

## God tier Farm 3231

### Chapter 3231 A ray of light (2)

Elon Musk wanted to hang up the phone and reject the call. After all, he was not in the mood to talk business with Li Yifu. Not to mention that Li Yifu's business was too risky, and he was not interested. However, rejecting the call was obviously very impolite, especially when the other party was a rich man like Li Yifu. If he rejected the call rudely, he might really offend the other party.

Therefore, despite his reluctance, Elon Musk still picked up the phone, but his tone was a little cold. "Mr. Li, what's the matter?"

"Mr. Mersk, I hope to see you again." Li Yifu said.

"I'm sorry, Mr. Li, I've left Silicon Valley. " "I have something to do at home these two days, so I'm temporarily away from work," Elon Musk said. In addition, I think I've made my stand clear on what you want to discuss, Mr. Li. It's true that we can't cooperate on that project because of risk control. I'm really sorry ..."

"Is Mr. Masker in Los Angeles?" Li Yifu smiled and asked, "I happen to be in Los Angeles too!"

Elon Musk's expression changed slightly, and he said, "What does Mr. Li mean? You followed me?"

In fact, there were many thoughts in Elon Musk's mind at this moment.

This was because Li Yifu's proposal to purchase spacesuits and space equipment was too sensitive. Moreover, Li Yifu's Chinese identity made it difficult for Elon Musk not to think that the Chinese government was behind this matter.

He had just left Silicon Valley, and the other party had already come to Los Angeles.

This made elonmask wary.

"Mr. Masker, please don't misunderstand!" Li Yifu smiled and said, "I'm not here to talk business with you. I heard that your child has some health problems, which is really unfortunate. I'm willing to provide you with some medical help. "

A hint of displeasure rose in elonmask's heart.

Obviously, Li Yifu had spent a lot of effort to investigate him. Otherwise, how could he have caught up with him Los Angeles so quickly and even found out about little X's situation?

Although Elon Musk did not deliberately keep it a secret, this did not mean that he could accept his privacy being invaded.

Therefore, elonmask's tone became less polite.

He snorted and said, "Mr. Li, what do you mean by medical help?" Mr. Li, do you think that I can't find the best doctor and hospital to treat little X?"

"Of course I don't think so," Li Yifu replied indifferently. However ... As far as I know, the malignant degree of Strigoi is very high, especially your child's condition, which seems to be more serious. Even

under the best conditions currently available, I think the survival rate does not seem to exceed 40%, right?"

"So what?" Elon Musk felt that his patience was about to run out, and his tone became more and more stiff.

"This survival rate is simply a gamble!" Li Yifu said somewhat exaggeratedly, "Mr. Masker, do you think I would still call you if the only condition I could provide was a 40% survival rate, or just a little increase?"

Elon Musk's heart skipped a beat. He pretended to be calm and asked, "Mr. Li, What do you mean ... With the medical help you provide, what is little X's survival rate?"

"More than 90%," Li Yifu said indifferently. "If you don't take into account some unexpected factors, it's 100%!"

Li Yifu had full confidence in Xia ruofei's medical skills.

In fact, he had full confidence in Xia ruofei's ability in any field.

To put it bluntly, it was blind worship.

After listening to this, Elon Musk couldn't help but take a deep breath. Then, he came back to his senses. He felt that this was impossible, especially in the eyes of a person who especially believed in science. Everything had to conform to the laws of science, including his son's illness. Obviously, from a scientific point of view, the treatment plan proposed by Dr. Mannu's team had reached the top level in the world, and the patient's survival rate had been raised to the limit. Li Yifu said something like 90% or 100% as soon as he came up. He sounded like a charlatan.

A trace of displeasure rose in Elon Musk's heart. He felt that Li Yifu was making fun of him.

"Mr. Li, your joke is not funny!" He said coldly.

"It seems that Mr. Masker doesn't believe what I said." Li Yifu said calmly.

"Uh – huh!" Elon Musk said coldly, "does Mr. Li think that your words have a trace of credibility?"

Li Yifu laughed and said, "won't we know if it's credible after we try?" You don't even have the courage to try, and you're in such a hurry to come to a conclusion?"

"What Mr. Li said doesn't conform to the laws of science at all, so there's no need to try!" Elon Musk was unmoved.

"Scientific law? Is it a rule that your son must undergo surgery?" Li Yifu sneered. "Does science say that he has to face terrifying chemotherapy at such a young age? Science has also stipulated that there's a fifty to sixty percent chance that he won't live past five years old?"

"Mr. Li, please mind your words." Elon Musk's face was as dark as water. "Little X has unfortunately contracted this disease. This is something that no one wants to see."

Li Yifu's tone became a little more relaxed as he said, "Mr. Masker, I'm not trying to provoke you on purpose. I just want to tell you that there's no loss in giving yourself another chance to try. On the contrary, it's very likely that we'll usher in a miraculous turn of events!"

Li Yifu continued, "I've brought a Chinese medical expert here. He'll treat little X from a Chinese medical perspective." Our specialist has already understood little X's condition. He's very confident in curing this type of illness. "

Without waiting for Elon Musk to speak, Li Yifu struck while the iron was hot and said, "Mr. Masker, using the traditional Chinese medicine treatment method, there is no need for surgery, and there is no need to go through the self – harming chemotherapy, so the damage to the body is almost zero. Even if it doesn't work, you might as well give it a try. Could it be that the situation can get any worse?"

Li Yifu's last words finally moved Elon Musk.

He hesitated for a moment. "Mr. Li, I don't know much about traditional Chinese medicine. Can the specialist you brought really treat patients with such a condition?"

"I know this may be hard to believe, but it's the truth," said Li Yifu. In fact, the expert I brought here has successfully cured a serious malignant brain tumor. Please note that it's a cure!"

Elon Musk took a deep breath and said, "Okay, I'm willing to try a new treatment method, provided it doesn't cause any harm to my body."

"Of course, I can guarantee that." Li Yifu said.

Elon Musk hesitated again and asked, "Mr. Li, this treatment ... Is it related to the business you talked about the day before yesterday ..."

Li Yifu chuckled and interrupted Elon Musk's words, saying, "Let's not talk about this for now. Let's see the effect of the treatment first. How about it?"

Elon Musk knew that even if the two sides did not sign any agreement, Li Yifu was not a character that could be easily manipulated. If the treatment was really effective, he would most likely have to take the risk to complete this super large order. Otherwise, with Li Yifu's power in the United States, he would not be able to afford to launch a crazy revenge.

"Alright!" After a brief hesitation, Elon Musk said decisively, "Mr. Li, please bring the medical experts to my Manor! Right, where are you guys now? I'll send a car to pick you up. "

"Beverly Hills Hotel." Li Yifu said.

"OK!" Please wait at the hotel for half an hour!"

"No problem!" Li Yifu smiled and said, "Mr. Masker, you will know in the future that this is a very wise decision. This decision will bring your child a healthy physical state!"

Chapter 3232 Unknown but powerful (1)

Grams had been listening to her boyfriend's phone conversation. After Elon Musk hung up, she quickly asked, "Elon, have you found a better medical expert?"

Elon Musk heaved a long sigh and said with a complicated expression, "I don't know either ..."

"What?" Gramus was confused. He looked at Elon Musk with wide eyes. "You don't know either?"

Elon Musk made a hand gesture to calm down and said, ""My dear, wait for me for a while!"

