

God tier Farm 3311

Chapter 3311 A team wipe (2)

Xia ruofei had placed a huge pile of spiritual stones at the core of the formation. If there was a shortage of energy, the spiritual energy in the spiritual stones would be absorbed by the formation.

Therefore, the spiritual stones were piled up into a small mountain at the core of the formation.

It was only a hundred spiritual stones, but the pile of spiritual stones in the shape of a small hill did not change at all. If Xia ruofei had not used his spiritual power to accurately sense the consumption of spiritual stones, there would not have been any change from the outside.

Hence, in order to save time, Xia ruofei increased the power of the formation when he was dealing with the six fish that had escaped the net.

These six star beasts were out of luck.

Previously, the black rays of light had only attacked one star Beast. After Xia ruofei made a hand seal, the black rays of light suddenly appeared in a dense formation and attacked the six intermediate star beasts.

When the six star beasts saw the black rays that were like fine raindrops, their eyes were filled with despair. They had even forgotten that there was no point in dodging under such an all – encompassing attack.

With a series of plopping sounds, the bodies of these star beasts were directly pierced through by many sharp rays of light, leaving several finger – sized wounds on their bodies, causing blood to spray out.

Then, their bodies started to burn.

After a short while, the six star beasts stopped moving. In fact, three of the star beasts were already dead after being pierced by the black light. Because there were too many black lights this time, these three star beasts were unlucky enough to be hit in their vital parts.

Of course, looking at it from another perspective, they should be even luckier, because they did not suffer before they died, and they died almost instantly.

As for the remaining three star beasts, they were still being roasted for a long time before they died in pain.

Xia ruofei saw through the perceptual mirror that the mission progress had increased to 16/100.

He couldn't help but reveal a satisfied smile, and even snapped his fingers.

He was very satisfied with the power of the formation. Even though the consumption was slightly higher and the power of the formation was increased by several times, Xia ruofei had used up 500 spiritual stones in just a few minutes.

In order to get rid of the remaining star beasts as soon as possible, the spirit stones consumed in less than a minute were almost four times that of the previous ten star beasts.

However, Xia ruofei did not have much other than spiritual stones. The spiritual stones that he had obtained from scholar Yuntai's storage ring were enough to form a mountain. He did not even bat an eye at the mere consumption of 500 spiritual stones. He did not feel anything at all.

After dealing with these 16 star beasts, Xia ruofei did not delay any further. If he wanted to break the record, he had to kill at least 84 intermediate star beasts in the remaining hour or so. Time was of the essence.

Therefore, when the last star Beast became a number in his mission progress, he immediately waved his hand and put away the formation materials and spirit stones. Then, his figure flashed, and he stepped on the flying sword and flew close to the ground, quickly escaping into the dense forest.

It should be said that this trap & kill array was very effective against star beasts.

Xia ruofei also discovered that fire attacks seemed to be particularly effective against star beasts. He didn't know if it was because of the materials used, but the black light produced by the formation would quickly ignite the entire body of the Star Beast once it came into contact with it. It was almost an accurate hit.

However, the formation's weakness was also very obvious.

They had to make arrangements in advance.

This trap & kill array was a little complicated. Even though Xia ruofei was very familiar with it, he still needed a few minutes to set it up.

It was decided that he couldn't set up the formation at the last minute after encountering the Star Beast. He could only set it up in advance and wait for the Star Beast to fall into his trap.

In this vast forest, Xia ruofei was not sure where the star beasts were. Even if there were stupid star beasts that ran into the formation, it was a small probability. It was impossible for 84 of them to appear in a row, right?

Hence, Xia ruofei had to take the initiative to attack. It would be best if he could chase away one astral beast and attract a whole bunch of them. Then, he would only need to wait to harvest the mission progress.

Xia ruofei's figure flickered in and out of view in the dense forest. He was moving forward at a very fast speed.

Of course, he was still on high alert. The forest was full of danger. If Xia ruofei was not careful, he would be at a disadvantage even if it was an intermediate Star Beast, let alone a high – Level one.

After about three minutes, Xia ruofei suddenly stopped.

He was now more and more familiar with the control of the qushuang flying sword. It only took him two seconds to go from extremely fast to extremely still. It was completely seamless.

Within the range of Xia ruofei's spiritual power, a silly Star Beast appeared.

The astral beast sniffed the surrounding grass while looking left and right as it moved forward.

Xia ruofei wasn't sure what level this astral beast was, but he could tell that it wasn't likely to be a high – Level one.

As expected, when Xia ruofei was close enough, the Star Beast's introduction appeared in his perceptual mirror.

It was indeed a middle – rank astral beast.

Xia ruofei's heart was slightly happy, and he immediately increased his speed. In fact, even if it was just a primary level Star Beast, Xia ruofei would not hesitate to get close to it. His goal was not to kill this Star Beast, but to use force to make this Star Beast flee. If it was only a primary level Star Beast, he would definitely go easy on it, giving it a chance to escape.

If it was a high – Level astral beast, what was Xia ruofei's point of consideration? He should quickly wipe his head and escape.

Xia ruofei's luck was not bad. It was a middle – rank astral beast.

As the distance between the two got closer, Xia ruofei also summoned the blue travel immortal sword. He directly used his spiritual power to grab it and continued to move in the direction of the middle – Level Star Beast.

Very quickly, the intermediate Star Beast also noticed Xia ruofei.

It let out a deep roar and then ran towards Xia ruofei.

Xia ruofei jumped off the flying sword and pointed his finger. The qushuang flying sword and the blue immortal sword let out a Dragon's Roar at the same time and whizzed towards the Star Beast.

At the same time, a wavering flame appeared in Xia ruofei's palm. Controlling fire was not a high – end function. Xia ruofei had long been able to do this.

Xia ruofei waved his hand and the flame flew towards the Star Beast.

Compared to the speed of the flying sword, the flame was like a turtle.

Of course, Xia ruofei didn't want to take the Star Beast's life at once, so he wasn't in a hurry.

The flying sword of qushuang was the fastest. It directly attacked the Star Beast from the front, followed by the blue immortal sword. However, it made a beautiful arc and attacked the Star Beast from the right side.

The Star Beast showed no fear at all. Xia ruofei even felt that the Star Beast's eyes were filled with mockery.

Seeing this, Xia ruofei was even more furious. He was actually despised by a puppet astral beast.

The Star Beast nimbly dodged the qushuang flying sword and the blue immortal sword. Just as it was about to attack Xia ruofei, the flame arrived.

There was a trace of fear in the Star Beast's eyes, but it didn't escape immediately. After hesitating for a moment, it dodged to the side.

Xia ruofei saw all of this. He was even more certain of his judgment. This astral beast seemed to be naturally afraid of fire.

Xia ruofei didn't look into the reason. Instead, he focused on controlling the two flying swords and the flame with his spiritual power, attacking the Star Beast with three different thoughts.

...

In fact, this flame was much weaker than the black light of the array. However, the astral beast seemed to be very afraid of the flame. There were a few times when it had the chance to break through the attack line and directly attack Xia ruofei. However, it seemed to be frightened by this small flame and was a little timid.

