

## God tier Farm 691

### Chapter 691: The herb garden in space (1)

Xia Qing looked at Xia ruofei with a strange expression and said, "Master, as far as I know, pomfrets originally live in the sea. They only go upstream when they lay eggs. Isn't this just right?"

Xia ruofei was stunned for a moment, then he came to his senses. He smiled embarrassedly and said, "It really is! This is in line with the nature of the pomfrets!"

However, Xia ruofei changed his mind and said, "That's not right ... These rays will all be in the sea, and I won't be able to catch them when I need them!"

Although only a small part of the ocean had been unlocked, which was only about a hundred meters away from the coastline, it was foreseeable that the ocean would become even wider in the future as the space was upgraded.

Xia Qing smiled and said, "master, you've forgotten that this is the spirit map world!" You're the absolute master of the spirit map world, so what's the difference between swimming in the river and swimming in the sea? With a single thought, no matter where they are in the spirit map world, they can't escape your control!"

"That makes sense!" Xia ruofei returned to her senses and said with a smile, "Xia Qing! The spirit map world is getting bigger and bigger. Sometimes, I really forget that this is just an artificial space ..."

Xia ruofei tried to feel it. Every blade of grass and tree in the entire space, including every little ray fish that had returned to the sea, could still be clearly sensed by him.

Furthermore, Xia ruofei could feel that as long as he willed it, the invisible spatial force could gather all these rays without any effort.

Xia ruofei was completely relieved.

With a slight thought, he used an invisible spatial force to lift the all – terrain vehicle, bringing Xia Qing, Blackie, and the others to float over the river easily, and landed steadily on the other side of the river.

Then, Xia ruofei continued driving, inspecting the upgraded mountain and sea realm of the spirit map space.

Xia ruofei realized that one – third of the mountain sea realm was a coastline, and the remaining two – thirds was still land. According to this trend, he was either on a continent or a Peninsula.

As for the specific situation, he could only wait for the realm to continue upgrading and expanding before the mysterious veil could be slowly lifted.

.....

Xia ruofei walked along the coastline and the space membrane and returned to the starting point.

By now, he had a rough estimate of the area of the mountain and sea realm.

It had about 3800 mu.

In other words, it had nearly doubled in size compared to the last time he had absorbed the Jade.

And this was only the area of the land. If the area of the sea was included, it would definitely be more than four thousand mu.

Now that the mountain sea realm's environment was more suitable for kun fish to grow, Xia ruofei decided to go to the Archean realm and transfer a portion of the kun fish to the mountain sea realm.

Of course, there were still some breeding fish left in the Archean realm.

That was because time was 30 times faster at the Archean realm. The speed of reproduction of the rays was naturally 30 times faster than normal. This way, Xia ruofei could expand the population of rays even more quickly.

Xia ruofei walked around the Archean realm and felt that it was too empty.

Other than the oak trees that he had transplanted earlier, there were almost no other crops.

That was because Xia ruofei had placed most of the valuable crops at the Archean realm. Wild ginseng and the like could obtain the greatest benefits under the time flow that was 30 times faster.

There was no need for Xia ruofei to grow crops that did not have obvious economic benefits in the realm.

Not to mention the time and effort, he wouldn't be able to earn much money.

Xia ruofei furrowed his brows and expressed his thoughts. Then, he asked, "Xia Qing, this Archean realm is so spacious. It's really a waste to just leave it here. Do you have any good suggestions?"

"Master, you can set up a medicinal garden here!" Xia Qing said after some thought.

"Herb garden?" Xia ruofei said, "I've never even heard of the immortal herbs you mentioned before. Where can I find the seeds to plant them?"

Xia Qing smiled. "Master, spirit herbs and immortal herbs can only be found by chance. They can't be sought. The herb garden I mentioned isn't for growing these immortal spirit herbs."

"You don't plant spirit herbs and immortal herbs? Could it be a normal Chinese medicine?" Xia ruofei asked.

"Yes!" Xia Qing nodded. "Master, I've seen the herbs you bought from the outside world. To be honest, the quality is very poor! When you brew body tempering soup, spirit nourishing soup, heart nourishing soup, Jade skin cream, and so on, these herbs can only produce a little effect."

"No way? I ordered those herbs from a big pharmacy!" Xia ruofei said, "the quality should be guaranteed, right?"

Xia Qing shook her head and said, "that might be due to the external environment. In short, the medicinal properties of those herbs are very weak. In my opinion, they are not qualified!"

"So you're saying we should plant it ourselves?" Xia ruofei asked.

“Yes!” Xia Qing nodded. Master, there’s a large piece of open space in the mountain sea realm, and we can plant large amounts of the herbs you need. The herbs produced in the spirit map world are definitely of a higher quality than the ones you bought!”

“It can significantly increase the efficacy of the spirit bearing soup and body tempering soup?” Xia ruofei asked.

“That’s for sure!” Xia Qing said without the slightest hesitation.

Xia ruofei nodded and decided, “okay!” Then he’d create a spatial herb garden! Xia Qing, give me a list of the Chinese herbs you need to plant. I’ll take care of the seeds, and you’ll be in charge of the specific work of opening the herb garden. Is that okay?”

## **Chapter 692: Spatial herb garden (2)**

“Master! I promise I won’t let you down!” Xia Qing stuck out her chest and said, “you only need to provide the seeds. Leave the rest to me!”

“Good! Make a list now!” Xia ruofei said.

Following that, Xia ruofei waved his hand. The paper and pen that were originally kept in the Archean realm immediately appeared in his hands.

Xia ruofei passed a pen and paper to Xia Qing. Xia Qing listed more than 30 kinds of Chinese medicinal herbs on the spot. They were all common medicinal herbs. It would not be difficult to find their seeds.

Xia ruofei folded the paper and put it in his pocket. “I’ll go buy the seeds as soon as I get out. Xia Qing, you can start the preparatory work now!”

“Yes, master!” Xia Qing said respectfully.

Xia Qing was originally a spirit puppet that assisted in the management of the spirit map world. Clearing the land, taking care of the spirit plants, planting medicinal herbs, and so on were all his “innate skills.” As a spirit puppet that was absolutely submissive, the joy of master giving him tasks was born from the bottom of his heart.

Xia ruofei then told Blackie and the others to stay in the medium. After the expansion of the farm was completed, he would take them out to have fun.

Then, with a thought, Xia ruofei left the space and kept the spirit map scroll in his palm.

Xia ruofei looked at the time. It was already past one o’ clock in the afternoon and he had missed the meal time.

So, he went downstairs to the kitchen and made some noodles for himself.

Of course, he didn’t forget to get two eggs. With the tomatoes and cabbage produced by the space, a bowl of ordinary noodles with the magical vegetables in the space became extremely delicious in an instant.