Then, he turned his head and waved to the Butler who was standing in the distance waiting for orders. After calling the Butler over, he ordered the Butler to send a car to the Beverly Hills Hotel immediately and gave him Li Yifu's contact information.

In the end, elonmask warned, ""You must maintain enough respect for Li Yifu! He's a senior in the business world. "

"I understand! Sir, I'll personally take the car to pick Mr. Li up!" The Butler said respectfully.

Elon Musk nodded and waved his hand tiredly, ""Go and come back quickly!"

The Butler went to the hotel to pick them up, while elonmask turned his gaze to grams and asked, ""My dear, do you know about Chinese medicine?"

"Chinese medicine?" gramus hesitated.

"Uh – huh!" "Yes!" Elonmask nodded.

Grams shrugged and said, "I've heard some. There are a few Hollywood stars who like Chinese medicine in Chinatown, but they mainly do physiotherapy, rehabilitation, relaxation, and massage. I heard that Chinese medicine also uses grass roots and tree bark to treat people. The mysterious Easterners may not be able to strictly distinguish between witchcraft and medicine ..."

Elon Musk furrowed his brows and said, ""Mr. Li Yifu recommended me a Chinese medicine practitioner ..."

"Oh! God ..." Gramus covered his mouth and said after a long while, "dear, you can't be thinking of giving little X that black potion, right? I can't imagine it ..."

Elonmask pressed down on grams' shoulders and looked into her eyes. ""My dear, please calm down! Li Yifu is a well – known super – rich man in the United States. He shouldn't be so ridiculous as to use a swindler who doesn't know any medical skills to make fun of us!"

"Maybe he has a favor to ask of you, so he knows that you're in a hurry to seek help?" "Maybe he's been deceived," gramus said. Anyway, little X is still so young, we can't risk his health!"

Elon Musk shook his head and said, ""If it was a normal disease, I definitely wouldn't have done this. "But you've also heard Dr. Mannu's analysis. The malignant level of flexor Carcinus is very high, and the one in little X's body is especially dangerous. Even with the world's best medical resources, the survival rate is only about one – third! If we use Dr. Manu's plan, the risk is also very high! The Chinese medicine doctor Li Yifu introduced doesn't require surgery or chemotherapy. Even if there's a certain risk, I think it's worth it to bet on the small probability. "

Elonmask was a businessman, so he naturally used the risk – reward ratio to evaluate the feasibility of this matter. In contrast, he was much calmer than Grims.

After grams heard this, he pondered for a long time before nodding and saying, ""Alright then! However, I have to be by little X's side during the treatment process!"

“Of course, I’ll accompany you the entire time.” Elonmask said.

He actually didn’t have much hope for this.

.....

In the Beverly Hills Hotel, after a discussion, Xia ruofei and Li Yifu decided that Xia ruofei and Li Yifu would go to the mansion of Elon Musk, while the others would rest in the hotel.

After all, they were going to treat a patient and not to visit. It was not appropriate for five or six people to go at once.

Soon, the Butler of Elon Musk contacted Li Yifu, and the car he brought had already arrived at the hotel.

Thus, everyone stood up and left the room. Song Wei and Ling Qingxue stayed in their rooms to rest while Chen Xuan and Yu Xin ‘er returned to their own rooms.

Xia ruofei took out an exquisite first aid box from the spirit map space. Inside it was a set of silver needles used by Traditional Chinese Medicine Practitioners, as well as some Traditional Chinese Medicine equipment, including a braziers.

He carried the first aid kit in his hand and went downstairs with Li Yifu. Soon, he saw the Butler of the Elon Musk family.

The Butler respectfully led the two of them to a Bentley before sitting in the front passenger seat and instructing the driver to return to the manor.

Along the way, Xia ruofei closed his eyes to rest. When the car was about to reach its destination, he opened his eyes and looked out the window.

Elon Musk’s mansion was located in Bellaire, Los Angeles. Like most super mansions, this small Manor was very private. It was surrounded by lush trees, and the whole house was surrounded by a golf course and forest, forming a corner.

However, Xia ruofei took a closer look at the house that could be vaguely seen in the distance. He could not help but feel surprised that the house was not as magnificent as he had imagined. It also did not have the technological sense that matched Elon Musk’s identity. On the contrary, it looked very simple and even a little old.

“How much does this house cost?” Xia ruofei asked, smiling.

“He should have spent more than 20 million dollars on this house!” Li Yifu said.

“Woof! It’s really not cheap!” Xia ruofei asked, “are property prices in the M Nation this expensive too?”

Chapter 3233 Unknowingly powerful (2)

Li Yifu chuckled. “Senior granduncle, luxury houses are different from ordinary houses. There’s no reference price. It’s mainly based on the environment and so on.”

The driver and the Butler didn’t understand Chinese, so Li Yifu didn’t have to worry too much.

Li Yifu continued, "I've looked up some information. The owner of this house is Environmental Protection. You can see that he has installed a lot of solar panels. Masker has always been committed to promoting the development of clean energy, such as electric vehicles. Solar energy is also a key part of his industry."

Xia ruofei nodded and said, "yes!" This brother is quite interesting ..."

While they were talking, the car had already passed through an arch that looked like a Spain Castle and entered the interior of the mansion.

Masker, who had been informed by the Butler in advance, had already come out to wait. His girlfriend, glams, was also with him.

The Bentley slowly stopped. The Butler quickly got out of the car and opened the door on Xia ruofei's side while the chauffeur opened the door on Li Yifu's side. The two of them stepped out.

Elon Musk took a few steps forward. He saw Xia ruofei getting out of the car on the other side and was slightly stunned. He even looked into the car, hoping to see that there were still people who hadn't gotten out.

In America, there was no such thing as "the older the doctor, the more popular he is". However, Xia ruofei looked too young. The learning period of medical majors was longer. Most medical students at Xia ruofei's age were still in their master's or doctor 's! He didn't even have much practical experience, so how could he be an expert who could cure serious brain cancer?

Elon Musk suddenly felt like he had been played by Li Yifu.

Li Yifu went around the front of the car and met up with Xia ruofei on the other side. Then, the two of them walked towards Elon Musk together.

"Mr. Li!" There was a trace of displeasure on Elon Musk's face. He frowned slightly and asked, "may I ask if the Chinese medicine expert you mentioned on the phone is here?"

Li Yifu looked at Xia ruofei beside him and smiled. "Mr. Masker, let me introduce you. This is doctor Xia from China. Doctor Xia has cured many serious malignant tumors ..."

Elon Musk didn't believe it at all, because if this young man in front of him was really so amazing, all kinds of reports would have been overwhelming. If he could even cure late – Stage brain cancer, this kind of achievement could have won the Nobel Prize that year, and there would be no suspense at all.

In other words, if Xia ruofei was really that amazing, he would not have been so unknown.

Elon Musk confirmed that he had never seen Xia ruofei in any reports when the Australian Airlines plane landed in Saipan. As a passenger who had never flown a plane before, Xia ruofei successfully landed and saved hundreds of people on the plane. Such a heroic story was favored by the Western media, and there were many reports on it in the global media during that period. Unfortunately, Xia ruofei was now using the image of Xia Tian. Even if Elon Musk had an impression of the news of the forced landing of Australian Airlines, he would never associate the Xia ruofei who had changed her appearance with the legendary hero of that time.

There was a hint of mockery in Elon Musk's eyes, but he still asked politely, "Doctor Xia, may I ask which Medical University did you graduate from? Which hospital are you currently working at?"