Naturally, Xia ruofei would not let go of this opportunity. His attacks became fiercer ...

Chapter 3312 Victory in the beginning (1)

Finally, after the flame flickered, the flying sword found an opening and accurately cut through the Star Beast's neck.

However, the Star Beast's neck was also protected by very thick scales. Although the flying sword was extremely sharp, it could only leave a small wound on the Star Beast's body. It didn't even bleed much.

Xia ruofei was already mentally prepared for the Star Beast's rough skin and thick flesh, so he was not discouraged.

However, the Star Beast was injured, so it became more irritable and roared repeatedly.

Xia ruofei nimbly controlled the two flying swords and the flame while he hid in the outer circle and dealt with the Star Beast. The Star Beast wanted to break out and attack Xia ruofei several times, but it was still afraid of the flame. In addition, the two flying swords were very sharp and its defense was almost impregnable. The Star Beast couldn't find an opportunity to attack, so it was even more furious.

Xia ruofei was getting more and more stable. Not long after, he left a few more wounds on the Star Beast.

In fact, Xia ruofei had the chance to kill this Star Beast, but he didn't do so because the forest was too big. He wandered around for a long time before he found a star Beast. It wasn't easy to kill a Star Beast with thick skin and meat. If he kept this up, he wouldn't be able to break the record in the remaining time.

Therefore, Xia ruofei had intentionally held back. He wanted to replicate the previous successful experience and let the Star Beast escape so that he could call his friends to take revenge.

This was the fastest way Xia ruofei could think of to complete the task. This was the only way to maximize the effect of the array.

The situation was developing in the direction that Xia ruofei had predicted. The astral beast had gradually calmed down after a long time of attack. It began to realize that it was in danger because the flying sword had almost hit its vital parts twice. In addition, that seemingly ordinary little flame had made it feel a little scared.

Therefore, after a stalemate of more than ten minutes, this astral beast finally made the same choice as the last one. It roared unwillingly, then turned around and ran.

Xia ruofei pretended to chase after him for a while. The Star Beast was determined to escape and also exerted its speed to the extreme. In the blink of an eye, it disappeared into the dense forest.

Xia ruofei was just putting on an act. He didn't really want to chase after it and end its life.

Hence, Xia ruofei quickly returned and set up the formation at the location of the battle.

The next step was to wait.

However, Xia ruofei didn't stay where he was. He continued to explore in other directions. As long as it was within the range of his spiritual power, he would be able to detect the star beasts as soon as they came. Time was of the essence, and he had to race against time. It was obviously not the best choice to wait here like an idiot. He still wanted to find a few more star beasts! It would be best if he could set up the traps one by one seamlessly and directly reap the lives of the star beasts.

However, the forest was huge and the density of astral beasts was low. Xia ruofei looked around but did not see any other astral beasts.

He only turned back when the location of the formation was almost out of Xia ruofei's spiritual perception range.

Fortunately, the fleeing astral beast did not make Xia ruofei wait for too long. Perhaps there was a special way of communication between astral beasts. Xia ruofei could not find a single astral beast in the forest for a long time. The fleeing astral beast only took about ten minutes to return with twenty astral beasts.

Xia ruofei had already returned to the location of the formation and was hiding behind a huge rock.

His spirit power sensed that the Star Beast that had run away just now had returned with its companion to seek revenge. He was immediately invigorated. He stood up from behind the rock and went forward to meet the star Beast.

Soon, the astral beasts also noticed Xia ruofei. They immediately let out fierce roars and increased their speed. They fanned out and surrounded Xia ruofei.

Xia ruofei did not panic. He even had the time to confirm the number of astral beasts in this group and whether there were any terrifying high – Level astral beasts mixed in.

Soon, he confirmed that this group of star beasts, including the one that had just escaped, had a total of 21 star beasts, and all of them were intermediate star beasts.

Xia ruofei was relieved. He turned around and ran into the forest.

How could the star beasts let Xia ruofei go so easily? Hence, they increased their speed and chased after Xia ruofei.

Thus, the previous scene played out again.

The twenty – one star beasts all rushed into the range of the trap and kill array. Their vision was suddenly blocked by the fog, and they suddenly became twenty – one headless flies.

Xia ruofei emerged from the forest. He could easily sense the exact location of the 21 star beasts in the array. A sharp look flashed in his eyes.

This time, he didn't hesitate at all. Before the star beasts could even try to break the formation with force, he had already formed a hand seal and launched an attack on them. Moreover, he didn't want to save spirit stones at all. He directly adjusted the attack of the formation to the maximum, all in order to buy as much time as possible.

Immediately, countless streaks of black light appeared within the formation, almost filling the entire space.

Chapter 3313 A Swift victory (2)

As if they had a life of their own, these black lights found their targets as soon as they appeared. Their speed suddenly increased a bit, and they directly attacked the star beasts who were temporarily blind.

Puchi, Puchi sounds rang out continuously, and in an instant, the twenty – one star beasts were all struck by the black light.

Immediately, the array was lit up with flames. These Majestic Star beasts were in a very sorry state.

They had also come to the end of their lives. After a while, the last star Beast also stopped wailing. It retreated a few times and then completely stopped breathing.

Xia ruofei didn't need to check if the astral beast was Dead or Alive because he could see through the vision of the perceptual mirror that his mission progress had been updated to 37/100.

It was 16/100 just now, but now it was 37/100, which meant that he had killed another 21 star beasts.

In other words, none of the 21 star beasts were spared. They had all been killed by the trap & kill array.

Xia ruofei only gave himself half a minute to enjoy the joy.

Then, he quickly removed the formation and put away all the formation materials. After throwing them into the spirit map space, Xia ruofei continued to venture deeper into the forest in search of a new target.

Xia ruofei realized that this method was quite useful. The efficiency of hunting star beasts had increased a lot.

In the following time, Xia ruofei pushed himself to the limit. Soon, he followed the same pattern and killed two batches of 43 intermediate star beasts.

His mission progress had reached 80/100.

If he wanted to break the record, he only had about 30 minutes left. He had to kill 20 intermediate star beasts within half an hour, or all his previous efforts would be in vain.

In fact, Xia ruofei was still very confident at the moment. The next few batches of intermediate star beasts he encountered were all more than twenty.

Therefore, as long as he could successfully find another intermediate Star Beast, defeat it, set up an array, and wait for it to call for reinforcements, there was a high probability that he could deal with it in one wave.

Xia ruofei continued to search in the forest. He estimated that he had walked more than 200 kilometers since he reached the second level of the Tower of Trials. Obviously, this forest was huge, so huge that it was beyond his imagination.

Xia ruofei's mind was running wild as he searched forward. The person he was most worried about was naturally Ling Qingxue.

After all, Ling Qingxue's combat experience was close to zero, and danger lurked everywhere in the trial Pagoda.

At this moment, Xia ruofei heard a creak from his right ...

He immediately stopped in his tracks and looked in the direction of the sound.

