

Global CM 651

Chapter 651: Deification! Life Level Upgrade! _3

What appeared before Chen Mo was an enchanting and peculiar pet.

Its body seemed to be composed of countless twinkling stars, emitting a dazzling light.

Its form was unpredictable, sometimes like a rotating nebula, at other times like a solitary meteor.

The pet was small and agile, like a gemstone from the cosmos, sparkling with multicolored light.

Its eyes were deep and crystal clear. On its body surface, starlight intertwined to form magnificent patterns, displaying mystical and ancient symbols.

If he had to describe its overall appearance, Chen Mo thought it looked exactly like a slime with two large eyes and skin made of starlight.

[The Heavenly Path's Hint: Congratulations on successfully incubating a chaos-grade pet—Chaos Slime from the chaos-grade pet egg.]

[The Heavenly Path's Hint: Please name your pet.]

"Its name really is Slime!" Chen Mo exclaimed, momentarily speechless.

"Let's call it Little Slime then."

Chen Mo, who was terrible at naming, quickly chose 'Little Slime' and then immediately checked its attributes.

[Name]: Little Slime

[Growth Stage]: Newborn (50-star)

[Favorability]: 100 (Deeply Loved)

[Gender]: Genderless

[Race]: Chaos Race

[Variety]: Chaos Slime

[Level]: 60

[Experience]: ???/??? (Cannot gain experience points due to skills)

[Attribute]: All Attributes: Level × Star Level × 100

[Skill]: Chaos Power, Transcendent Growth, Chaos Fluctuation, Free Transformation, Passive Locked (Unlocked in infancy), Active Locked (Unlocked in infancy)

[Chaos Fluctuation·Active]: Little Slime releases Chaos Fluctuation, forming a domain centered on itself with a radius of (Level × Star Level × 100) meters. Within this domain, hostile units' damage increase and damage reduction will be weakened by (Level × Star Level)%, while friendly units' will be boosted by (Level × Star Level)%. This effect lasts for a number of minutes equal to Little Slime's personal level.

[Free Transformation·Active]: Little Slime can freely transform, changing its form to adapt to different combat environments and needs. It can attach to any object, such as weapons, shields, traps, etc. After attaching, it will enhance the object to varying degrees depending on the object's nature, with the duration related to its level.

As one could see, chaos-grade pets all started with two identical passive skills.

However, their two active effects differed. The slime's active effects could provide decent buffs and debuffs over a wide area, affecting both teammates and enemies, making it an excellent support pet.

Chen Mo even found such pets more appealing than purely damage-focused ones.

He immediately initiated the soul pact.

[The Heavenly Path's Hint: An anomaly in your soul has been detected. Your soul is a fusion soul, containing elements from this realm and a non-this realm soul!]

[The Heavenly Path's Hint: The non-this realm soul has been detected to have undergone a soul pact previously. This soul pact can only be formed using the soul from this realm. Do you confirm?]

Naturally, Chen Mo chose to confirm.

As soon as he confirmed, that familiar sensation returned: a pull at a crucial point in his soul, linked to a corresponding point in Little Slime's soul.

[The Heavenly Path's Hint: Soul pact complete. Congratulations on the successful pact! You will simultaneously receive the star-rank blessing of the pacted pet!]

[The Heavenly Path's Hint: Your pet currently has a star level of fifty stars. You have received the blessing of fifty stars, and your attributes have changed!]

[Profession]: Dominator of the Undead (third-transition hidden initial profession, 20-star + 50-star), Infinite Fusion Master (hidden initial profession, 5-star + 50-star)

Seeing his professional star levels skyrocket, Chen Mo immediately checked his attributes. He found that all his attributes were indeed calculated based on his dual professions and the star levels from his two soul-pacted pets. He had really scored big this time.

And this wasn't the end of the bonuses.

Chen Mo had already exchanged for a large number of items to enhance the pet's growth value and help it break through its growth stages—enough for it to advance to the next one.

According to the progression of chaos-grade pets, each growth stage breakthrough increased their star level by fifty stars. For Chen Mo, this meant another one hundred stars added to his professional star levels.

With two pets, this meant an increase of two hundred professional star levels—a truly explosive upgrade.

Chen Mo immediately began the synthesis.

However, there were too many materials, all of which needed to be synthesized from SSS-level to chaos-grade before they could be used by chaos-grade pets. Chen Mo needed to spend a lot of eternal gold coins for the synthesis.

He had to go to the Academy Alliance Headquarters to make a withdrawal from the Merits Bureau.

He made a withdrawal of a full one million eternal gold coins in one go. This act so alarmed the head of the Merits Bureau that he immediately reported the matter to the three Alliance Hierarchs.

Although it had been confirmed that Chen Mo possessed the authority for such withdrawals, taking out this many eternal gold coins was still an audacious move. After all, a single eternal gold coin was equivalent to one hundred million alliance currency.

Chen Mo had effectively spent the equivalent of one hundred trillion alliance currency. Who wouldn't be flustered by such a figure?

Although the three Alliance Hierarchs were unsure why Chen Mo was withdrawing such a massive sum of eternal gold coins, they still approved the transaction.

Soon, Chen Mo successfully obtained one million eternal gold coins.

Using it felt great, but Chen Mo suspected he'd have a hefty bill to pay back later.

Upon returning to his room, Chen Mo immediately started the synthesis.

Meanwhile, the adorable Xiao Hui and Little Slime obediently munched on the various growth-enhancing foods Chen Mo tossed their way.

Chapter 652: Deification! Life Level Upgrade! _4

Soon enough, both little creatures had advanced to their juvenile phase.

Their appearances also changed accordingly.

Although Little Slime's size remained unchanged, its surface now looked more brilliantly starlike.

As for Xiao Hui, she grew slightly taller, her body becoming more rounded. She now resembled a cute hedgehog completely covered in soft grey fur.

Instead of calling them chaos pets, it's more apt to call them Gold-Swallowing Pets. They devour so much money!

Watching the million eternal gold coins he had just acquired instantly diminish by nearly half, Chen Mo felt his heart bleed.

However, seeing the attribute increase brought about by his pets' growth, he was overjoyed.

With his persistent and frenzied synthesizing, the pets finally advanced once more, entering their Growth Stage.

Little Slime's body had become almost transparent, as profound as a galaxy.

As for Xiao Hui, she had morphed from a little hedgehog into a perfectly round ball.

Xiao Hui's entire body was exceptionally round, covered in gray fur. If she tucked in her head and sat on a table, she would look just like a round, fluffy toy; no one would guess she was a living creature.

Once both creatures reached their Growth Stage, their attributes underwent significant changes, and they also unlocked four additional skills.

Name: Xiao Hui

Growth Stage: Growth Stage (150 stars)

Affection: 100 (Deeply Loved)

Gender: Female

Race: Chaos Race

Species: Chaos Beast

Level: 60

Experience: ???/??? (Unable to earn experience points due to skill effect)

Attributes: All Attributes "Level*Star Level*300"

Skills: Chaos Origin Force, Transcendent Growth, Chaos Breath, Source Change, Undying Body, Chaos Split Space, Damage Absorption, Chaos Counterattack, Passive Skill: Locked (Unlocks at Mature Stage), Active Skill: Locked (Unlocks at Mature Stage)

Chaos Breath (Active): Xiao Hui fires a Chaos Breath towards all hostile units within a range of "Level*Star Level*300 meters." It inflicts Chaos Damage equal to "All Attributes*Level*10" and randomly inflicts thirty powerful, irresistible, and undispellable abnormal statuses on the targets, lasting for "Level*3" minutes.

Undying Body (Passive): When Xiao Hui is killed, she can revive after 1 second (no Cooldown, but each resurrection extends the time needed for the next by 1 second, up to a maximum of 60 seconds).

Chaos Split Space (Active): Suppresses all hostile aerial units within a radius of "Level*Star Level*300" meters around Xiao Hui, rendering them unable to maintain Flying status in this area. Furthermore, it continuously inflicts Chaos Damage equal to "All Attributes*Level/100" per second on all enemies not in a Flying state.

Damage Absorption (Passive): Any non-Chaos Damage taken by Xiao Hui can be transformed into healing. Additionally, all friendly units within a radius of "Level*Star Level*300" meters around Xiao Hui receive healing equal to one-tenth of that amount.

Chaos Counterattack (Active): Summons the power of primal chaos to form reflect damage Energy that attaches to a target unit. During this period, any damage inflicted upon that unit will reflect onto the damage source, inflicting Chaos Damage equal to "All Attributes*Level."

Evidently, just like a real hedgehog, Xiao Hui gained a powerful Damage Reflection Skill once she reached the Growth Stage.

Given Xiao Hui's current strength, whether others could even damage her was debatable. Any attack merely landing on her would trigger a backlash, dealing 160 million Chaos Damage in return.

She was definitely not something an ordinary person could afford to provoke.