Xia ruofei had already gotten rid of all the vegetables he had planted in the Archean realm. However, he still had a lot of vegetables that he had harvested in the past. He had stored them in a space that could

keep them fresh forever so that he could eat the most authentic space vegetables whenever he needed them.

.....

Xia ruofei had been away for seven to eight days, so he should have gone to the company to check on the progress, especially the preliminary review of the new medicine. However, it was lunch break and Xia ruofei did not want to disturb his employees.

So, he simply drove the pickup truck away from the farm and went straight to the seed company in the city.

The Sanshan seed company was the largest company in the entire Southeast province. They sold all the common seeds of Chinese medicine.

Xia ruofei followed Xia Qing's list and bought all the seeds he needed at once.

There were more than 30 kinds of medicinal seeds, and he bought 5 catties of each. Xia ruofei felt that with so many seeds, it should be enough for Xia Qing's use.

There were more than 50 kilograms of seeds. The expensive ones cost a few hundred Yuan per kilogram, and the cheaper ones only cost 10 to 20 yuan. Xia ruofei spent more than 5000 Yuan in total and left the city's seed company with a big bag of sorted and packaged medicinal seeds.

Xia ruofei did not return to the farm immediately. Instead, he drove to the northern suburbs of San Shan city. There were many companies that sold farming machinery there.

Xia ruofei had taken into consideration that the planting area was so large that it would be very inefficient to rely on Xia Qing's manpower to cultivate the land. Hence, he had driven over to see if there were any small machines that could be used.

After a round of shopping, Xia ruofei really had some gains.

A company called Dahua agricultural machinery was selling a kind of caterpillar track super – Small agricultural excavator for about 80000 Yuan.

Compared to those engineering hook machines that cost hundreds of thousands or even millions, this was a good price.

Although this kind of super – Small excavator was almost useless on the construction site, it was very suitable to be used to open up the medicine garden in the realm.

Xia ruofei bought one without any hesitation, and the other party even delivered it to his door.

Hence, Xia ruofei asked them to send the small excavator directly to the warehouse he rented in the city. He also bought a large barrel of diesel on the way.

In the warehouse, Xia ruofei took the excavator, diesel, and the seeds he had just bought into the medium.

Then, Xia ruofei used his mind to communicate with Xia Qing in the medium, telling him to deal with the seeds first and not to cultivate the land for the time being. Everything could be discussed after he entered the medium.

After that, Xia ruofei drove back to the farm.

When he returned to the farm, it was already three in the afternoon. He parked his car at the general building and went upstairs to Feng Jing's office.

Thump thump thump!

Xia ruofei gently knocked on the door. Feng Jing looked up and saw Xia ruofei. She immediately stood up and smiled. "Mr. Chairman, you're finally willing to return to the three mountains? I thought that you had fallen into the land of gentleness in the capital and had forgotten about home!"

Xia ruofei pretended to be serious and said, "what are you saying?" I'm doing official business in Beijing!"

"Haven't we already finished our business?" Feng Jing grinned. "I heard from Xue Jinshan that the chairman personally came and got the approval in the same night. He was so domineering!"

Xia ruofei said helplessly, "I had other things to do in the capital. Didn't I rush back as soon as I finished?"

"I don't Dare to Care about you!" Feng Rao said with a smile. Besides, we're all used to you going missing from time to time! Anyway, the company will still operate without a Chairman!"

"That's right! It's my fault for having such a capable general manager!" Xia ruofei asked with a smile, "President Feng, how's the company these days?"

### **Chapter 693: Spatial herb garden (3)**

"Everything is normal!" Feng Jing said, "the expansion project will be completed in about a week. Our company's account has sufficient funds, so it won't be a problem to pay for the project."

"That's good!" Xia ruofei smiled and said, "I have to prepare the seeds in advance! With so many vegetable greenhouses, the supply of seeds would have to keep up!"

"Yes! Cao tieshu has already looked for me, but you have always been personally in charge of the matter of the seeds, so I told him to wait for you to come back. " Feng ke said.

"Don't worry! There's no time to delay!" Xia ruofei said with a smile.

"Also, after the expansion of the farm is completed, there will be a shortage of manpower in the greenhouse." Feng Rao said, "I have already asked Cao tieshu to release the news of the recruitment. They are mainly recruiting people from their village. Now, many villagers have signed up. Everyone is very enthusiastic!"

"That's for sure!" Xia ruofei laughed and said, "the exemplary effect of Cao tieshu's batch of workers is amazing! Everyone in the village is envious of their current income and welfare!"

Xia ruofei was not going to care about the recruitment. He was only going to recruit a few greenhouse workers. He was going to be the hands – off manager and let Feng Jing take care of it. He would let Cao tieshu take charge of the specific matters.

After all, Cao tieshu was the one who used and managed the recruitment. Moreover, if he delegated the appropriate authority, Cao tieshu would have more prestige in the village. At the same time, his loyalty to the company would naturally increase.

Next, Xia ruofei asked about the preliminary review of the new medicine, which he was most concerned about.

Feng Jing told Xia ruofei that the provincial Food and Drug Administration was very efficient in the preliminary examination of the heart – nourishing soup. The preliminary examination process had already started on the second day after Xue Jinshan’s return.

Moreover, he kun, the Deputy Director of the Food and Drug Administration, had personally come forward to coordinate with the provincial health and planning Commission to arrange Peking Union Medical College Hospital, which was more authoritative in the field of child neurosurgery, to be the Clinical Trial Unit.

At present, Peking Union Medical College Hospital was selecting suitable test subjects and control groups in accordance with the requirements of the clinical trial. They were preparing to conduct the first phase of the clinical trial in a double – blind situation.

The so – called double – blind test was to divide the test subjects into an experimental group and a control group. They would take the experimental drug, the control drug, or a placebo drug respectively. The researchers and the test subject would not know which group the test subject was assigned to or what drug he took.

.....

“What a fast progress!” Xia ruofei said in surprise.

“Who said it wasn’t?” Feng Jing said, “according to the regulations, the first review must be done through a technical review, and then an on – site inspection of the trial – Production environment. The samples must also be tested. These links have not been completed yet! We haven’t even prepared the drugs for the clinical trials ...”

After the establishment of the pharmaceutical company, they did not have their own pharmaceutical factory, so what Feng Jing said was naturally impossible. The drugs used in Xia ruofei’s own experiments were all made by Xia ruofei at the last minute. Xia ruofei had been in Beijing these days, so Xue Jinshan naturally could not make heart – nourishing soup.

Xia ruofei smiled and said, “it seems that our work is lagging behind!” President Feng, you have to speed up the progress on your side. How’s the inspection coming along these days? He had to buy a pharmaceutical factory as soon as possible! We still have to make adjustments to the production line, fix the production process, reset the parameters, and so on. Finally, we still have to carry out a trial production for a period of time. If we don’t speed it up, I’m afraid that even the progress of the clinical trials will be affected. ”

“I already have my eyes on the two pharmaceutical factories,” Feng Jing said. “I’ve also made some preliminary contact with them. I’m just waiting for you to come back and make the final decision!”

