Chapter 56 Oversized Backpack! (Extra Updated)_1

Chen Mo was in no rush. He observed his surroundings while waiting.

Soon, the attendant returned with a backpack.

"Honored guest, everything you wanted is inside this. Feel free to verify it."

"What's this backpack for?"

"It's just a small backpack we're giving you for free."

"I see." Chen Mo took the backpack, sensed its contents, and felt that everything seemed to be about right.

The only things that couldn't be put into his storage space were the one hundred space backpacks. They had packed them all into a large suitcase and pushed it in front of Chen Mo.

Chen Mo didn't bother counting, figuring it was all there. After all, such a large store wouldn't stoop so low as to cut corners on low-grade items; doing so would just tarnish its own name.

Since Elder Rui had rounded up the payment and waived the remainder, Chen Mo still had a full one million left.

He planned to go to the front desk of Myriad Heaven and exchange 100 eternal copper coins for one million in cash to show Sister Yiyi.

Bringing so many things back meant he would be very busy.

Just as Chen Mo was about to stand up, he suddenly received a Heavenly Path Hint.

[The Heavenly Path's Hint: The "shiny eternal copper coin" you listed for 1 eternal silver coin has been purchased. You received 100 eternal copper coins.]

[The Heavenly Path's Hint: You've received a buyer's message. The message will be retained for 24 hours. Please check it in time.]

Somebody bought that piece of junk?

Chen Mo was surprised.

Seeing that the buyer had indeed sent a message, Chen Mo immediately opened it.

[Heavenly Account 5566XX...: Do you have more shiny eternal copper coins?]

[Heavenly Account 7777XX...: How many do you need?]

Seeing the buyer wanted more, Chen Mo was secretly thrilled. Looks like I'm about to make a fortune!

He couldn't believe someone would buy something that cost him only 30,000 for one million!

[Heavenly Account 5566XX...: I need three more. If you list them now, I will buy them instantly.]

[Heavenly Account 7777XX...: Okay, I'll list them right away.]

Chen Mo excused himself to go to the restroom, planning to combine a few shiny eternal copper coins to list for sale.

In his haste, he almost reflexively headed for the men's restroom again. Fortunately, he constantly reminded himself and turned into the women's restroom instead.

However, as someone who had always been law-abiding, this was Chen Mo's first time entering a women's restroom. Suddenly entering a place he felt was off-limits, he found it genuinely awkward.

He quickly found a stall to hide in but still felt uncomfortable. He decided to get it over with and leave as quickly as possible.

It's a good thing I didn't convert all my eternal copper coins into money earlier. Otherwise, with all this back-and-forth exchanging, they might think I'm crazy.

Chen Mo hastily combined three shiny eternal copper coins and listed them on the Heavenly Trade Market immediately.

As expected, they were bought instantly as soon as he listed them. All three were snapped up.

[Heavenly Account 5566XX...: It took me a whole month to get just one. Thanks to your four coins, I finally have five. Thank you so much.]

[Heavenly Account 7777XX...: Don't mention it. It's a win-win. Feel free to contact me again if you need more.]

[Heavenly Account 5566XX...: Got it.]

[Heavenly Account 7777XX...: If you don't mind me asking, what's this item used for?]

[Heavenly Account 5566XX...: There's a strange old man in the Tower of Eternity who only accepts this particular currency for trades. The drop rate in the location he mentioned is abysmally low. I've been grinding in the Abyss for a whole month and only found one. I'm about to puke from all the grinding!]

Chen Mo was surprised to hear that the other party was a powerhouse capable of entering the Tower of Eternity.

Anyone who could enter the Tower of Eternity was a powerful expert at the fourth-transition or higher.

Realizing he had just swindled four million from the guy for something that cost him only 120,000, and the buyer even thanked him for it, Chen Mo felt a pang of guilt and quickly closed the chat.

Now he had 4.88 million on hand.

When he had opened the Heavenly Dao interface earlier, Chen Mo realized he had forgotten to prepare rare, precious, and even higher-tier epic materials.

He quickly bought 500 of each of the rare and precious types from Elder Rui. The epic-level dark-series materials were numerous and expensive. Unsure which specific types he would need for synthesis, Chen Mo decided not to buy them yet and to wait and see.

Buying these materials cost him a total of 750,000, leaving him with 4.13 million.

After completing this final transaction, Chen Mo double-checked to ensure he hadn't missed anything. Only then did he go to the front desk to exchange 113 eternal copper coins for 1.13 million alliance currency.

He kept the remaining 300 eternal copper coins in reserve.

With all these tasks completed, Chen Mo finally left Myriad Heaven, pulling his suitcase.

Instead of heading straight home, he wandered around the city for a while before finding a public restroom and slipping inside.

This time, he remembered to enter the women's restroom. After finding an empty stall, Chen Mo opened his suitcase and began the synthesis process.

After continuously synthesizing with over a hundred backpacks, Chen Mo finally spent 81 of them to obtain a super-capacity backpack with four special effects: Search, Tenacity, Expansion, and Space Inclusion.

Three successive enhancements had caused the Expansion affix to evolve, increasing the capacity tenfold each time.

The original tenfold expansion backpack, after successfully synthesizing the subsequent three effects, now had its capacity increased to ten thousandfold.

This backpack now boasted a capacity of ten thousand cubic meters. Additionally, thanks to its effects, it allowed for quick searching of stored items, was highly durable, and could even store other space backpacks.

This last effect, Space Inclusion, was particularly noteworthy. Normally, space backpacks couldn't be stored inside one another, but this backpack now possessed that ability.

However, with ten thousand cubic meters of storage space, who would really care if space backpacks could be nested? It was hard to imagine ever using up that much room.

That being said, Chen Mo still had quite a few space backpacks left in the suitcase. Each had cost 10,000, so it would be a waste to throw them away. Perhaps I'll collect a few hundred more later and upgrade this current backpack again, he thought.

By then, with a storage space of one hundred thousand cubic meters, there would truly be nothing it couldn't hold.

After stowing everything into this super-capacity backpack, Chen Mo finally left the restroom.

Then he resumed his aimless wandering around the city.

When he reached a secluded, dead-end alley, he immediately reverted to his original form, then took a few detours before finally returning home.

Although the Safe Zone's security was actually quite good, and Chen Mo didn't strictly need to be so cautious, it was always better to be safe than sorry. Prudence never hurt anyone.

Returning home with a vast haul of supplies and a large sum of money, Chen Mo immediately sent a message to Liu Yiyi, telling her not to go to work and to come home as soon as possible because he had a surprise for her.
