basically cannot become a truly powerful Spirit Pet... Even if the Snow Fox Ferret in Qin Fang's hand has strong spirituality, it won't work.

Once it becomes a Spiritual Beast, the Little Mink can truly become a helper and partner for Qin Fang, capable of doing many things for him.

But this achievement is not so easy, the growth of a Spiritual Beast is not something that can be accomplished overnight; it also requires huge opportunities.

If we talk about earlier times, although Qin Fang had many good items, including the juice of Superb Spiritual Medicine Golden Dragon Saliva, refined Spiritual Medicine Lingyuan Grass, and Lingyuan Fruit...

Even having these, the hope for the Little Mink to advance to a Spiritual Beast was already very large, but it also needs time to slowly grow... Perhaps like this Three-eyed Viper in front, entering into the quasi-Spirit Beast tier, requires gradual accumulation to advance!

This is not something that can be accomplished overnight; even Qin Fang can only reluctantly accept this fact.

"I must strip its inner core..."

But right now, there's a huge opportunity presented, and Qin Fang naturally does not plan to let it go. Getting the inner core of this Three-eyed Viper would basically complete the conditions for the Little Mink's advancement.

Why not tame this Three-eyed Viper?

Qin Fang does not want to do this because it is not worth it.

This Three-eyed Viper, although sent to this maze, still retains its wild nature, and taming it would require a quite amount of effort, with the risk of being backfired at any time.

This might be the reason why so many experts on Devil's Island managed to capture it but are unwilling to domesticate it.

Qin Fang can be fearless of the Three-eyed Viper's venom, but other experts might not have this ability; once bitten, even a Great Grandmaster-level expert might not withstand it!

Moreover, Qin Fang already has the Little Dragon as a pet, unless it's a Divine Beast of the same level, other creatures cannot coexist with the Little Dragon.

The Snow Fox Ferret doesn't actually count as Qin Fang's pet; it should be considered as the Little Dragon's pet, just like the Heart Gu...

Therefore, taming this Three-eyed Viper also requires intervention by the Little Dragon, and because of this, Qin Fang directly abandons this idea.

Additionally, the Three-eyed Viper's body isn't small; even if it becomes a pet, it's inconvenient to carry around, especially when going out, it can't be brought along.

In comparison, the Snow Fox Ferret appears more suitable, as it can control its own venom, not harming people casually, and the Snow Fox Ferret is more small and adorable. No problem taking it as a little pet, this is something unmatched by the Three-eyed Viper.

Considering all aspects, Qin Fang decided to kill this Three-eyed Viper and take its inner core, so the Snow Fox Ferret can consume it and advance into a Spiritual Beast.

Furthermore, Qin Fang also wants to understand some characteristics of deep-sea creatures through this Three-eyed Viper...

The deep sea is a forbidden zone for humans; outside world has sparse spiritual energy, but inside the deep sea, it may not be like this; there might still be some incredibly powerful creatures hidden inside.

Qin Fang is hidden in the dark, its silhouette almost invisible, but the Modified Human is different, as he is currently quite close to the Three-eyed Viper.

"Hiss hiss~~"

The Three-eyed Viper's three eyes are all staring this Modified Human directly. Its forked tongue is continuously flicking, emitting this hissing sound, making it sound eerie.

Moreover, the coiled body of the Three-eyed Viper is slowly moving, not very fast but gradually slithering towards the Modified Human.

Apparently, the Three-eyed Viper seems to have a bad temper and is already somewhat angry at this unknown intruder.

The Modified Human is unafraid, and Qin Fang wonders if he realizes the ferocity of the Three-eyed Viper, but at least at this moment, he seems quite calm.

Snap~~

Compared to others carrying swords, daggers, and other weapons, this Modified Human has a considerable advantage. By extending a hand, razor-sharp blades reminiscent of Wolverine extend from his fingers.

"He's really a Wolverine..."

Qin Fang estimates this Modified Human was modified based on Wolverine, the gleaming blades definitely crafted from some very durable alloy.

"Looks like I'll have to be the mantis stalking the cicada with the sparrow behind this time..."

He glanced at the body of the Three-eyed Viper. This kind of venomous serpent that lives in the deep sea needs to withstand enormous water pressure, the snake skin and body naturally won't be fragile.

Qin Fang estimates the snake skin of this Three-eyed Viper is likely not weaker in strength than the toughness of the Python Skin he possesses.

Chapter 2032 - Three-eyed Viper! (Part 3)

Qin Fang didn't know if the blade of the modified human could pierce the snake skin of the three-eyed viper, but at least his Flowing Shadow Divine Sword should have a good chance.

However, Qin Fang did not rush to act but continued to stay hidden. He even proactively stepped onto the top of the passage to hide himself well so as not to be innocently involved.

In such a narrow passage, if the three-eyed viper and the modified human were to fight, retreating wouldn't be so easy for Qin Fang.