Xia ruofei smiled and said, "then what are we waiting for?" Now, please tell me about the situation! Let's go to the meeting room and call Xue Jinshan and the others!"

#### **Chapter 694: final decision (1)**

Xue Jinshan was leading a few new people in the Research Institute to research some matters regarding the preliminary review of the heart – nourishing soup.

The approval of new drugs involved many aspects. Now that Xue Jinshan was in charge of this matter, he was under a lot of pressure. Every day, he would bring a few undergraduate students to meet and research.

When he heard that Xia ruofei had returned, Xue Jinshan immediately put down what he was doing and ran to the meeting room with his laptop.

"President Xia!" Xue Jinshan said happily as soon as he came in, "the preliminary examination is going very smoothly. The provincial Drug Administration has given us unconditional support!"

Xia ruofei laughed and said, "Jinshan, sit down and talk." Director Feng has already told me about the situation. Everyone has worked hard during this period!"

"It's not hard, not hard at all. "Xue Jinshan chuckled. Everyone's full of energy working for chief Xia!"

It was not an exaggeration to say that besides Xia ruofei, Xue Jinshan was the person who knew the heart – nourishing soup the best. He was very clear that once this new medicine hit the market, it would definitely become a global topic.

When he thought about how he was about to create history, Xue Jinshan was filled with enthusiasm.

Xia ruofei smiled and said, "we'll talk about the new drug approval later. I called you here today to discuss the acquisition of the pharmaceutical factory." As you know, the approval process for the new drug is going quite smoothly, and the progress is far beyond our expectations. It's urgent to acquire the pharmaceutical factory for mass – Production testing!"

"Yes! President Xia, a lot of work is going to stop in the preliminary stage because our production site is not in place yet. " Xue Jinshan said, feeling the same.

At this moment, Feng Jing walked into the meeting room with a few stacks of documents. "Chairman, after our preliminary investigation, we've selected two pharmaceutical factories as potential acquisition targets. The specific information is here, you can take a look first."

After that, Feng Jing gestured to her assistant, Liu Qian, to distribute the information to Xia ruofei and Xue Jinshan.

Just as Xia ruofei and Xue Jinshan were going through the information, Feng Jing introduced, "These two factories produce Eastern medicine. One is Min Jiang pharmaceuticals from San Shan, and the other is Nanyue pharmaceuticals in Song Ping."

.....

Xia ruofei casually flipped through it and raised his head to smile. ""Since these two companies have caught your eye, they must have their own advantages. President Feng, please introduce their advantages and disadvantages!"

Feng Jing nodded. "Firstly, they're both Chinese medicine companies. We can use their production lines directly. Furthermore, both companies have the intention to sell their products due to poor management."

Feng Rao took a sip of water and continued, ""Let me first talk about Min Jiang pharmaceuticals! "The advantage is that it's located in Sanshan city, and our company has centralized management. In addition, we've inspected this pharmaceutical company. The production line was updated the year before last, and it's at least 90% new." Nanyue pharmaceuticals, on the other hand, is a little bigger than Min Jiang pharmaceuticals. They have three sterile production workshops, while Min Jiang pharmaceuticals only has two. Furthermore, Nanyue pharmaceuticals has the production approval for many types of Chinese medicine, which is also where Min Jiang pharmaceuticals is weaker than them."

"Have they made an offer?" Xia ruofei nodded.

"That's what I was about to say," Feng Rao said. "The two companies' offers are about the same, around 25 million. I've looked at the market, and the transfer price of such a small pharmaceutical factory is about this level. They didn't ask for too much. "

After saying that, Feng Rao suddenly changed the topic and said, "However, at the same price, Nanyue pharmaceuticals clearly has an advantage. Not only is their factory larger than Min Jiang pharmaceuticals, but they also have five more production permits than Min Jiang pharmaceuticals. Just these permits alone are worth a lot of money. If it wasn't for the geographical location, I would definitely be inclined towards the South eclipse Kingdom. "

Xia ruofei smiled but didn't express his opinion immediately. Instead, he looked at Xue Jinshan and asked, ""Jinshan, what do you think?"

Xue Jinshan muttered to himself for a moment before flipping through the information in his hands. He cautiously said, "President Xia, I personally think ... We can put aside the production approval for now. Even if we acquire the pharmaceutical factory, it's unlikely that we can continue to produce the drugs that they have produced before. The heart – nourishing soup project will be able to top the other ten projects."

Xia ruofei nodded and said, "CEO Feng, I agree with Jinshan." After we acquire the pharmaceutical factory, we'll only be producing heart – nourishing soup in the short term. The production approval for other Chinese medicine wouldn't be of much use to us. "

"If we remove the approval, then Min Jiang pharmaceuticals and Nan Yue pharmaceuticals are basically on par," Feng Jing nodded. Nanyue pharmaceuticals might be a little bigger, but Min Jiang pharmaceuticals' production line has been updated, and the land price in San Shan city can't be compared to that in Song Ping city. "

Xia ruofei was silent for a long time. He carefully compared the two documents in his hands and finally raised his head. "CEO Feng, from a company management perspective, Min Jiang pharmaceuticals is clearly more suitable. Moreover, their 90% new production line is more attractive to me than Nanyue

pharmaceuticals, who has an additional sterile workshop. My personal opinion is leaning towards Min Jiang pharmaceuticals.”

“Alright, then we’ll focus on negotiating with Min Jiang pharmaceuticals!” Feng Jing nodded.

Xia ruofei agreed, “don’t cut off contact with Nanyue pharmaceuticals immediately. Let’s use it as an alternative!” Also, don’t let Min Jiang pharmaceuticals find out that we’re in a hurry to acquire a pharmaceutical factory. I don’t think I need to teach you the negotiation skills.”

## **Chapter 695: final decision (2)**

“Understood!” Feng Rao said with a smile. Chairman, Min Jiang pharmaceuticals ‘sale of cash is still very urgent. I believe that the negotiations will be able to make substantial progress very soon.”

Xia ruofei nodded and said, You should hurry up and get this matter settled. Regarding this negotiation, I don’t have any other requests, nor will I set a bottom line for you. Even if the final price is only 25 million, I can accept it.”

Feng Jing nodded. “I understand, Chairman. I’ll contact Min Jiang pharmaceuticals today to conduct in – depth negotiations. I’ll report to you as soon as there’s any progress!”

Xia ruofei gathered the information and stood up. “Good! Then, everyone, get into position and do what you’re responsible for!”

Feng Rao and Xue Jinshan also stood up. At this moment, Feng Rao suddenly said, “By the way, Chairman, Jiang Hua seems to be looking for you urgently at the pomfrets cultivation workshop ...”

