

God tier Farm 3401

Chapter 3401: Goldthread nether snake (1)

At this moment, Xia ruofei felt an unprecedented sense of danger.

His entire body trembled, and his mind became clear.

At this moment, Xia ruofei saw that Ling Qingxue was already moving towards the strange plant involuntarily. It was as if she had forgotten where she was. She had completely let go of her hands and was just about to walk towards it.

Xia ruofei broke out in a cold sweat. He grabbed the protruding part of the rock wall with one hand and grabbed Ling Qingxue's EVA suit with the other. At the same time, he shouted, ""Qingxue!"

Xia ruofei's shout contained his spiritual power, and Ling Qingxue's mind became clearer. However, her eyes still carried a trace of confusion.

At this moment, Xia ruofei saw from the corner of his eye a pair of cold eyes staring at him from a distance of one or two meters away from the yuan Qi protective shield he had erected. The eyes were emotionless, making Xia ruofei feel as if he had been splashed with ice water. He was cold from head to toe, and his body was stiff.

Besides, Xia ruofei could clearly see that this pair of eyes came from a huge triangular head. The scales on it were faintly visible in the mist.

At that moment, Xia ruofei's hair stood on end.

He had never felt such a great sense of life – and – Death crisis before.

However, Xia ruofei's mental strength was still very strong. He did not become weak in the face of the sudden danger. On the contrary, his brain was unusually active at this moment, and countless thoughts had already passed through his mind in an instant.

His first reaction was to use his mind and an invisible force acted on Ling Qingxue's body.

At that moment, Ling Qingxue's consciousness was still in a daze and she did not resist at all. Xia ruofei easily kept Ling Qingxue into the spirit map space.

Of course, Xia ruofei had already prepared for this. Thus, Ling Qingxue was kept into an independent space that he had created in the mountain sea realm.

This independent space was very small, and it was surrounded by thick fog. There were many layers of space outside.

Xia ruofei had already considered this. It was to deal with such extreme situations so that he could protect Ling Qingxue at the first moment.

Even though Ling Qingxue's spiritual power had already broken through to the spirit gathering realm, she was still unable to penetrate the layers of space that were nested in such an arrangement. After

several distortions, she was unable to sense the situation of the mountain and sea realm in the spirit map's space even if she used her spiritual power to probe.

As for the naked eye, it was even more impossible to see.

Moreover, the fog that Xia ruofei had deliberately set up was similar to the fog at the bottom of the cliff. Ling Qingxue was so muddleheaded that she could not even sense the changes in her surroundings.

After Xia ruofei put Ling Qingxue into the spirit map space, he had no more worries.

This was only the first action that was completed in an instant. Immediately after, he controlled the flying sword of the qushuang and directly stepped on the flying sword to silently execute the sword Art. Without any hesitation, he flew up at high speed, displaying his speed to the extreme.

When the huge snake head appeared, Xia ruofei had already realized the extreme danger.

It took him only one or two seconds to complete these two actions.

Of course, Xia ruofei didn't forget to maintain his protective shield at all times. He knew very well that in such an environment, once the yuan Qi protective shield dissipated, he wouldn't be able to last more than two minutes with just his spacesuit.

If he came into direct contact with the poisonous mist, no matter how strong or talented Xia ruofei was, there would only be one outcome – he would not even have a corpse left.

The golden thread nether snake was as powerful as a peak – Stage golden core cultivator. Xia ruofei would not be able to defeat it.

He had always been very careful and alert of the surrounding situation, but he did not expect that he still did not notice anything.

Xia ruofei didn't know if the two fruits had bewitched his mind, but he didn't even notice the golden thread nether snake when it was nearby.

It was also possible that the goldthread nether snake had been hiding nearby, but Xia ruofei's spiritual power had not discovered it.

In short, such a dangerous demonic beast was only three to four meters away from him. Xia ruofei was very clear what this meant.

Therefore, his first reaction, other than protecting Ling Qingxue, was to distance himself from the other party.

In reality, Xia ruofei did not see the monster's full appearance. However, he could sense extreme danger from just a glimpse. Hence, his intuition told him that it was a goldthread nether snake. Without any hesitation, he immediately made a move to escape.

When Xia ruofei received the mission, he knew that it would be very difficult, but he still risked his life to climb down. However, he did not want to fight the goldthread nether snake head – on. He wanted to use some supplementary techniques of a cultivator, such as formations and magical weapons, to deal with the snake. Under such circumstances, he had no other choice but to run.

The goldthread nether snake's speed was extremely fast. This was already explained in the mission notification of the perceptual mirror. Xia ruofei was mentally prepared. However, Xia ruofei realized that he had underestimated the snake's speed.

Xia ruofei kept Ling Qingxue in the spirit map space for protection, then immediately stepped on his flying sword and climbed up at full speed. It only took him one or two seconds. It could be said that he had moved one step earlier than the goldthread nether snake..

Chapter 3402: Goldthread nether snake (2)

However, he had only flown a dozen meters high on his flying sword before he felt the threat of death.

Immediately after, Xia ruofei felt his energy shield shatter like an egg shell hitting a sharp stone.

The poisonous mist immediately swept over.

At the same time, Xia ruofei took a quick glance and realized that the golden thread nether snake's huge triangular head was only about two meters away from him. The huge snake's body could be seen vaguely in the clouds, like a giant dragon shuttling through the fog.

The toxic mist was moving at an incredible speed. In the blink of an eye, it had enveloped Xia ruofei. He could clearly feel his spacesuit being corroded.

This was the first time Xia ruofei felt that death was so close to him.

If Xia ruofei hesitated for even a second, he would either be buried in the snake's stomach or fall off the cliff. Soon, his spacesuit would be completely corroded and he would die a more miserable death.

At this critical moment, Xia ruofei thought of the only solution in this desperate situation.

With a thought, the spirit map scroll appeared in his palm.

Then, Xia ruofei used all his strength to throw the spirit map scroll towards the mountain peak. At the same time, he directly entered the spirit map space and entered the Archean realm.

The spirit painting itself was not heavy and it was very small. If an Aurous core cultivator used all his strength to throw it, the strength would be quite amazing.

Therefore, from the snake's point of view, it was as if the human had disappeared into thin air, leaving only a scroll whizzing upwards. It was so fast that it could not even react in time. It could only see a shadow, and in the blink of an eye, the scroll had become a small black dot in its vision.

Xia ruofei's sudden disappearance had stunned the goldthread nether snake. While it was still in a daze, the spirit painting had already risen a hundred meters. Its momentum had not decreased by much and it was still flying upwards at an extremely fast speed.

The golden thread nether snake quickly came back to its senses and let out an angry hiss. Its huge body twisted slightly, and then it jumped up. It ran along the cliff as if it was on flat ground, and quickly chased up. Its hard scales seemed to have suction cups, and the steep mountain wall could not stop it at all.

As the goldthread nether snake moved quickly, the rocks on the cliff fell with a clatter. A shallow ravine was formed wherever the snake passed.

This was just the snake's burst of speed, but it was able to leave behind a ditch on the cliff wall. It was clear how strong its body was.

Xia ruofei's mind was extremely calm even when he was facing death.

It could be said that he had made the only correct choice. Furthermore, at the last moment, he had not forgotten that he had to enter the Archean realm and not the mountain sea realm.

As there was a 30 times difference in the flow of time between the inside and outside, after Xia ruofei entered the spirit map space and reached the primal level, sensing the situation outside was 30 times slower. This gave him a lot of time to react.