After reviewing Xiao Hui's attributes, Chen Mo turned his attention to Little Slime's attributes.

Name: Little Slime

Growth Stage: Growth Stage (150-star)

Affection: 100 (Deeply Loved)

Gender: Genderless

Race: Chaos Race

Variety: Chaos Slime

Level: 60

Experience: ???/??? (Unable to gain experience points due to skill effects)

Attributes: All Attributes "Level*Star Level*300"

Skills: Chaos Origin Force, Transcendent Growth, Chaos Fluctuation, Free Transformation, Infinite Splitting, Chaos Whirlpool, Chaos Ripple, Chaos Resonance, Passive Skill: Locked (Unlocks at Mature Stage), Active Skill: Locked (Unlocks at Mature Stage)

Chaos Fluctuation (Active): Little Slime releases a Chaos Fluctuation, forming an area with a radius of "Level*Star Level*300" meters centered on itself. Within this area, hostile units' damage increase and damage reduction are reduced by "Level*Star Level"%, while friendly units' damage increase and damage reduction are increased by "Level*Star Level"%. This effect lasts for "Level*3" seconds.

Infinite Splitting (Passive): When Little Slime's current Health drops below 50% of its maximum Health, it will split into two separate entities. Each entity will possess half of Little Slime's attributes and have a maximum Health equal to Little Slime's 'current Health' at the moment of splitting. These split entities will continue to inherit this passive. The splitting stops when an entity's maximum life value would be less than 'Level*Star Level*100' points. If a split entity is not destroyed within 60 seconds, it will re-fuse into its previous form, dispelling all abnormal statuses and restoring its current life value to its maximum life value.

Chaos Whirlpool (Active): Little Slime releases a rotating Chaos Whirlpool, engulfing enemies within a radius of "Level*Star Level*300" meters centered on itself. Enemies are trapped in the Chaos Whirlpool, continuously taking Chaos Damage equal to "All Attributes*Level," and all their spatial abilities are restricted. Their movement speed is reduced by 99% for "Level*3" seconds.

Chaos Resonance (Passive): Whenever a nearby friendly unit casts a Skill, Little Slime's resonance effect is triggered. The Skill's effects will be calculated using the sum of the casting unit's attributes and Little Slime's attributes.

Chaos Ripple (Active): Little Slime releases a Chaos Ripple, covering targets within a radius of "Level*Star Level*300" meters centered on itself. For the duration, any healing effects the targets receive are converted into an equivalent amount of damage. Additionally, their armor and resistance are reduced by 50%. This lasts for "Level*3" seconds.

Now that both pets had fully advanced to the Growth Stage, their attributes and skill strength were quite formidable.

Disregarding their individual strengths, the mere 300-star bonus they provided to Chen Mo was enough to reach a grotesque level.

This level of star bonus had never been seen before.

Chen Mo's attributes had also undergone a drastic change. In response to his attribute changes, The Heavenly Dao's Hint sounded again!

The Heavenly Dao's Hint: It has been detected that your All Attributes have exceeded 500 million. You have met the requirements for a Life Level upgrade. Do you wish to proceed? Only by upgrading your Life Level can your attributes continue to increase.

Oh? A Life Level upgrade at 500 million attributes? Doesn't this mean I can advance to a god-tier Life form?

A joyous expression appeared on Chen Mo's face. He immediately chose to upgrade.

Instantly, he felt a surge of Rule Power flow into his body. Previously, all the powers he controlled felt like insubstantial imprints upon him. But at this very moment, Chen Mo truly sensed all the abilities he had mastered begin to merge with the Rule Power, pouring into his soul and becoming unequivocally his own!

At this moment, Chen Mo felt his consciousness become clearer and stronger. His body also underwent a subtle change, emanating a mysterious and powerful aura. With his transformation, Zhui Yi beside him also began to change.

Then, The Heavenly Dao's Hint sounded once more.

The Heavenly Dao's Hint: Congratulations on your successful Life Level upgrade! From this day forward, any abilities you acquire will truly become your own inherent strength. Your All Attributes have been converted to 5 divine elements. Due to this divine element transformation, all your Divine Power has been converted into hidden divine power. Your Life Level has evolved into that of an ordinary god-tier creature!

Chapter 653: The Deified Stone!_1

[The Heavenly Path's Hint: You have gained the qualification for divine character condensation. This will be triggered when your Divine Power reaches 1,000 points.]

[The Heavenly Path's Hint: As you have undergone deification, the attribute improvement effects from all your equipment, titles, and skills have become ineffective. From now on, only Divine Power can improve your attribute values. You can consume Deified Stones to deify corresponding equipment, titles, and skills, thereby converting their effects into Divine Power enhancements to achieve attribute improvement.]

The Deified Stones are produced in *the Tower of Eternity*!

Ineffective, so be it. I've made a killing this time anyway.

After receiving buffs from two growth-stage chaos-grade pets, Chen Mo's total All Attributes had merely reached 500 million; it wasn't that each of his individual primary attributes was 500 million.

However, after deification, his attributes became 5 Divine Element points. Each Divine Element point was equivalent to 100 million in total All Attributes. This meant his new base total of 500 million All Attributes from these 5 Divine Element points coincidentally matched his previous total, which had included the pet buffs. But the true impact was that these 5 Divine Element points were considered to have an effectiveness comparable to 2.5 billion points in the old attribute system. Therefore, Chen Mo's deification felt as if he had gained an 'effective' 2 billion in total attributes out of thin air.

He had clearly benefited immensely.

However, the downside was that the Divine Power he had painstakingly accumulated was converted into hidden divine power, which was a minor setback for Chen Mo.

After all, unlike others who relied on accumulating vast amounts of Divine Power to reach 500 million total attributes, Chen Mo had primarily depended on various buffs. Although he possessed 230 points of Divine Power, he had only received the attribute enhancement effect equivalent to 23 points of Divine Power. Clearly, he hadn't utilized much of it.

But overall, it was still a massive gain. Compared to others who gathered substantial Divine Power only to have it converted into hidden divine power later, at least he had undergone deification early.

In the future, any Divine Power he collected could directly increase his divine element intensity.

Actually, acquiring Divine Power was still relatively easy; the basic divine elements were the hardest to improve.

Most people remained at 5 basic divine element points even after deification.

To increase basic divine elements, one could only level up. However, leveling up after Level 100 was far more difficult than before.

Chen Mo, however, was in a good position. He was only at Level 60, with 40 more levels of relatively easy progression ahead. By the time he reached Level 100, his basic divine elements would likely far exceed those of other experts.

Since all attribute enhancement effects were nullified, Chen Mo currently only possessed 500 million All Attributes from his Divine Elements.

But even so, this was extremely potent.

Chen Mo's current attributes were:

[Name]: Chen Mo

[Grade]: 325-Stars (20-star hidden combat + 5-star hidden life + 300-star pet)

[Constitution]: Divine Physique (Not Activated)

[Divine Power]: 0 Points (Hidden: 1,230 Points)

[Profession]: Dominator of the Undead (Third-Transition Hidden Profession), Infinite Fusion Master (Hidden Initial Profession)

[Level]: Level 60

[Experience]: 12,196,664,699/21,130,400 (Twelfth-tier bottleneck)

[Attribute]:

【 Divine Elements】 : 5 points

【 God Ability】 : 500 points

God Ability is the comprehensive attribute representing the life value and energy value of deified beings.

With his current attributes, Chen Mo was a considerably powerful existence among those at the fifth-transition.

After all, not every fifth-transition professional could easily meet the conditions for deification.

Achieving a total of 500 million attributes was no simple feat.

After reviewing his attributes, Chen Mo prepared to undertake the twelfth-tier Realm Breakthrough Assessment.

[The Heavenly Path's Hint: Deification completion detected. You can continue leveling up without undergoing the Realm Breakthrough Assessment. Skip Realm Breakthrough Assessment?]

Chen Mo immediately asked the Heavenly Path Elf, "If I skip it, what about my Realm Breakthrough Assessment rewards?"

"Skipping the Realm Breakthrough Assessment will grant rewards based on your success rate of clearing it. For instance, if your clearance success rate is 50%, your probability of obtaining rewards after skipping is also 50%," the Heavenly Path Elf explained.

"Is that based on a perfect clear?" Chen Mo asked.

"Yes."

"Then how am I supposed to know the clearance rate for an Above SSS-level assessment if I can't even see it right now?"

"As a deified being, you now have the authority to view the clearance rate for Above SSS-level assessments."

"Really?" Chen Mo was surprised. He immediately checked his clearance probability for the Above SSS-level Realm Breakthrough Assessment.

Even without checking, I bet it's 100%. This is just a Level 60 bottleneck, after all. As a deified life-form, it would be ridiculous if I couldn't pass this.

As expected, a hint from the Heavenly Path quickly appeared.

