Chapter 521: Strange Nest (Two in One)_1

"Another trash BOSS." Seeing that the BOSS was useless, Chen Mo snorted, then commanded the Skeleton Monster to quickly destroy it.

Yusheng Liuyin, standing beside him, thought he was complaining that the BOSS was too weak and was left speechless. She wanted to ask him, as a first-transition, what kind of BOSS wouldn't be considered trash in your eyes?

"Senior sister, this BOSS should be rarer than the previous two."

After killing the BOSS, Chen Mo looked at its body, more excited than if he were seeing a naked woman. He estimated that based on the survival environment of this The Broken King, it should be more difficult to encounter than the previous two Legendary BOSSes, so it should be worth more money. This isn't just any BOSS body; it's a pile of glimmering eternal gold coins.

Yusheng Liuyin laughed and said, "Indeed, this type of BOSS rarely appears in any type of instance. The materials on its body are often rewarded in fragments through various tasks in other instances. The fact that we were able to hunt down a whole one means we can probably get at least 2,000 eternal gold coins from these materials."

"At least 2,000! There might be even more to sell." Chen Mo immediately grew excited about collecting, but Yusheng Liuyin stopped him.

"Wait. The environment here is a bit too scary. Let's carry its body out and collect slowly."

Chen Mo looked around and nodded in agreement. Although no Space-Time Rifts were currently appearing around them, this didn't mean one wouldn't suddenly materialize nearby. Staying in such a dangerous environment for too long was risky; it was better to leave as soon as possible.

Chen Mo immediately reached out to touch the BOSS's body and put it into his space backpack.

"Your space backpack is so big!?"

Yusheng Liuyin had originally planned to cut the BOSS into two large pieces so they could each carry one.

"Got a good treasure like a space backpack," Chen Mo explained with a smile. His space backpack was purely something he had freeloaded through his own abilities. There were no such backpacks for sale in the outside world. Even if someone had a backpack as big as his, it would probably be of Legendary quality or higher. These were purely bound, and in an instance, they were considered hard-to-get items. They were not things one could easily come by.

Having already witnessed Chen Mo's heaven-defying combat power, Yusheng Liuyin was no longer surprised by his other heaven-defying traits.

Soon, the two returned to the center of all the nest passages.

Chen Mo took out the body, and the two used the god-grade collecting technique to disassemble it. In the end, Yusheng Liuyin gave a comprehensive estimate, "These materials should be worth about 2,500 eternal gold coins if traded in at the Academy Alliance."

"This is too profitable." Chen Mo felt happy thinking that even if he split the profits with his Senior sister, he had freeloaded almost 2,000 eternal gold coins this time.

However, Yusheng Liuyin smiled bitterly at the side, saying, "This is the first time I've made so much money in an instance. I've entered this one many times before, and it's always completely different. It's rare to encounter so many Legendary BOSSes.

"Even when they do appear, they are very difficult to kill and often damage materials.

"This time, we made so much money purely because of you. You killed them quickly and barely damaged the materials on the BOSS's body, which is why their value remained so intact."

"Really? I was thinking of running this instance a few more times. So it's not always like this?"

"Sometimes in an instance, we only encounter two or three BOSS-grade Legendary monsters.

"Most of them are elites, small monsters, and such. This time, however, we didn't see a single small monster or elite; all we encountered were BOSSes. This doesn't happen every time; otherwise, these materials wouldn't be so expensive.

"Scarcity creates value."

Chen Mo nodded with a smile. No matter what, making money was a good thing. Other things didn't concern him.

With the King of Destruction slain, Chen Mo hesitated about which of the remaining five nests to enter. The problem was that once they entered a nest, they couldn't retreat directly after killing the BOSS inside. Chen Mo was hesitant, fearing they might go directly to the final BOSS's lair, which would mean earning less money.

"Senior sister, which way should we go next? Any ideas?"

Knowing that he was indecisive, Chen Mo turned his head and asked Yusheng Liuyin to decide.

"Do you want to farm more BOSSes or go straight for the final BOSS?" Yusheng Liuyin asked, looking at Chen Mo with a playful smile.

"Well, of course I want to farm more BOSSes," Chen Mo immediately said with a smile. "It's all money."

"Alright, that's easy to handle."

Just then, Yusheng Liuyin took out a talisman paper and a Compass from her wide sleeves. As she pressed the talisman paper against her forehead, it suddenly burned up. She threw it onto the Compass, and the Compass suddenly started spinning.

Soon after, the Compass needle pointed to one nest.

"This nest is the final BOSS's nest. If we don't want to go for the final BOSS first, let's go to the other nests first," Yusheng Liuyin said, glancing at the Compass.

By now, Chen Mo had already used his pioneer's perception ability to sense Yusheng Liuyin's Compass. In his sight, Yusheng Liuyin was shrouded in a layer of weird Chaos Energy.

Chapter 522: Strange Nest (Two in One)_2

Clearly, she was carrying a Chaos Stone.

With a Chaos Stone, even an SSS-level perception ability would be unable to detect anything. However, it couldn't evade Chen Mo's notice. After all, Chen Mo held the title of Above SSS-level Chaos Tester. Even if obscured by Chaos Energy, she still couldn't escape Chen Mo's detection.

After carefully examining Yusheng Liuyin's Compass, Chen Mo found himself wanting one too. That Compass she has is an excellent item, he mused. It continuously tracks her mission targets. This very item reminds me of my own divine artifact suicide mission. If I had a treasure like that Compass, wouldn't finding others with divine artifact components become much simpler? As these thoughts raced through his mind, Chen Mo and Yusheng Liuyin turned and entered another nest.

The environment within this nest was quite different from the previous three. The environments in the previous three nests included a Lava Domain, an Extreme Cold Sealed Land, and a Time-Space Broken Space. None of these nest spaces seemed capable of sustaining life.

But this time, the nest looked very different.

The entire nest was covered with sprawling foliage. The air was fresh and natural, and the flowers were delicate and beautiful. Upon stepping into the nest, Chen Mo and Yusheng Liuyin were immediately taken aback by the sight before them.

The nest teemed with life, seeming like a small world full of vitality. The air was filled with the fresh scent of flowers and plants, soothing and pleasant. The nest was green and lush, with flowers blooming in every corner. Colorful flowers competed in brilliance—red, yellow, blue, purple—all kinds of colors intertwined, forming a magnificent painting. Delicate flower buds were unfolding, releasing a

mesmerizing fragrance. The trees were thriving, their branches and leaves dense, forming a green ocean and creating a lush, verdant atmosphere.