If he got involved, not only would he fail to be the one waiting for an opportunity, but he might also face the dual attacks of the three-eyed viper and the modified human... This was not something Qin Fang wanted to happen.

Luckily, although the passage was narrow, its height was still barely manageable. Qin Fang climbed to the top and pressed his body against the stone wall, which allowed him to remain safe.

Hiss~~~

However, before Qin Fang had fully prepared, the three-eyed viper couldn't wait any longer and launched an attack against the modified human.

The snake's body, as thick as an arm, instantly turned into a black phantom, shooting swiftly toward the modified human.

Its speed was as fast as lightning, reaching the modified human practically in the blink of an eye, and its gaping maw seemed like it wanted to swallow the modified human whole.

"Tsk tsk, they say greed knows no bounds, like a snake swallowing an elephant—I've seen it now..."

This saying is known by many, but such an event is rare to witness, yet it unfolded right before his eyes.

Compared to some snakes on land, the three-eyed viper is already quite large, about two to three meters long, with a body as thick as a grown man's arm.

But this modified human is also very burly and robust, standing at 1.9 meters tall and weighing at least over 100 kilograms, built entirely of strong muscles infused with metal, making him not only sturdy but also quite heavy.

With such a massive physique, it is definitely not easy for the three-eyed viper to swallow him...

However, this three-eyed viper is already a quasi-spirit beast. Its intelligence has developed to some extent—not comparable to humans, but it possesses some level of thinking ability.

Qin Fang estimated that the main goal of this three-eyed viper was not to swallow the modified human but at least to bite him once...

Most of the three-eyed viper's strength lies in its venom, which allows it to easily kill many enemies—its greatest advantage, which isn't something it would overlook.

Bam~~

But the modified human isn't a weakling either and naturally could anticipate the three-eyed viper's plan. As the viper approached, he abruptly swung his blade, slashing toward the viper's body...

The three-eyed viper's speed was incredible, but the modified human's was not slow either with precise timing and distance calculation. Unless the viper dodged, the modified human's blade would definitely hit it hard at the critical juncture of its body...

Could the three-eyed viper dodge?

Obviously not!

Because everything was happening in a flash, it was an instinctive move, leaving no time for any changes.

Bam~~

With a muffled sound, the modified human's blade slashed harshly at the critical part of the viper's body, while it also bit fiercely at the modified human's chest.

Soon, the three-eyed viper's long body was heavily slammed down to the ground... The modified human's strike was not only fierce but also surprisingly powerful.

The viper's body was large, but it couldn't withstand such tremendous force and was directly knocked.

Hiss hiss hiss hiss~~

Just as Qin Fang expected, the toughness of the three-eyed viper's skin was not at all inferior to that of the Xuan Shui Python's skin.

Though the modified human's alloy-forged blade was sturdy and sharp, it failed to inflict any damage to the viper's body...

At most, the harsh smashing caused the viper to become even more irritable, its flicking tongue adding a chilling sensation.

Of course, the viper also managed to bite the modified human, leaving two fang marks, which turned black, indicating the venom's potency.

However, this modified human has impressive defensive capabilities. Even though the viper bit him, it couldn't penetrate his skin.

Coupled with the modified human's quick actions and immense strength, within such a short span, it might not have caused serious harm.

"Things aren't looking good~~~"

As an observer, Qin Fang could see more clearly and couldn't help furrowing his brows. The modified human seemed quite disadvantageous against this three-eyed viper.

Though it appeared as if both sides emerged unscathed from the first encounter, seemingly a standstill situation, it was actually quite unfavorable for the modified human.

The modified human had strong defenses, relying mainly on those blades for attack, yet even striking the crucial underbelly of the viper didn't harm it substantially, which wasn't good news.

Although the modified human resisted the viper's venom, it didn't mean much... because some venoms aren't only transmitted through bites.

"Poison fog~~~~"

The modified human perhaps hadn't noticed that as the three-eyed viper flicked its tongue, its venom was already turning into faint poison fog.

This meant that the modified human unwittingly inhaled a considerable amount of poison fog...

"Looks like you won't last much longer..."

The modified human boasts unparalleled defense, but it is only surface protection. Once the poison fog enters the lungs, the potent toxin will seep outwards from within, quickly proving lethal.

According to Qin Fang's judgment on this fog's toxicity, it won't be long...

Chapter 2033 - The Third Eye!

...

Regarding the life or death of this Modified Human, Qin Fang wasn't too concerned... Even if this Three-eyed Viper couldn't finish him off, Qin Fang himself would certainly do the job.

Who would let this guy carrying two treasures on him go? That's like a walking treasure trove, and there's no way Qin Fang would give it up so easily.

"However, dying like this seems a bit too unprofitable..."