Xia ruofei was stunned and quickly asked, “Is there a problem with the pomfrets? Could it be that a large number of deaths have occurred?”

“I’m not too sure about that,” Feng Rao said, “but it shouldn’t be a mass death of pomfrets. If something so serious had happened, Jiang Hua would’ve definitely reported it to me.” Why don’t you take a look at the pomfrets cultivation workshop? Jiang Hua must be at the fish pond right now.”

Xia ruofei was in a hurry to go home, but after hearing Feng Jing’s words, he immediately changed his mind and said, “Alright, I’ll go over and take a look now!”

Xia ruofei left the complex and was not in the mood to walk over. He drove the pickup truck straight to the pomfrets cultivation workshop.

A roadblock had been set up 100 meters away from the cultivation workshop, and a veteran was guarding it.

Xia ruofei knew that this was a special request from Jiang Hua. Under normal circumstances, the vehicles were not allowed to get too close to the breeding workshop to avoid disturbing the delicate and timid rays.

The veteran saw Xia ruofei’s car and quickly tried to open the bar.

Xia ruofei waved his hand to stop him. He got out of the car and said, “No need, I’ll just walk in! By the way, is Jiang Hua inside?”

.....

“Yes, he’s here. He stays at jianggong until 10 O’ clock in the evening almost every day. Sometimes, he even spends the night in the cultivation workshop.” The veteran said.

Xia ruofei nodded and patted his shoulder.””Brother, you’ve worked hard!”

With that, Xia ruofei quickly walked towards the cultivation workshop.

After pushing the door open, Xia ruofei unconsciously lightened his footsteps. Jiang Hua was squatting by the fish pond and observing the Chinese perch. Although Xia ruofei’s footsteps were light, he was still a science student and had already noticed it. He turned around warily.

Seeing that it was Xia ruofei, Jiang Hua’s face lit up. He quickly stood up and walked to Xia ruofei. He said in a low voice,””President Xia, you’re back?”

Xia ruofei smiled.”I heard from director Feng that you were looking for me urgently. What’s the matter?”

“Let’s go, director Xia!”Jiang Hua said. Let’s talk in the control room. ”

The two of them went to the control room. A worker was monitoring the various data of the cultivation workshop.

Jiang Hua gestured for the worker to leave first. Then, he pulled out a chair for Xia ruofei and said,”President Xia, please have a seat!”

The control room had soundproof glass, so they didn’t need to talk like they were in an underground meeting.

Xia ruofei sat down and asked with a smile,””Speak! What happened?”

Jiang Hua said,”director Xia, it’s actually nothing much, but I’m not too sure ... These rays are growing too fast!” It’s growing at least 30% faster than I expected! At this rate, we’ll probably be able to harvest the fish three months in advance!”

Xia ruofei smiled and said,”isn’t that a good thing?” Why are you so nervous?”

Jiang Hua said,”director Xia, I’ve never been confident!” I’ve been raising beluga for so many years, but I’ve never seen one grow so fast! I’ve heard that Chinese perch grow slower, but now it’s the opposite. It’s even faster than the United States perch I raised! President Xia, this ... There shouldn’t be any problems, right?”

Xia ruofei laughed and said,”what problem can there be?” Our baby pomfrets are all improved. Not only are they stronger than normal pomfrets, but they also grow faster, and their meat is as tender as wild pomfrets!”

Jiang Hua nodded and said,”so it’s an improved fry?” No wonder it’s growing so fast ... CEO Xia, you’re really amazing to be able to get such a good kun fry ...”

Jiang Hua was not stupid enough to ask Xia ruofei about the source of the baby stingers. As an employee, he just had to do his job and take good care of the baby stingers.

After getting a reasonable explanation from Xia ruofei, Jiang Hua was relieved and stopped worrying about the growth rate of the Chinese perch.

Xia ruofei smiled. "Jiangong, my friend has prepared a new batch of fish. They should be shipped over soon. You have to be ready to receive them at any time!"

"No problem!" Jiang Hua said excitedly. President Xia, many of our fish ponds are still empty, waiting for the young fish to come! The more such good fish, the better! It's best to have a few more batches, so that we can have adult fish for sale every month!"

"Don't worry! The fish will definitely be sent over in an endless stream." Xia ruofei said, "that's why we're only in charge of the breeding. You don't have to worry about the breeding of pomfrets!"

"Understood!" Jiang Hua said.

### **Chapter 696: final decision (3)**

Since Xia ruofei had come to the beluga breeding workshop, he naturally had to take a look around. After looking at the fish ponds, Xia ruofei did not let Jiang Hua accompany him and asked him to do his own things.

Xia ruofei continued to stroll around the pomfrets cultivation workshop. Soon, he seemed to have unintentionally walked to the circulating pool.

The water in this large reservoir would go through multiple filtration cycles and be sent to each fish pond.

Xia ruofei used his body to block the view behind him and also the surveillance camera. He used a very secretive move to take a bottle of spirit Heart Flower petal solution and quickly poured it into the water reservoir.

This was a secret magical treasure that could ensure the rapid growth and tenacious vitality of the Pomfret! Xia ruofei would come over every once in a while to add some more.

With his skills, he naturally had a way to complete it without anyone knowing.

Moreover, as the boss, he would come over to inspect every once in a while, so naturally, it would not arouse any suspicion.

After adding the flower petal solution, Xia ruofei gestured to Jiang Hua in the control room and left the pomfrets breeding workshop.

Xia ruofei returned to the intersection and drove the pickup truck back to the small villa.

He looked at the time. There was still about an hour before dinner, so he decided to use this time to go to the spirit map world and make some arrangements for the herb garden.

After going upstairs and locking the door and windows, Xia ruofei took out the spirit map and entered the medium.

The small excavator he had bought was quietly placed next to the all-terrain vehicle, and behind the excavator was a large barrel of diesel.

Xia Qing was busy processing those seeds in the space.

.....

He took over some of the empty plastic containers that Xia ruofei had left at the Archean realm. He fetched some spirit pond water and was currently soaking the seeds.

Seeing Xia ruofei come in, Xia Qing immediately put down the work in her hands and walked over quickly. She called out respectfully, ""Master!"

"Xia Qing, do you know why I didn't let you cultivate the land first?" Xia ruofei asked.

"This subordinate does not know!" Xia Qing replied.

Xia ruofei pointed at the small excavator and said, ""To do a good job, you must have sharp tools. It's too inefficient to rely on you to excavate with your bare hands, so I bought an excavator!"

Xia Qing looked at the steel monster, which was even weirder than the all-terrain vehicle, and said in confusion, ""Master, you're saying ... This metal guy can dig?"

Xia ruofei nodded and said, "yes!" And it's countless times faster than you digging with your bare hands!"

Xia Qing looked at the excavator and still felt that it was unbelievable.