The most outrageous aspect was that an artificial sun hung high within this nest. Although having a sun inside the nest seemed absurd, its temperature was very moderate. It gave Chen Mo and Yusheng Liuyin, who had just experienced the Lava Domain and the Extreme Cold Sealed Land, a sense of warmth. Sunlight filtered through the gaps in the leaves, casting mottled shadows and adding a hint of mystery to the nest.

A gentle breeze stirred the leaves, which rustled softly as if singing a hymn to nature's beauty. A stream meandered between the rocks, its water shimmering and clear to the bottom. Birds sang in the trees, their cheerful songs echoing through the nest as if cheering for this beautiful dwelling.

There were also various small animals active in the nest. Cute rabbits hopped about in the grass, playing. Agile squirrels darted through the trees, foraging for nuts. Butterflies danced among the flowers, creating a beautiful picture. Bees busied themselves collecting nectar, adding a sweet fragrance to the nest.

There was also a small lake in the nest. The turquoise lake water was like a mirror, reflecting the surrounding scenery. The lake water flowed leisurely, gently lapping against the rocks on the shore and creating a pleasant sound. Occasionally, fish leaped from the water, splashing droplets and adding a vivid touch to the scene.

When Chen Mo and Yusheng Liuyin first stepped into this nest, they thought they had taken a wrong turn and somehow exited the entire nest world. If not for their perception ability continuously detecting the nest's boundary, they would have definitely thought they were in the wrong area.

As they entered this area, they immediately began to scan for any potential BOSS. However, no matter how far they ventured, aside from flowers, plants, and trees, they couldn't detect any powerful living beings.

As Chen Mo and Yusheng Liuyin stood within this vibrant nest, they felt a wave of astonishment. Looking around, they found no other Adventurers or monsters, only plants and a peaceful ambiance.

"Why is it so quiet here?" Yusheng Liuyin whispered, her voice echoing clearly in the emptiness of the nest.

Chen Mo knitted his brows. They had anticipated encountering a BOSS, but so far, there were no signs of one. They continued to move forward cautiously, seeking clues.

As they ventured deeper, the nest's environment remained as fresh and natural as before. The trees grew more densely, and the fragrance of flowers and grass intensified. It felt as if they had entered a fairyland.

However, despite the nest's beautiful tranquility, Chen Mo and Yusheng Liuyin remained vigilant. Or rather, such a beautiful environment increasingly gave them the ominous feeling of the calm before a storm.

They crossed a sea of flowers and arrived beside a quiet stream. The stream water trickled by, crystal clear. Suddenly, Chen Mo felt something was amiss. He bent down, scooped up a handful of water, and watched as it trickled from between his fingers. As he watched the water droplets, a flicker of contemplation sparked in his eyes.

"Look at this water. It contains such intense Magic Power!" Chen Mo said, turning to Yusheng Liuyin beside him.

"This... could this be the legendary Holy Devil Spring?" Yusheng Liuyin, who was very knowledgeable, said immediately.

Holy Devil Spring? Upon hearing this name, Chen Mo's face lit up with joy. Isn't this one of the types of Holy Water I'm seeking?

Although the stream water contained powerful Magic Power, it couldn't be preserved. As soon as he scooped it up, the Magic Power dissipated.

Chapter 523: Strange Nest (Two in One)_3

Chen Mo took out another bottle, attempting to collect the water. However, the moment it entered the bottle, the intense Magic Power within the brook instantly dissipated, making it impossible to take away.

"This isn't the source of the Holy Devil Spring," Yusheng Liuyin said to Chen Mo. "Although it seems rich in Magic Power, it's unstable and dissipates upon extraction. To obtain it, we must find the true source of the Holy Devil Spring."

"That shouldn't be too difficult. We just need to follow the stream to its source."

Chen Mo immediately took flight, heading upstream along the brook.

Yusheng Liuyin followed closely. Soon, they had flown several thousand meters along the brook.

"What's going on with this lair? Why is it so enormous?" Yusheng Liuyin wondered aloud.

Yusheng Liuyin felt something was off, and Chen Mo also sensed the anomaly.

They had flown for so long without finding the source of the Holy Devil Spring. Something feels off, Chen Mo mused.

"You're right. This lair is unusually vast," Chen Mo said, his brows furrowing. He felt an indescribable eeriness, as if something was hidden within the lair.

They continued to fly upstream, gradually entering a space with more concentrated Energy. The surrounding air grew heavy, suffused with a vibrant, invigorating aura.

Chen Mo and Yusheng Liuyin exchanged a glance. A growing sense of unease settled over them.

As they flew, there was a sudden THUMP!

The two of them stopped abruptly in mid-air.

Reaching out, their hands met something strange in front of them—an invisible barrier.

"Could it be? Are we trapped inside some kind of enchantment?" Yusheng Liuyin exclaimed.

Chen Mo instantly ordered the Skeleton Monster to attack the enchantment's barrier. However, it was exceptionally sturdy; they couldn't budge it at all!

Just then, Yusheng Liuyin took out her Compass again.

This time, however, her use of the Compass was different.

She unexpectedly bit the tip of her tongue and forcefully spat a mouthful of blood onto the Compass.

This was no ordinary bloodletting.

Chen Mo clearly saw Yusheng Liuyin's Health decrease by half.

It wasn't just her current Health; her maximum Life value had been halved.

However, as she performed this strange technique, the Compass began to spin erratically. Soon, it pointed towards the upper-left corner of the lair.

"What are you searching for this time?" Chen Mo asked, curious.

"Since there's a barrier, there must be an enchantment or an Array. I'm searching for the core of this enchantment," Yusheng Liuyin replied weakly.

Chen Mo understood and nodded. He had initially planned to rely on his extensive perception range to find it. However, seeing Yusheng Liuyin's ability to pinpoint the location directly would save considerable effort.

However, Yusheng Liuyin looked quite weak. "Senior sister," Chen Mo suggested, "that last move seemed to take a lot out of you. Let me carry you until you recover."

Yusheng Liuyin nodded, not refusing. Although she rarely allowed herself to be in such close proximity to boys, she didn't feel particularly guarded around this junior.

Chen Mo truly had no other intentions. He picked up Yusheng Liuyin and activated his Illusory Spirit Feather Boots to their full potential. With a powerful HUMM, he WHOOSHED away like a jet, transforming into a streak of light heading towards the target!

Chapter 524: Mysterious Shrine!_1

Carrying Yusheng Liuyin on his back, Chen Mo moved swiftly through the air, faint light emanating from his Illusory Spirit Feather Boots, speeding up their progress.

They navigated through the Monster Nest, flying over beautiful seas of flowers and dense forests, following the Compass towards what could potentially be the matrix center.

During the flight, the two increasingly sensed strong Energy fluctuations, signifying they were getting closer to their target.

Soon, Chen Mo's superior perception ability tipped him off about what lay ahead.