The first thing he did was to use his spirit power to look outside. From his perspective, the entire world was spinning at a slow speed. For a moment, he saw the unchanging sky in the trial Pagoda, and for a moment, he saw the cliff wall shrouded in clouds. A moment later, he saw the goldthread nether snake's enormous triangular head slowly approaching...

This was because Xia ruofei had grabbed the spirit painting and thrown it with all his might. Hence, it was actually spinning rapidly in the air. If Xia ruofei did not have a time flow that was 30 times faster than normal, he would have seen a rapidly spinning and constantly inverted world.

Xia ruofei's first concern was still the safety of the spirit map.

After the yuan Qi Shield was destroyed by the golden thread nether snake, the spirit map was exposed to the poisonous mist. Even though Xia ruofei was very confident in the spirit map, the mist was too terrifying. He was worried that the spirit map would be corroded.

Hence, the first thing Xia ruofei did after entering the formation was to check the state of the spirit painting.

What made him feel slightly relieved was that the spirit map scroll didn't seem to be affected by the poisonous cloud. Even the surface of the scroll didn't show any signs of corrosion.

Not only that, but Xia ruofei could also feel that the spirit painting seemed to be absorbing the poisonous mist around it on its own. He could not help but be slightly surprised.

The spirit map easily absorbed most of the poisonous fog. Xia ruofei could feel that the density of the fog around the painting had decreased. However, when he tried to sense it again, he could not find out where the poisonous fog had gone after it was absorbed.

Xia ruofei frowned slightly. Then, he immediately reached out and took a time array flag. He quickly set it up in the small square of the Archean realm.

Soon, the time formation was set up.

Xia ruofei entered the range of the formation without hesitation.

In this way, there was a difference of about 2000 times in the flow of time between him and the outside world. This gave him enough time to investigate the situation outside and think of countermeasures.

Now, when Xia ruofei tried to sense the outside world again, he realized that everything seemed to be frozen. If he did not carefully check and compare, he would not even feel that the spirit map scroll was spinning.

This was because the difference in the flow of time between the outside world and the outside world was too great. In the time formation that Xia ruofei was in, every half an hour that passed was only one second in the outside world.

With that, Xia ruofei finally had enough time to think of a solution.

He heaved a long sigh of relief and sat down cross – legged in the middle of the formation. He began to think about how he could escape and how he could deal with the goldthread nether snake.

Even though he had personally experienced the terror of the goldthread nether snake, Xia ruofei had no intention of giving up.

As long as there was a chance, Xia ruofei would try his best to complete the task.

However, the goldthread nether snake was so powerful that Xia ruofei could not think of a good way to deal with it.

The description of the goldthread nether snake in the perceptual mirror was very limited, so Xia ruofei had really underestimated it at first.

Xia ruofei even thought that the golden thread nether snake was similar to the ordinary venomous snakes on earth. However, just its size alone was enough to make Xia ruofei gasp. Some species of pythons on earth were obviously not as big as this golden thread nether snake.

The mission notification had only mentioned the snake's characteristics, especially the three one – inch – long golden threads on the snake's head, which caused Xia ruofei to misunderstand. He did not expect the three one – inch – long golden threads to be almost undetectable compared to the snake's huge head. Hence, he had made a wrong judgment about the snake's size.

Most of the larger pythons were not poisonous. However, not only was the golden thread nether snake large in size, but it also carried a highly poisonous mist. This was not just from the introduction of the sensory mirror, but also from the shape of its head. Generally, snakes with triangular heads were poisonous.

Xia ruofei had obtained a lot of ancient books about the cultivation world from the Jade talisman of inheritance. Among them, there were many descriptions of the various demonic beasts that had once existed in the cultivation world. Of course, many demonic beasts had gone extinct, at least on earth.

Xia ruofei could not find any information about the goldthread nether snake in the books.

Initially, Xia ruofei had wanted to get more detailed information, especially the goldthread nether snake's weakness. Only then would he be able to think of a way to defeat it. However, there was no record of the goldthread nether snake in the ancient books, and the mission prompt of the perceptual

mirror did not mention anything about the snake. As such, it would be more difficult for Xia ruofei to find its weakness.

Xia ruofei didn't know that in a secret space enshrouded in purple mist, an elder in a green Daoist robe was constantly paying attention to the situation on the sixth level of the trial Pagoda.

When he saw Xia ruofei's series of actions that seemed to be reflexively completed without thinking, he couldn't help but nod.

One had to admit that Xia ruofei's ability to adapt was very strong..

Chapter 3403: Light at the end of the tunnel (1)

Originally, the mission for this level wasn't a golden thread nether snake at its peak. Instead, it was a golden thread nether snake with a cultivation level equivalent to a middle Jindan stage cultivator. This kind of golden thread nether snake wasn't fully mature yet and its strength was much lower. It was suitable for a golden core stage cultivator to train.

However, since it was Xia ruofei who was challenging the stage, the green – robed elder increased the difficulty.

Of course, since Xia ruofei was going through the levels with Ling Qingxue, according to the previous rules, the difficulty of the mission would be increased, and the number of missions would be doubled. Hence, the difficulty of this mission did not exceed Xia ruofei's expectations.

The green – robed elder was indeed fond of talents. That was why he had focused on Xia ruofei's progress. There was only a mirror in front of him that could check the situation in the trial Pagoda. He could only look at Xia ruofei's side and naturally could not see the performance of the others.

Even so, the green – robed elder had no intention of "changing channels". He did not care about Chen Xuan and the others who were also challenging the levels. All his attention was on Xia ruofei.

However, the elder only admired Xia ruofei. If Xia ruofei's life was in danger during the trial, he would not help. The trial was a screening process. If he could not pass the trial, it would be useless even if he survived.

The world of cultivation had always been cruel to the extreme.

The green – robed elder had met many talented juniors in his long cultivation life. However, most of them had disappeared in the long river of history. Hence, he would not give Xia ruofei special treatment just because of his outstanding performance.

When Xia ruofei and Ling Qingxue had encountered the goldthread nether snake, the elder in the green Daoist robe had thought that Xia ruofei and Ling Qingxue were dead for sure. He felt a little regretful. He did not expect Xia ruofei to be so clear – headed in such a desperate situation. He had managed to find a way to survive even when there seemed to be no other way out.

The green – robed elder couldn't help but Mutter to himself, ""This little guy looks really good! Do you want to..."

Halfway through his words, the green – robed old man shook his head and said, “If he can’t even pass such a test, then he won’t be able to survive in the future. Return to that land of despair to struggle on whilst at death’s door? What’s the point of that?”

After mumbling to himself, the green – robed elder made up his mind and decided to wait and see.

The spirit painting was still rolling and flying upwards. Due to the gravity, its speed was naturally getting slower and slower. When the goldthread nether snake realized what was going on, it quickly chased after it along the cliff, its speed getting faster and faster.

Although the two humans had disappeared into thin air, the scroll that had suddenly appeared still made the goldthread nether snake chase after them relentlessly.

The distance between it and the spirit painting was also getting smaller and smaller.

At this moment, Xia ruofei, who was in the time formation of the spirit map space, was paying close attention to the situation outside while thinking of a solution. He had been in the formation for almost an hour but still could not come up with a good solution.

Once he left the spirit map space, the outside would be filled with poisonous mist. Even though he could put up his Yuan Qi barrier again, he was much slower than the snake. The cliff was at least three to four hundred meters high, and he wouldn’t be able to reach the top in time.

Moreover, even if he managed to escape to the top of the mountain, he still wouldn’t be able to defeat the goldthread nether snake if he didn’t make preparations in advance.