Xia ruofei smiled and said, "Xia Qing, I came here today to teach you how to use this excavator. After you learn it, you'll have a powerful helper. The speed of opening up the herb garden will also be greatly accelerated!"

"Master, I ... I can also use this metal thing?" Xia Qing asked in surprise.

"Why can't I? The machine is dead. As long as you learn how to operate it, you will naturally be able to use it!" Xia ruofei said, "I'll start teaching you how to use an excavator!"

Xia Qing quickly looked at Xia ruofei, afraid that she would miss some details and fail to learn.

Xia ruofei revealed a confident smile and said, ""The first step ... Uh! Where's the manual for this thing? I'll take a look first!"

Xia Qing was speechless.

### **Chapter 697: Taoyuan pharmaceutical factory (1)**

In fact, when Xia ruofei was in the Army, he had learned the basic driving skills of many vehicles and even helicopters, including armored vehicles with caterpillar tracks. Xia ruofei was not completely clueless about the basic operation of these small agricultural machines.

Besides, this small excavator only had a few control levers. Xia ruofei took out the manual and read it briefly. He had a basic understanding of the principles.

However, to teach Xia Qing, he had to first familiarize himself with the operation.

The mountain sea realm was extremely spacious, and there was no need to worry about any danger. He could build with all his might.

For safety's sake, Xia ruofei drove the all – terrain vehicle, which was parked beside the small excavator, far away. He then asked Xia Qing, Blackie, and the rest to leave the range of the mechanical arm before jumping onto the excavator.

The small excavator was already half filled with diesel. Xia ruofei pressed the key and the excavator started to make a loud noise. The exhaust pipe started to emit black smoke.

Fortunately, the space had an automatic purification function. Otherwise, the air would be polluted in such an enclosed space.

Xia ruofei tried to move a few joysticks and quickly understood the basic operations of moving forward, backward, and operating a mechanical arm.

With the sound of the engine, Xia ruofei operated the small excavator to move forward, backward, and turn around. Then, he began to try to dig clumsily.

Ten minutes later, the familiar Xia ruofei called Xia Qing over.

Xia Qing was already stunned when she saw Xia ruofei operating the excavator while he was practicing. That big shovel could dig a big pit! If it was used to dig holes, it would be a peerless divine weapon!

So when Xia ruofei beckoned, Xia Qing immediately ran over, her eyes almost shining.

Xia ruofei began to teach Xia Qing how to operate the small excavator.

.....

Considering that Xia Qing had Zero Foundation, Xia ruofei started to teach her how to refuel the machine. He told Xia Qing that the excavator was driven by diesel and that if there was no oil, she had to refuel the machine in time. The big Oil barrel behind her was filled with diesel.

Xia ruofei personally demonstrated and after teaching Xia Qing how to refuel, he began to talk about starting the engine, then how to move forward, how to retreat, and how to brake.

In the end, Xia ruofei taught Xia Qing how to operate the mechanical arm.

After explaining everything once, Xia ruofei let Xia Qing observe from the side. He explained again as he operated to deepen Xia Qing's memory.

After that, Xia ruofei passed the excavator to Xia Qing and let her try it out.

Xia Qing had long been eager to try. After getting Xia ruofei's approval, she immediately sat in the driver's seat.

Xia ruofei hurriedly brought Blackie and the rest far away.

Xia Qing had never seen modern machinery before. Now, she had only listened to Xia ruofei's explanation of the basic operations and then observed for a while. Xia ruofei himself was not confident, so he didn't know how much Xia Qing could learn.

So, it was better to hide as far away as possible!

In any case, there was nothing in the mountain sea realm other than a few oak trees and the iron cage that kept the Hornet. The oak tree and the iron fence were still far away! Let Xia Qing do whatever she wants!

To Xia ruofei's surprise, the excavator that he was most worried about did not go out of control.

Xia Qing's driving of the excavator was a little shaky. It looked like she was moving very clumsily, but it seemed like she was operating it well.

He was seriously experiencing the basic operations such as forward, backward, turning, and so on.

After a while, Xia Qing began to try to use the mechanical arm.

This required the close cooperation of two control sticks, which tested the hand sensitivity.

In the beginning, Xia Qing couldn't operate it well, but after a while, she was actually able to operate it well. With the sound of the engine, the mechanical arm of the excavator slowly pressed down, and Xia Qing quickly dug up a shovel of soil smoothly.

Then, he twisted the control stick, and the excavator quickly changed direction. He then controlled the mechanical arm to pour the soil to the side.

Xia ruofei was dumbfounded. Xia Qing's learning ability was too strong!

The more Xia Qing played with the excavator, the more confident she became. After a short while, a large pit was dug in front of her, and a small mound of soil was piled up on the side of the excavator.

Even when Xia ruofei called for them to stop, Xia Qing was still not satisfied. She reluctantly dug another shovel of soil, then turned off the engine according to the procedure Xia ruofei had taught her, and jumped down.

"Master! This ... Excavator is so useful!" Xia Qing said with an excited expression, "with this, I will be able to open up my herb garden much faster!"

Xia ruofei laughed and said, "I bought it for you to use!" Xia Qing, you'll start working today. You'll be in charge of how the herb garden is set up and how the seeds are planted. I don't care about the process, I only want the results!"

"Yes! Master!" Xia Qing said confidently, "just wait and see!"

"Use the excavator however you like. If you run out of diesel, let me know. I'll go buy more!" Xia ruofei said with a smile.

"Yes, master!" Xia Qing said, "that's right, master. I've already made the Da Hong Pao tea leaves that I picked last time into tea leaves. I'll go get them for you now!"

After she finished speaking, Xia Qing jogged up to the middle of the mountain and took out a tin can from the stone room in the cave. Xia ruofei had prepared it for Xia Qing in advance to hold the Da Hong Pao tea leaves.

## Chapter 698: Tao Yuan pharmaceutical factory (2)

Xia ruofei took the tin can. Once he opened the lid, he could smell the strong fragrance of tea. He grabbed a small handful of tea leaves and looked at them. The appearance was impeccable. It was definitely not inferior to the Da Hong Pao made by Mr. Li Zhifu.

As for the quality of the tea leaves, he would only know after they were brewed.

However, just from its appearance, the quality was definitely not bad!

Xia ruofei put the tea leaves back into the tin can and then carefully closed the lid. He smiled at Xia Qing and said, "Not bad, not bad! Xia Qing, thank you for your hard work!"

"Master, it's nothing. It's not worth mentioning," Xia Qing said with a smile.

"In the future, as long as the tea leaves from the 12 parent trees can be harvested, you can immediately pick them. However, you can save them up a few more times before making them together." Xia ruofei said, "the tea leaves won't go bad in this space anyway."

"Yes, master!"

Xia ruofei said a few more words, then with a thought, he left the spirit map space with the jar of Da Hong Pao.