A shrine?

As they landed from their rapid flight, they found themselves in a vast and spectacular open area.

In the center of the open area stood a massive and majestic shrine, radiating a dazzling light.

The shrine was filled with an ancient and mysterious aura, like a portal to an unknown world.

Chen Mo gently put down Yusheng Liuyin, and the two of them stood quietly, gazing at the odd shrine.

They could feel an extraordinary Energy harbored within the shrine.

"There is actually a shrine in such a Monster Nest."

Chen Mo and Yusheng Liuyin both tried to perceive the inside of the shrine, but unfortunately, they couldn't sense anything.

It seemed as though some force was blocking the inside of the shrine, making it impossible for them to directly perceive.

Seeing this, Chen Mo didn't mind. He directly commanded his Skeleton Monster to enter.

After all, he currently shared his vision with the Skeleton Monster.

As the Skeleton Monster entered, Chen Mo was finally able to see clearly into the shrine.

The passage inside the shrine had a series of peculiar sculptures, apparently of various Legendary creatures.

Moving further in, the Energy seemed to thicken, as if a secret treasure was placed in the center of the shrine.

Just an SS level instance, how could it have a shrine with such dense Energy?

Chen Mo felt the Energy fluctuations in the shrine were comparable to those of the god-grade beings he had encountered in SSS-level instances.

Soon, the Skeleton Monster reached the very center of the shrine. In the very center was a unique room with many peculiar murals carved into its walls. In the middle of the room, a strange sphere floated above a platform.

No other living beings were around.

Chen Mo immediately had the Skeleton Monster attempt to touch the floating sphere.

The moment the Skeleton Monster's finger touched the surface of the sphere, a powerful surge of Energy immediately erupted from it.

Chen Mo felt the atmosphere around him tense up instantly as a mysterious force began to emerge.

The light in the shrine became even more dazzling; a colossal pillar of Energy rose from the center of the sphere, like a passageway connecting heaven and earth.

Suddenly, the sphere emitted a powerful attractive pull. Chen Mo felt as if the Skeleton Monster's body was being drawn by an unseen force, flying rapidly towards the sphere.

The next moment, Chen Mo lost contact with this Skeleton Monster. It was clear that the Skeleton Monster was either dispersed or pulled into a strange space.

There's something very strange about this shrine.

Seeing that there was a problem with the sphere, Chen Mo sent another Skeleton Monster into the shrine.

This time, Chen Mo did not have the Skeleton Monster touch the sphere directly but had it examine the surrounding sculptures.

He had a feeling that these sculptures of Legendary creatures in the passage might be hiding secrets about the shrine.

As the Skeleton Monster once again fearlessly stepped into the shrine, it moved towards the sculptures of Legendary creatures under Chen Mo's command.

As the solitary Skeleton Monster walked through the vast and empty shrine corridor, even the faint CLACKING of its bones echoed loudly in the silent space.

The shrine exuded an air of mystique, and the sculptures within were particularly eye-catching.

Soon, the first sculpture appeared in the Skeleton Monster's vision. It was tall and majestic.

It was a colossal dragon sculpture perched on a stone platform, its eyes like torches, emanating an intimidating aura.

Every scale was intricately carved, as though about to spring to life, and its wings were spread, like shadows in the night.

Chen Mo instructed the Skeleton Monster to stare at the dragon sculpture with its glowing eyes, sensing a strong Energy fluctuation.

As expected, there's something wrong with the sculpture!

Chen Mo immediately commanded the Skeleton Monster to approach the sculpture. As it quietly neared, carefully avoiding any visible traps within the shrine, a tremor suddenly emanated from within. The ground began to shake, emitting a low, RUMBLING noise.

Chen Mo instantly commanded the Skeleton Monster to halt, sensing the approaching danger.

The eyes of the dragon sculpture flickered with a frosty red light. The next instant, it seemed to come to life, its jaws snapping open to spew out a surge of raging Flame. The Flame, like the furious breath of a dragon, rapidly spread, shrouding the entire shrine corridor.

The spread of the Flame was shockingly fast; as the firelight danced, a wave of suffocating heat filled the shrine.

The Flame was a dazzling red, shimmering with blistering light, as if a true Legendary dragon was breathing in fury.

Through the Skeleton Monster's perception, Chen Mo could feel the destructive force contained in the Flame spewed by this strange sculpture. Wherever the Flame went, the air was instantly distorted, surrounding objects began to melt, and even the ground started to crack.

The high temperature generated by the Flame ignited the surrounding air, forming a twisted sea of fire.

Chen Mo could feel the terrifying Energy emitted by the Flame, as if it could turn everything to ash.

However, this shrine was exceedingly bizarre. No matter how much it was damaged, it would return to normal in an instant. While the Flame burned and destroyed, the shrine was constantly and rapidly self-repairing.

Witnessing the bizarre Flame, Chen Mo, sharing consciousness with the Skeleton Monster, subconsciously commanded it to move away. But the Skeleton Monster could not escape the engulfing Flame. In the blink of an eye, its bones began to melt, emitting sharp, CRACKLING sounds as if being grilled. The raging Flame pressed down on it, gradually devouring its existence.

The Flame roared, and frenzied Energy rampaged inside the shrine, creating a spectacular scene.

Chen Mo couldn't help but feel a sense of awe. He realized that this power far exceeded ordinary threats; this Flame carried obliteration-grade Energy!

The temperature continued to rise, and the Flame's power grew even more terrifying. Soon, the Skeleton Monster was burned into nothingness.

The obliteration-grade Flame completely overwhelmed the Skeleton Monster's characteristics, burning it utterly clean.

As the burning Flame gradually weakened and eventually subsided, it revealed the dragon sculpture's true form. The once lifelike giant dragon sculpture had lost its recent brilliance, reverting to an ordinary stone carving.

It was as if it hadn't been the one spewing Flame at all.

Although the dragon sculpture had lost its animation, its intricate carvings still seemed lifelike, continuing to exhibit the dragon's majesty and fearsome aura.

Obliteration-grade power instantly destroyed my Skeleton Monster? The danger of this SS level instance is truly no joke. No wonder its death rate isn't much lower than that of SSS-level instances.

Seeing Chen Mo's surprised expression, Yusheng Liuyin immediately asked, "What's wrong?"

"Nothing much, just a bit troublesome. It's going to take some effort to figure out what's going on in this shrine," Chen Mo said, then sent out another Skeleton Monster.

This time, he directed the Skeleton Monster towards a peculiar lion sculpture next to the dragon.

The Legendary lion sculpture was tall and mighty, standing in the center of the shrine's passage, radiating an unparalleled, magnificent aura.