At this moment, Xia ruofei no longer had any wild thoughts. He was highly focused because he had been maintaining his mental strength to Scout the surroundings. However, he did not find anything unusual within the range of his mental strength. The sound was at most a hundred meters away from him. The range of his mental strength was much larger than this. What was it? How did he escape the detection of spiritual power?

There were too many questions in Xia ruofei's mind, but he knew that now was not the time to get to the bottom of it. The most important thing was to find the source of the sound and confirm whether it was safe.

Xia ruofei's expression was grave. He stared at the place where the sound came from and explored to the right.

At this moment, Xia ruofei heard another creak.

Xia ruofei suddenly felt an extreme sense of danger. His hair stood on end.

Xia ruofei was very confident in his sixth sense. He stopped in his tracks and retreated quickly.

However, just as Xia ruofei was about to retreat, a roar suddenly came from the direction of the sound.

Xia ruofei felt as if his heart had been stepped on just by hearing this sound. He didn't dare to look back. As he ran, he summoned the qushuang flying sword and wanted to escape.

He wasn't sure what was in the forest, but his sixth sense told him that it was an extremely dangerous guy.

As expected, the moment Xia ruofei stepped on the qushuang flying sword, he heard a creaking sound, accompanied by the sound of a branch being cut.

Xia ruofei didn't dare to look back. Instead, he pushed the speed of the qushuang flying sword to the extreme and agilely shuttled through the forest.

His spiritual power was still in a scouting state, but he found nothing.

If he only used his spiritual power to check, he would find that there was nothing behind him.

Such a strange situation made Xia ruofei even more nervous. As he flew forward, he saw an opening and quickly turned around to take a look.

With one look, he was instantly shocked.

About ten meters behind him, a huge astral beast was fiercely chasing him.

This astral beast was stronger than all the astral beasts he had encountered before. Its body was three times the length of an ordinary middle – grade astral beast, and the scales on its body exuded a Dark Blue Metallic luster. When it opened its big mouth, two rows of fangs were extremely sharp, and the toenails on its claws were as sharp as daggers, exuding a cold aura.

A high – Level astral beast!

Xia ruofei suddenly had this thought.

There was no doubt that this Star Beast that could escape his spiritual power detection and was obviously much stronger than a medium level Star Beast was most likely a high level Star Beast.

Xia ruofei couldn't help but smile bitterly. He thought to himself that his luck was too bad. He had been searching aimlessly in such a large forest and had encountered a high – Level Star Beast.

He felt that this was most likely the lair of a high – Level astral beast. He had stupidly walked in step by step. If he hadn't been careful enough after hearing the creaking sound, he might have already died under the claws of a high – Level astral beast.

However, his current situation was also very dangerous. The speed of the flying sword had reached its maximum, but the distance between him and the high – Level Star Beast was still slowly closing.

Star beasts were already very fast, and the high – Level Star Beast behind Xia ruofei was even faster than the intermediate Star Beast.

Therefore, even if Xia ruofei used all his strength to drive the flying sword, he could not escape from this high – Level Star beast's pursuit.

Most importantly, time was still ticking away. If he wanted to break the record, he did not have much time left.

As Xia ruofei fled through the forest, he racked his brain and tried to think of a countermeasure.

If not for the qushuang flying sword, even if Xia ruofei used all his strength, he would have been caught up by the high – Level Star Beast.

Even so, the distance between the two was slowly shrinking. In other words, if he didn't come up with a practical and effective way, it would only be a matter of time before he was caught by the high – Level Star Beast.

As he had been exposed to the high – Level astral beasts, Xia ruofei could not take out the spirit map scroll.

Astral beasts were highly intelligent. If Xia ruofei had disappeared into thin air and there was an obviously man – made scroll on the ground, the high – Level astral beast would definitely be interested in it.

Time waits for no man. Xia ruofei had been running for three minutes and thinking of a plan.

Finally, after weighing the pros and cons, he decided to take the initiative to change, and even take a little risk.

Hence, as Xia ruofei was running away, he waved his hand slightly and the center of the trap & kill array was sent into the grass.

...

Xia ruofei controlled his flying sword and flew past. The high – Level Star Beast followed closely behind. The confinement killing array's core that was hidden in the grass did not attract his attention.

Xia ruofei controlled the flying sword and flew forward with all his might. Then, he changed his direction unknowingly and returned to the place where he had released the array core after going around in circles.

Next, Xia ruofei led the high – Level Star Beast in circles in the forest. Every time they passed by the grass in the center of the trap and kill array, he would throw out some materials for the array.

Even though the distance between Xia ruofei and the astral beast was closing, he didn't panic. Instead, he tried his best to set up the formation.

After more than ten minutes, Xia ruofei finally placed the last piece of material in place ...

Chapter 3314 High – Level astral beast (1)

Xia ruofei gritted his teeth and pushed the speed of the qushuang flying sword to the maximum. However, after ten minutes, the high – Level Star Beast was still getting closer and closer. Now, it was only two to three meters away from Xia ruofei.

Xia ruofei's energy consumption was huge as well. Fortunately, he had the energy storage Pearl and had stored enough energy. Otherwise, he would have been out of energy.

Even so, Xia ruofei felt a great sense of danger.

That high – Level astral beast must have used its maximum speed. Otherwise, at such a close distance, if it charged again and increased its speed, it would be able to attack Xia ruofei directly.

Fortunately, astral beasts didn't have any long – range attacks. Otherwise, Xia ruofei wouldn't be able to survive even if he had nine lives.

Of course, if the high – Level Star Beast could really launch a long – range attack, he would definitely not care about anything else and hide in the spirit map space first. He was still quite confident in the spirit map scroll. He felt that even if the high – Level Star Beast saw him hiding in the spirit map scroll, it would most likely not be able to destroy the scroll.

After a series of difficult escape and detours, Xia ruofei finally set up the trap & kill array.

Under such circumstances, he was naturally unable to adjust the array.

Fortunately, he had already set up the same array several times while hunting the intermediate Star Beast today. In addition, he had designed the array himself, so it could be said that he was very familiar with it. Even in such a high – speed state, the probability of making a mistake was very small.

After setting up the formation, Xia ruofei did not have time to think about anything else. He roughly determined the direction and plunged into the pre – Set range of the formation.

The high – Level astral beast did not hesitate and followed Xia ruofei closely.

In fact, the high – Level Star Beast was already infuriated. A golden core stage human cultivator could actually run so fast. In front of the Star Beast, which was known for its speed, it had been running for ten minutes and still hadn't been caught. This was simply a disgrace to the Star Beast race.

Especially when it was a noble high – Level astral beast.

Besides, this high – Level astral beast did not know what the things that Xia ruofei threw out occasionally were for. It thought that he had lost his way and thrown things randomly.

Xia ruofei and the high – Level astral beast, one chasing and the other escaping, entered the range of the array in the blink of an eye.

Xia ruofei had already prepared the seal. As soon as he entered the range of the array, he immediately activated the trap and kill array.

At this moment, the high – Level Star Beast had also caught up. The timing was just right.