After returning to the outside world, Xia ruofei saw that there was still some time before the canteen would open. Hence, he took the can of tea leaves downstairs to the living room and skillfully set up the tea set.

Then, he took out a small bucket of water from the spatial spirit pond and poured it into the kettle to boil.

Soon, an extremely strong tea aroma began to fill the living room of the small villa.

Xia ruofei lifted the tea cup to his mouth and sipped the clear tea.

The unique fragrance of Da Hong Pao spread in his mouth. Even Xia ruofei, who did not know much about tea, could not help but reveal an expression of reminiscence. He drank the remaining tea in the tea cup in one gulp, savored the aftertaste in his mouth, and then swallowed it in one gulp.

.....

Top – grade tea!

They were also from the same 12 Da Hong Pao trees, and the Da Hong Pao that Xia Qing made was not inferior to the batch that Mr. Li Zhi Fu made.

Xia ruofei even faintly felt that Xia Qing's craftsmanship seemed to be more natural. This tea had a natural charm that could make people reminisce for a long time.

Xia ruofei couldn't think of any words to describe this cup of Dahongpao. After a long while, two words came to his mind.

Immortal tea!

That's right! This tea should only be available in heaven, how many times could it be tasted in the human world!

Xia ruofei was very happy. This tea was great, whether it was for himself or for someone else.

He made another five or six cups of tea and found that the rich Tea fragrance had only weakened slightly, and the color of the tea had only become slightly lighter.

It seemed like this Da Hong Pao was even more durable than the ones made by li Zhifu!

Xia ruofei carefully covered the tin can and put it into the medium. He checked the space to see if it had the best preservation effect. There was no need to worry about the preservation problem of the tea leaves in the space.

.....

In the next few days, Xia ruofei selected another 500 kun fish of suitable size from the medium.

These baby stingers gradually returned to the sea from the river. However, Xia ruofei was the absolute master in the spirit map space. He effortlessly picked out 500 of them and transferred them into the plastic box without the Stingers noticing.

Then, Xia ruofei drove the car out and dawdled outside for more than an hour before driving back. When he was about to reach the farm, he took out the plastic boxes containing the fry fish from the medium and neatly stacked them in the back of the pickup truck.

When Jiang Hua heard that there were more baby pomfrets, he carefully transferred the 500 baby pomfrets to the pomfrets cultivation workshop. He carefully selected an empty fish pond and set all the indicators before placing them in the pond.

On Feng Jing's side, the negotiations were also progressing very quickly.

Min Jiang pharmaceuticals was also eager to sell these bad assets, and Tao Yuan company was also very sincere in acquiring them, so both sides made a certain concession.

In the end, both parties agreed that paradise Corporation would purchase all of Min Jiang pharmaceutical's shares for 23.5 million Chinese dollars.

Under Feng Jing's insistence, the min Jiang Corporation would be in charge of the relocation of the former Min Jiang pharmaceutical workers.

However, Feng Jing also promised that under the same conditions, the pharmaceutical factory would give priority to hiring workers from Min Jiang pharmaceutical.

For Min Jiang group, there were many other industries besides the pharmaceutical company, so it was not difficult to arrange for these workers. Moreover, Tao Yuan company had promised to recruit a group of skilled and hardworking employees. This way, Min Jiang group would have less pressure to arrange for these workers.

Just like that, after five days of negotiations, the peach blossom company and Min Jiang group finally came to an agreement. Feng Jing and the General Manager of Min Jiang group signed the transfer contract, and Min Jiang pharmaceuticals was finally owned by the peach blossom company.

Feng Jing reported the entire negotiation and contract signing process to Xia ruofei.

However, Xia ruofei was addicted to being the boss and basically did not interfere with the acquisition negotiations. Even the final signature was done by Feng Jing.

Of course, for the contract to take effect, it required the company seal of the Paradise Corporation. This required Xia ruofei's approval.

Very quickly, Min Jiang pharmaceutical company was renamed to Taoyuan pharmaceutical factory.

The first thing Xia ruofei did was to bring Feng Jing and Xue Jinshan along to interview the original Min Jiang pharmaceutical workers who had the intention to continue working in the pharmaceutical factory.

About 30 people passed the interview and stayed at Taoyuan pharmaceutical factory.

Among these people, there were basic frontline workers, production line maintenance engineers, and some management talents. Even the original Deputy factory manager of Min Jiang pharmaceuticals had come to participate in the interview and was hired by the peach blossom company.

Most of them were skilled workers. In Xia ruofei's eyes, they were all talents!

After the acquisition of the pharmaceutical factory was completed, the more than 30 people who passed the interview and stayed were quickly assigned to the positions they were good at.

However, these people did not have much to do for the time being. As soon as the acquisition was successful, Xia ruofei had the pharmaceutical factory stop the production of the Chinese medicine produced by Min Jiang pharmaceuticals. There was no market for them and they would lose money every day the production line was opened. Naturally, Xia ruofei would not allow such a situation to happen.

After everyone was assembled, Xia ruofei brought Xue Jinshan into the sterile workshop and started to research the production process of the heart – nourishing soup.

This Chinese medicine production line was introduced last year and was quite advanced. The feeding, pre – processing, extraction, filtering, evaporation, concentration, and other processes were all controlled by computers.

Moreover, the entire process could be set up through a computer. After debugging the set parameters, it could also be packaged and saved in encryption.

This production line could produce different types of Chinese medicine. All he needed to do was to adjust the different parameter packages in the control computer to switch the production mode.

Of course, Xia ruofei didn't need this function at the moment because the pharmaceutical factory would only produce one product in the short term, which was the heart – nourishing soup.

A few of the employees who had been retained by Taoyuan pharmaceuticals were production line maintenance engineers. Xia ruofei invited them to the sterile workshop and asked them to be his Masters. He explained the operation of the production line and the settings of the control computer in detail.

In fact, the parameter settings were all fool – proof, and anyone with a little bit of Software Foundation could master it with a little research.

After a few tries, Xia ruofei had basically mastered it.

So he began to write the various parameter indicators for the production of the heart – nourishing soup in the control computer.

The manufacturing parameters of the heart – nourishing soup were naturally the company's top secret, so Xue Jinshan tactfully pulled a few production line maintenance staff and left the sterile workshop's control room.

Xia ruofei sat alone in front of the control computer and started to enter the time, feeding order, temperature and other parameters into the computer according to the brewing process of the heart – nourishing soup.

On Xue Jinshan's side, Xia ruofei didn't let him idle either. He immediately sent him out to buy Chinese medicinal herbs to prepare for a trial production today.

It was impossible for the machines and equipment to be in place all at once. Only through continuous experimental production and enough failures would the various parameters be closer and closer to the optimal value.

Without the help of a professional engineer, Xia ruofei spent more than two hours to convert the production process of the heart – nourishing soup into parameters on the control computer.