Its body was sleek, with protruding muscles, every inch of the carving revealing a beautiful balance of power and form. The sculpture's eyes were so vividly carved that they emitted a fierce and wild light, like the true gaze of a living lion.

As the Skeleton Monster approached the lion sculpture, the entire shrine suddenly began to shake strangely again, as if a colossal beast sleeping deep underground had awakened. The ground trembled violently, the walls emitted a RUMBLING sound, and the atmosphere within the shrine grew tense.

In the next instant, a red light ignited in the lion sculpture's eyes, growing increasingly fierce and radiating an intimidating aura that was impossible to ignore.

Suddenly, the lion sculpture opened its mighty jaws and let out a deafening ROAR. The sound echoed through every corner of the shrine, sending a shiver down one's spine.

As the ROAR echoed, the air around the lion sculpture began to annihilate, forming a vortex of darkness that quickly expanded, releasing a terrifying power.

Chen Mo's Skeleton Monster had just been caught in this dark vortex, its bones beginning to tear apart.

Apparently not satisfied, the lion sculpture suddenly opened its massive maw, spewing out a shockwave of frenzied Energy. This terrifying Energy shockwave swept directly through the shrine, instantly pulverizing everything it touched. The immense impact distorted the air and made the walls tremble violently.

The Skeleton Monster, caught and immobilized by the dark vortex, naturally bore the brunt of this terrifying Energy shockwave. Its body was instantly torn apart, turning into a pile of shattered bones and dust.

In the face of this equally powerful, obliteration-grade force, it simply couldn't resist.

After the Energy shockwave passed, the lion sculpture, like the dragon sculpture before it, returned to its static state. It still stood tall in the middle of the shrine corridor, as if nothing had happened.

Chen Mo's gaze turned heavy. He now had a much deeper understanding of the danger posed by this shrine.

This place was filled with unimaginable power, and every Legendary creature sculpture concealed an infinite threat.

What's going on? Why are the traps in an SS level instance so insane? Could this be a treasure space?

Suddenly, a possibility occurred to Chen Mo. He recalled that treasure spaces had been mentioned before. In this world, it was suspected that his parents had been killed because someone had opened a treasure space with a difficulty far exceeding that of the instance they were in.

Treasure spaces could appear by chance in any instance.

The difficulty of a treasure space wasn't always directly tied to the original instance's difficulty.

Some treasure spaces might be less difficult than the original instance.

Others could be far more difficult.

Generally, if they were easier, they would be at most one difficulty level lower.

But if they were harder, one might enter an A-Class difficulty instance only to find the treasure space was SSS-level.

Usually, one could judge a treasure space's difficulty by initially sensing the Energy fluctuations within it.

But sometimes, the Energy fluctuations weren't very obvious, making judgment much harder.

This strange Monster Nest he was currently in had an eerie, constantly changing Energy.

When he first entered, it had been a world of singing birds and fragrant flowers, with minimal Energy fluctuations.

But as he delved deeper, he sensed increasingly immense Energy.

And now this shrine was absurdly powerful.

That's why he was having these suspicions.

Chapter 525: Light of Divine Source! (Four in One) _1

Seeing that the Skeleton Monsters had been annihilated by the statues twice in a row, it was clear that all these statues were probably capable of awakening and attacking. And for lifeless objects to awaken and attack, there must be a corresponding energy transfer. Otherwise, it's impossible for lifeless objects to awaken out of thin air.

If the energy source comes from that sphere, there should be a path of transmission in between. Could finding this path be the solution? Each time my Skeleton Monster triggered a change in the statues, strange tremors occurred in the shrine. There's definitely something fishy about this.

Upon thinking this, Chen Mo decided to test it again. However, this time, instead of sending in just one Skeleton Monster, he dispatched a large group of Skeleton Monsters into the shrine. He wanted to observe every minute detail of the shrine's changes.

Seeing Chen Mo dispatch a large group of Skeleton Monsters into the shrine, Yusheng Liuyin immediately asked with curiosity, "Is there a BOSS in this shrine?"

Chen Mo shook his head and said, "No, it's very strange inside. It doesn't feel like something you'd encounter in an SS-level dungeon."

"Oh? Could it be the Treasure Secret Realm?"

"It could be. I haven't figured it out yet, but my Skeleton Monster triggered traps twice and was killed miserably each time. The damage was obliteration-grade. My Skeleton Monster died instantly without activating any abilities."

"Obliteration-grade?" At Chen Mo's comment, Yusheng Liuyin's beautiful large eyes suddenly lit up, and she said, "Chen Mo, we may have encountered a major opportunity."

"Major opportunity?" Chen Mo was a bit puzzled. "Apart from the Treasure Secret Realm, what else could it be?"

"It's indeed the Treasure Secret Realm, but within the Treasure Secret Realm, there is a very special branch: the Land of Divine Legacy! This is an extremely special secret realm that can only be encountered in S-level or higher dungeons."

"Oh? I haven't heard of this before. What's so special about this Land of Divine Legacy?" Chen Mo eagerly asked.

"The biggest difference between the Land of Divine Legacy and an ordinary Treasure Secret Realm is that an ordinary Treasure Secret Realm might directly give rewards. It could contain locked top-grade treasure chests, or there might be secret realm guardians obstructing you. However, the Land of Divine Legacy is different; it's more of a test. Once someone passes the test, they can obtain a part of the divine legacy left by a god. Those who pass can gain Divine Power there. Of course, we haven't reached the fifth-transition yet, so even if we were given Divine Power, we wouldn't be able to acquire it. But aside from Divine Power, you can also acquire divinity!"

Upon hearing what Yusheng Liuyin said, this time, it was Chen Mo's eyes that lit up. He hadn't expected that just coming to farm experience points would result in such a significant gift.

After Yusheng Liuyin finished explaining the benefits of the Land of Divine Legacy, her expression dimmed, and she said, "It's just a pity that the legacy from the Land of Divine Legacy is incredibly difficult to obtain. So far, I've only heard of fewer than three people who have received its reward."

"That isn't a small number, though," Chen Mo remarked.

"This is based on data from countless talented experts who have experienced who knows how many Lands of Divine Legacy. The number of people who died during their exploration is immeasurable."

"Well, that's true. The Land of Divine Legacy indeed isn't a place for people to play around in. It annihilates on a whim, but thankfully, it's still somewhat merciful. There's always a brief warning before each attack."

Even though the trials in the Land of Divine Legacy have exceptionally brutal penalties—basically, getting hit means death—you can clearly feel a premonitory tremor before being afflicted. The attack only appears after the tremor. At that point, if someone has an ability like Chen Mo's Blink or an instant Teleportation Talisman, they can escape at the first sign of abnormality. So, it's not necessarily fatal.