After Xia ruofei activated the formation, he immediately turned in the direction that he had calculated earlier.

After the high – Level astral beast was trapped in the formation, it suddenly felt that everything was white and it had lost track of Xia ruofei.

This sudden change made the high – Level Star Beast even more furious.

Originally, it thought that dealing with a human golden core stage cultivator would be easy. It didn't expect that this human cultivator could actually ride a flying sword in the trial Pagoda. As a result, its speed advantage, which it was most proud of, was not fully displayed. Then, it inexplicably fell into an array and completely lost him.

The high – Level astral beast roared madly, and its huge claws slammed forward heavily. Suddenly, a cloud of dust flew up, and a large pit was smashed into the ground.

After Xia ruofei activated the formation, he immediately distanced himself from the high – Level astral beast and paid close attention to its every move.

Now that this high – Level Star Beast was in the array, he could easily grasp its whereabouts.

Xia ruofei could not help but frown when he saw the high – Level astral beast's angry attack, which had created a huge pit in the ground.

The destructive power of a high – Level astral beast was indeed extraordinary. The attack power of a medium – Level astral beast was simply not on the same level.

Although the Star Beast attacked randomly in the formation, once it hit the key nodes of the formation by chance, it would still cause damage to the formation.

The first few times the formation trapped the star beasts, their attacks were relatively weak, and the formation had a major characteristic, that was, it could divide the attack power evenly between the various parts of the formation, so their attacks seemed to be insignificant.

However, it was different for high – Level star beasts. Each of their attacks was very destructive. The reason why the array could disperse the attack was also based on the characteristics of the array pattern. The array pattern of this array could not disperse such a high – intensity attack in a short time, and a part of the energy must have been directly used on the attack point.

This way, it would be easy to damage the formation.

Xia ruofei arrived at the center of the formation as fast as he could. It was easier for him to control the formation there.

In just a few dozen seconds, the high – Level Star beast's attack had already landed on the key nodes of the array three times, and each time it caused some damage to the array. Although it could still hold on for a short time, if it took a little longer, the high – Level Star Beast was likely to escape.

When the formation was damaged, Xia ruofei would have no other trump cards and could only hide in the spirit map space.

This was something Xia ruofei did not want to see.

He caught his breath and immediately formed a hand seal, activating the formation to attack the high level Star Beast.

In the face of such a terrifying opponent, Xia ruofei did not dare to hold back at all. He did not care about the consumption of the formation at all. He directly attacked with the greatest extent of his power. If he did not do something ruthless, the formation would be destroyed immediately. By then, there would be no point in keeping so many spiritual stones.

Chapter 3315 High – Level astral beast (2)

The high – Level astral beast's attacks sent stone fragments flying everywhere, but the formation only shook slightly. It was not damaged for the time being, so its field of vision was still a vast expanse of white. The visibility was very low, and it was surrounded by thick white fog.

This made it even more anxious and restless, and it attacked even more fiercely.

Of course, this high – Level Star Beast thought that it was destroying everything along the way, but in fact, it had long been affected by the array and had been moving in a very small circle.

This characteristic of a formation was very effective in trapping enemies. However, there were also some negative effects in this situation. The high – Level astral beast was always in this area, so its attacks basically all fell on the nodes of the array in this area.

In this way, the damage to these nodes would continue to stack. If the damage was stacked to a certain extent, it would inevitably have a great impact on the formation.

This was the main reason why Xia ruofei was so eager to attack.

After the formation's offensive power was activated, black streaks of light appeared in the White mist. These streaks of light were more dense than ever before, almost covering the sky and earth, and there was no gap at all.

The high – Level astral beast immediately sensed the danger. It roared and waved its claws at a high speed. It was so fast that even Xia ruofei could not see the high – Level astral beast's claws clearly. All he could see was an impenetrable shadow.

At the same time, the high level astral beast had also shrunk its head and body, completely hiding within the defensive line formed by its claws.

The crackling sounds continued to ring out.

The black rays of light quickly arrived in front of the high – Level Star Beast, but they were all swept away by the Star Beast's claws. The rays of light were all diverted, and none of them landed on the Star Beast.

Xia ruofei couldn't help frowning. He kept making hand seals and activating the formation to attack.

Such a sustained attack naturally consumed a lot of energy.

The pile of spirit stones that was as large as a small mountain was shrinking at a speed visible to the naked eye.

Xia ruofei continued to maintain the array as he threw out a pile of spiritual crystals.

This was an energy crystal that was purer than spirit stones.

At the moment, Xia ruofei's energy reserve was very sufficient. Even if the formation continued to maintain its maximum attack, it would consume a long time.

However, the problem was that the attack speed of the black light was still not fast enough compared to the reaction speed of a high – Level Star Beast.

Therefore, the high – Level star beasts were able to block all the sharp lights. Occasionally, one or two of them would slip through, but he could use his flexible body to easily avoid them.

In other words, the continuous high consumption was in fact useless.

Xia ruofei frowned. After a while, he gritted his teeth and continued to activate the formation. His body flashed and followed a specific route towards the high – Level astral beast.

Since the black light could not be used for the time being, Xia ruofei could only add fuel to the fire.

If they were outside the array, he would not be so bold. A high – Level astral beast was at the nascent Soul Stage. It was much stronger than Chen Nanfeng, the number one cultivator in the world of cultivation. If they fought head – on, Xia ruofei had no chance of winning.

However, with the help of the formation, Xia ruofei had more confidence.

He could clearly observe the movements of the high level star beasts, but the high level star beasts were like blind and deaf, completely unable to see the situation around them.

Xia ruofei felt that it was not a problem for him to hide in the dark and play tricks.

A few minutes later, Xia ruofei was already near the high – Level astral beast, but it was still unaware.

Most of its attention was used to block the black light.

Xia ruofei's heart skipped a beat. He made a hand seal, and the flying sword of the bent frost silently stabbed toward the high – Level Star Beast.

The angle at which qu Shuang's flying sword pierced the high – Level Star Beast was just behind it, aiming at the lower part of the Star Beast's ribs.

The high – Level astral beast was waving its front claws to block the black light, and the area under its ribs was open.

As it neared the high – Level Star Beast, the flying sword suddenly accelerated.

The whistling sound reached the Star Beast's ears, and only then did it discover the crooked Frost Flying sword that had just appeared from the fog.

The high – Level Star Beast was both shocked and angry. It let out a furious roar and stomped its back foot, barely avoiding being hit in its vital parts. The flying sword of the bent frost stabbed into the hard scales on its back.

With a “ding” sound and a few sparks, the high – Level Star Beast was unscathed. The crooked Frost Flying sword couldn't even leave a mark on the Star Beast's body.

However, the high – Level Star beast's hasty evasion of the curved Frost Flying sword had inevitably led to a gap in its defense.

A black ray of light passed through the shadow of its claws and landed on its front leg with a Swoosh.

When Xia ruofei had used the trap & kill array to kill the intermediate star beasts previously, the black light would cause a penetrating injury to the star beasts as long as it landed on them.