The mountaintop only had a radius of about three kilometers, surrounded by cliffs on all sides. The bottom was filled with poisonous fog, so there was no way to escape.

Xia ruofei couldn’t even repeat what he had done just now. He had thrown the scroll with all his might before the snake could react. Now that the snake had its eyes on the scroll and was moving at a faster speed, it would take at least two to three seconds for Xia ruofei to leave the spirit map and continue throwing the scroll. It would be enough for the snake to catch up. It would be even more dangerous then.

Xia ruofei racked his brain but could not think of a good solution. The main reason was that he had not found the snake’s weakness and had no idea where to start.

The most important thing now was to escape. It seemed that it would be very difficult to escape. The goldthread nether snake seemed to have its eyes set on the spirit map, and it had no intention of giving up.

Could it be that he could only hope that the spirit map scroll had enough defensive power to render the goldthread nether snake helpless? Xia ruofei thought to himself.

But even so, Xia ruofei was still very passive and things were out of his control.

Although Xia ruofei was in the time formation and the time flow was almost 2000 times faster than the outside world after the time formation of the upper realm was superimposed, he still had plenty of time. However, he could not think of a good solution no matter how hard he racked his brains.

At this moment, a voice rang in Xia ruofei's mind." "Fellow Daoist Xia, you don't seem to be in a good state ..."

Xia ruofei was stunned for a moment, but then he realized that it was the voice of master Yuntai.

His first reaction was to move the mysterious ore into the time formation he was in..

Chapter 3404: Light at the end of the tunnel (2)

Layman Yuntai was in the state of a spiritual body and should have dissipated over time. However, because of Xia ruofei's mysterious ore, his spiritual body could survive for a long time. It was also because of this that scholar Yuntai had always stayed in the inner space of this mysterious ore. Moreover, he spent most of his time in closed – door cultivation, strengthening his spirit body bit by bit.

During this period, master Yuntai had a few short moments of consciousness, but it was very short, and Xia ruofei never had the opportunity to have an in – depth exchange with him.

The situation was urgent. After all, master Yuntai was a senior and had more experience than Xia ruofei. He might be able to help.

That mysterious ore had always been placed in the stone chamber of the mountain sea realm's cave. However, Xia ruofei was the master of the spirit map space, and he only needed to move his thoughts slightly, and the ore would be directly moved over.

"Senior Yuntai!" Xia ruofei's voice was filled with surprise.

If there was anyway to turn the situation around, it would be on layman Yuntai.

Layman Yuntai said in surprise,""Your time formation is interesting! Two layers of nesting, and the effect can be stacked, creating a difference of two thousand times time flow. Amazing!"

Scholar Yuntai was indeed very experienced. Although his spiritual body was in the mysterious ore space, he could accurately judge the difference in the flow of time in his current position by just using a trace of his mental power.

Xia ruofei was not in the mood to talk about time formation. He said anxiously,"Senior Yuntai, you've seen the current situation. It's quite critical... Do you have any good ideas?"

Scholar Yuntai also knew that although the current situation was dangerous, it was not particularly urgent because of the time formation. Therefore, he slowly said with a smile,""If I'm not mistaken, the one chasing you should be a goldthread nether snake, right?"

Xia ruofei was overjoyed when he heard scholar Yuntai's words. It was good that this old senior could recognize the goldthread nether snake. Perhaps he would have a way to deal with it.

Xia ruofei quickly replied,"yes!" Senior Yuntai, do you know about this golden thread nether snake? What are its weaknesses?"

Scholar Yuntai laughed and said,"Speaking of which... This golden thread nether snake should have gone extinct a long time ago!" When I first started on the path of cultivation, I saw a senior of my sect catch

one, and it was a young goldthread nether snake. I remember that senior saying that goldthread nether snakes were very rare and almost extinct. And the one that's chasing us now is obviously an adult! Where was this place? Why would there be such a huge goldthread nether snake?"

Although Xia ruofei was anxious, he still said patiently, "Senior Yuntai, this is a trial space!"

Then, Xia ruofei briefly explained how they went into the arcane realm after they arrived on the moon and how he went into the Tower of Trials. Of course, he skipped over the details of Ling Qingxue being teleported to the same place as him and the Tower of Trials.

Upon hearing this, scholar Yuntai said with interest, "I didn't know that the rising Dragon Token had such a wonderful use! This secret realm is really on the Moon Far Away!"

"Senior Yuntai, the golden thread nether snake is about to catch up. Please tell me how to deal with it!" Xia ruofei said.

Even though time was 2000 times slower, the goldthread nether snake was still very fast. Xia ruofei roughly estimated that it would take at most an hour, which was two to three seconds in the outside world, for the snake to catch up to the spirit map. If they could not come up with a solution before that, everything would be out of control.

"Fellow Daoist Xia," said layman Yuntai with a smile, "in our time, although the golden thread nether snake was rare, its strength was actually average. Under normal circumstances, even an early stage nascent soul cultivator could easily deal with it..." Xia ruofei couldn't help but be speechless. The nascent Soul Stage was still far from him. In the eyes of master Yuntai, cultivators in the early stage of the nascent Soul Stage were not even worth mentioning. Hence, he felt that the goldthread nether snake was not difficult to deal with.

"If I had the cultivation of an early nascent soul realm cultivator, I wouldn't have to run away in such a sorry state ..." Xia ruofei said with a bitter smile.

Scholar Yuntai laughed and said, "The Yuanying stage isn't difficult, but there's no way to improve your cultivation in a short time. You're only at the early Aurous core stage, so it won't be easy for you to deal with the goldthread nether snake."

Speaking up to this point, scholar Yuntai paused for a moment. He was probably trying to recall the characteristics of the goldthread nether snake.

He pondered for a moment and said, "The weakness of all snakes is at the seven – inch," ye mo said. "To deal with the goldthread nether snake, we have to find its seven – inch."

Xia ruofei was stunned for a moment. "But this snake is much bigger than a giant python. Its strength is comparable to a cultivator at the peak of the late golden core stage. It doesn't seem easy to attack such a large snake."

Scholar Yuntai laughed and said, "The goldthread nether snake's weakness isn't on its body!"

"All?" Xia ruofei was confused. "It's not the weakness?" What... What do you mean?"

Scholar Yuntai laughed and said, "It's indeed not on its body, it's on its head!" Did you notice that there are three golden threads on the head of the goldthread nether snake, about an inch long..."

"I've already seen that." Xia ruofei said.

"If you look closely, you'll see that the three golden threads on the snake's head are in fact the shape of three snakes." Said layman Yuntai.

Xia ruofei quickly used his spiritual power to check. Because time was two thousand times faster inside and outside, everything outside seemed to be still and moving very slowly. Hence, Xia ruofei easily found the three golden lines. After checking carefully, Xia ruofei said, "Senior Yuntai, you're very accurate. Those three golden lines are really in the shape of three little snakes."

Scholar Yuntai chuckled and said, "so, the weakness of the golden thread nether snake isn't in the seven – inch spot on its body, but in the seven – inch spot of these three little golden snakes!" If you attack the vital points of those three little golden snakes, you should be able to obtain a good result!"

Xia ruofei nodded and said, "If it wasn't for senior Yuntai, then this junior really wouldn't have thought that this beast's Mingmen was actually on its head. Normally, the head should be the most vulnerable place to attack. In the process of natural selection, how did it survive? Such a huge weakness actually didn't evolve..."