However, the threat level of the penalties is indeed extremely terrifying. If you're careless and get caught, death is certain.

Knowing that this might be a special category of Treasure Secret Realm known as the Land of Divine Legacy, Chen Mo became even more energized.

Soon, his Skeleton Monsters had spread throughout every corner of the shrine.

At this point, Chen Mo commanded one of the Skeleton Monsters to slowly approach the towering bird statue behind the lion, his eyes filled with anticipation. I hope I can identify the problem this time.

The moment Chen Mo's Skeleton Monster touched the bird statue, the familiar tremor occurred again, just as expected.

The deep purple glow around the bird statue became more pronounced, and the red light flashing in its eyes seemed to be the focus of the shrine, creating an oppressive feeling that pressed down on one's heart.

As the Skeleton Monster touched the bird statue, a tremor suddenly swept through the entire shrine. The ground began to tremble slightly, as if responding to the Skeleton Monster's contact.

The bird statue's body began to transform. Its feathers flickered with a deep purple color, like stars twinkling in the night sky. Its eyes flashed with a ferocious red light, emitting a powerful wave of energy.

Red light burst from the bird statue's eyes, shooting straight into the sky as if intending to tear it apart. Chen Mo and Yusheng Liuyin, who were outside the shrine, both saw this light piercing through the shrine.

At this moment, the entire world seemed to become still beneath this red light.

Next, a deep starlight suddenly emerged from between the bird statue's feathers. The light spread out, forming a dazzling web of light that enveloped the entire shrine.

Chapter 526: Light of Divine Source! (Four in One) _2

At that moment, the bird statue opened its purple beak, emitting a resounding cry that seemed to originate from the depths of the Universe. The cry was as deafening as thunder, unleashing a powerful sonic shockwave. This shockwave's force was extraordinarily fierce, making the air within the shrine seem to twist. Nearby Skeleton Monsters were struck by this force, their bodies instantly shattering as if hit by a giant hammer, bones and dust scattering everywhere.

Simultaneously, the radiant web of light contracted towards all the Skeleton Monsters in the shrine, accompanying the bird statue's cry. Their skeletal bodies were tightly ensnared by the web of light. As it shrank, all the Skeleton Monsters crackled and then, in the next moment, exploded into countless dust particles, dispersing with the wind.

After all the attacks ceased, the shrine fell silent once more. The bird statue's red glow gradually faded, and it returned to its previous inanimate state, as if everything that had just transpired was merely an illusion.

As expected, when the bird statue used Energy to attack the Skeleton Monsters this time, a faint tremor once again ran through the shrine. It was as if traces of Energy were flowing along a specific path.

Outside the shrine, Chen Mo stood his ground, recalling the recent changes within. Unfortunately, he hadn't captured any noticeable differences this time, which prompted him to try again.

Next, Chen Mo repeatedly dispatched hordes of Skeleton Monsters inside. He spent a great deal of time observing different spots within the shrine, attempting to find a structure or device related to Energy transfer.

Finally, through careful observation, he noticed that an area of the mural within the shrine differed from the rest. This section of the mural emanated a faint Energy fluctuation, synchronized with the frequency and rhythm of the ground tremors.

Upon sending Skeleton Monsters inside again, Chen Mo immediately focused his attention on this mural. He observed it closely and discovered it was composed of many tiny lines and patterns.

When he commanded the Skeleton Monsters to touch the statue and trigger its attack again, Chen Mo found these lines would vibrate oddly. When close, he could feel a subtle Energy flow.

Clearly, something's amiss! Chen Mo immediately began to study the arrangement and connections of these lines. He believed these lines might be part of an Energy pathway, and the mural itself could be a trigger or control device. He commanded the Skeleton Monsters to trace the lines with their fingers, attempting to find potential connection points and intersections.

After some exploration, he suddenly felt a faint flow of Energy. He noticed that when the Skeleton Monsters pressed specific intersections of the lines, the Energy flow became more distinct.

Chen Mo was thrilled. He realized this mural was part of the Energy transfer pathway! By pressing the correct lines and intersections, he successfully activated the pathway, allowing Energy to transfer from the small sphere to the statue.

Upon pressing specific points on the dragon pattern, the Energy was instantly transferred to the dragon statue. Through the shared senses of the Skeleton Monsters, Chen Mo saw the dragon statue come alive again. However, this time, it didn't attack the Skeleton Monsters; instead, it seemed to emanate a friendly aura.

A hint of joy touched Chen Mo's face. He had finally found the hidden Energy transfer pathway and established some form of connection with the dragon statue.

Following this line of reasoning, Chen Mo commanded the Skeleton Monsters to activate all the other statues as well. However, as he did so, the second statue unexpectedly turned hostile and instantly exterminated all the Skeleton Monsters in the shrine.

Activating the dragon statue was fine, but there's an issue with the second one. Could there be a specific activation sequence for these statues? With this thought, Chen Mo immediately dispatched more Skeleton Monsters inside.

After observing for some time, Chen Mo noticed that the gazes of the statues in the middle two rows were directed differently. The dragon statue's gaze was fixed on the bird statue.

Could it be that the bird statue is next after the dragon? Thinking of this, Chen Mo immediately commanded the Skeleton Monsters to activate the dragon statue and then the bird statue.

This time, there were no issues. Both statues remained in a friendly state and didn't launch any attacks. Seeing this, Chen Mo immediately commanded the Skeleton Monsters to continue. Following the bird statue's line of sight, Chen Mo then activated the lion statue. The lion statue also remained friendly and didn't attack. This confirmed it.

Following the same logic, Chen Mo eventually activated all eight statues.

The moment all the statues were activated, Chen Mo felt a powerful and mysterious Energy fluctuation permeate the entire shrine. Each statue began to emit a dazzling radiance, as if imbued with new vitality. As the Energy transferred, the atmosphere in the shrine grew increasingly mystical and solemn. Chen Mo could sense the power and wisdom contained within each statue; they seemed to be communicating with him in some way.

Suddenly, a dazzling beam of light erupted from the small sphere at the center of the shrine, illuminating the entire space and unleashing a terrifying attractive force. This force pulled both Chen Mo and Yusheng Liuyin from outside the shrine directly into its interior. However, this time the pull was gentle. Chen Mo didn't feel threatened and didn't attempt to flee.

"What's going on?" Yusheng Liuyin, who had no idea what was happening, immediately looked at Chen Mo with curiosity and asked.

"It's nothing. It's likely because we successfully deciphered it."

As an invisible force pulled them into the shrine, the eight statues within had already moved to surround the small sphere at its center, forming an octagonal perimeter with the sphere enclosed in the middle.