However, this time, the target was a high – Level astral beast, so the effect of the attack was not satisfactory.

The Jet – Black light had only pierced through less than an inch before its energy was exhausted and it disappeared.

However, no matter what, it still left a small wound on the Star Beast's body, and Scarlet blood was flowing out of the wound.

The high – Level astral beast let out a violent roar. It had almost completely gone berserk.

A human cultivator in the Golden core stage had actually injured it. What was this? It was like a person being bitten by an ant and losing a piece of flesh. It was simply unimaginable.

The high – Level Star Beast, which had entered a berserk state, was emitting a terrifying aura.

It stomped its back hooves and charged at the black light. Then, it curled up its body to protect its vital parts and used the hardest scales on its back to withstand the remaining light. It launched a fierce attack in front of it without any care.

The banging sounds were endless.

Some of them were the sounds of the black light hitting the high – Level star beasts, but most of them were the sounds of the high – Level star beasts wantonly destroying.

In just a few seconds, the high – Level astral beast was hit three times by the sharp light. It also used its most destructive power, sending rocks flying and the formation on the verge of collapse.

Because in this short period of time, one of the nodes of the formation had been attacked continuously and the damage was already very serious.

Xia ruofei's expression turned ugly. He gritted his teeth and continued to activate the array, launching his most powerful attacks. At the same time, he continued to control the bent Frost Flying sword to attack the high – Level Star Beast.

At this point, it all depended on who could hold on.

If the formation collapsed first, even if the high – Level astral beast was badly injured, Xia ruofei would immediately escape. He would not take any chances.

If the high – Level astral beast couldn't hold on, it would lose its life.

At this time, the first wound on the high – Level Star beast's body, which had been pierced by the black light, began to emit a small flame.

...

Seeing this, Xia ruofei's face revealed a trace of joy.

It seemed that the black light's most powerful attack was still effective against high level star beasts.

He just didn't know how much damage these flames could cause to a high level astral beast.

When the high – Level Star Beast saw the flames on its front legs, it couldn't help but be shocked. At the same time, it also let out a mournful roar.

Xia ruofei's eyes brightened. It seemed that even high – Level astral beasts had a natural fear of fire. Moreover, fire seemed to do more damage to them than physical attacks.

Soon after, the high – Level astral beast's back also began to burn.

It screamed in pain, and the speed of its claws slowed down involuntarily.

With the attacks weakened, the pressure on the formation was also greatly reduced.

However, the node of the array, which had been attacked many times, was completely destroyed by such an attack.

A hole appeared in the formation, and the White mist instantly dissipated a lot.

The biggest headache for Xia ruofei was that the damage to this node meant that its ability to trap enemies had been greatly reduced.

...

Sure enough, the high – Level Star Beast continued to screech in pain, and the effect of the array weakened a lot. It actually entered the depths of the array, close to the core of the array, and the violent attack still did not reduce.

The closer he was to the core, the more important nodes he could see.

Xia ruofei saw that the high – Level astral beast was not showing any signs of dying. Instead, it started to attack the more important nodes of the array. He could not help but feel a headache coming on ...

Chapter 3316 A Pyrrhic victory and an unexpected joy (1)

Xia ruofei could only try his best to maintain the formation's maximum attack. In fact, after some nodes were damaged, the formation's attack power had started to decrease.

Fortunately, the high – Level astral beast was also injured quite badly, especially the continuous burning of the flames, which continued to cause damage to it, and also made it continue to be in a weak state.

At the end of the day, the only thing that mattered now was who could last longer.

The critical points of the formation were being continuously attacked, and the damage was getting more and more serious. The flames on the high – Level astral beast's body were also burning more and more fiercely, and its mournful cries echoed throughout the formation.

Xia ruofei gritted his teeth and continued to use the curved Frost Flying sword to stab the vital parts of the high – Level Star Beast.

Although the flying swords couldn't do much damage to the Star Beast, they could distract it and disturb it. At the same time, they could also stimulate the Star Beast's anger.

No matter if it was a human or an astral beast, once they were overwhelmed by anger, their judgment would naturally not be as accurate as when they were calm.

The black light continued to attack the high – Level Star Beast. Because it was in a state of Fury, it was persistently attacking its surroundings, so its defense was naturally lax.

As a result, even though the high level astral beast's front claws were still moving like the wind, there were still many black lights that passed through the light curtain formed by the claws and landed on the high level astral beast, leaving big and small wounds.

Of course, more importantly, the wounds formed by the black light would burst into flames in a short time.

The high – Level astral beast's injuries were getting more and more serious, and its roars were endless. However, its attacks were gradually weakening.

Of course, as the formation was damaged, its attack power was also constantly decreasing.

In fact, the high – Level astral beast had already thought of retreating when the battle had reached such a tragic stage.

Unfortunately, they were in a trap and kill array. Not only could this array attack with a terrifying sharp light, but it could also trap the enemy.

If this was an ordinary battlefield, the high – Level Star Beast would have already abandoned its dignity and face and fled. But now that it was trapped in the formation, it had no place to escape. It could only continue to attack aimlessly in despair.

Time passed by.

This was the third time Xia ruofei had added spiritual crystals to the formation.

Under the despairing attacks of the high – Level astral beast, the formation was becoming more and more broken.

Finally, the high – Level Star Beast couldn't hold on any longer.

It let out an unwilling roar, and its huge body fell to the ground.

At this time, there were already over a hundred wounds of various sizes on his body. These wounds were all burning with raging flames, and he looked extremely miserable.

As for Xia ruofei's trap and kill array, even though it was still attacking, the black light had become much sparser. It was only about one – fifth of its peak.

After the high – Level Star Beast fell, the black light landed on the high – Level Star beast's body, which had been burned out of shape, without the Star Beast being able to resist.

The high – Level astral beast trembled a few times, but it could no longer stand up, let alone resist the attack.

Xia ruofei didn't let his guard down. He didn't come out of his hiding place and didn't even stop attacking the array. He continued to activate the array without caring about the energy consumption and released the weakened attack.

The black light continued to fall on the high level Star Beast.

In the beginning, the high – Level astral beast would continue to struggle, but soon, it could only Twitch on the spot.

After a few minutes, when the black light landed on the high – Level astral beast, it could only move its claws. Its body could no longer move.

Xia ruofei finally heaved a sigh of relief.

This was the most dangerous situation he had ever been in since he entered the Tower of Trials.

Fortunately, the trap & kill array had a miraculous effect. In the end, he still managed to kill this high level Star Beast. Although the high level Star Beast was not completely dead under the support of its strong vitality, the result was already determined.

On the first floor of the Tower of Trials, the original infant stage puppet was extremely powerful, but Xia ruofei did not face it head on. It was only when he left the first floor of the Tower of Trials that the original infant stage puppet rushed to the entrance of the tunnel. However, the two of them still did not fight face to face. Xia ruofei entered the second floor of the Tower of Trials without any danger.

But this time, he was being held back by a high – Level astral beast. Xia ruofei had no choice but to face it head on.