Xia ruofei waved at Xue Jinshan, who was standing outside the glass, indicating that the first trial production was about to begin.

Xue Jinshan quickly followed Xia ruofei's arrangement and put three of the herbs into the feed port according to the ratio.

Xia ruofei took a deep breath and pressed the red button on the control computer. The fully automatic production line immediately started ...

### **Chapter 699: Trial mass production success (1)**

After the medicinal ingredients entered the production line, Xue Jinshan was watching nervously from the side.

Even though the process of the herb's brewing could not be seen from the outside, Xue Jinshan did not dare to take a single step away.

After a short while, the indicator light of the feed port lit up and made a beeping sound. The LED screen above the feed port began to roll out the medicinal materials that needed to be put in one minute.

Xue Jinshan hurriedly prepared the herbs according to the ratio and personally put them into the feeding mouth.

Xia ruofei had been watching the entire process from the control room.

An hour later, Xia ruofei and Xue Jinshan received a large jar of medicinal soup. As it was a trial production, Xia ruofei did not need to go through the filling process.

Xia ruofei carefully observed the color of the medicinal soup and even personally scooped a small spoonful and put it in his mouth to taste.

Xue Jinshan immediately took a test tube sample and handed the first trial production of the heart – nourishing soup to several undergraduate students.

They would test the various active ingredients in the soup and compare it with the data of Xia ruofei's heart – nourishing soup.

Xia ruofei also filled a small bottle and put it in his bag after labeling it.

In reality, he had only done the action of putting the medicinal soup into his bag, but he had already sent the bottle of medicinal soup into the spirit map space.

Xia ruofei used his heart to inform Xia Qing and asked him to appraise this bottle of heart – nourishing soup.

From his previous inquiries, Xia ruofei knew that Xia Qing was very familiar with the unlocked formulas in the booklet, including heart – nourishing soup, spirit – nourishing soup, body – tempering soup, and so on.

.....

In terms of understanding of medicinal herbs, even ten Xia ruofeis couldn't compare to one Xia Qing.

Hence, Xia ruofei immediately asked Xia Qing to identify the heart – nourishing soup that was in trial production.

After Xia Qing received Xia ruofei's orders in the space, she was very efficient. In a short while, she had sent back the feedback to Xia ruofei through telepathy.

Xia ruofei began to adjust the production process parameters in the computer according to Xia Qing's feedback.

For example, if Xia Qing said that the heat of a certain medicine was not enough, Xia ruofei would increase the brewing time and raise the boiling temperature; Similarly, the amount of distilled water added, the timing of feeding, etc., Had all been adjusted to varying degrees.

Outside, Xue Jinshan had already called for workers to clean the production line. Before each trial production, the residue and medicinal liquid from the previous trial should be cleaned to avoid affecting the parameters of the test product.

After the production line was ready, Xia ruofei had finished the slight adjustments to the process parameters. They immediately started the second wave of trial production.

Similarly, Xue Jinshan had ordered someone to take a sample of the medicinal soup for testing, while Xia ruofei had taken the sealed bottle and labeled it before putting it into his bag. In reality, he had sent it into the spirit map space.

Xia Qing was like the God farmer who had tasted all kinds of herbs. She appraised the heart – nourishing soup that Xia ruofei had sent in and gave her feedback.

Xia ruofei continued to adjust the parameters according to Xia Qing's feedback.

Xia ruofei spent the entire day in Taoyuan pharmaceutical factory, constantly adjusting the production process and parameters, and then carrying out trial production.

Xue Jinshan's test results also showed that, with Xia ruofei's constant adjustments, the data of the produced herbal soup was getting closer and closer to the data of the previously hand – brewed heart – nourishing soup.

After more than ten adjustments, they finally produced a heart – nourishing soup that met the standard.

Xia ruofei finally heaved a sigh of relief. This job was really tiring!

Xia ruofei immediately ordered Xue Jinshan to find someone to clean the production line thoroughly. At the same time, he sealed the entire production process parameters.

In the future, during production, he could only use this data package, but he would not be able to see the original data.

Moreover, this data package had a self – destruction program. If it was cracked by force, all the data would be deleted.

The control computer was isolated from the internet and only connected to the production line in the sterile workshop, so the possibility of a hacker stealing information remotely was almost zero.

Xia ruofei was also very concerned about keeping the recipe of the heart – nourishing soup a secret. He immediately called Lei Hu and informed him to send four old soldiers to the factory.

These veterans were not in charge of the specific security work. Their only task was to protect the computer. The four of them took turns to make sure that the control room was guarded 24 hours a day.

Even during the trial production in the future, the technicians who used the computer to transfer the program must be under the supervision of these veterans. Any other unnecessary operations would be immediately stopped.

Xia ruofei asked Xue Jinshan to prepare a dormitory for the four veterans in the pharmaceutical factory. At the same time, a small room was set up next to the control room for the four veterans to be on duty.

Xia ruofei waited for the ex – soldiers to arrive at the factory before he personally reminded them of the importance of the control computer. He then specifically told them their mission.

These veterans were Xia ruofei's most trusted people. There was no doubt about their loyalty. Hence, whenever it came to such an important position, Xia ruofei would always think of them first.

After arranging everything, Xia ruofei left the pharmaceutical factory with Xue Jinshan.

The entire factory was temporarily in a state of shutdown. Xia ruofei let the newly hired Min Jiang pharmaceutical Deputy Director take charge of the factory temporarily and led the workers to clean up the factory's environment.

This was because the pharmaceutical factory was about to start the trial production of the heart – nourishing soup, and at the same time, it would also welcome the first review by the provincial Drug Administration.

## **Chapter 700: Trial mass production success (2)**

The new drug's production environment and production process were all the contents of the preliminary examination. The environmental hygiene of the factory area naturally had to be clean and tidy.

Although the provincial Food and Drug Administration would definitely not make things difficult for the peach blossom company during the first trial, they still had to do what they needed to do on the surface.

After returning to the farm, Xia ruofei immediately gathered Feng Jing and the company's middle management, including pang Hao, Xue Jinshan, and the others for a meeting.

The main focus was to research the new drug approval, trial production, and clinical trials.

Xia ruofei sat in the middle and said,""Chief Feng, fellow colleagues, today, I have brought along Jin Shan and finished debugging the production line of paradise pharmaceutical factory. Now, the sterile workshop of the pharmaceutical factory is ready to produce the heart – nourishing soup that meets the standard at any time."

Feng Rao was very excited,"that's great!" Chairman, you're so efficient!"

Adjusting the production line in one day and solidifying the production process, such efficiency was simply heaven – defying.

Of course, this was all thanks to Xia Qing, the "Shennong". It was because he had tasted it personally time and time again and gave targeted feedback that Xia ruofei could quickly adjust the parameters in a targeted manner.

It could be said that every adjustment was done on the right path, without any detours. This way, the efficiency was naturally surprisingly high.