But at the same time, as an outsider, Qin Fang couldn't help but mutter to himself, his brows furrowed as he watched the battle not far away with curiosity and doubt.

The Three-eyed Viper was extremely fierce and ruthless, and its movements were exceptionally swift, being able to maneuver effortlessly in such a narrow space.

On the other hand, the Modified Human found it increasingly difficult to maneuver. After all, a strong adult could barely move in such a space, making mobility quite challenging.

Given the current situation, the Three-eyed Viper was holding the absolute advantage and kept shrinking the Modified Human's moving range, almost driving him to a dead end.

Even Qin Fang, though lurking at the top of the rock wall, was quite close to the Three-eyed Viper below. At this moment, if he were to drop directly, he would basically be able to touch the Three-eyed Viper.

"I can't let this Three-eyed Viper just kill the guy..."

Though Qin Fang also intended to eliminate the Modified Human, the Three-eyed Viper was simply too formidable. The Modified Human was already robust enough but hadn't caused it any significant harm.

If this continued, the Modified Human would surely die, while the Three-eyed Viper remained in its prime. Qin Fang would then have to face a full-strength Three-eyed Viper, which was contrary to his initial plan.

He intended to be the one reaping the benefits, not the one facing the brunt of the attack!

"But, how exactly should I help?"

Qin Fang didn't want the Modified Human to perish without contributing anything. But in the current situation, unless he secretly struck the Three-eyed Viper, the Modified Human alone seemed unable to inflict substantial damage...

However, Qin Fang had no qualms about making a move, as he was planning to eliminate the Three-eyed Viper and seize its inner core.

The issue was, for Qin Fang to strike now, the timing wasn't quite right.

Although it could alleviate the immediate danger for the Modified Human, it might also seriously wound the Three-eyed Viper. After that, he might face attacks from both the Three-eyed Viper and the Modified Human.

This wasn't just Qin Fang's speculation; it was almost an inevitable situation...

At the very least, the moment Qin Fang intervened, the Modified Human's crisis would be resolved, and he would definitely push Qin Fang to the forefront to withstand the Three-eyed Viper's assault.

As for himself, he might sneak away to rest or directly escape, or worse, he might plot against Qin Fang...

Qin Fang certainly didn't want to help someone, only to be stabbed in the back afterwards.

"It's best to strike secretly, without being detected by the Three-eyed Viper or the Modified Human!"

This was the most frustrating part for Qin Fang, his mind quickly racing through thoughts, seeking a solution that could benefit both sides.

However, in such situations and circumstances, finding a perfect solution was quite difficult, and from all his thinking, Qin Fang didn't seem to come up with any particularly good ideas.

The Three-eyed Viper in front of him was indeed tough-skinned, and there weren't many things that could penetrate its defense... It seemed that aside from Qin Fang's Flowing Shadow Divine Sword, even regular bullets couldn't penetrate its Snake Skin!

"High explosive bullets..."

However, Qin Fang suddenly thought of a method, his eyes lighting up instantly, while a brilliant smile appeared at the corner of his mouth.

With a slight movement of his wrist, a heavy sniper rifle appeared in his hand, already loaded with the most powerful high explosive bullets.

"Unfortunately, the range is a bit too close..."

Qin Fang quickly aimed at the Three-eyed Viper, sighing to himself a bit helplessly.

The power of the sniper rifle was indeed terrifying, especially with these high explosive bullets, capable of penetrating steel plates several centimeters thick.

But the problem was, for a sniper rifle bullet to exert its maximum power, it also needed to be within its optimal shooting range.

As for the heavy sniper rifle in Qin Fang's hand, the optimal range was between five hundred to eight hundred meters, where the bullet's power was maximized.

But now, Qin Fang was at the top of the rock wall, just a few meters away from the Three-eyed Viper, which severely limited the sniper rifle's effectiveness.

Yet, there wasn't a particularly good solution for this.

Certainly, Qin Fang could move back a little, but the passage wasn't straight, rather winding and twisting.

Beyond ten meters, he could hear the sounds of fighting ahead, but his eyes couldn't see any activity there.

Although the bullet's trajectory was parabolic, it was a downward parabola and couldn't turn during its flight.

Moreover, at such a short distance, the bullet's trajectory was basically a straight line...

Beyond ten meters, even if Qin Fang's shooting was at a Quasi-Grandmaster Level, or even Supreme Level, it would still be difficult to hit the Three-eyed Viper.

Chapter 2034 - The Third Eye! (Part 2)

Furthermore, the speed of the Three-eyed Viper is just too fast. This is Qin Fang—a different gunman might not be able to aim at such a close range.

Pu~~~

Qin Fang didn't hesitate at all, aimed at the moving Three-eyed Viper, then pulled the trigger. The bullet instantly shot out from the muzzle, heading straight towards the Three-eyed Viper.