One had to admit that the power of the original level was indeed very terrifying.

Without the help of the formation, it would be impossible for Xia ruofei to kill a high – Level Star Beast.

The black light continued to fall on the high level Star Beast. At this moment, there was not a single part of the high level Star Beast that was intact. The flames had completely surrounded it, but it still did not move. It was obvious that it had already died.

However, Xia ruofei did not feel any joy.

Although he had killed the high – Level Star Beast, it was an out – and – out Pyrrhic victory. His trap & kill array had basically been destroyed after this battle.

What made Xia ruofei even more depressed was that from the time he ran away from the high – Level Star Beast to the time he set up the trap & kill array and killed it by luck, the whole process had taken a lot of time.

One had to know that what he lacked the most now was time.

Xia ruofei looked at the mission notification in his perceptual mirror and realized that he only had three minutes left to break the record.

He could not help but smile bitterly.

What could he do in three minutes?

He would need at least ten times the time to reforge the materials for a new set of the confinement killing array. Moreover, even if the confinement killing array was intact now, he couldn't kill 20 star beasts in three minutes.

Chapter 3317 A Pyrrhic victory and an unexpected joy (2)

Even if there were twenty star beasts, they were trapped in the formation, and it would be difficult for him to get rid of them all in such a short time.

Not to mention, he still had to prepare the array, find the Star Beast, defeat it, set up the array, wait for the Star Beast to come for revenge, and then finally use the array to kill them one by one. Let alone three minutes, even 30 minutes was not enough. After all, it would take too much time to prepare the materials for the array again.

As a result, even though he had killed a high level Star Beast, he had lost the chance to break the record and pass the second test.

Xia ruofei couldn't help but want to sigh.

Although he had encountered some setbacks in the beginning of the Tower of Trials "second level mission, after he adjusted his strategy, it had been very smooth. Originally, he still had about half an hour left, which was enough for him to kill the last batch of star beasts, but the heavens didn't go as he wished, and he actually encountered a high level Star Beast at the last moment.

What was worse was that Xia ruofei didn't even know that his spiritual power couldn't detect high – Level star beasts of the original infant stage. That was why he almost ran into the lair of high – Level star beasts.

In the end, although he managed to kill a high level astral beast, it didn't help him in his record – breaking mission at all.

Xia ruofei had no other choice.

Even if he didn't want to give up, he had to accept the reality that he had no hope of breaking the record.

Perseverance was a very valuable quality, but if one did it despite knowing that it was impossible, it was not perseverance, but stubbornness.

Hence, when Xia ruofei saw that there were only three minutes left, he was not in a hurry.

Since he couldn't break the record, the remaining task of killing twenty star beasts wasn't that urgent.

He would spend some time to prepare the materials for the formation and then slowly look for an intermediate Star Beast. According to the previous method, completing the task would be very easy.

Therefore, it would not be difficult for him to pass the test on the second level and enter the third level. However, the extra reward for breaking the record would not be his.

Xia ruofei saw that the high – Level Star Beast was curled up on the ground, not moving, so he stopped attacking.

The high – Level astral beast's body seemed to have shrunk under the blazing fire.

There was also a slight crackling sound in the flames. It was the sound of the oil on the body of a high – Level Star Beast burning.

At this moment, Xia ruofei saw that the high – Level astral beast’s claw moved slightly, but it quickly went silent.

At this moment, a notification appeared in the field of vision of the perceptual mirror:

Congratulations! You have successfully completed the second level of the Tower of Trials. Killing an advanced star Beast is the same as killing 100 intermediate star beasts, the mission will be considered complete)

Xia ruofei couldn’t help but be stunned.

The mission was completed just like that?

It seemed that even though the high – Level astral beast was motionless before, it was not completely dead. It had only died just now, which was why the mission notification had appeared.

Xia ruofei subconsciously looked at the mission time on the top of his perceptual mirror and realized that he had completed the mission two minutes faster than the best record.

Xia ruofei couldn’t help but widen his eyes. It turned out that his life – and – Death battle was not in vain. In the end, he still broke the record and passed the test of the second level of the Tower of Trials!

Xia ruofei heaved a long sigh of relief.

The designer of this mission was really a bit of a scammer. Since killing a high – Level astral beast would allow one to pass the test directly, why didn’t the mission description mention a single word about it?

If he had known ... Xia ruofei would not have chosen to face the terrifying high – Level astral beast.

If he could choose again, Xia ruofei would rather spend more time looking for intermediate astral beasts. At least it would be safer that way.

However, when he was facing a high – grade astral beast, he was really fighting with his life. Even if he managed to kill the high – grade astral beast with the help of the trap and kill array, it was mostly due to luck.

Even though the process was somewhat tortuous, the result was good.

Xia ruofei also relaxed.

At this time, a new notification appeared in the field of vision of the perceptual mirror:

The trial Pagoda’s third floor is now open. You can follow the directions given and find the passage to the third floor.

Xia ruofei took a look and saw an arrow on the map in his perception mirror. It was heading towards the right.

Xia ruofei tried to turn his body to the right and the arrow in the perceptual map started to move to the center.

When Xia ruofei’s body turned to a certain angle, the arrow was pointing straight ahead and turned green.

Xia ruofei understood that the arrow was pointing in the direction of the third level of the Tower of Trials.

At the same time, he also saw a circle of light on the map. This circle of light was surrounded by a Halo, and the range of the Halo would slightly change from large to small, and then from small to large again, as if it was breathing.

This indication was already very clear. The position of that circle of light should be where the entrance to the passage was.

Now that he had completed the mission on the second level of the trial Pagoda, Xia ruofei naturally had to rush to the third level.

However, he was very curious. He had received the reward of the perceptual mirror. If the other cultivators who had entered the trial tower without the perceptual mirror had also completed the mission, how would they get the hint to find the passage to the next level?

Xia ruofei was just a little curious. He knew that the designer and the builder of the trial Pagoda must have had other ways.

When he saw Ling Qingxue and Chen Xuan, he would just have to ask them.

The most important thing now was to go up as much as possible. Only then would he have a chance to meet Ling Qingxue as soon as possible.

Xia ruofei would not have to worry about Ling Qingxue's safety all the time if he met up with her.

Therefore, he put away the array materials as fast as he could and threw away some of the damaged materials.

Then, he found a hidden place and hid the spirit map scroll.

Xia ruofei was preparing to enter the spirit map space and make use of the difference in the flow of time between the Archean realm and the time array flags to complete the materials needed for the trap and kill array.

In addition, he had consumed a lot of Yuan Qi during the escape and the battle just now, so he needed to replenish it. Furthermore, when he was running at full speed, he had even used a portion of the elemental storage Pearl's elemental energy, which had to be refilled.

Xia ruofei was still clueless about the third level, so he had to make all the necessary preparations. After all, the second level of the Tower of Trials was relatively safe. He did not know if he would have the time and opportunity to complete the preparations once he entered the third level.

Therefore, he might as well do everything that could be done on the second floor, which could be considered as sharpening the knife without delaying the work of cutting wood.