"Fellow Daoist Xia," said layman Yuntai with a smile, "I learned this from the elders in my sect. I've never fought against the goldthread nether snake before, so I can't guarantee that this weakness is accurate."

Then, layman Yuntai said, "That's right. As far as I know, goldthread nether snake's ability to sense space is extremely weak, and your ability to control the laws of space is even better than some nascent soul cultivators. You can try to use this characteristic of goldthread nether snake and give it a fatal blow!"

"Spatial rules?" Xia ruofei muttered thoughtfully. Then, his eyes suddenly lit up and he said, "thank you for your guidance, senior Yuntai! I've benefited a lot!"

Since the space rule attack was the most effective, Xia ruofei decided to recall all the space – related formations he knew.

The laws of space were considered to be of a higher level. Xia ruofei's talent in array Dao was higher, and his understanding of space was also amazing. He had been trapped in the mysterious ore for thousands of years and had been studying the laws of space during that time. In this area, he was an absolute expert.

Using the laws of space to set up an array was even more advanced.

After all, it was extremely difficult to grasp the laws of space, and it was even more difficult to use the laws of space to form an array.

Spatial law formations were more powerful than ordinary maze and trap formations, and most of them were nested in multiple spaces. If one used ordinary methods to break the formation, if one's strength was strong enough, it was possible to break a trap formation or maze formation with force. However, the formation of space rules was different. It was really useless. Even if one could break the space with brute force, a powerful space formation could nest countless space cages. Even if an ordinary Aurous core stage or nascent Soul Stage cultivator died of exhaustion, it was impossible to break so many nested spaces with brute force.

As Xia ruofei thought about it, his expression started to relax..

Chapter 3405: Nine turn space splitting formation (1)

In fact, the formations that Xia ruofei had obtained from the Jade talisman of inheritance did not involve much space rules.

However, Xia ruofei's understanding of the laws of space was already very deep. Even the realm Fox, who was favored by space, had to admit this. Especially in the spirit map space, as the controller of this space, Xia ruofei could torture the realm fox like a game.

Hence, within the limited time, Xia ruofei quickly picked out one of the space arrays that he had mastered.

"Senior Yuntai, what do you think of using the nine turn space splitting formation to deal with this goldthread nether snake?" Xia ruofei decided to ask for the opinion of master Yuntai. After all, he had a lot more experience.

Upon hearing this, layman Yuntai asked in surprise, ""You actually know the nine turn space splitting formation?"

"I've learned this formation before, and I also remember the formation diagram." Xia ruofei replied, "but I haven't set it up yet..."

Then, Xia ruofei changed the topic and said, ""But it shouldn't be too difficult!"

Layman Yuntai didn't know whether to laugh or cry. ""The nine turn space splitting formation is indeed not a particularly profound spatial formation. However, for an Aurous core stage cultivator, it is still extremely difficult to set up. Are you sure you can do it? After all, you don't have much time. You won't have the chance to make a mistake!"

"I'm confident." Xia ruofei said calmly, "of course, if you have better recommendations and I happen to know this array, I can try to set up other arrays."

Scholar Yuntai pondered for a moment and said, ""The nine turn space splitting formation isn't the best choice, of course. There are many other formations that are more effective against goldthread nether snakes. However, this wasn't something that an Aurous core stage cultivator could do. One had to be at least in the nascent Soul Stage or even the advanced stage of the nascent Soul Stage. In fact, I don't think that an early – Stage golden core cultivator like you would have a high success rate in setting up the nine – turn space splitting formation!"

"In that case, junior will give it a try!" Xia ruofei said, "if it really doesn't work, we'll think of another way!"

Scholar Yuntai laughed and said, "there's no harm in trying!" Although I'm not particularly optimistic about it! However, this small world of yours seems to be quite advanced. Even if the formation fails, it shouldn't be a problem for you to survive with this small world Magic treasure ..."

Xia ruofei couldn't help but be speechless. It seemed that scholar Yuntai still didn't have much confidence in himself!

However, Xia ruofei did not explain further. He quickly used his spiritual power to observe the situation outside. The goldthread nether snake was indeed very fast, but the speed of the spirit map was constantly decreasing. It should be able to catch up in two to three seconds.

In other words, Xia ruofei still had about an hour to prepare the formation.

Of course, whether the formation could be prepared and set up in a flash was also a test of Xia ruofei's control over the formation.

However, that was a matter for the future. Now, he needed to prepare the formation within an hour. This was already a huge test for Xia ruofei. The formation was not huge but it required a lot of precision. The preparation work was also complicated. An hour was just enough. In other words, there was very little room for error. Basically, Xia ruofei could not make any mistakes and could only complete it in a short hour without any retouching.

Xia ruofei sat down cross – legged and quickly collected a large amount of formation materials from all over the space. Then, he cleared his mind of all distracting thoughts and quickly recalled the details of the nine turn space splitting formation. He began to prepare the materials.

As time passed, Xia ruofei was completely immersed in the state of selflessness. The materials were floating around him. His fingers moved and wisps of spiritual energy flowed out from his fingertips. They accurately landed on different materials and carved out mysterious array patterns.

As he did not have enough time, Xia ruofei chose the more difficult method. He had to process more than three sets of formation materials at the same time and make sure that each carving was extremely accurate. If he used the standard of the secular world, there would not be a single deviation. Even if it was not to the nanometer level, it had to be at least to the micrometer level.

Otherwise, even the slightest deviation would greatly reduce the effect of the final formation, or even completely fail.

The so – called “a miss by a millimeter is a thousand miles” described this situation.

Scholar Yuntai had also kept quiet. In fact, he had been paying attention to Xia ruofei's preparation of the materials for the formation in the mysterious ore space.

To be honest, the mood of the master of the cloud platform was very complicated. At first, he thought that it was impossible for Xia ruofei to complete the preparation of the array materials in such a short time. But when he saw that Xia ruofei was actually doing three things at the same time and handling three different sets of array materials at the same time, he felt that Xia ruofei was being whimsical. How could he maintain precise control in such a situation?

As Xia ruofei finished processing more and more materials, the amount of materials waiting to be processed decreased little by little. However, there were no mistakes at all. Not even a single set of materials had been changed. The shock in the heart of layman Yuntai was indescribable.

He forced himself not to make a sound because he knew that Xia ruofei was very focused. He must not disturb him or he might fail..

Chapter 3406: Nine turn space splitting formation (2)

Just like that, Xia ruofei used more than 50 minutes to prepare the materials for the nine turn space splitting formation.

When Xia ruofei was done with the last set of formation materials, he was surrounded by a pile of processed formation materials. They were floating around him, almost blocking his entire body.

After confirming that Xia ruofei had finished preparing the materials for the formation, master Yuntai muttered, "Fellow Daoist Xia, you've really scared me..."

Xia ruofei was checking the materials for the formation. He was stunned for a moment and then smiled. "Senior Yuntai, what do you mean?"

"I didn't think that fellow Daoist Xia would be so talented in the rules of space," said scholar Yuntai. "You're also so accomplished in the array path. It's really amazing!"

"Senior is too kind!" Xia ruofei quickly checked the materials that had been processed and said, "I was pressed for time and had no choice but to take such a risky approach. Fortunately, I was lucky and did not make any big mistakes."

"It should be said that there are no mistakes!" Scholar Yuntai said, "I've seen the entire process of you handling the array materials just now. It seems that there are no mistakes."

Xia ruofei shook his head slightly and said, "it's still too rushed. Two of the talismans have a small deviation. It might affect the effect of the array." But luckily, I still have a few minutes to salvage the situation!"