This heavy sniper rifle was equipped with a silencer, effectively blocking the sound of the gunshot; although not completely silent, it wasn't too loud.

Right now, the intense battle between the Three-eyed Viper and the Modified Human shattered rock walls and ground, with debris flying everywhere, and the noise level was quite substantial, effectively masking the sound of the gunshot.

Of course, at the grandmaster-level tier, such sounds, though not loud, can still be detected. After all, a grandmaster-level expert's five senses are far more formidable than those of an average person.

At least Qin Fang himself could distinctly discern the gunshot from the chaotic noise.

But he decided to take a gamble... betting that the Modified Human didn't have such capability!

The strength of the Modified Human comes more from genetic modification than from diligent practice, unlike the martial arts experts from Dragon Country who develop their skills bit by bit through hard practice.

This intensity of the five senses is certainly much stronger for martial arts experts. As for these modified humans... they might not be so formidable.

At least, Qin Fang figured that this Modified Human, enhanced with metal implants, exhibited some sluggishness in action and thought, making it even less likely to notice Qin Fang's subtle moves.

However, Qin Fang was somewhat worried that the Three-eyed Viper might notice his subtle moves...

"I wonder if it worked?"

The close distance would reduce the bullet's power significantly, and even Qin Fang couldn't be certain if the high-explosive bullet would pierce through the Snake Skin of the Three-eyed Viper.

Qin Fang didn't have much time to think; almost immediately after the shot was fired, he swiftly moved two to three meters back.

Using a slightly curved bend as cover, Qin Fang's figure was completely concealed. Although he couldn't see the situation ahead, the Three-eyed Viper certainly wouldn't be able to detect Qin Fang's presence.

If it can't detect him, it naturally wouldn't be able to attack Qin Fang...

Yet Qin Fang couldn't see the result and his mind was constantly on it; that shot carried significant hopes for Qin Fang.

But Qin Fang held his patience, waiting at the spot for several minutes before slowly moving forward.

This slow movement involved cautiously extending his head forward; he didn't need to see clearly, just catching sight of the Three-eyed Viper sufficed.

Qin Fang could use the small map for Scouting Skill but could only get the Three-eyed Viper's status...

Although the Modified Human couldn't break through the Three-eyed Viper's defenses, its strength was considerable, and each heavy strike inflicted some damage on the Three-eyed Viper.

This damage, of course, manifested as a reduction in Life Points... Qin Fang could see the Three-eyed Viper's Life Points gradually decreasing.

Due to the decrease in Life Points, whether Qin Fang's shot succeeded or not, the reduction in Life Points would continue, making it hard to judge clearly.

This necessitated Qin Fang to observe with his eyes to confirm if the Three-eyed Viper had wounds... As long as there was a wound, it meant Qin Fang was successful!

"Oh, it seems it worked..."

When Qin Fang peeked over, he immediately spotted the intense battle between the Three-eyed Viper and the Modified Human...

Although this outcome was relatively favorable for Qin Fang.

Yet Qin Fang wasn't happy at all; instead, he frowned deeply... because the Modified Human failed him.

"The poison has entered the organs, it's dying..."

The Modified Human's body, though incredibly robust, couldn't be harmed by the Three-eyed Viper's Poison Fang, leaving only black spots with no damage otherwise.

These "wound" locations were spread across the vital points of the Modified Human's body—heart, dantian, neck... almost everywhere there were black spots.

Yet these areas showed no damage... the strength of its defense was quite astonishing to Qin Fang.

Unfortunately, even strong defenses were futile; the Three-eyed Viper was far more intelligent than regular vipers. Seeing that brute force was ineffective, it resorted to toxic gas attacks.

It even maintained an aggressive stance, forcing the Modified Human into continuous battles, further accelerating the effects of the venomous fumes.

Within a brief few minutes, the condition of the Modified Human deteriorated rapidly, and Qin Fang figured it wouldn't take even two minutes for the Modified Human to meet its end...

"What a fool..."

The Modified Human's impending demise didn't bother Qin Fang, but he couldn't help but curse its stupidity.

Earlier, Qin Fang's shot successfully inflicted a wound on the Three-eyed Viper, from which blood was gushing.

A rational mind would seize this opportunity and vigorously attack this wound... just as Qin Fang did to take down the Xuan Shui Python back in the day.

Chapter 2035 - The Third Eye!

But this Modified Human seemed to have a missing screw in his head, continuing to aggressively attack the Three-eyed Viper, yet his technique was in complete disarray, and he struck randomly without targeting any vital points!

"What's going on?"

Witnessing this scene, Qin Fang furrowed his brows, vaguely sensing something amiss... To have achieved this level of strength in the underground world, he couldn't possibly be just a slaughter-hungry butcher, surely he had some intellect!

But this Modified Human seemed like an idiot, which was very unusual...