[The Heavenly Path's Hint: Detection complete. Your clearance rate is 100%. It is recommended that you skip the Realm Breakthrough Assessment.]

Perfect. Chen Mo thought, too lazy to waste time grinding. He immediately chose to skip the Above SSS-level Realm Breakthrough Assessment.

Instantly, hints from the Heavenly Path followed.

[The Heavenly Path's Hint: Congratulations on passing the Above SSS-level Assessment! You have obtained an origin-grade item: Super Divine Stone!]

[The Heavenly Path's Hint: As you skipped the twelfth-tier Above SSS-level Realm Breakthrough Assessment, you will not be issued an Above SSS-level Realm Breakthrough Assessment Clearing Scroll.]

[The Heavenly Path's Hint: Realm Breakthrough Assessments beyond Level 20 no longer offer Experience Point benefits. However, upon completing an assessment with a perfect score, you will receive a quantity of eternal gold coins equal to the challenge level of the assessment. You have obtained 60 eternal gold coins!]

"Congratulations to the Solar System for the first professional to perfectly complete the Level 60 Above SSS-level Realm Breakthrough Assessment! For this achievement, special rewards will be distributed to all professionals in the Solar System. Henceforth, any native Solar System professionals at Level 60 who do not wish to undergo the Realm Breakthrough Assessment may skip it directly without needing to perform a self-initiated breakthrough, and they will receive the title 'Breakthrough'!"

"Congratulations to the first professional in the Solar System to perfectly complete the Level 60 Above SSS-level Realm Breakthrough Assessment! An additional Above SSS-level reward will be specially issued to this professional!"

[The Heavenly Path's Hint: Congratulations on receiving an Above SSS-level Gift Pack!]

[The Heavenly Path's Hint: As you have broken through the twelfth-tier bottleneck, you have unlocked a Profession Exclusive Active Skill!]

[The Heavenly Path's Hint: As you undertook a hidden rebirth mission during your third-transition, the intensity of your newly acquired skill has been automatically upgraded by two tiers!]

[The Heavenly Path's Hint: As you have broken through the twelfth-tier bottleneck, you have unlocked a profession-exclusive passive skill!]

[The Heavenly Path's Hint: As you undertook a hidden rebirth mission during your third-transition, the intensity of your newly acquired skill has been automatically upgraded by two tiers!]

[The Heavenly Path's Hint: It has been detected that you have broken through the twelfth-tier bottleneck. You have gained an opportunity to undertake the Legendary Trial. As you possess the Divine Physique, your level cap will remain restricted if you do not complete the Legendary Trial. Do you wish to proceed to the Trial Tower to participate?]

This Legendary Trial is really something else! I can skip Realm Breakthrough Assessments after deification, but I can't even skip this Legendary Trial?

Chen Mo couldn't help but feel that this Legendary Trial, true to its name, showed no leniency even to deified life-forms.

However, Chen Mo wasn't overly concerned.

His Divine Power had just been converted and depleted, so he needed to replenish it. This Legendary Trial couldn't have come at a better time.

According to the description of Divine Power, every point can enhance initial attributes by 100%. Before deification, I wasn't a deified life-form, so my Divine Physique only had one-tenth of its effect. Now that I am a deified life-form, the Divine Power I gain should take full 100% effect. Wouldn't that mean acquiring just one point of Divine Power's enhancement would be equivalent to directly increasing my Divine Elements by 5 points?

Pondering this, Chen Mo couldn't help but look forward to the benefits of acquiring more Divine Power.

Chapter 654: Breakthrough Madness! (Four in One)_1

Participating in the Legendary Trial, Chen Mo saw no need to bring Zhui Yi with him. He left him on Earth and chose to enter the Legendary Trial space on his own.

Before entering the Trial Tower, Chen Mo first checked the two professional skills he had just unlocked when he broke through to the twelfth-tier.

[Undead Transfer·The Golden Active]: You can freely teleport or transfer yourself to the side of any Undead-Summoning Item. You can also teleport or transfer any Undead Unit to your side or to the side of any Undead-Summoning Item.

What a great position-switching technique.

According to this skill description, if Chen Mo had over a hundred million Undead-Summoning Items dispersed across a vast region, then all these locations would become teleportation points. He could teleport himself and his Undead Units to any location with an Undead-Summoning Item.

This skill was extremely flexible and of high strategic value.

However, for Chen Mo, who possessed Divine Flicker and the Teleportation Godstone, the effect was somewhat repetitive, but still quite practical.

[The Undead's Majesty-The Golden Passive]: For each Undead-Summoning Item you possess, enemy units within a 'Level × Star Level × 300 meters' radius around you have their physical and magical attack reduced by 1 point!

These two newly acquired skills were, in fact, highly practical.

If Chen Mo only had his Dominator of the Undead main skill, he would likely be very pleased with these two new skills.

However, Chen Mo had too many methods at his disposal, so the effects of these two skills were rather limited for him.

But overall, they weren't bad. At least these two skills were part of his own inherent power. The Teleportation Godstone relied on an item, and the area-of-effect attack reduction relied on his pet, Little Slime. After all, none of those were fundamentally his own strength. It was always a good thing to possess more fundamental power himself.

Chen Mo didn't have many complaints about these two gains.

After checking the benefits from these two skills, Chen Mo turned his attention to the Super Divine Stone he had recently obtained.

Many of his abilities had still not reached the Above SSS-level standard. Chen Mo quickly scanned his numerous abilities, considering which one to improve.

That said, even though the side effects of Moluo's Brain were removed by the Divine Physique, making it comparable to Above SSS-level, its original designation was SSS-level. What will happen if I use the Super Divine Stone on Moluo's Brain?

Chen Mo was curious about this. Even Moluo's Brain itself couldn't deduce what the result would be if the Super Divine Stone was used on it.

Anyway, opportunities to obtain the Super Divine Stone are plentiful now, so I don't mind if the experiment fails.

He immediately activated the Super Divine Stone on Moluo's Brain.

The next instant, he felt as if his brain had suddenly ignited, becoming incredibly hot!

This sensation lasted for several seconds before finally subsiding. As it ended, Chen Mo promptly received a notification from The Heavenly Path's Hint.

[The Heavenly Path's Hint: Transformation successful! Your 'Moluo's Brain' has evolved into 'True-Moluo's Brain'!]

True-Moluo's Brain? It just added one word?

Chen Mo immediately checked the effects of True-Moluo's Brain.

[True-Moluo's Brain]: This is the brain of Moluo, the God of Adventure. Moluo's Brain will grant you a detailed understanding of various dungeons, allowing you to easily analyze their related quests and completion methods. You will be able to obtain perfect strategies, key quest information, and quest objective locations.

At the same time, Moluo's Brain will enhance your observational and cognitive abilities, making you keener and more intelligent. You will find it easier to discover hidden clues and solve complex puzzles, providing comprehensive support for your adventures.

True Moluo's Brain can also perform rapid battle simulations, allowing you to devise the optimal combat plan to achieve victory.

True Moluo's Brain has no side effects.

Looking at the changes after Moluo's Brain evolved into True Moluo's Brain, Chen Mo felt like he had gotten a raw deal.

He had originally used Moluo's Brain without any side effects, which meant True Moluo's Brain only offered one additional effect over Moluo's Brain: combat simulation.

This was an indirect enhancement to his combat capabilities, but Chen Mo currently steamrolled most encounters. Therefore, this function was largely useless for him at the moment.

If I had known, I would have upgraded something else first. I actually thought it might transform into an omniscient and omnipotent brain!

Chen Mo's idea was quite audacious, but unfortunately, even an Above SSS-level ability was far from reaching such a standard.

Using True Moluo's Brain, Chen Mo immediately sought to resolve a question: did Realm Breakthrough Assessment difficulties exist beyond Above SSS-level, perhaps reaching a Chaos-grade?

The analysis confirmed that they did exist. However, there was nothing to be pleased about, because Chaos-grade Realm Breakthrough Assessments could not be swept. Therefore, it was impossible to obtain Chaos-grade Realm Breakthrough Assessment Clearing Scrolls by synthesizing Above SSS-level Realm Breakthrough Assessment Clearing Scrolls.

Only when someone from his own Star System entered the Chaos Origin Land and completed specific corresponding events would this tier of Realm Breakthrough Assessment become accessible.

Clearly, the people of Earth were still far from reaching that standard.

Setting aside the matter of synthesizing Chaos-grade Clearing Scrolls, Chen Mo directly initiated the Legendary Trial.

This time, after he entered, he wasn't met with any trial stage prompt. Instead, a man, bathed in divine light and exuding immense Divine Power from his entire being, appeared before him.

"Interesting, very interesting. You've completed deification at only the third transition," this person remarked, his voice magnetic and tinged with amusement, upon seeing Chen Mo arrive.

Chapter 655: Crazy Breakthrough! (Four in One) _2

"And you are?"