In reality, the goldthread nether snake was already very close to the spirit map in the outside world. If the spirit map was a human, he would have been able to smell the stinky poison that the snake was exhaling.

However, with the help of the time formation, Xia ruofei could still handle the materials with relative ease.

As he spoke, he took out two more Jade talismans and quickly began to carve.

This was his second time inscribing these two talismans. He was also multitasking, so it was much easier than before. Moreover, because he had already carved it once before, he was already aware of the deviations in the parts. Therefore, this time, it was very smooth. In just two to three minutes, the two array talismans were completed.

In the mysterious ore space, layman Yuntai was speechless when he saw Xia ruofei's actions.

To be honest, from his point of view, the two talismans that Xia ruofei had made were no different from the previous two. It could be seen that the difference that Xia ruofei had mentioned was actually very small.

Under such a tight situation, Xia ruofei was still striving for perfection, which made master Yuntai sigh.

Could this be the standard of a genius?

Xia ruofei didn't have much time to chat with master Yuntai. He was constantly paying attention to the outside world. At this time, the goldthread nether snake had almost caught up with the spirit map. He had to go out and set up the array as soon as possible.

Xia ruofei tried to set it up in the spirit map space.

There were 108 talismans for this nine turn space splitting array. Each talisman had a specific position and could not deviate from it. Otherwise, the array might lose its effect. This was a test of Xia ruofei's control.

It was a good thing that his spiritual power had improved by a large margin, and he had a very deep understanding of this array.

Therefore, he set up the array with a wave of his hand.

Xia ruofei felt the operation of the formation and nodded in satisfaction." "It looks pretty good... But if I have enough time, the power of the formation can increase by at least 20%. But that's all I can do now..."

Yuntai scholar was speechless. So Xia ruofei was not satisfied with this formation, or rather, it was just barely satisfactory to Xia ruofei. This requirement was too high!

With master Yuntai's understanding of the nine turn space splitting formation, even a nascent Soul Stage cultivator would find it hard to do better than Xia ruofei in the same amount of time.

To be more precise, not many original infant stage cultivators could do what Xia ruofei did.

As for Aurous core stage cultivators, there was no need to even mention them.

Even if there was no time limit, it was an almost impossible task for an Aurous core stage cultivator to make the talismans for the nine turn space splitting array.

Not to mention that in such a short period of time, he had to deal with the materials of the array three times at the same time. It was simply a fantasy. If he hadn't seen it with his own eyes, perhaps even he himself would not have believed it.

Xia ruofei waved his hand to remove the formation and let the materials float in the air. He then used his spiritual power to check the situation outside.

At that moment, the goldthread nether snake had almost caught up to the spirit map. Xia ruofei saw a frozen scene. The goldthread nether snake had extended its long tongue halfway, and the Crimson spikes on it were clearly visible.

It was obvious that the golden thread nether snake was trying to wrap its tongue around the spirit map. However, the time inside and outside was two thousand times faster, so Xia ruofei could only see the extremely slow and almost fixed image.

However, he could not delay any longer. Xia ruofei muttered to himself and left the spirit map space with a thought.

Before he left, he had already investigated the surrounding terrain and the situation of the goldthread nether snake, so he was well-prepared.

Xia ruofei appeared about three meters to the right of the spirit map. He used his Yuan Qi to protect himself and grabbed a protruding rock at that spot. At the same time, he kept the spirit map without hesitation.

Almost at the same time, the golden thread nether snake's fearsome tongue had already reached the spot where the spirit map had been, and it directly struck the rock, sending rock chips flying.

Just as the goldthread nether snake was about to capture the painting, it suddenly disappeared into thin air. Then, that annoying human appeared in front of it. Naturally, it was both shocked and angry.

The snake's agile tongue did not retract at all. It turned to the right and stabbed at Xia ruofei's forehead.

The snake's tongue was very fast and it could turn in the middle. This was indeed out of Xia ruofei's expectations.

However, Xia ruofei did not dare to stay where he was. He appeared in the outside world and grabbed the protruding rock. As he collected the spirit map, he exerted more force in his hand and his body suddenly rose into the air. He managed to avoid the snake's attack.

However, the goldthread nether snake was too close to him, and its speed had increased. Even if Xia ruofei dodged one attack, it would be difficult for him to Dodge the subsequent attacks. Furthermore, to ensure his agility, he did not even wear his spacesuit this time. In other words, he was completely relying on the energy shield to protect himself. Once the shield broke, he would be instantly killed by the poisonous mist. Therefore, it was very dangerous to fight the snake at such a close distance.

Xia ruofei had also made his move after careful planning. He did not intend to rely on his speed and strength to deal with the goldthread nether snake. After he dodged the attack from the snake's tongue, a black ball had already appeared in his palm. Then, he threw it at the goldthread nether snake without hesitation.

Xia ruofei had planned all of this before he left the spirit map space. He appeared in the outside world, grabbed the protruding rock wall, retrieved the spirit map scroll, jumped up to avoid the snake's tongue attack, and threw the black ball. All of these actions were done in one go. He had dodged the snake's attack. It was a close call.

Xia ruofei had gotten the black ball from Shen tianfang's storage belt.

When Shen tianfang and Xia ruofei were fighting, he had also used this black ball and caused great damage to the trap and kill array.

Therefore, Xia ruofei was very clear about the power of the black ball. The Super high temperature and air waves produced by its explosion, as well as the burning flames, were difficult for ordinary intermediate golden core cultivators to withstand.

Even though he was a little heartbroken, Xia ruofei did not hesitate to use the life-saving item left behind by Shen tianfang.

The golden thread nether snake was moving upwards at an extremely fast speed while the black ball was thrown downwards by Xia ruofei with all his might. Hence, in the blink of an eye, the black ball had hit the snake's huge triangular head. At the same time, Xia ruofei's trace of vital Qi had also touched the ball.

Suddenly, the black ball exploded..

Chapter 3407: Meeting on a narrow path (1)

There was a loud bang!

The blackball exploded violently the moment it came into contact with the goldthread nether snake.

The earth trembled and the mountains trembled. A large amount of flames instantly surrounded the goldthread nether snake.

The goldthread nether snake had been charging upwards at full speed, but it was caught off guard by the black ball's explosion, and its momentum was immediately halted.

What was even more terrifying was that the black ball just happened to come into contact with the three golden threads on the snake's head. The golden threads were actually in the shape of a snake, and the seven – inch mark was the snake's weakest point.

As a result, the goldthread nether snake had suffered significant damage from the explosion.

Its body trembled, and a stream of stinky blood flowed out of its mouth. The top of its head was also blasted open.

However, the goldthread nether snake had thick skin. The explosion and flames from the black ball didn't cause any fatal damage to it. It only looked extremely miserable.

The goldthread nether snake's ferocity was triggered. It let out an angry hiss and went berserk.

However, the distance between it and Xia ruofei was inevitably widened.

Because of the black ball's explosion, not only did it lose its momentum, but it also slid down a dozen meters.

Xia ruofei made use of the shock wave from the black ball's explosion to jump up. The qushuang flying sword under his feet also rose at its maximum speed. In the blink of an eye, he was dozens of meters away from the goldthread nether snake.

As soon as he picked up speed, Xia ruofei immediately summoned the spirit map scroll and threw it towards the top of the mountain with all his might.

Xia ruofei was already flying upwards at full speed on his sword. He then threw out the spirit map scroll at full speed. With the two speeds stacked together, the speed of the spirit map scroll was even faster. It made a whistling sound as it tore through the air and even left an afterimage.