Chapter 527: Light of Divine Source! (Four in One) _3

The eyes of all the statues began to emit a red light, illuminating the small orb in the center. Soon, the statues began to shatter inch by inch. From within them, small orbs emerged and surged into the central orb. Once all eight small orbs flew into the central orb, its Energy surged dramatically, immediately transforming it into a large orb.

As the large orb spun, the entire shrine began to shake violently. While Chen Mo and Yusheng Liuyin were being drawn in, they saw the entire shrine starting to fracture and crumble, all debris drawn into the large orb by its powerful pull.

A dazzling light radiated from the large orb, filling the entire shrine like a flood and causing the originally dim space to instantly brighten. The light contained boundless Energy and mysterious power, a heart-pounding sight. As the large orb rotated, Energy fluctuations formed a spinning vortex. Like a Black Hole, it mercilessly began to swallow the shrine. Walls began to shatter, pillars collapsed quickly, and floors cracked; everything became fragile under the power of the large orb.

A huge Energy vortex quickly expanded, devouring everything in the shrine. Fragments and debris were torn apart by the endless suction, shattering into countless tiny pieces before being ruthlessly sucked into the large orb by the Energy vortex. In this grand and frenzied process, the shrine's structure collapsed, sending rocks splattering and dust swirling. The broken debris was completely rent asunder by the rotating Energy vortex, turning into pitch-black shadows before being utterly swallowed by the large orb.

As time went on, the sucking force from the large orb gradually weakened and finally stabilized. The entire shrine had completely disappeared, leaving only bare ground. The large orb hung suspended in mid-air, emitting a faint, mysterious light. In the desolate space, no trace of the former shrine remained. All that could be seen was the solitary large orb, silently floating. The Energy fluctuations it emitted gradually subsided, and the surrounding air grew still. The whole scene was filled with a solemn and grave atmosphere, as if witnessing the end of a grand, mysterious ceremony.

At this time, Chen Mo and Yusheng Liuyin had also been drawn to the front of the large orb. The two looked at each other until The Heavenly Path's Hint rang out.

[The Heavenly Path's Hint: Congratulations on deciphering the Land of Divine Legacy left by the Nature God. You will receive part of her legacy. If you are ready, please touch the Light of Divine Source in front of you!]

So this thing is called the Light of Divine Source, Chen Mo thought as he focused his senses on it. He could feel that the large orb before him contained terrifying Divine Power. This Divine Power was even stronger than that of the genuine God he had encountered previously. If I could absorb all of it, it would be incredible! But it clearly states 'part,' so naturally, I can't take it all away, he mused. Since The Heavenly Path's Hint endorsed it, there wouldn't be any danger. Chen Mo immediately reached out and touched the Light of Divine Source before him, which pulsed with extremely terrifying Energy!

The moment his palm touched the Light of Divine Source, he felt a surge of potent Energy pouring into his body. The Heavenly Path's Hint also rang out immediately after.

[The Heavenly Path's Hint: Congratulations, because you have a Divine Physique. Although it hasn't been fully activated, it still played a role. This time you absorbed 10 points of Divine Power from the Light of Divine Source!]

So much?! Chen Mo was taken aback by The Heavenly Path's Hint. After all, it wasn't easy for a fifth-transition powerhouse in the Tower of Eternity to gain even one point of Divine Power. This single encounter had directly rewarded him with an amount of Divine Power equivalent to participating in a Legendary Trial. Naturally, he was excited.

"What's so much?" Yusheng Liuyin, who was beside him, asked curiously. "Did you get a very powerful Divinity?"

Only then did Chen Mo notice the second Heavenly Path's Hint.

[The Heavenly Path's Hint: Congratulations, you have obtained the Divinity "Natural God's Blessing" from the Light of Divine Source left by the Nature God!]

[Natural God's Blessing·Divinity]: Whenever you use any Skill, there's a 50% chance to instantly reset its Cooldown (including Skills not subject to Cooldown reduction).

No wonder it's a Divinity; it's truly powerful! Chen Mo immediately looked at Yusheng Liuyin and said, "It's a Divinity that can directly reduce Skill Cooldowns."

"I really envy you! I want a Divinity like yours too. The Divinity I just got is useful, but it's much worse compared to yours," Yusheng Liuyin said with a regretful look.

Chen Mo then sensed Yusheng Liuyin's Divinity. It turned out to be one that increased survivability. Given Yusheng Liuyin's own impressive survivability, this Divinity didn't seem particularly remarkable for her. But having an extra lifeline isn't a bad thing, he considered.

"Getting a Divinity for free is always a gain, no matter what," Chen Mo said with a smile.

"That is true." Yusheng Liuyin quickly adjusted her emotions. After all, it's a good thing. One shouldn't be unhappy just because it's not perfect, she thought, her spirits lifting.

In comparison, Chen Mo had truly struck it rich, gaining both a Divinity and Divine Power. Besides, Chen Mo hadn't forgotten about the source of the Holy Devil Spring, which had been enveloped by the enchantment, preventing him from reaching it. The previous enchantment was caused by the shrine. With the shrine shattered, the enchantment naturally no longer existed. Although he hadn't earned any eternal gold coins from this lair, Chen Mo had made a fortune in other aspects.

Chapter 528: Light of Divine Source! (Four in One) _4

After both had received their rewards, the Light of Divine Source flickered and then vanished in a flash, its whereabouts unknown.

At this point, Yusheng Liuyin curiously asked Chen Mo, "They say that even if you find a Land of Divine Legacy, obtaining the inheritance is harder than ascending to heaven. How did you manage to solve it so simply by sending in a few waves of Skeleton Monsters?"

"It wasn't as simple as it sounds. The main factor was that this Land of Divine Legacy is rather friendly, allowing us to probe from the outside," Chen Mo said. He recalled the obliteration-grade powers that had erupted within the shrine. "If we had been forced to enter the shrine, I fear we would have been killed eighteen times over before finding a solution. The danger level is still very high. An ordinary person entering, even a fifth-transition powerhouse, would probably find it difficult to resist."

"Since the shrine has been destroyed, I suppose the surrounding barriers have also disappeared. Let's continue our search for the Holy Devil Spring," Yusheng Liuyin said. She didn't dwell on how Chen Mo had succeeded; her primary goal was to earn study points and enjoy the subsequent benefits.

After being suffused with the potent energy of the Light of Divine Source, Yusheng Liuyin's condition returned to normal. The two immediately flew together towards the previously sighted source of the Holy Devil Spring.

A few minutes later, Chen Mo and Yusheng Liuyin arrived at the source of the Holy Devil Spring.

The mountain cave housing the Holy Devil Origin Spring resembled a grand shrine, towering and magnificent, emanating an intensely rich aura of Magic Power and sanctity.