Through the Eye of Origin, Chen Mo was able to penetrate the divine light surrounding the other person and see his appearance.

The man had a distinctive appearance, completely different from Earthlings.

His skin shimmered with a silver-white metallic luster, smooth and pure, as if forged from some unknown alloy.

His eyes possessed an alien characteristic: they were vertical slits, with deep pupils that shone brightly, like two twinkling gemstones.

His facial contours were extraordinarily exquisite, a blend of soft and sharp lines, resembling a finely crafted work of art.

A slight protrusion on his forehead was etched with mysterious tattoos, emanating subtle waves of Divine Power.

His ears, pointed and slender, stretched slightly backward, underscoring his unique identity.

"I am the guide. I will take you directly to the fiftieth floor."

"Directly to the fiftieth floor? What about the Divine Power?"

"Of course, it is directly given. Given your current level, these low-end trials are essentially nonexistent. There's no reason to waste anyone's time."

"That makes sense." Chen Mo smiled. "That's indeed easier for everyone."

"Let's go then."

With a flash of divine light from his person, the guide instantly ascended with Chen Mo, taking him to the fiftieth floor.

Only then did the guide extend a finger and touch Chen Mo's glabella.

Instantly, Chen Mo felt waves of surging Divine Power pour into his body.

In the past, when he gained Divine Power, he only felt it attached to him. But now, as he received it, Chen Mo could distinctly feel the surging power flow into his body, becoming a part of him that he could command as easily as his own limbs.

This sensation was quite wondrous.

[The Heavenly Path's Hint: You have completed the trial on the fiftieth floor of the Divine Training Tower and gained 55 Divine Power points from the guiding angel!]

Chen Mo, who had just depleted his Divine Power, instantaneously received 55 Divine Power points once more.

The Divine Power he possessed now was different from before.

Every point of Divine Power Chen Mo now obtained could double his divine element.

With the enhancement of 55 Divine Power points, Chen Mo's divine element reached 275.

Currently, among those in the fifth-transition, about one percent had undergone deification.

Among this one percent, only about one-tenth possessed more than 155 Divine Power points.

At Chen Mo's current strength, he could essentially crush anyone he encountered, as long as they were not among the strongest one-tenth of that one percent.

And this was Chen Mo's strength merely at the third-transition stage.

[The Heavenly Path's Hint: You have completed the Legendary Trial, and your level cap has been lifted!]

[The Heavenly Path's Hint: Congratulations, your level has increased, current Level 61! As your level has increased, your divine element has also increased. According to your profession's star level, you have gained 3.25 divine element.]

With my 325 profession star levels, I only gained 3.25 divine element upon leveling up. It seems that one gains 1 point of divine element per hundred profession star levels. This divine element, worth 100 million All Attributes points, is indeed hard to obtain.

[The Heavenly Path's Hint: Congratulations, your level has increased, current Level 65! As your level has gone up, your divine element has also increased. According to your profession's star level, you have gained 3.25 divine element.]

[Experience]: 12,075,132,699/29,326,400

[The Heavenly Path's Hint: You have reached Level 65 and encountered the thirteenth-tier bottleneck. You can choose to attempt the Realm Breakthrough Assessment!]

Having already skipped one Realm Breakthrough Assessment, Chen Mo unhesitatingly chose to skip again this time.

The biggest advantage of skipping over a direct challenge was the conservation of experience points.

When Chen Mo had skipped the Level 60 Realm Breakthrough Assessment, his experience points hadn't even been deducted; he was directly given the rewards.

This had saved Chen Mo a significant amount of experience points.

Before skipping, as always, he first checked his success rate.

[The Heavenly Path's Hint: Detection complete. Your success rate is 100%. It is recommended that you directly skip the Realm Breakthrough Assessment.]

Still at a 100% success rate, Chen Mo directly chose to skip the Above SSS-level Realm Breakthrough Assessment.

The Heavenly Path's Hint immediately followed.

[The Heavenly Path's Hint: Congratulations on successfully passing the Above SSS-level Assessment. You have obtained an origin-grade item: Super Divine Stone!]

Seeing it was another Super Divine Stone, Chen Mo couldn't help but comment internally, The appearance rate of this item is really high!

This time, he decided to use the Super Divine Stone on Divine Flicker.

[The Heavenly Path's Hint: You are using the Super Divine Stone on the Divine Flicker skill. After it takes effect, Divine Flicker will transform into a corresponding Dazzling Grade skill. Confirm?]

[The Heavenly Path's Hint: Successful transformation! Your Divine Flicker has evolved into Transcendent Divine Flicker!]

[Transcendent Divine Flicker - Dazzling]

[Profession]: All Occupations

[Level Requirement]: None

[Active Effect]: You can take any target with you and flicker to any location within the current map. (This flicker effect is not affected by any spatial restrictions of divine-grade or lower.) This skill has no cooldown!

It can forcibly ignore any rules and allow flickering even when Teleportation is restricted, but the skill will then enter a 1-day cooldown.

[Passive Effect]: The spatial abilities of all hostile units within a radius of (Personal Level × 100) meters around you are nullified! (This effect only applies to skills of divine-grade or lower.)

[Skill Description]: A Divine Skill that only beings who transcend Gods can master. By mastering it, you can travel freely anywhere, ignoring all obstacles!

Chapter 656: Breakthrough Madness! (Four in One)_3

"This is heaven-defying! I can forcibly ignore rules and flicker! Although there's a one-day Cooldown, with my Cooldown reduction, this Cooldown time isn't actually that long."

Looking at the new effect of Super Divine Flicker, Chen Mo exclaimed at its power.

Any ability that can ignore rule restrictions is inherently powerful.

[The Heavenly Path's Hint: Because you skipped the 13th-tier Above SSS-level Realm Breakthrough Assessment this time, no Above SSS-level Realm Breakthrough Assessment Clearing Scroll will be issued to you.]

[The Heavenly Path's Hint: After Level 20, you can no longer enjoy experience point discounts for Realm Breakthrough Assessments. However, for completing an assessment with a perfect score, you can obtain a reward of eternal gold coins equal in number to the challenge Level of this Realm Breakthrough Assessment. You have earned 65 eternal gold coins!]

"Congratulations to the Solar System! Its first Professional has perfectly completed the Level 65 Above SSS-level Realm Breakthrough Assessment. For this, a special reward will be distributed to all Professionals in the Solar System. From now on, all native Professionals of the Solar System at Level 65, if they do not wish to undertake the Realm Breakthrough Assessment, may directly skip it without needing to undergo an autonomous breakthrough. Furthermore, they will receive the "Breakthrough" title reward!"

"Congratulations to the Solar System for its first Professional perfectly completing the Level 65 Above SSS-level Realm Breakthrough Assessment! A special Above SSS-level reward will be granted to this Professional!"

[The Heavenly Path's Hint: Congratulations, you have received an Above SSS-level Gift Pack!]

Two Above SSS-level Gift Packs now. If I get one more, I can try to synthesize them, Chen Mo thought with some anticipation.

[The Heavenly Path's Hint: Congratulations, your Level has increased, current Level 66! Because your Level has increased, your divine element has also increased. According to your professional star level, you have gained 3.25 divine element points.]

...

[The Heavenly Path's Hint: Congratulations, your Level has increased, current Level 70! Because your Level has increased, your divine element has also increased. According to your professional star level, you have gained 3.25 divine element points.]

Experience: 11,910,000,699/38,852,400

[The Heavenly Path's Hint: Your Level has reached 70, reaching the 14th-tier bottleneck. You can choose to take the Realm Breakthrough Trial!]

After further testing confirmed a 100% success rate, Chen Mo once again skipped the 14th-tier bottleneck.

As the sound of the great path resonated three consecutive times, people all over the world were stunned.

They didn't know what was happening. Why was this powerhouse's breakthrough speed like a rocket? There was simply no time to clear dungeons; could it be that he had used Clearing Scrolls for everything?

[The Heavenly Path's Hint: Congratulations on passing the Above SSS-level assessment, you have obtained the origin-grade tool 'Space Curtain'!]

Space Curtain - Origin-grade

Passive Effect: When carried, a Spatial Isolation Zone forms around the owner. Any attack must first destroy the Spatial Isolation Zone before it can affect you. (Effective even when in the inventory.)

Active Effect: Upon activation, create a Spatial Isolation Zone within any designated area in a radius of 'Level × 100 meters' around yourself. All spatial abilities of hostile units within the zone will be nullified. (Can be activated even when in the inventory.)

Item Introduction: The curtain from before the God of Space's bed. Imbued with the God of Space's Divine Power over countless years, it has gained incredible Spatial Force.

Spatial isolation, this is a good thing. If I'm dealing with someone who has a powerful spatial Teleport ability, it might be hard to keep them contained. With this, however, that problem can be avoided.

Chen Mo was quite satisfied with this newly acquired Origin-grade treasure.