Xia Ruofei had a faint smile on his face. "I didn't graduate from a Medical University. In fact, I didn't go to college. Also, although I have a Chinese medical certificate, I don't work in any hospital."

"Mr. Xia, you've opened your own private clinic?" "What's wrong?" asked Elon Musk.

In the United States, private clinics and hospitals were also common, and often these private medical institutions had better standards and conditions. Of course, the cost of seeing a doctor in a private medical institution was also much higher. The general working class would go to a public hospital to see a doctor.

Xia Ruofei shook his head and said, "I don't have a clinic, nor have I been hired as someone else's private doctor ..."

Elon Musk raised his eyebrows, then spread his hands at Li Yifu and said, "Mr. Li, this doctor Xia doesn't seem to be the medical expert you mentioned ..."

"Mr. Masker!" Xia Ruofei said directly, "Chinese medicine is more about inheritance. Many famous Chinese doctors are taught by their Masters. In our country, we also recognize the inheritance of Chinese medicine from Masters to disciples. That's why not all Chinese medicine practitioners graduated from Chinese medicine universities."

Xia Ruofei paused and quickly continued, "Also ... I didn't go to the hospital to work, and I didn't do any medical work because I didn't want to make it my profession. It's just this time, and it has nothing to do with my medical skills. For example ..."

Xia Ruofei glanced at Elon Musk and Gramus. In fact, he had already used his mental power to probe them. At the same time, he had also used the "look" in Traditional Chinese Medicine to observe their situation.

After a slight pause of two seconds, Xia Ruofei smiled and continued, "For example ... Even though I'm not a professional doctor, I can still tell at a glance that Mr. Masker has not been sleeping well recently, and he has serious tinnitus. In addition, if I'm not wrong, Ms. Grams' right arm had a fracture before, and because it didn't recover completely back then, it often hurts, especially when the climate changes ..."

Both Elon Musk and Gramus were stunned.

If it was possible to find out about Elon Musk's health status and medical records through other means, then Gramus was not a particularly famous celebrity. Furthermore, she was not even Elon Musk's girlfriend when her arm was fractured many years ago. She had just entered the entertainment industry and no one knew her at all. How could things from that time be found out by an investigation?

What's more, Elon Musk's sleep and tinnitus problems had only appeared recently. Because he had been busy with work recently, and then there was the matter of little X's sarcoma, so he did not seek medical treatment at all. He only asked Dr. Mannu briefly, so it was impossible to leave a medical record.

Unless this young doctor Xia bribed Dr. Mannu.

Regardless of whether the probability was high or not, there was no point in bribing Dr. Mannu because in the end, medical skills were the only thing that mattered. The patient was there, and little X's illness would not get better just because Elon Musk and Grice were fooled.

Elonmask turned his gaze to grams.

With a look of disbelief on his face, he nodded and said, "When I was 18 years old, I fell off the stage during rehearsal and broke my right arm ... Over the years, my arm does hurt faintly when it rains and storms. He was very accurate ..."

"This is really shocking!" Elon Musk said, "doctor Xia, you can see so much and so accurately with your eyes. How did you do it?"

Xia ruofei said lightly, "Chinese medicine focuses on looking, listening, asking, and feeling. Looking is only one of the skills. A brilliant Chinese medicine doctor can indeed get a general judgment by observing the patient's complexion without contact." Of course, if you need a more accurate diagnosis, you'll still need to take his pulse and ask about his medical history. Sometimes, you'll also need to rely on some Western examination methods, such as CT, color ultrasound, and so on ..."

"I understand ..." Elonmask nodded, not fully understanding.

In fact, he was indeed a little confused by what Xia ruofei said. However, he had personally experienced what Xia ruofei had just shown him. Therefore, although he could not understand what Xia ruofei was saying, he still felt that he was better.

I don't know, but it's amazing!

The expression on Elon Musk's face immediately became much warmer. He made an inviting gesture and said, "Mr. Li, doctor Xia, let's go in and sit down. Please come in!"

Chapter 3234 Lifting heavy weights as if it were light (1)

Elon Musk and gramus led Xia ruofei and Li Yifu to the huge living room on the first floor of the main building of the mansion.

"Mr. Li, Dr. Xia, tea or coffee?" asked Elon Musk.

Xia ruofei raised his eyebrows and smiled. "Mr. Masker, you have tea here too?"

"It's a gift from a Chinese friend not long ago," said Elon Musk with a smile. "Although the two of us are not used to the taste of Chinese tea, the tea leaves this time seem to be especially fragrant. We would occasionally drink some."

"Is that so?" Xia ruofei smiled and said, "then let's try this tea!"

"No problem!" Elon Musk smiled and nodded, then gestured to the Butler standing at the side.

The Butler bowed slightly and walked to the side to prepare tea for everyone.

The tea cabinet was at a corner of the living room. Although the living room was huge and was a little far away, Xia ruofei and Li Yifu could tell at a glance that the tea the Butler took out from the tea cabinet was the Taoyuan Da Hong Pao. From the packaging, it was the most expensive kind.

The two of them couldn't help but smile at each other.

To Xia ruofei's surprise, there was an exquisite kungfu tea set beside the tea cabinet. It was probably from the friend of Elon Musk who had given him the tea.

The Butler's movements were a little awkward. What made Xia ruofei and Li Yifu both laugh and cry was that the Butler basically used the complicated tea set as a filtering tool. In the end, the tea that was brewed was actually in the coffee cups, filling everyone's cups.

This cup of tea, if it was a normal tea tasting cup, could hold at least ten or twenty cups.

No wonder the Butler took so long to make the tea. After all, the tea made by this kind of Kung Fu Tea set was only enough to fill four to five tea cups.

The Butler placed four large coffee cups filled with steaming hot tea on a tray and placed them in front of Xia ruofei and the others.

Elonmask smiled and said, "Mr. Li, doctor Xia, please have a taste!"

"Thank you!" Xia ruofei's expression was a little strange. He picked up the heavy coffee cup uncomfortably and took a sip.

Although the tea brewing technique was extremely bad, the peach blossom Da Hong Pao still had a strong fragrance, and the taste was not bad.

Of course, he could only get an evaluation of "not bad." It was impossible to get any higher.

Every time a good tea leaves were brewed, there would be subtle differences in the taste and sweetness of the tea. People who often drank tea would be able to feel the subtle changes with a slight taste.

There were several cups of tea mixed together in the cup, so the taste had naturally become a little strange.

Elonmask also took a bite, and even showed an expression of savoring the aftertaste, and asked, "Doctor Xia, how's the tea?"

"Not bad," Xia ruofei said tactfully.

He couldn't possibly say that the tea was impeccable, but the tea – brewing technique was terrible, wasting such expensive tea leaves ...

However, Xia ruofei still felt that his peach blossom Da Hong Pao was not worth it, so he couldn't help but say, "Mr. Masker, in China, there are many things to pay attention to when making tea. Your tea set is pretty good, but there seems to be some problems with the way you use it ... Of course, this is not important! If there's a chance, I can demonstrate the correct way to brew the Da Hong Pao tea leaves! As for now ... Let's talk about the illness first!"

Elonmask quickly nodded and said, "Alright! Little X had been diagnosed three days ago, and he had done a comprehensive examination in the past three days. Dr. Xia, I'll get someone to bring the examination report over, and then bring Dr. Mannu's Medical Group over. How about you guys have an exchange first?"