After Xia ruofei threw out the spirit map scroll, he immediately entered the spirit map's space and entered the primordial realm. He was directly inside the time formation.

Scholar Yuntai had been in the mysterious ore space, watching Xia ruofei's every move.

They had all witnessed Xia ruoxin's smooth and fluid movements after she had flown out.

Scholar Yuntai clicked his tongue and said, "fellow Daoist Xia, you really have a lot of life – saving methods!" There's actually a magic treasure like the Thunderbolt seed!"

Only then did Xia ruofei know that the black ball he had found in Shen tianfang's belongings was called Leiting.

He smiled and said, "I got this by chance. I only have one. If it wasn't for the urgent situation, I wouldn't have used it!"

"That's right!" Layman Yuntai agreed. "In that situation, if you didn't use the Thunderbolts to blow up the goldthread nether snake, you would have been in danger!"

Then, scholar Yuntai asked, "fellow Daoist Xia, you should have had enough time to fly to the top of the mountain. Why did you enter this small world?"

Master Yuntai also didn't understand. In the previous situation, if Xia ruofei had flown up quickly on his sword, he should have been able to reach the top of the mountain before the golden thread nether snake caught up to him. However, it was hard to say if he would have the time to set up the nine – turn space splitting formation.

However, Xia ruofei didn't fly up on his sword. Instead, he chose the same strategy as when he was in an emergency. He threw out the spirit map scroll again and entered the spirit map space by himself. Furthermore, Xia ruofei entered the time formation of the Archean realm. Clearly, he wanted to buy more time. It was just that no one knew what Xia ruofei wanted to do.

Xia ruofei smiled and said, "senior Yuntai, I thought about it just now and I think you're right." The nine turn space splitting formation was still not enough to deal with goldthread nether snake. I just happened to have some inspiration, so I decided to fight for some time to see if I could improve the formation."

Layman Yuntai couldn't help but be dumbfounded. After a long time, he muttered, ""! didn't hear wrong, did I? Or is there something wrong with my ears? It was wrong! I'm in a spirit body state right now, where do I get my ears?"

Since master Yuntai had lost his physical body, he communicated with Xia ruofei through spiritual power. Naturally, there was no problem with his hearing, and it was impossible for him to mishear.

So, he asked again in an uncertain tone, ""Fellow Daoist Xia, are you going to modify the nine turn space splitting formation before the battle?"

Xia ruofei gathered all the materials together and smiled. ""Senior Yuntai, you didn't hear wrong. I really want to improve the formation, mainly to increase its offensive power. Of course, the nine turn space splitting formation itself is already very mature, so it's not very possible to make any major changes to this kind of formation. I only have a preliminary idea to make minor adjustments to some parts of the formation and at the same time add a few more talismans. If there's no problem with my idea, I should be able to complete the transformation very quickly."

With that, Xia ruofei skillfully picked out a few talismans from the array materials. At the same time, he beckoned for more blank Jade talismans and began to draw array patterns on the blank Jade talismans with his spiritual power while comparing them.

Scholar Yuntai stared at Xia ruofei's movements with all his attention. He could not believe that someone could improve a fully developed formation in such a short time and could even increase the power of the attack.

Grand cloud scholar looked at the array pattern that Xia ruofei was inscribing. Compared to the array pattern on the talismans that he had picked out, there didn't seem to be much difference. Xia ruofei's inscribing speed was very fast, which showed that he had already deduced it very clearly in his mind..

Chapter 3408: Meeting on a narrow path (2)

Just as Xia ruofei had said, he could not perform any major surgery on the array. It was just some minor adjustments.

As a result, the main body of the formation patterns did not change much. He only made small adjustments to the formation patterns according to his own understanding.

In the eyes of layman Yuntai, this was like a fairy tale.

Xia ruofei had a deep understanding of the laws of space. It was because of this that he was able to find a few flaws in the array that could reduce its power. Now, he was following his own understanding and re – carving these talismans.

Xia ruofei spent about 40 minutes to make six new array talismans.

Then, he used his mind power to check and confirmed that the goldthread nether snake was not able to catch up for the time being. Based on the situation just now, the goldthread nether snake would need at least five to six seconds to catch up to the spirit map. In the primordial realm time formation in the spirit map, it would have about two to three hours. There was still some distance between the goldthread nether snake and the spirit map, so it was safe for the time being.

Hence, Xia ruofei set up the nine turn space splitting formation in the time formation.

Of course, this nine turn space splitting formation was the formation that he had prepared earlier. He did not use the array talismans that he had just improved.

In other words, Xia ruofei had first set up a standard nine – turn space splitting formation.

Scholar Yuntai had already seen Xia ruofei set up a formation so casually, but he still found it hard to believe when he saw it again.

When he thought about how Xia ruofei wanted to improve on the foundation of this formation, he felt that it was even more like a fantasy.

Xia ruofei sensed the operation of the formation and broke it apart.

Then, he accurately picked out the six array talismans and placed the six array talismans that he had just made inside.

Then, he skillfully set up the nine turn space splitting array again. This time, he modified the array according to his ideas.

Layman Yuntai was also staring at this new formation, and he couldn't help but release his mental energy to sense it.

Xia ruofei was doing the same thing.

Both of them felt at the same time that after the six array talismans were replaced, the operation of the array not only did not improve, but some nodes appeared to be blocked.

Xia ruofei couldn't help but frown, while scholar Yuntai secretly heaved a sigh of relief and thought,"! knew it wasn't that easy to improve the formation! Especially in such a short period of time, how could he really improve a mature array to a better level?

In the eyes of master Yuntai, there was a limit to geniuses. If Xia ruofei could really improve the array in such a short time, then he was beyond the scope of genius.

But Xia ruofei did not give up. He muttered to himself and reached out to draw two blank Jade talismans. Then, he thought for a moment and started to draw quickly with his fingers.

Streams of mental energy flowed out smoothly from his fingertips, leaving profound formation patterns on the blank jade talisman.

This time, layman Yuntai couldn't understand it at all.

This was because the runes that Xia ruofei had drawn were different from the runes on any of the nine turn space splitting array runes.

Xia ruofei was carving a new array pattern!

Scholar Yuntai was a little confused. Could it be that he's planning to give up on the nine turn space splitting formation and set up a new formation that I've never seen before? But there wasn't enough time! Moreover, the power of the nine turn space splitting formation itself was not bad. There was still a chance of killing the goldthread nether snake. Why would he give up what was near and seek what was far?

Fortunately, Xia ruofei did not take too long to inscribe the two Jade talismans this time. In about ten minutes, he had successfully inscribed two talismans.

Xia ruofei checked the array pattern on the Jade talisman and silently deduced it. Then, he nodded in satisfaction.

Then, Xia ruofei stretched out his hand and gently touched the array. He broke up the array that was not working well because of the improvement.

Then, he immediately pushed his hands and added the two array talismans in. Then, his hands gently drew in the air, and the array materials began to rearrange under the effect of his mental power.

In just a few seconds, a new formation was formed.

Scholar Yuntai was stunned. The nine turn space splitting formation was still in front of him. At least the main structure of the formation had not changed, but at least eight array talismans had been adjusted. In addition, two of Xia ruofei's newly made array talismans had been added.

"This is ..." Scholar Yuntai couldn't help but Mutter to himself.

Xia ruofei flicked his finger and activated the formation. Then, he immediately released his spiritual power to sense it.

Scholar Yuntai also came back to his senses and quickly used his mental energy to check the array.