[The Heavenly Path's Hint: Because you skipped the 14th-tier Above SSS-level Realm Breakthrough Assessment this time, an Above SSS-level Realm Breakthrough Assessment Clearing Scroll will not be issued to you.]

[The Heavenly Path's Hint: After Level 20, you can no longer enjoy experience point discounts for Realm Breakthrough Assessments. However, for completing an assessment with a perfect score, you can obtain a reward of eternal gold coins equal in number to the challenge Level of this Realm Breakthrough Assessment. You have earned 70 eternal gold coins!]

"Congratulations to the Solar System! Its first Professional has perfectly completed the Level 70 Above SSS-level Realm Breakthrough Assessment. For this, a special reward will be distributed to all Professionals in the Solar System. From now on, all native Professionals of the Solar System at Level 70, if they do not wish to undertake the Realm Breakthrough Assessment, may directly skip it without needing to undergo an autonomous breakthrough. Furthermore, they will receive the "Breakthrough" title reward!"

"Congratulations to the Solar System for its first Professional perfectly completing the Level 70 Above SSS-level Realm Breakthrough Assessment! An additional Above SSS-level reward will be granted to this Professional!"

[The Heavenly Path's Hint: Congratulations, you have received an Above SSS-level Gift Pack!]

With three Above SSS-level Gift Packs, Chen Mo immediately attempted to synthesize them.

When the synthesis interface appeared, it indeed showed that synthesizing three Above SSS-level Gift Packs required one bottle of Chaos Fusion Agent.

Chen Mo immediately purchased a Chaos Fusion Agent and proceeded with the synthesis.

The Heavenly Path's Hint soon sounded again.

[The Heavenly Path's Hint: Warning! This synthesis uses materials with two potential outcomes. Your synthesis has a 99% chance to result in a 'Selectable Above SSS-level Gift Pack' and a 1% chance to result in a 'Chaos-grade Gift Pack'. Please choose whether to proceed with the synthesis.]

This issue had occurred when synthesizing SSS-level Gift Packs, so I naturally anticipated it for Above SSS-level Gift Packs as well. I just hadn't expected the probabilities to be so disparate.

HISS! The chance of obtaining a Chaos-grade Gift Pack from synthesizing Above SSS-level Gift Packs is only 1%? Those odds are incredibly low!

However, I recall what the God I met earlier said about the difference between chaos-grade and divine-grade. Thinking of this, I understand the reason for these odds.

Chapter 657: Breakthrough Madness! (Four in One)_4

The primary reason was that the previous 100% success rate of pet egg synthesis had given Chen Mo the false impression that there wasn't much of a difference.

When he considered the 1-in-99 chance, the odds seemed far too low. It felt like a devastating loss, and he couldn't bring himself to continue synthesizing. He decided to hold onto the materials for now and reconsider later.

He immediately began the next Legendary Trial.

[The Heavenly Path's Hint: It has been detected that you have broken through the 14th-tier bottleneck. You have gained an opportunity to undertake the Legendary Trial. As you possess the Divine Physique, if you do not complete this Legendary Trial, you will be unable to fully break through your current level cap. Would you like to go to the Trial Tower to participate in the trial?]

For the current Chen Mo, the Legendary Trial didn't pose much difficulty.

With his present strength, the ten layers of the combat trial were far from a challenge.

The ten layers of the intelligence trial were even easier. With Moluo's Brain coupled with the Mind Reading Technique—a dual advantage—he was essentially unbeatable, regardless of whether the trial involved answering questions or a direct battle of wits.

As Chen Mo started the Legendary Trial, sure enough, it was once again the ten-layer intelligence trial.

Appearing before Chen Mo was Cha Latu again, who held the divine positions of both strength and wisdom.

Upon seeing this familiar figure, Chen Mo smiled and asked, "Will we skip directly this time as well?"

Cha Latu chuckled and shook his head. "This time, the ten-layer test is a contest of wits, different from the previous intelligence quizzes. Even with Moluo's Brain, victory isn't guaranteed."

Hearing this, Chen Mo was a bit surprised. They knew he had Moluo's Brain, but they didn't know he also possessed the Mind Reading Technique.

"It seems even Gods can't learn about the special rewards from event dungeons," Chen Mo said with a laugh. "Alright, I'd also like to test the intellect of the God of Wisdom."

"There's no surefire way to win this time. Don't blame me for not going easy on you."

"What would happen if I lose?"

"Don't worry. As long as you win more than three out of the ten games, you'll still advance to the tenth layer, but the Divine Power reward will be somewhat reduced."

"Okay."

Chen Mo finished speaking with a smile, ready for the battle of wits to begin.

Cha Latu then began to explain the rules for the first game.

The games of wit were designed to rely more on psychological strategy to circumvent Chen Mo's Moluo's Brain. This suited Chen Mo perfectly.

The first game was the traditional Rock, Paper, Scissors—the simplest, yet often the hardest game to win consistently.

Of course, that applied to normal circumstances.

But now, with the Mind Reading Technique as his trump card, Chen Mo was virtually assured of victory.

The first game, a best two-out-of-three, ended quickly. Chen Mo won easily and advanced to the second layer.

Initially, Cha Latu didn't notice anything amiss. After all, what could one discern from a best-of-three series?

The second game was a best three-out-of-five. Chen Mo once again won three consecutive rounds to take the match.

This time, Cha Latu finally sensed that something was unusual.

However, for the third game, the rules changed. Each player received ten cards, numbered 1 to 10. They would play one card simultaneously each turn. After ten turns, the player who had won more rounds would be the overall winner.

This time, Chen Mo lost four rounds but won six, securing a narrow victory.

This outcome made Cha Latu dismiss his earlier suspicions.

However, in the subsequent games, Chen Mo managed to win every single one, albeit narrowly.

Cha Latu was no fool; he increasingly felt that something was wrong. He just wasn't sure how Chen Mo had done it.

Finally, they arrived at the tenth game.

This time, the contest was simple: mind reading. Both players would write down a natural number, no larger than ten digits. Each round, a player could ask their opponent one question regarding the number they had written, and the opponent had to answer truthfully. However, the question could not directly inquire about the number itself. They would take turns asking questions, and the first to correctly guess the other's number would win.

Since Chen Mo was the one undergoing the trial, Cha Latu allowed him to ask the first question and make the first guess.

As soon as the numbers were written, Chen Mo instantly knew Cha Latu's number.

However, the standard questioning procedure still had to be observed. Typically, in this kind of game, the first question was used to determine the range of the number's digits.

So Chen Mo asked accordingly.

Cha Latu glanced at his number and replied, "It's exactly five digits long."

"I guess the number you wrote is 10,000."

The moment Cha Latu finished speaking, Chen Mo stated his guess. The number he announced was identical to the one Cha Latu had written.

Cha Latu stared at Chen Mo, stunned. "Was that a blind guess?"

"Do you want to hear the truth or a fabrication?" Chen Mo asked with a smile.

"The truth, naturally," Cha Latu replied, his expression serious as he looked at Chen Mo.

"I'm afraid that if I tell you, you'll deliberately design future trials to avoid my strengths." Chen Mo continued with a faint smile.

Hearing this, Cha Latu also began to laugh.

"Interesting. Suddenly, I don't want to know anymore. Let's leave this secret for later, and allow me to unravel it myself slowly."

As the God of Wisdom, he had his pride. Even though he couldn't fathom exactly how Chen Mo had guessed his number with such precision, he had a vague inkling. However, his potent Divine Power hadn't detected any such ability on Chen Mo, which left him deeply puzzled and suspicious.

Chapter 658: Breakthrough Madness! (Four in One)_5

With Chen Mo achieving ten victories in intellectual duels, Cha Latu directly took Chen Mo to the 60th floor, reached out, touched his brow, and infused him with 55 points of Divine Power.

"I look forward to dueling you again on the 71st floor." Having said that, Cha Latu sent Chen Mo out of the Divine Training Tower.

As soon as he emerged, The Heavenly Path's Hint immediately sounded in Chen Mo's ear.

[The Heavenly Path's Hint: You have completed the Legendary Trial; your level cap has been lifted!]

[The Heavenly Path's Hint: Congratulations, your Level has increased! Current Level: 71! Because your Level has increased, your divine element has also increased. Based on your profession's star level, you have gained 3.25 divine element points.]

...

[The Heavenly Path's Hint: Congratulations, your Level has increased! Current Level: 75! Because your Level has increased, your divine element has also increased. Based on your profession's star level, you have gained 3.25 divine element points.]

[Experience]: 11,694,418,699 / 49,808,400

[The Heavenly Path's Hint: Your Level has reached 75 and you have hit the 15th-tier bottleneck. You can choose to take the Realm Breakthrough Assessment!]

[The Heavenly Path's Hint: Congratulations on passing the Above SSS-level assessment! You have received an origin-grade item, the 『Super Divine Stone』 !]