Xia ruofei waved his hand and said, "I'd rather see the patient first!" "Mr. Masker, I've told you just now that Chinese medicine focuses on looking, listening, asking, and feeling. It's very important to make a face – to – Face diagnosis for the patient. In comparison, we don't rely as much on medical reports as Western medicine. "

Elon Musk and gramus looked at each other. They both thought of Xia ruofei's magical Chinese medicine "Wang" formula just now outside. She could accurately judge the disease of the other party with a glance. This was even more powerful than CT and MRI scans!

Since they were willing to give it a try and agreed to Xia ruofei's visit, they naturally would not reject Xia ruofei's normal request to diagnose in person.

Therefore, elonmask quickly nodded and said, ""No problem! However, I'll have to trouble doctor Xia to move him to the third floor. Little X is receiving preoperative treatment and can't leave his room. "

"Of course!" Xia ruofei picked up his coffee cup and took a big gulp of tea. He stood up and said, "let's go see the patient now!"

"Good! Please follow me!" Elon Musk also stood up. He looked at Li Yifu, hesitated, and said, "Mr. Li, how about ... You take a rest here?"

Li Yifu had already stood up with Xia ruofei. He said, ""I'll join you! Uh ... Is it convenient?"

His martial granduncle had gone to see someone's illness, so how could he, as his Grand – disciple, sit here and drink tea with a coffee cup? Even if he couldn't help, he had to correct his attitude!

Elon Musk felt a little strange, but he immediately said, ""Of course! This way, please!"

Elon Musk and grams took Xia ruofei and Li Yifu directly through the indoor elevator and arrived on the third floor.

Chapter 3235 Lifting heavy weights as if it were light (2)

The group passed through a stone corridor and came to a room at the East End.

Elon Musk pushed the door open and entered. Xia ruofei and the rest followed closely behind.

Xia ruofei saw a young female nurse in a white coat and a middle – aged woman in her forties in the room. They looked like nannies who were in charge of taking care of the children.

She was probably one of those confinement ladies in China. However, foreigners did not pay attention to confinement, so naturally, there was no such thing as "confinement lady".

When the young nurse saw Elon Musk and his group walk in, she quickly made a shushing gesture and said softly, ""Mr. Masker, the child has just fallen asleep. Please keep quiet!"

Elon Musk looked at Xia ruofei, his eyes asking for her opinion.

Xia ruofei nodded and said, ""It doesn't matter if you're asleep ..."

After that, he walked to the modified crib and leaned in to observe.

Little X was still a newborn, and his hair was a little sparse. The skin on his face had not become completely smooth, and there were some parts of his face that were peeling off. He did not look cute at all.

Although he was asleep, his brows were slightly furrowed, clearly not very comfortable.

On the child's neck, there was an obvious red and swollen area, and even his face was slightly deformed.

There was a rack beside the crib, and on it was an infusion bag. Little X was still receiving an infusion, but the child's blood vessels were too thin. Only the blood vessels in the temples were barely enough for the infusion, so the infusion needle was inserted into his forehead. It was a shocking sight.

Xia ruofei reached out and carefully avoided the needle. He gently touched little X's forehead.

The nurse's expression changed slightly, and she couldn't help but call out softly, "This gentleman ..."

"Stop!" Elon Mask waved his hand to stop the nurse.

The nurse stopped in her tracks, but her face still had a trace of displeasure.

Xia ruofei's hand moved away from the baby's forehead. Other than Li Yifu, no one else could tell that Xia ruofei had actually used a small wisp of spiritual power to put the baby into a deeper sleep.

In fact, the child's brows had already slowly relaxed after the spiritual power took effect. This was because he could not feel any pain in his body in deep sleep.

Xia ruofei reached out and gently opened the child's eyelids to take a look. Then, he gently pried open the child's mouth to observe the tongue. Finally, he pulled a stool over and sat by the crib. He placed his fingers on the child's wrist and took his pulse.

A child's pulse was much weaker than an adult's. Without a certain level of martial arts, it was not easy to check the pulse. However, this was not a problem for Xia ruofei.

After a while, Xia ruofei stood up.

When he was taking the pulse, he had also used his mental power to do a thorough examination of the child, so he already had an idea of what was going on.

He nodded lightly at Elon Mask and took the lead to walk out of the room.

Elon Musk and the others quickly followed, leaving the young female nurse and the nanny looking at each other in confusion.

They didn't know what the Asian that their boss had brought in was doing. He didn't say anything when he came in. He rolled his eyes and pinched the child's mouth. In the end, he even touched his wrist and closed his eyes in deep thought. After a series of operations, he got up and left without saying anything.

The nurse thought for a moment, then walked to the corner of the room, took out her phone, and called the personal doctor of Elon Musk, Mannu, and reported the situation to him.

Mannu and his medical team lived in this mansion, including this nurse. Strictly speaking, they were all members of Mannu's medical team, so to be precise, Mannu was her boss.

She had to be responsible for her direct boss.

In fact, providing medical services in this mansion was also a temporary measure. Once the treatment plan was determined, they would definitely have to go to a professional medical institution for surgery and follow – up treatment.

It was just that the rich could choose the best private medical institutions and receive better treatment than public hospitals.

After leaving the room, Elon Musk led Xia ruofei to the room next door and asked impatiently, “Doctor Xia, how’s the situation?”

Xia ruofei pondered for a moment and said, “it’s indeed a Strigoi.” The primary lesion should be in the neck, but the course of the disease is progressing very quickly. It has begun to spread to the brain, and there are already tumor cells in the eye sockets. In addition, there are early lymph node metastasis and blood transmission, and there are also signs of infection in the lungs. ”

Elon Musk and grumus looked at each other and were shocked. Xia ruofei’s judgment was almost exactly the same as the medical team’s examination results yesterday. That was the examination result of Dr. Mannu and the rest using a lot of top medical equipment! Xia ruofei only needed to look at her eyes, tongue, and pulse to make such an accurate judgment. It was simply unbelievable.

The reason why it was said to be “almost” exactly the same was that the medical team did not find any transfer of the eye socket during the examination.

However, Elon Musk and gramus already had complete trust in Xia ruofei’s medical skills. At least, the examination method had convinced them. So, they would rather believe that the medical team’s examination was not thorough enough and not that Xia ruofei’s judgment was wrong.

Elonmask was somewhat dumbfounded and could not help but ask, “Dr ... Dr. Xia, How did you come up with such a detailed conclusion?”

In the field of Western medicine, Xia ruofei’s method of examination was the simplest physical examination. It could only make a basic judgment and could not be so accurate.

Elon Musk had seen Xia ruofei’s simple inspection technique with his own eyes. He even had an illusion that if he learned a few moves, he would be as good as Xia ruofei.

Xia ruofei hesitated for a moment and said slowly, “After the preliminary examination, the child’s tongue is light, fat, white, and slightly greasy, and her pulse is deep and smooth. According to the symptoms of the disease and the child’s physique, it can be judged that the phlegm and heat are combined, and the blockage will transform into heat, so the affected area will be in pain and red. The child’s vital energy has been damaged, so he can’t fight against the disease ...”

It was indeed difficult to express Chinese Medicine’s dialectical theory in English. Xia ruofei had to rack his brains before he could barely translate it, and some words did not even reach the meaning.

As for elonmask and gramus, they were even more confused. They had no idea what Xia ruofei was talking about, but it sounded magical ...