After a quick probe, layman Yuntai couldn't help but cry out, "'This formation is so stable!"

With his experience and shrewdness, layman Yuntai should have been able to remain calm and composed, but he had lost his composure several times today.

Especially this time, he was extremely shocked.

Xia ruofei had replaced six runes, changed the positions of eight runes, and added two runes. In the end, he was still able to set up the nine turn space splitting array and the stability of the array had been greatly improved.

At first, master Yuntai thought that Xia ruofei's random addition of talismans would cause the formation to collapse and it would be impossible to form a stable energy channel.

However, reality had taught scholar Yuntai a good lesson. Xia ruofei's formation was obviously still the nine – turn space splitting formation. It was much more stable than the original formation, and the obstruction that had appeared earlier had disappeared.

There's actually such an operation? At this time, scholar Yuntai felt that his long cultivation life had been wasted. He couldn't even compare to a little kid in the early jiedan stage.

Xia ruofei examined it more carefully. His understanding of this formation was obviously much higher than that of Yuntai scholar. Therefore, he was not only concerned about the stability of the formation, but also the increase in power.

Xia ruofei tried to operate the formation and tested the attacking function of the formation.

This time, his heart was completely at ease.

"It seems like the effect of the modification is not bad. The power has increased by at least 30%!" Xia ruofei said happily, "senior Yuntai, do you think the probability of winning will increase a lot if we use this formation to deal with the goldthread nether snake?"

Only then did scholar Yuntai come back to his senses. He smiled bitterly and said, "Actually, with fellow Daoist Xia's abilities, even a standard nine – turn space splitting formation would be a huge threat to the goldthread nether snake. Now that it's been improved and its performance has been increased by thirty percent, this formation is no weaker than some classic space formations! Fellow Daoist Xia is really..."

"I'm only familiar with the rules of space," Xia ruofei said humbly. "I don't dare to change other formations like this."

Xia ruofei used his spiritual power to check the situation outside. After confirming that the goldthread nether snake was still some distance away from him, he decided to keep the improved nine revolutions void splitting formation in operation. He wanted to continue observing the improved nine revolutions void splitting formation. It had not been tested and verified yet, so Xia ruofei did not know if the formation would be able to maintain its current stable state.

The formation ran for more than half an hour before Xia ruofei stopped and broke it apart. Then, he let it stay suspended in the air.

"Senior Yuntai, this junior is ready to go out!" Xia ruofei said, "this time, there should be enough time for me to set up the array!"

"Yes!" Replied layman Yuntai. Fellow Daoist Xia, when we meet on a narrow road, the braver one will win. There's nothing to be afraid of about the goldthread nether snake. You must first overwhelm the other party with your momentum!"

"Understood!" Xia ruofei said, "please help me, senior Yuntai. If I make any mistakes, please remind me."

"Alright!" Layman Yuntai said straightforwardly.

With a thought, Xia ruofei left the spirit map space in a flash..

Chapter 3409: The might of the formation (1)

When Xia ruofei left the spirit map space, he hooked onto the protruding part of the cliff and kept the spirit map scroll.

The enraged goldthread nether snake had caught up to Xia ruofei again, but it was still 40 to 50 meters away from him.

Even though there was still some distance between them, Xia ruofei could already feel the terrifying aura of the goldthread nether snake, especially its soaring killing intent, which seemed to have a physical form. Xia ruofei could not help but shiver.

If Xia ruofei didn't move, the distance of a few dozen meters could be covered in a few breaths. Therefore, as soon as Xia ruofei arrived outside, he immediately summoned the flying sword and silently used the sword technique to drive the flying sword to the top of the mountain.

At this moment, Xia ruofei had already left the poisonous fog and was less than a hundred meters away from the top of the mountain.

He stood on the flying sword and was extremely fast.

Although the goldthread nether snake was faster, Xia ruofei's speed had increased as well. Hence, it was impossible for him to catch up to him within a short distance of a hundred meters.

Just like that, Xia ruofei successfully returned to the top of the mountain.

He didn't stop. With a thought, he took out all the materials for the nine turn space splitting array from the spirit map space. Then, with a wave of his hand, the floating materials immediately scattered in all directions.

After two or three seconds, all the materials had arrived at their respective positions.

Xia ruofei immediately took out another crystal and inserted it into the core of the array.

At this moment, the golden thread nether snake's huge triangular head peeked out from the cliff. Its cold eyes were filled with murderous intent, especially when it saw Xia ruofei. The snake let out an angry hiss and swung its head upwards.

This time, Xia ruofei finally saw the huge body of the goldthread nether snake. Its body was thicker than a water tank and covered in hard scales. Even the snake's belly was covered in these scales.

When the goldthread nether snake rose into the air, it was truly like a giant dragon, full of momentum.

If not for the fact that it did not have claws, Xia ruofei would have thought that it was a Dragon from the legends.

The golden thread nether snake flew into the air and stared coldly at Xia ruofei. Then, it suddenly lowered its head and increased its speed from zero to the extreme, leaving behind an afterimage.

Xia ruofei suddenly felt a huge threat of death.

He did not panic in the face of danger, and unhurriedly cast a spell.

The nine turn space splitting formation was activated at this critical moment.

The goldthread nether snake charged headfirst into the nine revolutions space – splitting formation.

It had been staring at Xia ruofei but the moment the formation was activated, it was as if the world had turned upside down. Everything in front of it disappeared and it felt as if it had entered a chaotic space.

The goldthread nether snake was enraged. It lunged forward and used its physical strength to break a small spatial cage.

However, there were countless of the same spatial cages, and they were layered together. Brute force alone would never be able to escape.

Moreover, the laws of space were more complicated than the other laws. The goldthread nether snake was the weakest in the laws of space. This could be said to be its weakness. Even though its strong body

allowed it to forcefully break through the relatively unstable small space, it could not see through the essence of the formation. As for harming the formation, there was no way it could.

If Xia ruofei was trapped in the formation, he would not be able to see a chaotic space. He could see the essence of this small space through the phenomenon in front of him.

The chaos in the golden thread nether snake's eyes could be broken down into spatial laws in Xia ruofei's eyes.

Furthermore, Xia ruofei would definitely be able to see through the spatial node of this formation.

Even Xia ruofei wouldn't be able to break this formation in a short period of time, but at least he wouldn't be like the golden thread nether snake, who had completely lost its mind.

At this moment, Xia ruofei heard the voice of the Grand cloud scholar in his mind, "Fellow Daoist Xia, can you first move me and this ore out of the formation? A difference of two thousand times in the flow of time is really a test of my patience!"

Xia ruofei was stunned for a moment. Then, he couldn't help but laugh. Just now, in order to make it easier for him to communicate with layman Yuntai, he had taken out the mysterious ore from the cave in the mountain sea realm and placed it within the time formation flag of the Archean realm. Now that he had left the spirit map space and was in the outside world, he was fighting fiercely with the golden thread nether snake. From the perspective of layman Yuntai, who was in the formation, it was the same as when Xia ruofei was investigating the situation outside. It was all in super slow motion. It was even close to being frozen.

Scholar Yuntai was also anxious to know how the formation would deal with the goldthread nether snake, so he couldn't help but remind Xia ruofei.

"I'm sorry, senior Yuntai, it's my negligence!" Xia ruofei said as he held back his laughter. Then, with a thought, he placed the mysterious ore back into the stone chamber in the mountain sea realm.

In this way, the flow of time in the environment of scholar Yuntai was exactly the same as the outside world.