Another Super Divine Stone?

After a cursory glance at most of his current god-grade abilities, Chen Mo used this Super Divine Stone on his 『Immune Divine Pendant』 .

[The Heavenly Path's Hint: You are applying the Super Divine Stone to the 『Immune Divine Pendant』 equipment. Once effective, the 『Immune Divine Pendant』 will be converted into a divine-grade equipment of the same type. Are you sure?]

[The Heavenly Path's Hint: Transformation successful! Your 『Immune Divine Pendant』 has evolved into the 『Super Transformation Immune Pendant』 !]

[Super Transformation Immune Pendant • Divine-grade]

[Profession Restriction]: None

[Equipment Requirement]: None

[Equipment Attribute]: Immune to all Sealing Effects and negative aura influences, and reflects these effects back onto their source.

[Equipment Special Effects]: Immunity Divine Ring

[[Immunity Divine Ring]] : Grants all friendly units within a radius of (Level * 1,000) meters around you the same immunity effect. No cooldown.

[Equipment Introduction]: A supremely powerful necklace offering persistent immunity. Once the most cherished adornment of the Combat Goddess, wear it, and perhaps you too can be invincible!

"The effects after Transcending are truly impressive! Not only does it grant immunity to seals and negative auras, but it also reflects these effects back onto the opponent. This has elevated its power to a whole new level! Moreover, the Equipment Special Effect has become an AoE buff with no cooldown!"

Chen Mo felt that this Super Divine Stone was well worth it; the benefits were quite substantial.

[The Heavenly Path's Hint: As you are opting to skip the 15th-tier, Above SSS-level Realm Breakthrough Assessment this time, you will not be issued the Above SSS-level Realm Breakthrough Assessment Clearing Scroll.]

[The Heavenly Path's Hint: After Level 20, you will no longer enjoy experience point discounts for Realm Breakthrough Assessments. However, upon completing an assessment with a perfect score, you will receive a reward of eternal gold coins equal to the challenge Level of this Realm Breakthrough Assessment. You have received 75 eternal gold coins!]

[System Announcement: Congratulations to the Solar System for the first perfect completion of a Level 75, Above SSS-level Realm Breakthrough Assessment by a professional! As a result, a special reward will be granted to all professionals in the Solar System. From now on, all native professionals in the Solar System who do not wish to undergo the Realm Breakthrough Assessment at Level 75 may choose to skip it directly, without needing an independent breakthrough, and will receive the 『Breakthrough』 title reward!]

[System Announcement: Congratulations to the Solar System for the first perfect completion of a Level 75, Above SSS-level Realm Breakthrough Assessment by a professional! An additional Above SSS-level reward will be specifically granted to this professional!]

For the Level 75 bottleneck, Chen Mo once again chose to skip it directly.

[The Heavenly Path's Hint: Congratulations on receiving an Above SSS-level Gift Pack!]

[The Heavenly Path's Hint: Congratulations, your Level has increased! Current Level: 76! Because your Level has increased, your divine element has also increased. Based on your profession's star level, you have gained 3.25 divine element points.]

...

[The Heavenly Path's Hint: Congratulations, your Level has increased! Current Level: 80! Because your Level has increased, your divine element has also increased. Based on your profession's star level, you have gained 3.25 divine element points.]

[Experience]: 11,421,036,699 / 62,950,500

[The Heavenly Path's Hint: Your Level has reached 80 and you have hit the 16th-tier bottleneck. You can choose to take the Realm Breakthrough Assessment!]

[The Heavenly Path's Hint: It has been detected that you have not yet undergone the profession's fourth-transition. Please proceed with the profession's fourth-transition before taking the Realm Breakthrough Assessment!]

[The Heavenly Path's Hint: As your current combat profession is 20th-star, you can choose a challenge difficulty for your profession's fourth-transition ranging from 21st-star to 25th-star!]

[The Heavenly Path's Hint: Please note, the higher the difficulty, the more dangerous the profession's fourth-transition task. High-difficulty fourth-transition tasks have an extremely high mortality rate. Please proceed according to your capabilities.]

[The Heavenly Path's Hint: Selecting a profession's fourth-transition task requires expending varying amounts of experience points. Based on your initial profession's star level, you can spend 10 to 50 times

the experience points required for Level 80 to initiate a profession's fourth-transition task at the corresponding difficulty! The profession's fourth-transition task can be challenged repeatedly, but if the task is failed, the deducted experience points will not be refunded. Please be cautious.]

With Chen Mo's continuous and frenzied breakthroughs, the booming sound of the great path reverberated endlessly, leaving people across the globe stunned and numb.

Even the three Alliance Hierarchs at the Academy Alliance Headquarters were momentarily baffled, wondering how Chen Mo had suddenly started advancing so rapidly.

The experience points required for this, even by a rough calculation, were an astronomical sum.

After all, the requirements for Above SSS-level difficulty were now publicly known, and everyone was clear on how many experience points each Level demanded.

Chen Mo had just sequentially passed the Realm Breakthrough Assessments for Level 60, 65, 70, and 75.

He needed a total of 9,629,338,000 experience points. After all, the cost for each Realm Breakthrough Assessment was the current Level multiplied by the experience points required for an upgrade at that Level, making the total experience point requirement immense.

Even disregarding the remainder, that was a solid 9.6 billion experience points.

Chapter 659: Extreme Fortune Wheel!_1

This required a colossal amount of experience points. All of Chen Mo's actions were practically within their grasp, so no matter how they calculated the results of Chen Mo's previous dungeon activities, it was not possible for him to accumulate so many experience points.

Even if he could get the most experience points from the fifth-transition Level 100 dungeon, it would be a considerable feat to obtain around one billion experience points from within the dungeon in one go.

How could he possibly accumulate nearly ten billion experience points?

This was the strange part that baffled the three Alliance Hierarchs.

How could they possibly imagine that an ordinary third-transition professional had actually evolved into a deified being? Not only were these breakthrough challenges exempt from requiring experience points, but he could even directly skip them to receive full rewards.

How infuriating this must be.

While the people on Earth were bewildered and discussing Chen Mo's crazy breakthrough, he had already started preparing for his fourth-transition.

The experience points he needed for the fourth-transition were about 3.1 billion.

Chen Mo still had around ten billion experience points left, which he could use quite liberally.

After deducting the experience points, he began his fourth-transition mission.

However, for the deified Chen Mo, the fourth-transition mission posed no difficulty.

Six hours later, Chen Mo returned to his dormitory.

At this time, The Heavenly Path's Hint started echoing in his ears.

[The Heavenly Path's Hint: Congratulations, you have accepted the inheritance of the former Dominator of the Undead; your current profession is now the "fourth-transition Dominator of the Undead · 25th-star"!]

[The Heavenly Path's Hint: Due to the success of your profession's rebirth, you have been granted an opportunity to redistribute your points. Would you like to redistribute?]

[The Heavenly Path's Hint: Because your profession has successfully reached the fourth-transition, you have unlocked "Pet Abilities". Related upgrade items have been unlocked for drop and acquisition, and you can obtain them in subsequent rewards to continuously strengthen your pet's abilities.]

[The Heavenly Path's Hint: Because your life rank has been raised to a deified being, your profession's star level will directly affect your gain of divine element. Currently, your upgrade divine element gain is 3.3 points per level.]

[The Heavenly Path's Hint: Due to your profession's upgrade to a fourth-transition, your profession has received a certain enhancement!]

(PS: All changes of profession attributes will be released all at once after the fifth-transition, so I'll hold back on sharing them for now.)

Chen Mo glanced at his enhanced profession attributes and immediately started the Realm Breakthrough Assessment.

[The Heavenly Path's Hint: Congratulations on passing the Above SSS-level Assessment. You have obtained the origin-grade item "Extreme Fortune Wheel"!]

[Extreme Fortune Wheel · origin-grade]

[Passive Effect of the Item]: When carried, any time you encounter a combat-related chance (for example, passive dodging rate, passive hitting rate, critical hit rate, etc.), the original chance will be randomly increased or decreased in a direction that is beneficial to you when calculating the probability. The random multiplier/divisor ranges between 2 to 10 times. (Effect activated while in the inventory)

For example, if your passive dodge rate is 30%, and upon being attacked the Extreme Fortune Wheel applies a random multiplier of 2x, your effective passive dodge rate becomes 60%. If the random multiplier is 10x, your effective passive dodge rate becomes 300%.

Conversely, if you are subjected to a detrimental effect, such as Chen Mo's own Ring of Death's Death Arrival effect which has a 1% chance of causing instant death, and the possessor of the Extreme Fortune

Wheel is attacked by this ability: if the Wheel applies a random divisor of 2x, the chance of death is halved to 0.5%. If the random divisor is 10x, the chance is reduced to one-tenth, becoming 0.1%.

It was considered a rather potent item for influencing probabilities.