“Mr. Masker, doctor Xia’s medical skills are second to none in China,” said Li Yifu with a smile. A friendly reminder, not all Chinese medicine doctors can make such an accurate judgment in a short time. Also, Chinese medicine generally focuses on treating both the root and the root of the problem. The treatment process is often longer than Western medicine, and the effect is not as fast. So, you must not blindly believe in Chinese medicine. ”

Li Yifu also reminded him out of good intentions, in case Elon Musk became a fanatic fan of Chinese medicine in the future and wanted to invite Chinese medicine doctors to take a look at any illness. If there was a serious illness, it would be easy to be delayed, and the probability of encountering scammers was not low.

Li Yifu continued,”of course, Dr. Xia’s traditional Chinese medicine treatment is different from other people ‘s. Generally speaking, the effect is very fast, even faster than Western medicine treatment. It also has an advantage that Western medicine can’t compare with. That is, most situations don’t require surgery treatment, so it won’t hurt the patient’s vitality.”

Elon Musk nodded and said,””Thank you for your reminder and explanation, Mr. Li! Thank you!”

Li Yifu smiled and nodded.

Elon Musk immediately looked at Xia ruofei and asked eagerly,””Doctor Xia, you’ve already understood little X’s condition. Can we use Chinese medicine to treat him?”

Xia ruofei smiled and looked at the eager gazes of elonmask and gramus. He nodded with certainty and said,””I’ve treated a malignant tumor that’s much more serious than this. The patient has now fully recovered. Although little X’s condition is a little serious, because it was discovered in time, it’s not a big problem to completely cure him.”

Chapter 3236 If you’re not convinced, come and argue (1)

When Xia ruofei said this, elonmask and gramus could not believe it. Of course, they had great hope, but when Xia ruofei said that he could be completely cured, it gave them a sense of disbelief.

Li Yifu had always idolized Xia ruofei blindly. When he saw that Elon Musk and glamus were both stunned, he couldn’t help but say,””Mr. Masker, since Dr. Xia said he’s confident, then there’s definitely no problem. He never makes promises easily!”

Elon Musk came back to his senses. He stood up and said,””Doctor Xia, can you really cure little X completely? What’s the probability of a relapse?”

The probability of recurrence was still very high, and the metastasis was very fast, especially for the type of Strigoi that little X had. Once it relapsed, it was basically a death sentence, which was why the survival rate was so low.

Xia ruofei smiled.”In my opinion, the standard for a complete recovery naturally includes the factors that cause the relapse. If the relapse happens, can it still be called a complete recovery?”

“A hundred percent no – relapse?” Elonmask could not help but open his mouth, revealing a look of disbelief.

At this moment, an angry voice was heard, ""Mr. Masker! I'm sure he's a despicable liar! No one can guarantee that there's a 100% non – recurrence rate for Strigo!"

As soon as he finished speaking, the personal doctor of Elon Musk, Mannu, walked into the room with a few pediatricians.

After the nurse reported the situation to Mannu, he felt that something was wrong and quickly brought a few experts to little X's room. Before they entered little X's room, they heard the conversation between Xia ruofei and Elon Musk in the next room.

When Mannu heard Xia ruofei say that she was completely cured and had no relapse, anger rose in his heart. He could not help but push open the door and rush in.

Seeing the Furious Mannu, elonmask could not help but frown slightly and said, ""Dr. Mannu ..."

"Mr. Masker, please forgive me for being presumptuous ..." Mannu bowed slightly to Elon masker and said, "I accidentally heard your conversation from outside. I couldn't help it, so I barged in."

"It's fine," Elon Musk waved his hand and said. Let me introduce them first! Dr. Xia, this is my private doctor, Dr. Manu, and his medical team. Dr. Mannu, this is Dr. Xia from China. In the field of Traditional Chinese Medicine ..."

"I'm sorry. Chinese medicine?" Mannu could not help but interrupt Elon Musk again and said seriously, "Mr. Musk, I know that you are very concerned about little X's condition and hope to increase his survival rate as much as possible. Perhaps it's because of this that some swindlers have a chance to take advantage of it!"

After he finished speaking, Mannu's face was full of mockery. He looked at Xia ruofei with disdain and said, ""As far as I know, your so – called Traditional Chinese Medicine is still using the most primitive method, extracting the pitifully small amount of medicinal ingredients from roots and bark. There are no scientific experiments, no precise instruments, no clear theoretical system ... If I remember correctly, there hasn't been a Chinese medicine approved to enter the United States market yet! Perhaps your country has no intention of applying at all? Because you know that the so – called medicine you make from the bark of the roots can't pass the strict drug testing standards and drug testing procedures of the United States!"

After firing off like a machine gun, Mannu turned his gaze to look at Elon Musk and said, ""Mr. Masker! Medical science is a very rigorous discipline. You are a giant in the field of science and Technology, a legend in Silicon Valley! How can you believe in this kind of pseudoscience?"

It had to be said that Mannu's momentum was still very strong. Even elonmask could not help but waver a little. However, when he thought of Xia ruofei's unpredictable examination methods, and the temptation of Xia ruofei's promise of a complete cure, he finally became determined again.

He said, "Dr. Mannu, I just want to let Dr. Xia try the methods of Chinese medicine." Doctor Xia's treatment doesn't require surgery on little X, and it won't damage his body. It won't affect you and your team's treatment work!"

"How can it not be affected?" Mannu opened his eyes in an exaggerated manner, spread his hands, and said, "all the Chinese medicine has not been tested. If it is rashly given to the patient, it will cause

unpredictable consequences! Besides, I can't guarantee that it won't conflict with our medicine. If it goes out of control, it'll be very dangerous. "

Naturally, Elon Musk was inclined to let Xia ruofei try first. After hearing Mannu's words, he could not help but look at Xia ruofei, wanting to hear how Xia ruofei would refute Mannu's point of view.

From the moment Mannu barged into the room, Xia ruofei had a calm smile on his face. Even when Mannu belittled Chinese medicine, he did not show any displeasure, giving off an unfathomable feeling.

Only when everyone's eyes were on him did he adjust his sitting position to be more comfortable. He glanced at Mannu and said lightly, ""Mr. Mannu, right? Although your point of view is not worth refuting, since you've said so much, then I'll ask you a few questions!"

Chapter 3237 Come and argue if you're not convinced (2)

Manu shrugged his shoulders and lifted his chin at Xia ruofei with a disdainful expression. ""I'm all ears!"

Looking at Mannu's "if you're not convinced, come and argue" look, Xia ruofei smiled lightly and said, ""Do you know how long the history of Chinese medicine has been passed down? Do you know how deep and profound the theoretical system of Chinese medicine is? Of course you don't know! Thousands of years ago, when Westerners still regarded bloodletting therapy as the standard method, China's Traditional Chinese Medicine already had a complete theoretical system. You didn't know what the unity of heaven and man was, yin and yang and five elements, and you didn't understand the five elements and six qi, as well as the meridians of the human body, but you could talk big about traditional Chinese medicine. It was like a primitive man who only knew how to use simple stone tools and saw a modern plane. He would never understand the modern means of transportation. However, primitive people would worship planes as gods, but you talk big about Chinese medicine. We usually call this ignorance!"

"You ..." Mannu's face was red with anger.

However, Xia ruofei did not give him a chance to speak. He only paused for a moment before continuing, ""Isn't it ignorance to attribute everything you don't understand as pseudoscience? And he was treating ignorance as something interesting! Mr. Manu must be very proud of his own argument that Chinese medicine could not pass the RDA standards and enter the United States. What I want to say is United States the drug test standards in the United States are for Western medicine. Why should Chinese medicine be evaluated according to these standards? Also, why did Chinese medicine have to enter the United States market? Is this our loss or the UA's loss?"