"I'm finally comfortable!" Scholar Yuntai said, and then he couldn't help but say in surprise, "eh? The effect of this formation is much better than I thought! The goldthread nether snake has already been trapped in the many small spaces!"

Chapter 3410: The might of the formation (2)

Grand cloud scholar was considered an expert. He could tell at a glance that the scales of victory were greatly leaning towards Xia ruofei.

Normal trapping arrays, even Xia ruofei's tried and tested trap & lull array, would find it difficult to trap a golden thread nether snake that was close to the early stage of the original level. It could also be easily destroyed by violence. Only spatial arrays could be broken by the layers of space. Although the snake tried to break the array with force, it could not damage the materials used to set the array. Therefore, it could not cause any damage to the array itself.

The nine revolutions space – splitting formation’s most prominent feature was that it created an endless amount of small spaces. In addition, the golden thread nether snake’s innate talent in space was far lower than the average. It could be said that the golden thread nether snake and the realm Fox were two extremes in terms of innate talent in space. The golden thread nether snake only knew how to use brute force to destroy small spaces, and the speed at which it destroyed them was even slower than the speed at which the formation created new small spaces. In this way, once it was trapped by the formation... It would be almost impossible to break out of the formation again.

Xia ruofei smiled and said, “I have to thank senior for your reminder!” If it wasn’t for Grand cloud’s guidance, I wouldn’t have known that the goldthread nether snake’s perception of space would be so weak.”

Generally speaking, those who were able to reach the peak of the advanced Aurous core stage and were close to the beginner nascent Soul Stage would not be too bad in the aspect of space. For normal cultivators at the peak of the advanced Aurous core stage, such as Chen Xuan’s father, Chen Nanfeng, even if he did not specialize in the laws of space, he would naturally come into contact with various laws at this level, including the laws of space.

In other words, if Chen Nanfeng had been trapped in the nine turn space – splitting formation, he would have performed much better than the goldthread nether snake.

Xia ruofei didn’t know much about the goldthread nether snake. If it wasn’t for the guidance of scholar Yuntai, he wouldn’t have thought of using a spatial attribute array to deal with the snake.

Scholar Yuntai smiled bitterly and said, “I just happened to know the weakness of this golden thread nether snake. It’s mainly because fellow Daoist Xia’s attainments in the Dao of arrays and understanding of the rules of space have reached an extremely high level. Otherwise, even if you knew the weakness of the snake, ordinary people wouldn’t be able to find a way to deal with it in such a short time!” So, there’s no need to thank me ii

...

“That’s true, but I still have to thank him!” Xia ruofei said with a smile.

He didn’t chat much with scholar Yuntai, because the goldthread nether snake was still trapped in the formation. He still needed to stay focused and control the formation.

The nine turn space splitting formation was naturally not as simple as a space cage. Otherwise, it would not have been impossible for ordinary golden core cultivators to set it up.

Its attacks were also extremely Swift and fierce.

Even if it was Xia ruofei himself, if he was trapped in such a formation, he would be in a very sorry state. If he was not careful, he might lose his life on the spot.

Seeing that the formation had stabilized and that the goldthread nether snake was trapped, Xia ruofei was relieved. Thus, he made a hand seal and skillfully sent it into the core of the array.

The nine turn space splitting formation immediately underwent a change. Streams of energy circulated within the formation patterns, and the momentum was extremely shocking.

The goldthread nether snake was on the verge of going crazy. It couldn't even remember how many small spaces it had broken, but every time it broke open a space, it was faced with the same scene. It was as if the small spaces were endless.

Moreover, it was completely relying on its tyrannical body to break through the space, so it was naturally impossible for it to not consume any energy.

In addition, after the space was shattered, it would also cause damage to it.

Although this kind of injury was basically nothing to it, it would eventually become unbearable after a long time. The scales on its back were already damaged in two places, and it was bleeding a lot.

These were all superficial wounds and had no effect on it for the time being. However, it had been trapped in this formation for a long time, which made it impatient. This was the first time it had suffered such a big loss.

Suddenly, a crack appeared in the space in front of the snake.

The goldthread nether snake was charging forward with all its might. In fact, it had been barging around like this all this time without any strategy. It crashed into the dark spatial crack.

The goldthread nether snake let out a shrill hiss.

A wound so deep that its bones could be seen appeared on its huge snake head, and blood spurted out.

The snake's fleshly body was far stronger than that of ordinary golden core cultivators, and even nascent soul cultivators couldn't compare to it. Otherwise, it would have already been beheaded.

If an ordinary person were to encounter such a spatial Rift, then the part of the body that came into contact with the spatial Rift would immediately disappear without a sound. This was because that part of the body had already entered another space, and naturally separated from the body.

It was only because the snake's body was extremely strong that it was able to withstand the terrifying tearing of the spatial crack.

Even so, the goldthread nether snake was severely injured by the spatial tear.

The goldthread nether snake's huge body curled up in pain, and then it started to writhe madly.

Fortunately, its physical condition was indeed unique. With such a deep wound, an ordinary person would definitely lose their combat ability in an instant. However, it only took a few seconds for the wound to stop bleeding and even begin to heal faintly.

The goldthread nether snake's rage points soared, but it could not be used. Xia ruofei did not even want to fight it head – on. It was still facing the endless spatial cage.

Moreover, the terrifying spatial rifts were increasing in number. The goldthread nether snake's initial anger had turned into a trace of fear.

It didn't even dare to charge around recklessly like it did when it was trapped in the formation.

Because it didn't know where the spatial Rift that it feared would suddenly appear.

The location of the spatial Rift was completely random, and it was silent.

In addition, the goldthread nether snake's talent in space was too poor. It couldn't sense any spatial fluctuations, so it was even more difficult to predict.

It had to be on guard at all times to avoid the spatial rifts that appeared randomly.

The golden thread nether snake's huge body was usually its greatest advantage, but now it had become a burden. The area it had to cover had also increased by a lot.

As the spatial rifts increased in number and frequency, the goldthread nether snake didn't even dare to rashly break through the spatial cage. It didn't have the energy to do anything other than defend itself.

The goldthread nether snake had just twisted its huge body to avoid a spatial crack.

These spatial rifts appeared without any warning or sound, so the goldthread nether snake had to maintain a high level of concentration. Its huge body was almost twisted into a fried dough twist. Fortunately, spatial rifts were very unstable and could not be maintained for too long. They would then disappear on their own.

Otherwise, no matter how strong the body of the golden thread nether snake was or how agile its reaction was, it wouldn't be able to last long.

Even so, there were still six or seven deep and terrifying wounds on its body. It was impossible for it to completely avoid all the spatial cracks, and no matter how strong its recovery ability was, it could not withstand the constant injuries.

Outside the formation, Xia ruofei was paying close attention to the goldthread nether snake's condition.

The scale of victory was leaning towards Xia ruofei's side.

What he had to do was to maintain the stability of the formation and add another straw to the camel's back.

Xia ruofei looked at the battered and exhausted goldthread nether snake inside the formation. He muttered to himself, then formed a hand seal and skillfully sent it into the core of the formation.

Within the nine turn space – splitting formation, the goldthread nether snake had not even had time to catch its breath when it heard a Sonic Boom.

It didn't even have time to react before it felt a sharp pain on its body. A part of its hard scales was directly blown off.

Immediately after, there was another sound of air breaking. This time, it came from the front. The goldthread nether snake finally saw it clearly. Its eyes were filled with horror. It was an extremely sharp spatial wind blade. It was obvious that it had been injured by the same spatial wind blade.

This was really a case of a house leaking when it rained overnight!