That was only the passive effect of this item. Chen Mo immediately turned his attention to the active effect of this item.

[Active Effect of the Item]: When you encounter a normal probability event, you can actively use the Extreme Fortune Wheel to change the probability of the event. For each 1% chance affected, the Cooldown time of the item will increase by 1 hour. After each change takes effect once, it will revert to the original probability. The passive effect will also be temporarily inactive during the Cooldown. (Effect activated while in the inventory)

[Item Introduction]: It is said to be an item that was made by integrating the blood of the Goddess of Luck, filled with the power of luck!

This Extreme Fortune Wheel's passive effect was powerful, and the active effect was also quite good.

For example, if an opponent has a 1,000% passive hit rate, and your passive dodge rate is only 50%, even if the passive effect applies a 10x multiplier to your dodge (making it 500%), the opponent's hit rate might still effectively be 100% against you. To completely dodge the opponent's attack, you would need to further reduce their hit rate by 50 percentage points or increase your dodge rate by 50 percentage points. After activating the Extreme Fortune Wheel's active effect to achieve this, the Wheel would enter a Cooldown time as long as 50 hours.

Of course, this was an application in battle. When Chen Mo saw this effect, the matter of the Chaos Gift Pack immediately flashed through his mind.

Just now, when he was attempting to synthesize the Chaos Gift Pack, he saw that the chance of creating it was pitifully low at only 1%, with a 99% probability of getting a designated Above SSS-level Gift Pack instead.

Under normal circumstances, this is obviously impossible to synthesize.

This is a three-in-one attempt, almost equivalent to spending three hundred to get one, which is indeed rather ruthless.

But now it's different. I have a chance to change the probability with this Extreme Fortune Wheel.

Although the passive effect only applied to combat-related probabilities, the active effect had no such limitation; it could clearly affect any probability.

This was definitely worth trying.

[The Heavenly Path's Hint: As you bypassed the 16th tier Above SSS-level Realm Breakthrough Assessment this time, an Above SSS-level Realm Breakthrough Assessment Clearing Scroll will not be issued to you.]

[The Heavenly Path's Hint: After Level 20, you can no longer enjoy the experience point discount for Realm Breakthrough Assessments. However, when you complete the assessment with a perfect score, you can receive an eternal gold coin award equivalent to the Level of the Realm Breakthrough Assessment challenge. You have received 80 eternal gold coins!]

"Congratulations to the Solar System for producing its first professional who has perfectly completed the Above SSS-level Realm Breakthrough Assessment at Level 80. For this, a special reward will be given to all professionals in the Solar System. All native professionals in the Solar System can directly skip the Realm Breakthrough Assessment at Level 80 if they do not wish to take part, and they do not need to independently break through. They can also obtain the "Breakthrough Person" title reward!"

"Congratulations to the Solar System for the first professional who has perfectly completed the Above SSS-level Realm Breakthrough Assessment at Level 80. A special additional Above SSS-level reward will be given to this professional!"

[The Heavenly Path's Hint: Congratulations! You have received an Above SSS-level Gift Pack!]

[The Heavenly Path's Hint: Because you have broken through the 16th-tier bottleneck, you have unlocked a Profession Exclusive Active Skill!]

[The Heavenly Path's Hint: Because you undertook a hidden rebirth mission during your fourth-transition, the strength of your new Skill has automatically been promoted by two tiers!]

[The Heavenly Path's Hint: Because you have broken through the 16th-tier bottleneck, you have unlocked a profession-exclusive passive skill!]

[The Heavenly Path's Hint: Because you undertook a hidden rebirth mission during your fourth-transition, the strength of your new Skill has automatically been promoted by two tiers!]

[The Heavenly Path's Hint: It is detected that you have broken through the 16th-tier bottleneck. You have obtained the chance to take part in the Legendary Trial. Because you have a Divine Physique, your Level limit will still be unable to thoroughly break through if you don't undertake the trial. Would you like to go to the Trial Tower and take the trial?]

After reading the hints from the Heavenly Path, Chen Mo ignored the matters regarding the Legendary Trial and immediately began to try using the Extreme Fortune Wheel. He wanted to see whether this item could affect the synthesis of the Chaos Gift Pack.

As he initiated the Extreme Fortune Wheel with a thought, The Heavenly Path's Hint also immediately followed.

[The Heavenly Path's Hint: You are currently using the Extreme Fortune Wheel to influence the current probability event. There are two probabilities in the current event: one is synthesizing a specified Above SSS-level Gift Pack with a probability of 99%, and the other is synthesizing a chaos-grade Gift Pack with a probability of 1%. Which probability would you like to change?]

Can I even choose? What would happen if I change the probability of the Above SSS-level Gift Pack to 0?

Chen Mo's Moluo's Brain immediately began analyzing.

The result of the analysis left him rather speechless.

If I were to make such changes, the chance of synthesizing a Chaos Gift Pack would be 1%, and there would be a 99% chance I wouldn't get anything.

This was definitely not the way to do it. Chen Mo then tried analyzing what would happen if he increased the Chaos Gift Pack synthesis probability by 100 percentage points.

The result was a near fifty-fifty chance: the synthesized item could either be an Above SSS-level Gift Pack or a Chaos Gift Pack.

In other words, the total probability has increased to 199%. Therefore, increasing it by 100 percentage points doesn't mean a sure hit for the Chaos Gift Pack.

To ensure the synthesis of the Chaos Gift Pack without fail, I'll need to manipulate both probabilities: take the Above SSS-level Gift Pack down to 0% and raise the Chaos Gift Pack to 100%. This is the only surefire way.

That would mean changing the probabilities by a total of 198 percentage points, resulting in a Cooldown of 198 hours.

Taking into account Chen Mo's ability to reduce Cooldown, it would still take roughly an hour.

The Cooldown time is quite lengthy.

However, compared to the speed at which Chen Mo acquired rewards, this Cooldown time was more than acceptable.

If it weren't for the limitation that the Extreme Fortune Wheel could only change probabilities when he himself encountered a probability event, Chen Mo had even thought of a great way to exploit a bug.

He had a divinity ability called Nature God's Blessing, which could instantly reset the Cooldown time of any ability, but this ability's trigger rate was only 50%.

If I used the Extreme Fortune Wheel to modify it, I could directly change it to a 100% success rate.

However, this wasn't feasible for his own Nature God's Blessing. Once he modified its trigger rate to 100%, Nature God's Blessing would activate and instantly clear the Extreme Fortune Wheel's Cooldown. This would also nullify the modification itself, reverting Nature God's Blessing to its 50% rate. So, when he used the Extreme Fortune Wheel on a different event later, Nature God's Blessing would still only have its original 50% chance to clear the Wheel's Cooldown.

But if the Extreme Fortune Wheel could be used on others, then it would be a different story. Chen Mo could let Zhui Yi use an Extreme Fortune Wheel to affect his Nature God's Blessing, then he could use his own Extreme Fortune Wheel to affect the synthesis probability.

This way, regardless of how much he changed the probability, under the effect of a 100% successful Nature God's Blessing (on Zhui Yi's part affecting his), his Extreme Fortune Wheel would effectively have no Cooldown.

Unfortunately, there was no such loophole to be exploited.

In fact, it didn't matter whether such a loophole was found or not. The power to change probabilities was already a huge boon.

Chen Mo immediately chose to change probabilities, reducing the probability of synthesizing the specified Above SSS-level Gift Pack to 0%, and increasing the probability of synthesizing a Chaos Gift Pack to 100%.

[The Heavenly Path's Hint: The modification of the probability is complete. Your Extreme Fortune Wheel has entered a Cooldown of 198 hours!]

[The Heavenly Path's Hint: Your Transcendent Calm Skill has taken effect and the Cooldown time of this item has been cleared.]

Chen Mo had two abilities that could clear Skill Cooldowns. One was Transcendent Calm, and the other was Nature God's Blessing!

He was quite likely to get an instant Cooldown clear.

Once the probability was modified, Chen Mo immediately began the synthesis.

The result came out very quickly.

[Congratulations, you have successfully synthesized the item!]

[Please take out your synthesized item, the "Chaos Gift Pack"!]]

It was really a success! This Extreme Fortune Wheel is so useful. If I used it on my Ring of Death, could I make it kill anyone with a 100% success rate? If that's possible, wouldn't it be too strong?

Chen Mo couldn't help but think of the Ring of Death and its terrifying Death Arrival instant kill effect.

But the Extreme Fortune Wheel's active effect has the premise of 'regular probability events.' The exact limitations of 'regular' will need further consideration.

Chapter 660: Three Conditions!_1

I don't even know what Chaos-grade is all about.

Chen Mo, unable to wait any longer, attempted to open the Chaos-grade Gift Pack right away.

However, The Heavenly Path's Hint sounded in response.

[The Heavenly Path's Hint: You have not yet met the conditions to open the Chaos-grade Gift Pack. Please check the relevant information on the Chaos-grade Gift Pack first!]