Then, Xia ruofei shrugged and said, ""I don't know what gave you such a ridiculous sense of superiority!"

Mannu almost died of anger to Xia ruofei. He panted and said, ""You can't change the truth even if you say all sorts of things! Cancer is a problem that can't be overcome for a long time. If Chinese medicine can really cure cancer, you guys would have spread it all over the world! I'm sorry, but I don't remember seeing a case of Chinese medicine successfully curing cancer in a top – tier weekly magazine! Therefore, your glib tongue is like a castle in the air, and it can't hold its ground at all!"

Xia ruofei smiled and said, ""You can't argue, so you're acting shamelessly? This is indeed very United States!"

“You didn’t answer my question directly!” Mannu felt that he had gotten back 10% of the profits, and his face also revealed a trace of pride.

In his opinion, this was an unsolvable problem.

Xia ruofei said calmly, “if you had brought up the truth earlier, I wouldn’t have wasted so much time!” Of course, I’ll tell you with the truth that Chinese medicine is much more advanced than you think!”

“Unfortunately ... Before you prove yourself, I won’t agree to let you treat my patient!” Mannu said, “Mr. Masker, I’m your private doctor. I have to be responsible for my employer. If you insist on letting Mr. Xia treat little X, then I’ll have to resign. Because I’m not sure if such an irresponsible treatment will bring about unpredictable results. For the reputation of me and the team, I must avoid such risks!”

“Xia ruofei!” Elon Musk looked at Xia ruofei.

Mannu was also a top doctor in the United States. Naturally, Elon Musk did not want him to resign and leave easily. After all, no matter how rich he was, it still required a little luck to find a reliable private doctor.

Xia ruofei smiled and said, “of course I won’t use little X’s case to prove my medical skills!” However, it doesn’t seem to be too difficult to speak the truth ...”

Xia ruofei then said indifferently, ““Dr. Mannu, I wonder if you know about Mr. Elonmask’s physical condition?”

“Of course!” Mannu replied proudly. I know Mr. Masker’s physical condition like the back of my hand!”

“What about the ringing in his ears recently?” Xia ruofei asked, “as far as I know, Mr. Mersk’s tinnitus is very serious, but you don’t seem to have a good solution ...”

Mannu could not help but be stunned for a moment, and then immediately said: “Mr. Masker’s tinnitus has only appeared recently, and we have been focusing on little X’s treatment plan for the past few days. Tinnitus is not life – threatening and can be treated later! This was also a method to optimize the management of medical resources! Of course, I’m afraid that your Chinese medicine doctors don’t understand this at all ...”

“Then ... Why don’t we ask Dr. Mannu to formulate a treatment plan for Mr. Masker now?” Xia ruofei smiled. “Although the tinnitus is not life – threatening for the time being, it is very painful for the patient.”

“Yes!” Elonmax could not help but nod.

There were many kinds of tinnitus. Some were high – frequency sounds similar to the chirping of cicadas, and some were low rumbling sounds. No matter what kind of sound it was, if it kept ringing in the ear for 24 hours, no one would feel good.

Especially in the dead of night, this sound became more obvious.

Therefore, tinnitus was often accompanied by insomnia, headaches, and other symptoms.

Mannu could not help but be stunned. He looked at Elon Musk and said, "Mr. Masker, I've explained to you last time. At present, there is no particularly effective treatment for tinnitus, and there are many reasons for it. I think it's because of little X's condition and the stress you've been under at work. I believe that it'll ease after some time ..."

When Xia ruofei heard this reply that was as he had expected, the smile on his face became even more brilliant. He spread his hands and said to Elon Musk, "Mr. Masker, do you see that? Was this the so-called rigorous Western medicine? You can only hope that the minor ringing in your ears will be cured without any medicine. "

"You ..." Mannu was so angry that he stomped his feet. "You're changing the concept!" Difficult – to – treat illnesses exist in any era, and this is completely different from our professionalism!"

Xia ruofei shrugged and said, "then, I'll tell you the truth. The illness that you think is difficult to treat is just a small problem that can be easily solved by Chinese medicine." In fact, little X's condition is the same. You can't come up with a complete plan for your employer even after racking your brains, but in my opinion, it's not that difficult!"

With that, Xia ruofei ignored Mannu and turned to look at Elon Musk, saying, "Mr. Masker, before I treat little X, I would like to solve your tinnitus. Do you mind?"

"Of course!" Elon Musk quickly replied. If you're willing to treat me, I'll be extremely grateful!"

Elon Musk also had the intention of testing Xia ruofei's medical skills. After all, Xia ruofei had only shown his ability in testing. In actual treatment, he had not shown his true ability.

Although tinnitus and little X's sarcoma were two completely unrelated diseases, if Xia ruofei could really solve the problem of tinnitus easily, it would prove that he had extraordinary medical skills. After all, Mannu had said just now that in the view of Western medicine, there was no particularly good solution to this kind of nerve tinnitus.

What's more, he had been troubled by his tinnitus these days. If it could be cured, it would be a great relief!

Xia ruofei nodded and picked up the small medical kit by his feet. After opening the kit, Xia ruofei took out a small cloth bag with a set of silver needles and unhurriedly spread it out on the coffee table.

He said, "I need to explain first. In the treatment process, I will use these very thin silver needles. This is a treatment method in Chinese medicine called acupuncture. It is not a surgery as defined by Western medicine." Moreover, these silver needles are very thin, so you won't feel any pain. At most, you'll feel like you've been bitten by a mosquito, so there's no need to be afraid. "

Mannu took a look and found that the set of silver needles was indeed very thin, as thin as a cow's hair. He knew that such needles would not cause any harm to Elon Musk, so he only pouted and did not say anything.

In fact, Mannu even felt that these silver needles, which were much thinner than the ones used for blood extraction, would not be able to penetrate human skin successfully. So, he was still holding on to the mentality of watching a show, waiting for Xia ruofei to give himself away in the next moment ...

## Chapter 3238 Facts speak louder than words (1)

In fact, what Mannu did not know was that there were countless Chinese medicine doctors who could use the smallest silver needle. This was not a great skill, but if the silver needle was not used well and the acupuncture point was chosen wrongly, it could lead to serious consequences. If this thin silver needle was used by a quack doctor, it could hurt one's life.

Mannu didn't even know the acupuncture points of Traditional Chinese Medicine, so naturally, he wouldn't know these things.

Elon Musk looked at the silver needles. Although they were thin, they were not short. Thinking about how long they were, he was a little scared.

However, there were so many people watching, and his girlfriend, glams, was also there. He also wanted to use this treatment to test Xia ruofei's medical skills, so he could not back down no matter what.

Elon Musk hesitated for a moment, then nodded and said, "Yes, doctor Xia, please treat him according to your Chinese medicine method! I have no objections."

Xia ruofei nodded. "Because little X's subsequent treatment will also use acupuncture. I'm telling you in advance so that you can be mentally prepared."

When Elon Musk heard that he was going to use the acupuncture technique on little X, he immediately burst out with fatherly love and said without hesitation, "In that case, try it on me first!"

When Xia ruofei saw that Elon Musk was like a warrior who had left and would never return, he could not help but find it funny.

"As long as the technique is correct, there is no danger in acupuncture," he said. "Mr. Masker, please relax. If your muscles are tense, it is not conducive to acupuncture."

Li Yifu also laughed and said, "Mr. Masker, Dr. Xia's words are very important. If you keep tightening the muscles of your whole body, the silver needle may get stuck or even break inside. So you must relax!"