Just as Xia ruofei hid the spirit map scroll and was about to enter the spirit map space, a third notification appeared in the field of vision of the perceptual mirror.

Congratulations, you've broken the time record for the Tower of Trials "second level mission. At the same time, you're also the first golden core stage cultivator to kill a high level Star Beast and complete the mission. You'll receive an additional reward. Since you have created two records at the same time, two rewards are available for you to choose from. You can only choose one.

...

Seeing this, Xia ruofei couldn't help but mock, "So there was only one reward for breaking two records! It was just an extra choice ... This was too stingy!

Although he was complaining, Xia ruofei was still very concerned about the rewards he would receive. He quickly continued to read, wanting to know what the two rewards were.

The push notification in the perceptual mirror flipped to another page, and two reward options appeared. Xia ruofei's eyes lit up after a quick glance. Then, he furrowed his brows slightly, looking conflicted.

Xia ruofei mumbled to himself, "this reward setting ... Is a bit too ridiculous! Isn't this making things difficult for us?"

Chapter 3318 The inevitable choice (1)

The words that appeared in the perceptual mirror provided Xia ruofei with two rewards to choose from.

First, he obtained the upgraded elemental storage Pearl, which could store the elemental energy of an early nascent soul realm cultivator.

Second, when you enter the third level of the Tower of Trials, you can be transported to the same small space as your companions who entered the secret realm at the same time.

If Xia ruofei had to choose between these two options, he would definitely choose the second one without hesitation. That way, he would be able to meet up with Ling Qingxue.

The upgraded elemental storage Pearl was naturally excellent. The amount of elemental energy an early – Stage nascent soul cultivator could store was on a whole different level compared to that of a late – Stage golden core cultivator. If Xia ruofei could carry all the elemental energy of an early – Stage nascent soul cultivator, it would be equivalent to having an endless amount of elemental energy.

Even though this vital Qi pool required him to slowly fill it up with his own vital Qi, it was still extremely precious.

If it was a battle between golden core cultivators, with the help of this elemental storage Pearl, Xia ruofei would be like a tiger with wings. Even if he were to face a late – Stage golden core cultivator, he would be confident to fight.

However, no matter how good the energy storage Pearl was, if he could choose to meet up with Ling Qingxue earlier, Xia ruofei would give up without hesitation. He would not be worried about the gains and losses at all.

The problem was that the second reward option had additional conditions and explanations. There were mainly a few points:

First, the so – called “the same time period” meant that as long as the cultivators who entered the secret realm within an hour before and after him were the same time period, they would be teleported to the same space. As for who would be teleported to the same space, that was random. In other words, every member of the team had fulfilled the conditions for the same time period. The probability of Xia ruofei and Ling Qingxue being teleported to the same trial space was only one in eight.

Second, if the randomly selected partner had not passed the second level of the Tower of Trials, or even the first level, he would be directly sent to the same space on the third level of the Tower of Trials as Xia ruofei.

Third, each level of the trial space had a corresponding trial mission, and the difficulty of the mission was related to the cultivation level of the cultivator who entered the small space. After the two of them entered the same trial space, the trial’s difficulty would be based on the cultivation level of the person with the higher cultivation level, and would be doubled.

These three conditions were the reason why Xia ruofei was so hesitant.

If he chose this reward, he would only have one in eight chance of being transported to the same small space as Ling Qingxue. At the same time, the difficulty of the mission would also be doubled based on his cultivation level because they would be in the same small space.

He still wasn’t sure if he would be lucky enough to be in the same trial space as Ling Qingxue, or if they would be teleported together.

The trial space was huge. If the two of them were not teleported to the same place, it would take a lot of effort to find Ling Qingxue. Ling Qingxue would also be in great danger because the difficulty of the mission was based on Xia ruofei’s cultivation level.

Of course, there was also a high possibility that Xia ruofei would not be paired with Ling Qingxue at all. Instead, he would be sent to the same training space with another person in the team.

There was an even worse possibility, which was that Xia ruofei was unfortunately transported to the same training space as the intermediate golden core cultivator in the team, such as the first heaven society’s elder Shen tianfang.

That meant that not only would he not be able to meet up with Ling Qingxue, but it would also increase the difficulty of his mission. By then, the difficulty of the mission would be set according to Shen tianfang’s cultivation level.

Xia ruofei was in a dilemma. Logically speaking, he should have chosen the first prize, the upgraded elemental storage Pearl. After all, it was better to be safe than sorry! However, he did not want to let go of this opportunity to meet up with Ling Qingxue. Xia ruofei had been worried about her safety every second they were apart. Now that such an opportunity was in front of him, how could he give it up so easily?

As for doubling the difficulty of the mission, as long as he could find Ling Qingxue and meet up with her as soon as possible, Xia ruofei would not have to worry about the difficulty of the mission. He was confident that he could complete it.

Xia ruofei was undoubtedly a calm and rational person. However, when faced with such a choice, he could not maintain his absolute rationality.

Although he wasn't about to make his choice, the reward prompt had explained that there would be two passages at the entrance to the third floor. If he entered from the left passage, it meant that he had chosen the first reward, which was the upgraded elemental storage Pearl. Entering from the right passageway, he naturally chose the second reward. However, after hesitating for a while, Xia ruofei had already made his decision.

He no longer had any distracting thoughts and directly entered the spirit map space.

Xia ruofei quickly set up a time formation at the Archean realm. Then, he entered the time formation to cultivate and recover his elemental energy. At the same time, he continued to replenish his elemental storage Pearl.

With the difference of a thousand times in time flow, Xia ruofei did not have to worry about the preparation work wasting too much time.

After recovering and filling the energy storage Pearl, Xia ruofei took out all the materials for the formation and re-carved the materials that had been damaged by the high-Level astral beast in the battle. Then, he carefully checked the entire set of components.

After doing all this, Xia ruofei drank some water from the spirit pool and meditated on the Jade futon for a while. He replenished his consumed spiritual power and then left the spirit map space with a thought.

He carefully put the spirit map scroll in his palm and then followed the arrow in his perceptual mirror's field of vision. He rode the qushuang flying sword and flew at full speed in the direction of the third floor's passageway.

Chapter 3319 The inevitable choice (2)

He still didn't dare to fly too high, and was practically flying close to the ground.

Even though he had already killed a high level Star Beast, he still remembered the fear he felt when he flew up to the top of the tree. He didn't know how many high level star beasts there were on the second floor of the Tower of Trials, and he didn't know if the sense of danger came from a high level Star Beast or an even more powerful monster.

Since he had already completed his mission on the second floor, Xia ruofei naturally did not want to cause any more trouble.

His luck wasn't bad. From the place where he killed the high-Level Star Beast to the entrance of the third level, he didn't encounter a single star Beast along the way. He didn't even encounter a low-Level Star Beast. Just like that, he arrived at the position of the light circle indicated by the perceptual mirror map without any danger.

What Xia ruofei saw was a huge green rock.

Perhaps it was because Xia ruofei had completed his mission, but there were two teleportation portals on the rock that were glowing with green light.