Hmm? Even after receiving the Chaos-grade Gift Pack, there are additional conditions to open it?

Chen Mo was taken aback; he immediately opened the Chaos-grade Gift Pack to check the related information.

[Chaos-Grade Gift Pack]: The ultimate Gift Pack containing Chaos Supreme Treasures. Every item inside possesses the extraordinary ability of infinite growth. To open this Gift Pack, three conditions must be met!

『Condition One』 : Consume 100 points of chaos source energy.

『Condition Two』 : Reach the fifth-transition in your professional reincarnation level.

『Condition Three』 : Achieve the life level of a deified being.

Alright, no wonder it's a top-tier Gift Pack; the opening conditions are unlike any other!

After reading the three conditions, Chen Mo couldn't help but feel that the difficulty of opening this Gift Pack was quite high.

The latter two conditions were still relatively achievable.

He had already met the third condition and was close to meeting the second one, but he had no idea where to acquire the chaos source energy required for the first condition.

So far, Chen Mo had only acquired 100 points of chaos source energy once before: during the college entrance exam, when he entered a counterfeit Chaos Origin Land and eliminated a horde of man-made horrors. That was it.

He had enough to open one Chaos-grade Gift Pack this time, but if he obtained another one in the future, he didn't know where else he could get another 100 points of chaos source energy.

After all, he didn't even know where the Chaos Origin Land was located.

Seeing a treasure trove right in front of him but unable to access it, Chen Mo could only put the Chaos-grade Gift Pack away for now.

He could open it once he reached the fifth-transition, which was just around the corner anyway, so there was no need to worry.

Setting aside the matter of the Chaos-grade Gift Pack for a moment, Chen Mo immediately began his challenge in the Divine Training Tower.

These ten floors were still battle floors, but for Chen Mo, whose attributes had been tremendously boosted after his deification and subsequent level-ups, clearing them was child's play. He cleared them at an extremely fast speed.

As a result, Chen Mo harvested 55 points of Divine Power, and he climbed to the seventieth floor of the Divine Training Tower.

[The Heavenly Path's Hint: You have completed the Legendary Trial; your level cap has been raised!]

[The Heavenly Path's Hint: Congratulations, your Level has increased! Current Level: 81! Due to your level-up, your divine element has also increased. According to your professional star level, you have gained 3.3 points of divine element.]

[The Heavenly Path's Hint: Congratulations, your Level has increased! Current Level: 85! Due to your level-up, your divine element has also increased. According to your professional star level, you have gained 3.3 points of divine element.]

[Experience]: 7,924,309,199/80,595,500

[The Heavenly Path's Hint: Your Level has reached 85, reaching the seventeenth-tier bottleneck. You can choose to take the Realm Breakthrough Assessment!]

If not for his life-level advancement to a deified being, the experience points Chen Mo had previously gained would have been far from sufficient to support him until the fifth-transition.

Choosing once again to skip the Realm Breakthrough Assessment without consuming any experience points, Chen Mo's Level soared rapidly.

The Heavenly Path's Hint and the sound of the Great Path were terribly busy. All over the world, people felt their scalps tingle from the frequency of the alerts they were hearing. This was their first time hearing the sound of the Great Path so frequently, going off like crazy within just one or two days.

[The Heavenly Path's Hint: Congratulations on passing the Above SSS-level assessment. You have gained the origin-grade item "Super Divine Stone"!]]

Having obtained the Super Divine Stone once again, an idea suddenly popped into Chen Mo's mind. If opening the Chaos-grade Gift Pack is rather challenging, what if fusing Super Divine Stones could yield a Chaos-grade Divine Stone? Given the probability of acquiring a Super Divine Stone, this approach seems more straightforward.

However, Chen Mo only briefly entertained this thought. Considering he still had several abilities that weren't Transcended, even the Super Divine Stones he possessed seemed insufficient.

Having once again obtained a Super Divine Stone, Chen Mo immediately selected one of his remaining untranscended abilities.

The "Life-And-Death Emblem" was a very practical treasure. Chen Mo decided to use this Transcending opportunity on it.

[The Heavenly Path's Hint: You are using a Super Divine Stone on the "Life-And-Death Emblem" Skill. Once activated, the "Life-And-Death Emblem" will transform into an origin-grade item of the same type. Confirm?]

[The Heavenly Path's Hint: Transformation successful! Your "Life-And-Death Emblem" has evolved into a "Life-And-Death Source Crystal"!]]

["Life-And-Death Source Crystal" - Origin-Grade]

[Item Passive Effect]: When carried, the holder will only receive a maximum of one unit of damage per second and can manually choose whether to activate this special immunity passive during the Life-And-Death status.

[[Special Immunity Passive]] : After activation, you are immune to damage inflicted by targets other than the Life-And-Death target, and furthermore, you will also be unable to damage any targets other than the Life-And-Death target. (If the Life-And-Death target does not inflict any damage on you for over three seconds, or you do not hit the Life-And-Death target for over three seconds, this special passive effect will cease.) (Effective even when in the backpack)

[Item Active Effect]: Upon activation, disregard all barriers and designate a unit within a range of "1,000 * Level" meters as your Life-And-Death target, forcefully pulling that unit to a position ten meters from you. During this period, neither party can voluntarily leave the ten-meter radius around the other. This effect lasts until one party dies!

When in the Life-And-Death status, the designated target will be unable to damage any unit other than you (the activator), and their All Attributes will be suppressed by 50%. After the Life-And-Death status ends, this ability enters a 60-minute cooldown.

This effect cannot be immunized or dispelled! (Can be activated even when in the backpack)

[Item Introduction]: This item is beloved by the God of War. Anyone targeted by him can only pray for luck!

Wow, the Life-And-Death Emblem is so much stronger after being Transcended!

The previous Life-And-Death Emblem, once in Life-And-Death status, prevented both the user and the enemy from damaging anyone other than their designated opponent. But now it was different. If he just triggered the active effect without enabling the special immunity passive, this restriction only applied to the enemy; Chen Mo could still damage any unit, while the enemy could only damage him.

In a critical situation, he could also activate the special immunity passive to become completely immune to damage from any other targets. With this special immunity passive, he could even use it strategically by targeting an ally; as long as the ally didn't attack him, he would be immune to all other external damage, effectively placing himself in an Invincible State!

Its utility was now even higher than before.

[The Heavenly Path's Hint: Because you skipped the seventeenth-tier Above SSS-level Realm Breakthrough Assessment, you will not receive an Above SSS-level Realm Breakthrough Assessment Clearing Scroll.]

[The Heavenly Path's Hint: After reaching Level 20, the Realm Breakthrough Assessment will no longer offer an experience point discount. Nevertheless, by completing the assessment with a perfect score, you can obtain a reward of eternal gold coins equivalent to the challenge Level of this Realm Breakthrough Assessment. You have received 85 eternal gold coins!]

"Congratulations to the Solar System for the first professional to perfectly complete the Level 85 Above SSS-level Realm Breakthrough Assessment! To celebrate, a special reward will be issued to all Solar System professionals. From now on, all indigenous professionals in the Solar System at Level 85, if they do not wish to undertake the Realm Breakthrough Assessment, may directly skip it without needing to break through the realm on their own, and they will also receive the "Breakthrough" title reward!"

"Congratulations to the first professional in the Solar System to perfectly complete the Level 85 Above SSS-level Realm Breakthrough Assessment! A special Above SSS-level reward will be issued to this professional!"

[The Heavenly Path's Hint: Congratulations on earning an Above SSS-level Gift Pack!]

He had once again accumulated three Above SSS-level Gift Packs. Chen Mo was now reluctant to open them. After all, he already had a surefire method to synthesize a Chaos-grade Gift Pack (presumably from these). He didn't know how to obtain chaos source energy yet, but figured he might learn how after going to the Tower of Eternity. Therefore, he wasn't in a rush to use them, especially since his current combat power was already quite formidable among those at the fifth-transition.

There was absolutely no need to rush opening Gift Packs for an immediate power boost.

[The Heavenly Path's Hint: Congratulations, your Level has increased! Current Level: 86! Due to your level-up, your divine element has also increased. According to your professional star level, you have gained 3.3 points of divine element.]

[The Heavenly Path's Hint: Congratulations, your Level has increased! Current Level: 90! Due to your level-up, your divine element has also increased. According to your professional star level, you have gained 3.3 points of divine element.]

[Experience]: 7,482,606,699/100,403,000

[The Heavenly Path's Hint: Your Level has reached 90, hitting the eighteenth-tier bottleneck. You are eligible to select the Realm Breakthrough Assessment!]

I'm at Level 90. Just 10 more levels to reach the fifth-transition.

Chen Mo was very much looking forward to seeing what he would receive from opening a Chaos-grade Gift Pack. However, he still had a few more realm breakthroughs and tower climbs to go!