Elon Musk was even more nervous after hearing Li Yifu's words, and it was difficult for him to relax.

Xia ruofei could not help but look at Li Yifu and shook his head, not knowing whether to laugh or cry.

He didn't let Elon Musk relax. Instead, he opened a bottle of medical alcohol, dipped a cotton swab in the alcohol, and sanitized the silver needle.

Then, he also used cotton swabs dipped in alcohol to disinfect the acupuncture points behind Elon Musk's ears.

After that, Xia ruofei picked up a silver needle with his fingers and said calmly, "Mr. Masker, we will start the treatment now. Please relax your body ..."

These words didn't sound like much to grams and the others, but when they fell into elonmask's ears, it seemed to have an invisible magic that made him relax involuntarily.

Of course, this was just a small application of the mental energy hypnotism technique. Now that Xia ruofei's mental energy had increased greatly, this small technique could be said to be very familiar. There was no possibility of failure when used on ordinary people.

Just as Elon Musk relaxed, Xia ruofei's right hand quickly stretched forward and then immediately retracted.

Elon Musk didn't even feel anything. He only felt an itch behind his ear. It wasn't painful at all. Even a mosquito bite was more painful than this.

When he saw that the silver needle in Xia ruofei's hand had disappeared, he realized that Xia ruofei had completed the acupuncture process.

To Grims, Mannu, and the rest, Xia ruofei's technique was even more amazing. The speed at which he inserted the needle was too fast, causing everyone's vision to blur. They seemed to see Xia ruofei's hand shake, and then they saw that the silver needle had already been inserted into a certain position behind Elon Musk's ear, and it was still trembling.

Before the crowd could react, Xia ruofei had already picked up the second sterilized silver needle. Similarly, he did not need to identify the acupuncture points. He waved his right hand and the second silver needle was inserted.

Xia ruofei's needle – inserting process was as smooth as floating clouds and flowing water. Everyone was dazzled by it.

In just a few breaths, Xia ruofei had already inserted the silver needles into six acupuncture points.

The order and depth of these silver needles were paid attention to, but Glamus and the others naturally couldn't see through it. Even Li Yifu didn't know much about it, so at most, he was just watching for fun.

For Elon Musk's problem of tinnitus, if he used the petals of the spirit Heart Flower, perhaps one – tenth of the petals would be enough to solve the problem.

However, to Xia ruofei, who had already integrated many lost and precious Chinese medicine books, this problem could be easily solved with Chinese medicine methods. Naturally, there was no need to waste precious petals.

What's more, he was cured simply by drinking a medicinal paste, so how could he show his medical skills?

Hence, Xia ruofei still chose acupuncture, which had a strong "spectator" nature. This would also give Elon Musk and Glamus a greater shock and make them more determined to invite him to treat little X.

After inserting the needles, Xia ruofei began to gently twist the silver needles and sometimes flicked a certain silver needle with his fingertips.

If a Chinese medicine master were to see this long – lost acupuncture technique, he would definitely be shocked.

It was a pity that there were no audience members who knew the industry.

Of course, even though they did not understand, they could still see that Xia ruofei's movements were smooth and comfortable.

On the other hand, Elon Musk felt it more directly. Although he could not see Xia ruofei's movements, he could feel an obvious soreness at the spot where the silver needle was inserted. It was as if someone had applied a hot towel on him. From the back of his ears to his neck, he felt warm.

Chapter 3239 Facts speak louder than words (2)

It was the first time in his life that Elon Musk had received acupuncture. He didn't expect that the scary – looking silver needles would not only not hurt, but also give him a feeling of floating. This feeling was even more comfortable than the feeling of smoking marijuana when he was young.

Elon Musk could not help but close his eyes.

After Xia ruofei was done with the needles, she deftly removed the silver needles, disinfected them again, and put them back into the needle bag.

He then said, "Mr. Masker, it's done." How do you feel?"

Only then did Elon Musk open his eyes. He realized that the acupuncture had been completed, and the feeling of soreness, swelling, and heat at the place where the needle had been inserted was indeed slowly fading.

Elonmask felt that he had not had enough, and blurted out, "So fast?"

Xia ruofei smiled and said, "Traditional Chinese Medicine is all about fairness and gentleness. It's best if it's just right. If the acupuncture time is too long, it may backfire." Mr. Masker, please feel it. If there are no accidents, the tinnitus should have improved."

It was only then that elonmask remembered the important matter. He quickly closed his eyes and felt it.

Mannu could not help but laugh. "I admit that your performance is very good. However, you want to achieve the purpose of treatment with such a simple injection? aren't you being too whimsical?"

"Shut up!" "What's wrong?" shouted elonmask with a frown.

Mannu could not help but be stunned, and he looked at Elon Mask with his mouth slightly open.

With an unhappy expression, elonmask said, "Dr. Mannu, please keep quiet. I'm feeling if the tinnitus is getting better ..."

Tinnitus. If it was in a relatively noisy environment, it was basically impossible to feel any abnormalities. Only when the environment was quiet would the sound of tinnitus be infinitely amplified.

Elon Musk was carefully feeling if his tinnitus had been relieved, but Mannu kept on chattering at the side. He could not help but reprimand him.

Only then did Mannu react, his face alternating between red and white as he said, "I'm sorry, Mr. Masker ..."

Elon Musk waved his hand and said, "It's nothing. Please keep quiet, everyone. Thank you!"

The room suddenly fell silent, and only the faint sound of breathing could be heard.

Although Mannu did not dare to speak anymore, he still looked at Xia ruofei with disdain. He did not believe that acupuncture alone could solve the problem of tinnitus.

Elonmask tilted his head and felt it for a while, and grams also looked at him nervously. After all, this was not only related to whether the problem of Elon Musk's tinnitus could be solved. More importantly, if Xia ruofei's superb medical skills were proven, little X's survival rate would increase greatly!

However, in order not to affect elonmask, he did not dare to speak.

After a long while, a hint of excitement flashed in elonmask's eyes as he said, ""Everyone, I'm very sorry, but I have to leave for a while! Please wait here for a few minutes, I'll be back soon!"

"My dear ..." Gramus asked worriedly.

Elonmask smiled and patted gramus 'hand.' ""It's alright, my dear. Take care of the guests. I'll be back soon!"

After he finished speaking, Elon Musk looked at Xia ruofei again.

"Please!" Xia ruofei smiled.

Elon Musk quickly walked out of the room, then passed through the long corridor and took the elevator to the basement.

There was a very advanced film and music Hall here.

In order to have the best viewing experience, the facilities in the film and entertainment Hall were very advanced, including sound insulation.

Even the walls were made of very professional sound – absorbing materials.

It could be said that as long as the door was closed, the inside would be absolutely quiet.

Elon Musk pushed open the door and walked into the studio with excitement and anxiety. After he closed the door, he went straight to a seat in the middle of the room and sat down, quietly enjoying the music.

In fact, when he was upstairs just now, elonmask could no longer feel his tinnitus.

However, he was worried that it was his own illusion and that the surrounding sound was too noisy, so he could not hear the ringing.

In fact, this was the case of being too concerned. He had been suffering from tinnitus for the past few days. After solving the problem, he could not believe the truth of the matter.

Elon Musk was now sitting in the studio. He could even hear a pin drop on the ground, but he still couldn't hear any tinnitus.

In the past, in such a quiet environment, the low – frequency rumbling in his left ear was enough to drive him crazy. If the high – frequency sound like the chirping of cicadas was added to his right ear, it would be a sour feeling.