Noticing this strangeness, Qin Fang initially intended to intervene again, but now he stopped, focusing intently on the Three-eyed Viper, trying to pinpoint the reason.

Qin Fang had a feeling that if he overlooked the cause of this bizarre situation, he might suffer significant losses here against the Three-eyed Viper.

To uncover the peculiarity of this Three-eyed Viper, Qin Fang indiscriminately used his Scouting Skill on both the viper and the Modified Human, hoping to find out the true reason for this anomaly.

"Three eyes... that third eye!"

The Scouting Skill is just that extraordinary, especially since Qin Fang had upgraded it to a Quasi-Grandmaster Level, making its effects exceptionally powerful.

Through a detailed search, Qin Fang indeed found something unusual; it was the third eye on the forehead of the Three-eyed Viper!

This eye seemed to have no difference from the other two eyes, except that it was vertically aligned.

But in reality, through careful scouting and comparison, Qin Fang found that the two eyes emitted a fierce and cold light, while the third eye shimmered with a faint green glow.

This glow appeared to hold some kind of magical power, where even Qin Fang, despite being an outsider, felt a bit dazed after looking at it for too long.

Qin Fang hadn't even faced the Three-eyed Viper head-on and already felt this way, so the Modified Human's bizarre state was understandable given his direct confrontation.

"Enchantment?"

Focusing on the eye of the Three-eyed Viper, Qin Fang furrowed his brows tightly, murmuring to himself.

Qin Fang knew that some Martial Arts Experts, like the Sorceresses from the Baihua Demon Sect, had cultivated certain enchanting techniques capable of wavering one's mind or even fully controlling their spirit.

But those relied on special cultivation techniques and unique medicines to achieve such effects, and stronger martial artists with firmer wills had higher resistance.

Qin Fang didn't expect a natural creature could possess such a peculiar ability, even far exceeding common enchanting techniques.

Although the Modified Human wasn't a fully cultivated martial artist, he had survived genetic modifications, so his willpower was at an extreme level.

This Modified Human might resist the enchanting techniques of the Baihua Demon Sect, but couldn't withstand the power of the Three-eyed Viper's third eye... This left Qin Fang feeling a bit chilled.

"Damn it, fortunately, I didn't impulsively make a move earlier... Otherwise, I could have suffered greatly too!"

Realizing this, Qin Fang felt extremely relieved.

He never expected that the third eye of the Three-eyed Viper was not only naturally peculiar but also possessed such magical power.

If he had rashly intervened, he might have fallen for it like the Modified Human... Even if not completely, just enough disruption affecting his cultivation could lead to Qin Fang's downfall.

"No way! I must come up with a countermeasure..."

The third eye of the Three-eyed Viper possessed such an enigmatic power, forcing Qin Fang to handle it cautiously. Without a suitable solution, even if he stepped forward, he couldn't be of any help.

Bang~~~

At this moment, the battle between the Three-eyed Viper and the Modified Human had also entered its final stage.

The Modified Human was deeply poisoned by now, and even though he was a Metal Transformed Person with terrifying defense, he now appeared as a pitch-black, extremely eerie poison man.

The intense poison seeped from his body, infiltrating almost all of his veins and capillaries...

As the blackness surfaced, the Modified Human turned completely black, looking as if he transformed from a white man into a black man.

Yet, the Three-eyed Viper wouldn't relent just because of this, shifting slightly, its slender body transformed into a black sword, slashing towards the Modified Human.

A dull thud was heard, and the Modified Human, whose defense was originally astonishing and almost unbreakable, now had his chest pierced as if hit by a heavy rocket...

The Three-eyed Viper actually flew straight through the Modified Human's chest, leaving behind a black, gaping hole... without leaving a trace of blood!

"Hiss~~~"

Seeing this scene, Qin Fang, as an outsider, couldn't help but take a sharp inhale.

Although he estimated the poison of the Three-eyed Viper to be extremely potent, even surpassing his Snow Fox Ferret's poison.

Seeing the actual effect of this deadly poison chilled Qin Fang's back...

This poison infiltrated the Modified Human's body in the form of a toxic mist, corroding his body slowly from the inside out...

Yet, this Modified Human was a Metal Transformed Person, with metals incorporated within his body, it's quite tough to break through such defense.

But unexpectedly, the Three-eyed Viper could directly pierce through the Modified Human's body, utterly killing him off...

Chapter 2036 Qin Fang vs. Three-eyed Viper!

...

"This is troublesome..."

Seeing this Modified Human die so pitifully, Qin Fang furrowed his brows deeply, muttering quite helplessly to himself.

He had already created a really good opportunity for this Modified Human. As long as he seized this chance, even if he couldn't kill the Three-eyed Viper, he could at least severely injure it.

But now, the Modified Human is dead, and the only damage the Three-eyed Viper suffered was from a bullet hole Qin Fang shot into it, with almost no other losses.