Spring water gushed from the source, forming a surging waterfall. The stream flowed like soft silver threads, shimmering with multicolored light, akin to a flowing rainbow. Water droplets tumbled and danced in the air, releasing a fresh aroma and crisp, clear sounds.

The area around the source was adorned with mysterious runes and ancient carvings, which radiated a mystical and Sacred power.

Light flickered between these patterns, creating a breathtakingly beautiful scene, as if narrating the magical secrets of the source.

The Holy Devil Origin Spring exuded a tranquil and solemn atmosphere, seemingly a nexus connecting the Sacred and power. Here, Magic Power and Sacred power merged, generating a unique and peculiar energy field.

Within the spring water, the Magic Power and Sacred power formed vortex-like patterns, resembling millions of fine threads intricately woven together, composing a splendid and colorful vista.

Light pierced the water's surface, casting a dazzling, multicolored halo that bathed the entire source in a dreamlike luminescence.

A mysterious fragrance permeated the air, evoking a sense of an extraordinary, transcendent presence.

Chen Mo and Yusheng Liuyin stood before the source, feeling the intense Energy fluctuations it emitted, as if they were in a Sacred and mystical realm.

"As expected of the Holy Devil Spring! Just by standing in this environment near the source, our recovery abilities have significantly improved."

At this moment, Chen Mo received The Heavenly Path's Hint. Due to his presence in the misty environment of the Holy Devil Spring, both his Life recovery ability and Energy recovery effects had greatly increased.

"We can take this spring water, right?" Chen Mo asked, looking at Yusheng Liuyin beside him.

"Yes, we can take as much as we like. However, if we want to take it out of the Instance Dungeon, we can only keep a maximum of one liter. The Heavenly Path's Hint will remind you, so taking more is pointless."

Hearing this, Chen Mo was somewhat speechless. "There's such a rule?"

But I only need a small bottle to cleanse the murky Heart of God, so it isn't a big problem.

Very quickly, Chen Mo filled a bottle with water from the Holy Devil Spring.

With this, I've collected nine types of Holy Water. Once I gather the final type, I can purify the murky Heart of God and gain another divinity. How wonderful!

Chen Mo contentedly stored the Holy Water. Just then, Yusheng Liuyin suddenly looked at him, her expression becoming subtle and intriguing, her eyes twinkling with a mischievous and playful light. "Chen Mo, it's said that if you soak in such a pure Holy Devil Origin Spring, you have a chance to acquire the Holy Devil Body, a special Constitution. I'm going in. Do you want to try?" she asked, her tone light and teasing.

"Holy Devil Body? What are its effects?"

"It can increase some attribute points and enhance survival ability," Yusheng Liuyin said with a smile.

"So, how do you soak?" Chen Mo couldn't help but glance up and down at Yusheng Liuyin.

"Of course, you take off your clothes and soak in the spring water. Haven't you ever been in a hot spring before?"

"Ahem. I have... So, how long do you have to soak?"

"It depends on your luck. After soaking in the Holy Devil Origin Spring, you have a chance to acquire the Holy Devil Body within twenty-four hours. However, it's unclear exactly when that might happen. Some people get it as soon as they jump in. If you soak for more than twenty-four hours and don't acquire it, then this particular Holy Devil Origin Spring can't grant you the Holy Devil Body. You'll have to look for such opportunities in future Instance Dungeons," Yusheng Liuyin explained patiently.

"So that's how it is. Senior sister, you should go soak first. In the meantime, I'll check out the other nests. If I encounter a BOSS, I'll kill it first, and then we can divide the spoils leisurely later."

"Not soaking together? This Holy Devil Origin Spring is quite spacious. I can even help scrub your back, you know! My back-scrubbing skills are excellent," Yusheng Liuyin said, a hint of inexplicable pride in her tone.

Upon hearing Yusheng Liuyin's words, Chen Mo couldn't help but laugh. He said to her, "Senior sister, there should be a distinction between men and women. This isn't appropriate."

Chapter 529: Light of Divine Source! (Four in One) _5

"In our Sakura Town, mixed bathing is normal as long as the person isn't very annoying. You don't find me annoying, do you?"

"Not at all, Senior sister. You misunderstood. It's just that in our culture, doing so might make people feel awkward."

"Really? I won't feel awkward. Don't tell me you're shy? Boys are supposed to be more daring. Bathing alone is so boring. Besides, if you wait for me to finish bathing before you get in, it would waste too much time." Her eyes twinkled with a hint of playfulness and mischief, while she maintained a friendly and intimate atmosphere.

"Alright then. You get in first. I'll go defeat the BOSSes in the other nests. If you still haven't awakened your Holy Devil Body by the time I return, I'll join you to save time," Chen Mo said with a smile.

"Alright. Go on then, and come back quickly." Yusheng Liuyin didn't insist, smiling as she bid him farewell.

Chen Mo nodded, leaving Yusheng Liuyin behind before flying off.

As he flew away from the Holy Devil Origin Spring, Yusheng Liuyin began to undress.

Chen Mo's advanced perception ability captured everything vividly in his mind.

He saw Yusheng Liuyin remove her clothes, naturally revealing her body's curves and her elegant posture.

Her skin was as white as jade, emitting a healthy and alluring glow. Her shoulder lines were beautiful—slender and soft—revealing a woman's gentle and graceful beauty. Her slender neck curved gently, like that of an elegant swan, adding an air of nobility and grace to her.

Her arms, soft yet firm, scooped up some spring water, sprinkling it on her body to test the temperature. Her movements were filled with elegance and a unique rhythm.

Finding the water temperature to her liking, Yusheng Liuyin removed her bodice and, with her long, beautiful legs, stepped into the Holy Devil Origin Spring.

Her gently swelling breasts revealed soft, full curves, like a perfectly sculpted work of art. Her waist was slender and supple, accentuating her perfect bodily proportions. Her hips were full and round, with smooth, graceful lines, exuding an intoxicating charm.

As the warm waters of the Holy Devil Spring enveloped her body, Chen Mo gradually moved beyond his perception range, having witnessed this beautiful and unique scene.

Leaving that nest, only four nests remained. One of these was where the main BOSS was located, so Chen Mo naturally aimed for the other three.

He turned around and entered one of the nests.

The environment of this nest was completely different from the previous one.

A chilling atmosphere permeated this nest. The surrounding air seemed to have congealed.

The moment Chen Mo stepped into the nest, a chill struck him, sending a shiver down his spine.

This was not the physical cold of a frosty cave, but a spiritual chill.

The nest was enveloped in darkness. The entire structure resembled an intricate Beehive Maze; once inside, it was impossible to find one's way.