Now, that annoying, never – ending voice had finally disappeared.

Elon Musk almost burst into tears.

He sat in the soft first – Class seat for a long time before he finally confirmed this fact.

For the first time, he felt that peace was wonderful.

Elon Musk remembered that Xia ruofei and the others were still waiting upstairs. He could not be bothered to enjoy the silence any longer. He quickly got up and left the studio. He took the elevator back upstairs and walked into the room next to little X.

Xia ruofei smiled as he looked at Elon Musk, who pushed the door open and entered.

Xia ruofei had already used his spiritual power to detect Elon Musk's actions earlier on, so he was very clear about what he was doing.

As soon as he entered the door, Elon Musk said excitedly, "Doctor Xia, this is amazing! My tinnitus has completely disappeared! Even in the quietest environment, I can't feel a tingling in my ears!"

Hearing this, Mannu gasped and revealed a look of disbelief.

At this moment, Xia ruofei had already ignored Mannu. He smiled and said to Elon Musk, "Mr. Masker, I don't think you have any more doubts about the effect of acupuncture now, right?"

"Of course!" "This is the most amazing medical skill I have ever seen!" Chinese medicine is simply too shocking!"

"My dear," Mannu said in surprise. "The symptoms of the tinnitus have really disappeared?"

Elon Musk nodded and said, "Yes! I just went to the recording room downstairs for a while, and the ringing in my ears is completely gone!"

"Heavens! This is amazing!" He was so excited that tears welled up in his eyes, and he used 'Auntie' a few times to express his feelings.

On one hand, she was happy for Elon Musk, but more so because of Xia ruofei's magical acupuncture skills, which had greatly increased her confidence. She was already full of hope for the treatment that little X was going to receive.

Mannu's face was pale as he muttered to himself, "Impossible ... Impossible ... This doesn't make any sense ..."

It was only then that Elon Musk noticed Mannu's existence. His tone was a little cold as he said, "Dr. Mannu, the truth is here. I think you should put away your prejudice against Chinese medicine!"

Mannu's entire body quivered, and then he said dejectedly, "I understand, Mr. Masker. I apologize for my previous remarks. "

...

"I think ..." Elon Musk said, "the person you should apologize to is Dr. Xia."

Mannu's face turned even uglier, but he still braced himself and said to Xia ruofei unwillingly, "Doctor Xia, I'm sorry."

Xia ruofei smiled and said, "I'll give you a piece of advice on behalf of China's Chinese medical field." We Chinese are all about being inclusive. I think doctor Mannu can learn more about Chinese medicine when you have time, it might be helpful to your work."

Mannu squeezed out a smile and said, "I will. Thank you for your suggestion."

After saying that, Mannu took a deep breath and said to Elon Musk, "Mr. Masker, I don't think I'm suitable for the position of your private doctor ..."

Chapter 3240 Dawn (1)

Elon Musk waved his hand and said, "Dr. Mannu, I am quite satisfied with your work. These few days, you and your team have done your best for little X. So, there is no need to resign."

"Mr. Masker ..." Mannu felt a little ashamed and felt that he had no face to stay any longer.

Elon Musk waved his hand and interrupted Mannu's words, saying, "I still hope that you can stay, Dr. Mannu, and continue to perfect little X's treatment plan. We can be a backup option."

At this point, elonmask looked at Xia ruofei and asked politely, "Doctor Xia, you don't mind, do you?"

Xia ruofei shrugged and said, "of course! It's better to be safe than sorry!" Even though I don't think it's necessary, I won't interfere with your decision."

Elon Musk looked a little embarrassed, and Li Yifu, who was at the side, also looked unhappy. He felt that Elon Musk did not trust Xia ruofei enough. On the other hand, Xia ruofei remained calm and did not show any emotional fluctuations.

Elonmask hesitated for a moment and said, "Then please let Dr. Mannu's team stay! After all, they still have to provide other medical services for me and my family."

Xia ruofei nodded with a smile and said, "I have no objections, but I hope that Mr. Mannu and the other members of the team can sign a confidentiality agreement ..."

"A confidentiality agreement?" Elon Musk was stunned for a moment.

"Regarding today's matter and the patient's subsequent treatment, I don't want the outside world to make a big deal out of it. So, I think a confidentiality agreement is necessary." Xia ruofei said.

Elonmask said in confusion, "Mr. Xia, if you can cure such a dangerous disease, you will definitely become famous around the world! And ..."

"I don't want to be famous." Xia ruofei interrupted Elon Musk's words.

Elon Musk was very puzzled by Xia ruofei's decision. There was actually someone in this world who would complain about his fame? He was in the internet and high – tech industry, so he had some deep – rooted ideas. Sometimes, good news or even an illusory concept could double the market value of a technology company. Therefore, he could not understand Xia ruofei's low – Profile approach.

However, since Xia ruofei had made his decision, he would not object. After all, it was his freedom.

Therefore, Elon Musk nodded and said, "No problem!"

"Dr. Mannu, this confidentiality agreement ..."

"We'll sign it!" Mannu said without hesitation.

Although he didn't understand the Chinese 'indifference to fame and fortune', it was only good for him to keep this high – paying job. As for the confidentiality agreement, it was not a loss for him. Even if he didn't sign any agreement, he was not willing to help Xia ruofei promote everywhere.

Elon Musk nodded, took out his mobile phone, and called his assistant to arrange the confidentiality agreement.

Elon Musk's company had many cutting – edge technologies, and confidentiality was of utmost importance. Such confidentiality agreements had templates, and it was not difficult to make slight changes to the Terms based on the templates.

"Doctor Xia, I've already made the arrangements." Elon Musk said, "after the confidentiality agreement is ready, Dr. Mannu and his team members will sign it as soon as possible!"

Xia ruofei smiled and nodded.

Mannu felt that he had no face to stay any longer, and took the opportunity to say, "Mr. Masker, I'll go and perfect the treatment plan first!"

"Alright, thank you!"

"Let's go!" Mannu left the room with his team members. He had come in aggressively, but not only did he not expose the "liar", but he had also been slapped in the face. In the blink of an eye, their high – end medical team had become a backup. It was really heartbreaking ...

Xia ruofei said to Elon Musk, "Mr. Masker, regarding the problem of tinnitus, I have to tell you that acupuncture can only treat the symptoms ..."

"Treat the symptoms?"

Although Xia ruofei tried to explain the word 'treating the symptoms' in English in an easy – to – understand way, it was obvious that Elon Musk still did not understand.

Xia ruofei smiled and said, "in simple words, it can only relieve the pain."

"Ah?" Elon Musk was shocked. He didn't want to experience the torture of tinnitus again. "That ... That means that such symptoms will appear in the future? Then can I do acupuncture once in a while?"

"This can be done, but it will only treat the symptoms and not the root cause." Xia ruofei said, "so if you want to solve this problem completely, you need to take Chinese medicine."

Elon Musk heaved a long sigh of relief. He had thought that this illness could never be cured!

"No problem!" He quickly replied. I'll listen to you, doctor Xia! We'll treat him however you want!"

Xia ruofei smiled and nodded. He asked for a pen and paper from Elon Musk and started writing. After a while, Xia ruofei stopped writing and handed the piece of paper to him.

Elon Musk took it and looked at it. It was all in Chinese. Although the words looked very ethereal, even he, who did not understand Chinese at all, felt that these words were full of spirit, but the key was that he did not know what the content was!