Looking at the blackened corpse on the ground, Qin Fang's face was not looking good.

After killing the Modified Human, the Three-eyed Viper slowly swam back, moving to the side of the Modified Human's body.

It circled around once, then opened its massive jaws to slowly devour the Modified Human's body bit by bit.

"Damn, this guy's really got the nerve..."

Even though he knew this Three-eyed Viper wasn't likely to give up on this pile of meat, Qin Fang didn't expect it would actually dare to start eating.

This Modified Human was a typical European-American build, and an extremely strong one at that, much more robust than Sylvester Stallone.

With such a large frame, even if chopped into pieces, just the fist the size of a casserole would be enough to choke the Three-eyed Viper... let alone the entire body.

But the Three-eyed Viper didn't care at all, seemingly thinking its mouth and body were big enough, stubbornly trying to swallow the Modified Human whole.

This Modified Human was violently poisoned, with his entire body's blood and flesh filled with extremely potent toxins. Just a touch could lead to corrosion, but the Three-eyed Viper didn't seem concerned, showing it was already immune to its own poison.

In fact, it might be immune to many poisons, with its poison resistance reaching a terrifying level!

"Hold off a bit before making a move..."

Seeing the Modified Human killed by the Three-eyed Viper, Qin Fang hesitated on whether to act immediately, then saw the scene of the Viper feeding.

Witnessing this, Qin Fang felt a chill and shiver, but at the same time, his eyes lit up, as if something had suddenly dawned on him.

The attack which was poised and ready was now put on hold, quietly waiting for the perfect opportunity to strike.

The Three-eyed Viper's body was still too small to entirely swallow such a large corpse, and it wouldn't be an easy task.

So it started from the Modified Human's arms and legs, biting down...

Being able to almost evolve into a Spiritual Beast, the Three-eyed Viper had considerable intelligence; ordinary pythons might swallow whole, but not the Three-eyed Viper.

Its venom was terrifyingly corrosive, but it had the means to deal with this problem...

Instead, it had a simpler way—using its formidable body to smash the Modified Human's corpse.

If the Modified Human were still alive, his body's defense would be incredibly strong, and even such a powerful swipe from the Three-eyed Viper would leave just a slight mark.

But now, the Modified Human was dead, and his body was soaked with snake venom, weakening his defenses. The Three-eyed Viper easily tore off one of his arms with a single strike of its tail.

One strike, two strikes, three strikes...

In just a few swift moments, the Three-eyed Viper cut the Modified Human into several pieces... limbs, head, torso!

The scene of dismemberment was excessively brutal and gory, making even Qin Fang feel a bit nauseous, whereas the Three-eyed Viper seemed quite pleased.

It celebrated its victory by devouring piece after piece of the "meal"! Opening its enormous mouth, it swallowed these "foods" one by one!

This Three-eyed Viper was even greedier than Qin Fang imagined. With its body size, just consuming two legs would be enough to bloat it.

But the Three-eyed Viper still wasn't satisfied, stubbornly swallowing every remaining part one by one...

Qin Fang watched coldly the entire time, observing as the Three-eyed Viper consumed all the "food"... until it transformed into a ball shape!

Indeed, it became a sphere!

Snakes are peculiar creatures; they can consume prey several times larger than themselves, and this Three-eyed Viper was no exception.

Now, its body had changed from its original slender shape to a round ball... Qin Fang could even see an arm still hanging from its edge, not yet fully swallowed!

At this moment, the Three-eyed Viper was still trying to gulp down the arm, even though its stomach was already packed. It refused to give up!

Of course, this was futile, as there wasn't any more room in its stomach, leaving it reluctantly nibbling at the arm.

As the battle on this side concluded, the Three-eyed Viper shuffled its hefty body, slowly heading back to its lair.

The wound left by Qin Fang's sniper shot had already stopped bleeding, covered by a thin membrane, as if it was about to scab over.

Chapter 2037 Qin Fang vs. Three-eyed Viper!_2

Regarding this point, Qin Fang had anticipated it. The Three-eyed Viper is a Quasi-Spirit Beast; without some skill, it would have been killed long ago.

"The time has come..."

However, looking at the Three-eyed Viper which was so plump that it hardly resembled a serpent, Qin Fang's lips curved into a slight smile.

He had waited for this moment for a long time, and now it had finally arrived.

Swish~~~

Without the slightest hesitation, Qin Fang's feet borrowed some strength from the top of the stone wall, turning himself into an extremely sharp "Sharp Arrow" shooting towards the back of the Three-eyed Viper.

Clang~~

At the same time, the Flowing Shadow Divine Sword silently appeared in Qin Fang's hand, its cold gleam giving off a sense of sharpness.

The wound on the Three-eyed Viper was slowly healing, but its body had grown plump to such an extent that the wound, although not torn open, remained extremely visible.