Xia ruofei was no longer unfamiliar with this kind of passageway. Whether it was the passageway they had entered this secret realm or the passageway from the first level to the second level, they all looked similar.

Xia ruofei glanced at the two dimensional gateways. Different choices might lead to two different results in the subsequent exploration. However, he only took a deep breath and walked towards the right passageway without hesitation. When faced with the opportunity to meet up with Ling Qingxue, Xia ruofei would rather be impulsive than lose this opportunity.

Therefore, he had already made his choice before he left.

At this moment, he would naturally not hesitate.

When Xia ruofei stepped into the passage, his mind was calm. He did not pray for the blessings of the gods and was randomly teleported to the same place as Ling Qingxue. She thought that he was a cultivator himself. As his cultivation level increased, he felt that the gods and demons in the legends might just be cultivators with high cultivation levels.

After a moment of dizziness, the scenery in front of Xia ruofei had completely changed.

On the second floor of the Tower of Trials, it was an environment similar to a tropical jungle. All he could see were towering trees and lush vines. The range of his field of vision was not large, but in fact, the jungle was boundless.

After stepping into the passage, what appeared in front of Xia ruofei was a house with a small bridge and flowing water. The winding path led to a secluded courtyard.

If he did not know that he was in the Tower of Trials, Xia ruofei would have had the illusion that he had traveled back in time to the ancient times. This was obviously the house of a rich family in ancient times.

Xia ruofei was probably in the back garden of the house. He could see an antique Pavilion, a flower bed full of flowers, a pond where koi fish swam, and even a small stage.

Xia ruofei was dumbfounded. This was the third level of the trial Pagoda?

He had once imagined that after he entered the third floor of the Tower of Trials, he would face a very harsh environment, such as a hot desert, deep mountains and old forests where poisonous insects were wreaking havoc, but he had never thought that he would face such a peaceful and quiet house.

Of course, the more peaceful he was, the more uneasy he felt. This was because although the moving garden looked very comfortable, there was also a hint of strangeness.

Xia ruofei couldn't help but be on guard. He also released his spiritual power to check his surroundings.

The stone Road was just an ordinary stone Road, and the plants in the garden were all common flowers and plants on earth. Although the material of the pavilions was very good, and some of them were even made of precious Phoebe zhennan, they were still in the category of ordinary materials.

Everything here seemed to have nothing to do with the cultivation world.

Xia ruofei had thought that he had entered a courtyard left behind by some powerful person. However, it seemed that the possibility was very low.

This was because there was no trace of the cultivation world.

Of course, he did not find any traces of the formation.

All the signs pointed to the fact that this was an exquisite house.

At this moment, footsteps were heard.

Xia ruofei couldn't help but look up. His heart started to beat faster as well. Could it be that he had been teleported to the same place as his companions? Would it be Ling Qingxue?

In the blink of an eye, Xia ruofei saw the person who had arrived. His expression changed slightly, revealing a look of disbelief. He didn't even notice that his mouth was wide open.

A soldier in a camouflage uniform walked out from behind the moon gate. There were still some grass crumbs on his face, and there were a few shocking bullet holes on his body. The blood stained the camouflage uniform red.

Xia ruofei stared at the familiar face and mumbled, "Hu ... Why are you here?"

Xia ruofei never thought that he would see Lin Hu, who had already sacrificed himself.

In his memory, Lin Hu was undoubtedly a person who was deeply engraved in his heart, because Lin Hu had sacrificed his life to protect him.

Xia ruofei would dream of this scene many times in the middle of the night. Xuanji and Lin Hu were lying on the ground, glaring at him and shouting, "Don't come here to die! The sniper is watching me!"

Xia ruofei watched as the sniper shot Lin Hu's arm and thigh. He had been a sniper before and knew that this was the most common tactic of snipers. They deliberately left the target alive so that once the other party's comrades came to rescue them, he could use the sniper rifle to take down them one by one. This was a good way to increase the success of the battle.

Chapter 3320 The inevitable choice (3)

It was because of Lin Hu's roar that Xia ruofei resisted the urge to jump up. In the end, he hid in the sniper's blind spot and watched Lin Hu sacrifice himself in front of him.

Seeing Lin Hu again in such a situation, and in the state he was in before he died, Xia ruofei's mind was in a mess.

Lin Hu was still holding a Type 95 automatic rifle. He grinned at Xia ruofei and said, "RUO Fei, you're doing pretty well now! Don't tell me you've forgotten me! I've blocked a bullet for you before!"

Xia ruofei's eyes were filled with tears as he said in a trembling voice, "How could I forget you? You're my best brother and my best comrade in this life. I can forget anyone but you! Hu, I promised you back then that your mother is my mother! I've already brought your mother and sister to San Shan. Now that your mother has recognized me as her godson, I'll take good care of them ..."

"Is that so?" Lin Hu's lips curled up slightly as he said, "kid, can you really take good care of them? I don't really believe it."

"What do you mean?" Xia ruofei was confused. "Hu, I don't understand ..."

"My sister Qiao'er likes you so much, but you turn a blind eye to it and make her sad every day. Is this how you help me take care of my sister?" Lin Hu said with a dissatisfied look.

Xia ruofei was stunned. He was not a fool. He could naturally feel Lin Qiao's feelings for him. However, he would rather think that Lin Qiao's dependence on her brother had shifted to him after her brother's sacrifice.

After all, he already had Ling Qingxue and Song Wei. He also had Monica overseas. Even Song Wei and Ling Qingxue didn't know about this. He really didn't dare to mess with any more girls.

Lin Hu had suddenly pointed this out today, and Xia ruofei was caught off guard.

"Hu, I ..." Xia ruofei was at a loss for words.

"I'm just joking!" Lin Hu grinned. You were like this when you were in the Army. You liked to take everything seriously and couldn't tell if it was a joke. I remember back in the recruit company, there was an old squad leader who was teasing you, and you almost broke his head. A new recruit dared to hit the squad leader. You were the only Scorpion in our Regiment to sh * t!"

Xia ruofei couldn't help but laugh. "You still have the nerve to talk about me? Don't you know what kind of person you are? Who was the one who had secretly taken out the photo of the platoon leader's fiancée from his theory study notebook for everyone to admire? I remember you were punished by the platoon leader to copy the discipline order a hundred times! How many nights did you stay up to finish it?"

Lin Hu couldn't help but laugh out loud. The two of them sat down on the stone steps along the corridor and talked about some interesting things in their military lives. When they talked about the happy parts, they couldn't help but laugh out loud.

The back garden of the house was filled with the laughter of the two.

After a long time, Xia ruofei sighed and said, "Hu, thank you for coming to accompany me for the past half an hour. I'm really happy to be able to talk to you about the past, but you should leave ..."

"Leave? Where to?" Lin Hu was dumbfounded.

"Go to where you came from ..." Xia ruofei said indifferently.

As soon as he finished speaking, he waved his right hand, and a sword light flashed, leaving a bloody wound on Lin Hu's neck ...
