

GOD! I TURNED INTO A TURTLE

Chapter 9 – Changing Brush

Under the darkness of night, the Monster Beast Forest still had some brilliance.

Ye Que came to the dense forest smelling the smell of blood.

A one-horned rhino exuding the aura of a quadruple monster, inserted its one-horn into the head of a black-spotted wild boar.

The black-spotted wild boar struggled desperately and was about to die.

“Don’t die! Leave it to me to brush up on experience points and proficiency!”

Ye Que rushed at full speed, before the black-spotted wild boar died, and cast a shadow attack.

“Ding! The host killed the triple monster wild boar! Gained 0.5 experience points.”

“Ding! Shadow attack proficiency, increase by 10.”

Roar!

The one-horned rhino was enraged.

This is its prey, a turtle as big as a palm, dare to **** it!
court death!

With a lift of both hooves, it stomped on the turtle.

“The harder you push, the more excited I get!”

Ye Que retracted his limbs and head into the turtle shell.

“The rock shakes!”

“Ding! Host talent triggers, counterattack!”

The one-horned rhino was knocked into the air, and both hooves were covered in blood.

It was dumbfounded.

This thing is the size of a palm, why is it so painful!

“Ding! Rock shock proficiency, increase by 15.”

Cool!

“Come on!”

Ye Que rushed towards the one-horned rhinoceros.

The one-horned rhinoceros suffered a loss, so it didn't dare to be tough, so it turned around and fled.

Yet something happened that broke it down.

This thing actually caught up.

“Ding! The host kills the quadruple monster unicorn! Gain experience point 1.”

In the end, Ye Que killed the one-horned rhinoceros.

“Let's find monsters to brush! Experience points, proficiency, all have to be brushed up!”

He was prompted by the map scan, and he found a quadruple monster again.

Use the shadow attack, rock shock, and talent counterattack to kill this quadruple monster.

He gains experience point 1 again.

Look at the panel again.

Skill 2: Rock Shock 50/100 (proficiency increased to 100, can be upgraded to Rock Seal)

Mystic: Riot (in one minute, all abilities are increased by 50%, cooldown time: three days)

Experience points and skill proficiency are increasing.

“More experience points and proficiency are needed!”

Ye Que went to look for the monster again.

“Ding! The host killed the quadruple demon beast Earth Splitter!”

“Ding! Rock shock proficiency, increase by 15.”

“Ding! Shadow attack proficiency, increase by 15.”

“Ding! The host needs 3 experience points to break through the realm, so the upper limit of experience points is 3! No experience points can be obtained from this kill!”

“what!”

Ye Que was shocked.

There is even an upper limit!

But he was soon relieved.

Just by killing weak monsters, one can grow into a powerful party.

Even he himself was skeptical.

After all, whether killing monsters can be upgraded depends on the quality of the monsters.

“You can only gain proficiency, but you can’t gain experience points... No!”

His eyes lit up.

“The upper limit of experience points is 3, then I use it up, can’t I still use it!”

Instantly open the panel.

Speed: 4.2/10

Defense: 5/10

Attack: 4/10

Experience Points: 3

“Increase speed by 1, increase defense by 1.1, and increase attack by 0.9!”

Suddenly, the panel data changed.

Speed: 5.2/10

Defense: 6.1/10

Attack: 4.9/10

Experience points: 0

“Hahahaha! Speed is five levels, defense is six levels, and realm is still at level four. I am really a genius among turtles!”

He decided to brush out 3 experience points, use them up, and then continue to brush.

Let’s stay still when attacking, and brush up the defense and speed to the level of a super strong.

Ye Que was excited, and went to hunt monsters again.

“Ding! The host kills the quadruple monster beast Wild Black Bull! Gain experience point 1.”

“Ding! Rock shock proficiency, increase by 15.”

“Ding! Shadow attack proficiency, increase by 15.”

“Map scanning prompt: 600 meters ahead, a fifth-level monster appears!”

Ye Que rushed over.

Not long after, came back again.

“That fifth-layer monster is too cunning, if it’s not for its low attack power, I must kill it!”

Although it can also rely on defensive talents and skills to grind the fifth-level monsters to death.

But doing so is a waste of time and energy.

Compared to beheading the quadruple monsters, the cost performance is too low.

“I’m going to kill the quadruple monsters. With my fifth-tier speed and sixth-tier defense, the quadruple monsters can’t hurt me!”

Ye Que hunted down monsters again.

Before dawn, he once again generated 3 experience points.

Open the panel.

Speed: 5.2/10

Defense: 6.1/10

Attack: 4.9/10

Experience Points: 3

“Speed +1.5, defense +1.5.”

Ye Que couldn't wait to add points.

“Ding! The host's speed, defense, and attack gaps are too large, and experience points cannot be used.”

Ye Que was dumbfounded.

Between speed, defense and attack, there can only be a difference of at most two realms?

In fact, he has long guessed that it may be restricted to a certain extent.

So when it really came, I didn't feel surprised.

“The speed increases by 1.7, and the defense increases by 0.8.”

The panel data changed again.

Speed: 6.9/10

Defense: 6.9/10

Attack: 4.9/10

Experience points: 0.5

Adding points in this way can not only maximize the strength, but also the speed, defense and attack have not exceeded two realms.

And his own realm is still stable at the fourth level.

“In this way, I can earn another 2.5 experience points.”

While I am still in the fourth level realm, hunt down the fourth level monsters as soon as possible to earn high experience points.

Ye Que used the skills of card realm, experience points and proficiency to the extreme.

When he brushed the experience points to the upper limit, the sky was already bright, and Zhengyang was hanging in the sky.

“The system has reminded me before that the proficiency of Panshi Shock has reached 100, and it has been upgraded to Panshi Yin.”

Open the panel to see.

Speed: 6.9/10

Defense: 6.9/10

Attack: 4.9/10

Experience Points: 3

Martial Arts: Enabled.

Evolution: Wild Forest Turtle (quadruple monster with keen hearing)

Skill 1: Shadow Assassination 235/500 (proficiency increased to 500, can be upgraded to Void Assassination)

Skill 2: Rock Seal 0/500 (proficiency increased to 500, can be upgraded to Void Shock)

Mystic: Riot (in one minute, all abilities are increased by 50%, cooldown time: three days)

When the experience point reaches 3, the Panshi Shock is upgraded to the Panshi Seal, and the proficiency of Shadow Attack is greatly increased.

“Now that the experience points have reached the upper limit, the speed, attack, and defense cannot be increased. It is not worthwhile to only increase the proficiency! Only breakthrough!”

In fact, breakthrough is not a bad thing.

It is of great help to him to reach the fifth level realm and be able to open the exercises.

Ye Que didn't think much, and broke through decisively.

“Attack plus 1.”

Suddenly, the panel data changed.

Speed: 6.9/10

Defense: 6.9/10

Attack: 5.9/10

Experience Points: 2

“Ding! The speed, defense, and attack of the host are all above 5, and you can break through to the fifth level! Do you want to break through?”

“breakthrough!”

The body keeps getting stronger.

“Ding! The breakthrough has been successful!”

Five levels of realm, can open skills!

“Go and replenish your strength first!”

There were many monsters killed before, and Ye Que had no shortage of food.

When you are full, check the panel.