In such a conspicuous spot, how could Qin Fang possibly let it go?

A silver flash flickered, and the Flowing Shadow Divine Sword in Qin Fang's hand transformed into a stream of light, darting directly at the wound.

Hissssss~~

Qin Fang made his move! But the Three-eyed Viper was no weakling; it seemed to immediately sense Qin Fang's presence, and its serpent head slowly turned around.

All three narrow triangular eyes glared towards Qin Fang, its forked tongue flickered, producing an eerie hissing sound that sent a chill down anyone's spine!

Of course, it could also see the Flowing Shadow Divine Sword in Qin Fang's hand, and perhaps sensing that the sword might cause it harm, the colors of the Three-eyed Viper's eyes immediately changed.

Especially the vertical third eye, which suddenly turned into a bizarre white, seeming to emit a faint glow.

"It's coming!"

As Qin Fang noticed the glow, he felt a slight dizziness, and his heart was instantly shocked, not expecting the Three-eyed Viper's third eye to be far more formidable than he had estimated.

"Mm~~"

However, Qin Fang had been cautious beforehand, unlike a Modified Human who would be completely unprepared, he immediately bit down hard on the tip of his tongue.

The intense pain came with a faint taste of blood, the tongue tip was bitten through, but Qin Fang's mind cleared considerably.

Poof~~

With a clear mind, Qin Fang's actions were naturally unaffected, and the Flowing Shadow Divine Sword in his hand swiftly struck, fiercely piercing into the Three-eyed Viper's abdomen through the wound!

A slight muffled sound, Qin Fang's Flowing Shadow Divine Sword sunk straight into it, and the fresh blood spurted from the wound, directly spraying all over Qin Fang.

The speed was too fast, Qin Fang couldn't dodge even if he wanted to... moreover, Qin Fang knew he absolutely couldn't dodge.

Qin Fang's strike was powerful, the entire blade buried in the Three-eyed Viper's abdomen... leaving only a section of the hilt outside.

This was due to the Three-eyed Viper's body being round as a ball; Qin Fang's strike didn't even touch the underside of its body.

If it hadn't eaten anything, Qin Fang's strike might have pinned the Three-eyed Viper directly to the ground... now it just opened a large wound.

"Roar~~~"

Inflicted with such serious damage, the Three-eyed Viper immediately went berserk, and the intense pain made it emit a piercingly sorrowful scream.

However, this also drove the Three-eyed Viper into a furious rage, its three narrow venomous eyes fixating on Qin Fang while its triangular head spat out the severed hand from its mouth, its blood-red maw swiftly lunging forward...

A pall of light green poisonous mist spewed out from the mouth of the Three-eyed Viper, appearing particularly dense and carrying a foul stench.

This toxic mist is highly poisonous, even modified humans with enhanced bodies can't withstand its toxicity, showing its ferocity.

However, Qin Fang was not very concerned about the poisonous mist, as he had the protection of Little Dragon. So far, there was no toxin that could make Little Dragon helpless.

Qin Fang had already determined that Little Dragon was the nemesis of all poisons...

Hiss~~

Not only was Qin Fang unafraid of the poisonous mist, he even took a deep breath, inhaling quite a bit into his respiratory tract.

But soon Qin Fang felt a faint numbness, this was the toxic mist beginning to take effect... However, before this numbness could spread, a cool sensation spread through Qin Fang's body, instantly cleansing all the toxins.

And these toxins gathered together, directly being devoured by Little Dragon hidden in Qin Fang's heart...

Having discovered this, Qin Fang was already certain that, though the toxic mist was formidable, it couldn't affect him, and he was truly relieved.

"So stinky~~"

The poisonous mist posed no threat, but the blood-red mouth approaching brought an overpowering stench, as if it hadn't been brushed for several lifetimes, making Qin Fang nearly vomit his meal from the night before!

Whoa~~

Being assaulted by such a foul smell, Qin Fang felt quite miserable, and the little excitement he had just surfaced was greatly diminished.

But Qin Fang was also a fierce one, knowing this wasn't the time to consider such matters, so he paid no mind to the rapidly approaching maw of the Three-eyed Viper, instead gripping his Flowing Shadow Divine Sword, and fiercely slicing downward...

Chapter 2038 - Qin Fang vs. Three-eyed Viper! (Part 3)

The blood-red mouth of the Three-eyed Viper was now very close to Qin Fang, almost within inches; a little further forward, it would have bitten Qin Fang.

However...

The defense of the Three-eyed Viper's snake skin was indeed incredible, even the alloy short blade used by the Modified Human couldn't cut through it!

But now, the Three-eyed Viper faced the Flowing Shadow Divine Sword!

The Flowing Shadow Divine Sword was a weapon second only to the Ten Great Divine Weapons, and it could practically cut through iron like mud...