Even though Chen Mo's perception ability was exceptionally strong, all he could sense around him were identical, hexagonal, honeycomb-like rooms. If one ventured deeper, they would quickly become completely disoriented.

The floor was littered with uneven rocks and shattered bones, exuding a stench of decay and death.

Chen Mo soon noticed some peculiar patterns on the walls of the nest. Carefully following these patterns, he tried to find a path deeper into the nest.

As he ventured further into the nest, strange sounds began to echo around him. Sometimes they were low growls, other times piercing screams, which sent a chill down his spine.

Gradually, he felt an increasingly strong dark aura, like an invisible shadow hanging over the nest. He could sense the Dark Power here was exceptionally strong, and it seemed an evil force awaited him in the depths of the nest.

As he continued to venture deeper, the pattern he had been following surprisingly came to an abrupt halt. The surrounding ground then began to spin wildly, though it quickly stopped.

By this time, Chen Mo had been lured into the center of the nest. He attempted to perceive the other rooms within his range, only to find that everything within his perception was an endless expanse of identical hexagonal rooms.

Chen Mo tried to use his Divine Flicker ability to escape, attempting to Flicker to the most distant hexagonal room he could perceive.

But no matter how many times he Flickered, he was still surrounded by a dense, endless expanse of hexagonal rooms.

"Playing a maze game with me?" Chen Mo smirked. "Let's see if you have more rooms or I have more people."

With a thought, millions of Skeleton Monsters instantly gathered by his side.

At Chen Mo's command, all the Skeleton Monsters scattered, heading off in all directions to explore the rooms one by one.

One Skeleton Monster was left behind in each room they entered.

While the Skeleton Monsters set out, Chen Mo didn't bother moving about, leisurely awaiting the results of their exploration.

Indeed, there was strength in numbers.

With Chen Mo's millions of Skeleton Monsters systematically occupying the rooms, it wasn't long before most of the honeycomb-like chambers had been scouted. Even then, the Skeleton Monsters continued to press forward.

Chapter 530: Holy Devil Body! (Four in One) _1

Seeing how effective the Skeleton Monsters were, and with not many unsearched rooms left, Chen Mo decided to use his perception ability and Divine Flicker ability to clear the remaining rooms himself.

However, only after he used his Divine Flicker ability again did he understand why his previous attempts at Teleportation had been futile.

No matter where he used Divine Flicker, the rooms occupied by Skeleton Monsters would shift based on his destination, maneuvering to surround his current room and trap him at the center.

It looks like using a Teleport ability within this lair will trigger a counter-measure.

With this realization, Chen Mo tried walking into an adjacent room.

This time, the surrounding rooms didn't move strangely again.

Chen Mo now understood there was a peculiar mechanism within this lair. Trying to cheat using Divine Flicker was simply not an option. Using such an ability would trigger a counter-measure, forcibly moving him to the central room and rendering any Teleportation futile.

Understanding this principle, Chen Mo stopped using Divine Flicker recklessly. Instead, he relied on the Skeleton Monsters to continuously explore, occupying all empty spaces, and brute-forced his way through the Beehive Maze.

Just as Chen Mo stepped out of the Beehive Maze and entered the final, vast room, he saw a giant BOSS materialize out of thin air in the center.

It stood tens of meters high, its body like a massive dark fortress, emanating a sinister and fierce aura.

Its black shell was tough and heavy, like impregnable armor, covering its entire body.

Mysterious runes and evil patterns were carved all over the shell, shimmering with a dark glow. Each pattern pulsed with surging Dark Energy, emitting an imposing and terrifying aura.

It had the typical form of a spider, with eight enormous eyes flashing with blood-red light.

These eyes revealed boundless ferocity and cruelty, as though they could discern an enemy's every move. Each eye was like a Black Hole, seemingly capable of swallowing all light and hope.

Indeed, it was a giant Spider Monster!

The Spider Monster's gigantic legs were conspicuous.

They were as thick and strong as pillars, glinting with a cold, dark iron-like light.

Each leg had many joints, flexibly and precisely supporting its entire body. A hard black shell covered its legs, seemingly capable of effortlessly resisting any attack. Each claw was sharp and pointed, radiating a frightening cold glint, as if it could tear apart anything that dared to challenge the monster.

The Spider Monster's body brimmed with Dark Energy, an energy filled with destructive power.

It could summon evil forces from the darkness and unleash lethal Dark Magic.

These magic attacks held immense power and could quickly weaken or even annihilate enemies.

The Spider Monster excelled at using the power of darkness for ambushes and attacks, making it an extremely threatening enemy.

In addition to its immense power and Dark Magic, the Spider Monster also possessed swift movements and acute perception ability.

It could move anywhere in an instant. In the few seconds since Chen Mo had entered the room, it had already changed positions several times.

What a show-off.

Despite the Spider Monster's formidable abilities—instantaneous movement, high attack and defense attributes, and profound mastery of Dark Magic—it faced Chen Mo, an opponent who defied logic.

No matter how swiftly it moved, it was useless. With a mental command, Chen Mo summoned all ten million-plus Skeleton Monsters back to his side.

The gigantic Spider Monster was so terrified it actually retreated.

Perhaps due to its profound understanding of Dark Energy, it alone could sense the terrifying Dark Energy surrounding Chen Mo.

However, escape was impossible.

With a thought from Chen Mo, the Space-Time Pearl activated, anchoring it in place. It was then met by a round of attacks from the Skeleton Monsters.

The Skeleton Monsters' attributes were already incomparable to their previous selves, and now they even possessed their own Skills. Their unleashed combat power was completely overwhelming for this third-transition, Level 80, SS-level BOSS.

In the blink of an eye, this Legendary-grade monster, the Shadow Spider BOSS, comparable to a giant dragon, was instantly killed by Chen Mo. Since this BOSS had no particularly remarkable features, Chen Mo didn't preserve it as a Special Undead.

With the death of the Shadow Spider, the peculiar Beehive Maze made of Dark Energy also disintegrated and vanished.

Chen Mo reached out, touched the Shadow Spider, and collected its corpse into his bag, then turned and left the lair.

This lair had taken a bit longer than the previous ones, largely due to the time spent in the maze.

Upon exiting, Chen Mo saw that Yusheng Liuyin had not yet returned. He surmised her luck had been average this time, and she hadn't yet acquired the Holy Devil Body. So, Chen Mo turned and entered the next lair.

Chen Mo flew across the Wilderness Forest and arrived at the lair known as [Nether Ghost Tomb].

He entered the lair's entrance and was met by a desolate death energy. The lair's walls, constructed from thick rock, appeared ancient and solemn.

These rocks were riddled with cracks and indentations, heavily eroded by the passage of time.

The interior of the cavern was gloomy and cold, filled with a suffocating death energy.