Otherwise, it might take ten days to half a month to complete the debugging.

Xia ruofei smiled and said,"the laboratory data from Kanayama showed that the medicine we produced is basically the same as the heart – nourishing soup that we brewed by hand. I've checked it myself. It can be confirmed that our mass production experiment is a success."

Xia ruofei paused and continued,""I gathered everyone here today to arrange the work for the next period."

"Chairman, just tell me what you need to do!" Feng Jing said. We'll definitely do our best!"

.....

Xia ruofei smiled and said, "the main work for this period of time is naturally the preliminary review and clinical trials of the heart – nourishing soup. Of course, the daily operation of the company must also be guaranteed. This will depend on everyone's respective duties."

"I can't help much on my end," pang Hao said with a grin. "But I'll definitely do a good job of providing logistical support for everyone."

"Why can't I help? You're the God of Fortune!" Xia ruofei jokingly said, "the approval of the new drug and the trial production will require a lot of money!"

"As long as you agree and sign it, I'll naturally give you my full support!" Pang Hao chuckled. We always only look at the boss's signature. However, if we spend too much and we don't have enough liquid funds, don't blame me!"

"Don't worry! In the future, you'll only have to worry about having too much liquid capital, which will benefit the bank!" Xia ruofei said with a smile.

He then said, "alright, back to the main topic!" First of all, you have to keep a close eye on Kanayama regarding the approval of the new drug. You can contact the provincial Drug Administration directly and give you full authority over it!"

Xue Jinshan nodded. "I understand, general manager Xia. I'll contact the Food and Drug Administration immediately and ask them to inspect the pharmaceutical factory. This is also a very important procedure in the preliminary examination."

Xia ruofei nodded and said, "during the on – site inspection, they will definitely need to look at our production process and test the medicine that we've produced. Besides, the clinical trials will be in full swing soon. By then, Peking Union Medical College Hospital will also need a large amount of heart – nourishing soup. Therefore, the trial production can not be delayed. It must be carried out as soon as possible."

"President Xia, the workers are all ready – made now. The quality of these workers is very good, and their professional abilities are also very strong. They should be able to take on the job directly after some simple training," said Xue Jinshan. The parameters of the production line have also been adjusted, and we can start production at any time. "

"Yes," Xia ruofei nodded, "but there's some preparation work to be done before the trial production. First of all, the packaging of the heart – nourishing soup, including the glass bottles that are compatible with our filling and sealing equipment, as well as the packaging box and the exterior design. CEO Feng, let's leave this matter to the company's administrative office! Immediately contact the design company and the manufacturer to solve the packaging problem as soon as possible. "

"No problem!" Feng Rao immediately said.

"Time is of the essence. I'll give you three days. Can you complete it?" Xia ruofei asked Feng Rao.

"Although I'm a little nervous, it should be fine." Feng Jing replied, "I'll get them to work overtime on the design!"

In fact, the main task was still to design the packaging. As for the matching glass bottles and straws, Min Jiang pharmaceuticals had cooperated with a supporting manufacturer when they produced the Chinese medicine soup. He just had to contact them, negotiate the price, and place the order directly.

Xia ruofei nodded and continued, ""The second thing is the storage of the required medicinal herbs. This is also of utmost importance!"

Xue Jinshan thought for a moment and said, "director Xia, the initial stage is only for clinical trials. The demand for the medicine will not be too large. We can order the medicinal herbs needed to brew the heart – nourishing soup from large Chinese medicine shops."

Xia ruofei thought for a moment and said, ""It's a temporary solution, but it can't last long! After we expand our production scale, we won't be able to solve the problem by ordering from pharmacies. "

"Chairman," Feng Jing said, "in the long run, I think we can sign an acquisition agreement with the nearby villagers and provide them with a certain amount of subsidies to encourage them to grow the Chinese medicinal herbs we need."

Xia ruofei's eyes lit up and he said, "that's a good idea!" This way, we will have a stable source of raw materials, and we don't have to worry about being controlled by others in the future. "

Feng Jing hesitated for a moment. "Chairman, the only thing I'm worried about is the confidentiality of the formula. It's very easy for someone to speculate the rough formula from the variety of herbs we entrusted the villagers to grow."

Xia ruofei smiled and said, "first of all, we can ask the villagers to plant a few more herbs and set up a few bewitching arrays." Secondly, to be honest, I'm not afraid of people knowing the recipe of the heart – nourishing soup. Without the correct ratio, production process, and process, even if others can guess the recipe, they simply can't make an effective heart – nourishing soup!"

"If that's the case, then I'm relieved!" Feng ke said.

Xia ruofei thought for a moment and said, ""Jin Shan, you'll be in charge of purchasing the medicinal herbs needed for the early stages of the trial production from the pharmacy ... Or perhaps you can go to Tongren Hall! I'll give you the contact information of Qiantang Tongren Tang's CEO Lin. You can tell him my name and he'll definitely give us the best price. "

"Yes, President Xia!" Xue Jinshan jotted down notes in his notebook as he spoke.

Xia ruofei continued, "as for mobilizing the villagers to plant the Chinese herbal medicines ... I'll have to trouble you, director Xiao. You'll be in charge, right?"

Xia ruofei said as he looked at the company's Marketing Director, Xiao Qiang.

Although Xiao Qiang wasn't confident, he still reluctantly nodded and said, ""Alright," he said.

Xia ruofei seemed to have seen through Xiao Qiang's thoughts. He smiled and said, ""I'm more inclined to the villages near our farm. I'll talk to the county leaders later. Director Xiao, you'll listen to me when the time comes. After I've coordinated with them, you can go directly to the leaders in the town and ask them to help mobilize the villagers."

When Xiao Qiang heard that the chairman would personally coordinate, the trace of concern in his heart disappeared without a trace. He quickly said, "I understand! Chairman, I'll definitely do my best to complete the mission."

Xia ruofei laughed and said, "it's good to have confidence!" Director Xiao, Jin Shan will give you a list of the medicinal herbs we need later. Please come up with a proposal first, including the overall plan, the subsidy standards for the villagers, and so on. The more detailed, the better!"

"Alright, I'll get started on this matter immediately after the meeting is over!" Xiao Qiang nodded.

After Xia ruofei assigned this task, he looked at Xue Jinshan and said, "" Jinshan, before the exterior design and packaging production are completed, you should familiarize the workers with the production procedures and clarify their respective positions. You can demonstrate and train some of the medicinal herbs. My only request is that these workers should be familiar with the process in three days and can start production at any time."

"Yes! President Xia. " Xue Jinshan immediately said.

Xia ruofei had said all that he needed to say. Basically, all the work had been divided. He asked if everyone had any other questions and immediately clapped his hands. He stood up and said, "Then, today's meeting will end here. Everyone, take your places and perform your duties! Dismissed!"