With this swing, striking at the location of the previous opening, it sliced vertically with tenacity. Although Qin Fang felt some resistance, it didn't hinder his actions due to Qin Fang's mighty exertion.

"She-ong~~~"

This injury was much more severe than the previous strike, almost directly cutting open half of the Three-eyed Viper's body...

The intense and unbearable pain made the Three-eyed Viper abandon Qin Fang's body that was right before it. That triangular head raised high, opening the blood-red mouth and letting out such a bleak scream...

Crash~~~

Qin Fang's crisis reversed in an instant; with such severe damage, the Three-eyed Viper couldn't continue to attack Qin Fang anymore.

Half of its body was cut open, and the wound was quite large... Even a large piece of flesh fell out from the damaged wound!

And the blood, needless to say, didn't spray randomly this time but surged out, staining the ground red in a blink.

Unfortunately, the optic fiber here wasn't great, and the bloodstains on the ground weren't very clear... But the dense bloody scent around was unmistakable.

The Modified Human was poisoned by the Three-eyed Viper, his blood destroyed and polluted by the toxin, becoming toxic blood... Even the bloody scent became much thinner.

So, although the Modified Human was dismembered by the Three-eyed Viper, the bloody scent in the air wasn't too intense; but this time, it was much more concentrated, all belonging to the blood of the Three-eyed Viper!

"Ong~~~"

This time, Qin Fang succeeded, but it completely enraged the Three-eyed Viper, a Quasi-Spirit Beast. Its body writhed, its raised head, and opened huge blood-red mouth emitting such a sorrowful sound.

Then, the corpse of the Modified Human it had swallowed was seen gushing out... In just a blink, the spherical body of the Three-eyed Viper slimmed down considerably!

Of course, not everything was regurgitated; at least some fragments of meat inside its back half remained unclearly expelled from a wound.

Overall, the Three-eyed Viper seemed considerably "lighter" now, at least more agile in its actions than before.

Buzz~~~

The most critical moment came when the third eye of the Three-eyed Viper suddenly flickered intensely with a white light, the dense beams resembling a mini-sun, stinging so much that Qin Fang couldn't open his eyes.

Qin Fang had no way to open his eyes...

The third eye of the Three-eyed Viper had an extraordinarily strange allure. Even Qin Fang didn't have a particularly good way to counter it.

To avoid the tragedy suffered by the Modified Human, Qin Fang simply adopted an "out of sight, out of mind" approach, directly avoiding eye contact with the Three-eyed Viper.

His advantage over the Modified Human was not fearing the toxin of the Three-eyed Viper, not afraid of being sprayed with poisonous fog, nor being concerned about being bitten and directly injected with poison!

However, Qin Fang clearly underestimated the power of the Three-eyed Viper...

Boom~~~

While Qin Fang was evading the seductive gaze of the Three-eyed Viper's third eye, he suddenly felt a strong weight slam into his chest.

His heart quivered fiercely, and his Life Points instantly dropped by a third...

"Ssss~~~ Such strong strength!"

This was the move the Three-eyed Viper had used before, striking with such force that it pierced a hole into the Modified Human's body.

Initially, Qin Fang thought the reason the Three-eyed Viper could pierce the Modified Human's body was due to the toxin corroding his body, preventing his strongest defense, making muscles soft and weak, giving the Three-eyed Viper the upper hand...

But now, it seemed that wasn't necessarily the case!

Qin Fang endured the same fierce impact, his body involuntarily retreating a dozen steps back before he could stabilize himself.

But, Qin Fang clutched his chest tightly, where the pain was extremely strong... Swallowing a Blood Replenishing Pill, he replenished his Life Points, but the pain didn't disappear!

"Luckily, I wore two pieces of Heavenly Silkworm Silk Armor..."

However, Qin Fang wasn't very pleased; instead, he touched his Heavenly Silkworm Silk Armor with some lingering fear, feeling a bit fortunate.

He had two pieces of Heavenly Silkworm Silk Armor, always kept on himself, providing certain defense power, but unexpectedly they played a significant role this time.

The Three-eyed Viper's attack had enormous strength, its attack power was indeed strong, but it didn't have the killer strength for a lethal blow.

But the real killer move lies in the Three-eyed Viper's piercing power...

If not for the strong resilience of the two pieces of Heavenly Silkworm Silk Armor, Qin Fang's chest would directly have had a hole punched through by the Three-eyed Viper...

This place is the vital area of the heart, one of Qin Fang's few vulnerable points. If the heart was pierced, Qin Fang's Life Points wouldn't just drop by a third but directly to zero!

Coincidentally, the two pieces of Heavenly Silkworm Silk Armor were not only good at defense but also had amazingly strong resilience, stopping the piercing attack of the Three-eyed Viper.

The force indeed transmitted to Qin Fang's heart, causing a considerable shock but not forming a deadly killing intent! Instead, Qin Fang gained from it...
