

Godly Choice 1781

Chapter 1781: too fast

After Ren Huafei finished speaking, and everyone discussed in excitement for a while, Li Yun interrupted their excitement.

With BMW, Volkswagen, and Zhongwei Group, three consecutive heavyweight cooperation tonight, let the executives of Baiyun Technology surprise, pain and happiness.

The pain is due to the overtime work contract, and the happiness is because it is foreseeable that after Baiyun Technology signs a cooperative relationship with these three companies, the future development will be a thousand miles away. They can get remuneration, stock dividends, etc. Definitely start with tens of millions, and will even create a lot of billionaires!

Therefore, now that Li Yun spoke, everyone stopped and looked at the young chairman.

What can be "decided" as the finale is definitely a more important thing!

Li Yun looked at Wu Ke, then looked around at many executives for a week, with a faint smile in his eyes, and said: "I have decided that the company will open another new project with an estimated investment of between 50 billion and 100 billion!"

The chairman is here again!

Such a thought flashed in everyone's mind.

The autopilot project was launched when the Xuanyuanzhideng project was still being tested. Now the autopilot car has not yet left the factory, and it has signed a smart phone voice assistance program with Zhongwei.

now what?

He has not yet formally signed a contract with Mr. Ren, and the chairman plans to start a big project again!

This is simply... fast, too fast!

"Uh."

Wu Ke looked helplessly and rubbed his forehead in pain, "Chairman, what do you want to invest in? That means you have to recruit people again, right?"

"If you are busy, then you don't have to recruit. I propose that the board of directors give you a salary increase."

Li Yun made a joke, Wu Ke couldn't laugh or cry. He hasn't been paid yet, it's all stocks.

"Li Yun, do you want to invest again?" Ren Huafei looked over with interest, his eyes flashed: "From Xuanyuan's Shield to mobile phone intelligent voice assistance, Baiyun Technology's projects are quite promising projects! No! Do you know what it is?"

Everyone was also very curious, and Li Yun smiled slightly and said three words.

"lithium battery!?"

Everyone was stunned, they really didn't expect it to be in this regard.

After all, Baiyun Technology has always been an information technology company. Although autonomous driving involves industry, it still writes reliable driver assistance programs, which are still closely related to computers.

But lithium batteries...

To be honest, I have no connection with technology companies at all!

"Yes, it's a lithium battery."

Li Yun smiled mysteriously: "A new type of all-solid-state ultra-compressed lithium battery that is ten times smaller than ordinary lithium batteries and contains ten times more power!"

"!!!"

Everyone suddenly opened their eyes and looked at the overly young chairman in disbelief. After confirming that he was not lying, the meeting room exploded.

"Ten times smaller, and ten times more power... This is a hundred times the difference!"

"In this way, under the same weight of a mobile phone, it can have a hundred times more battery life!" Ren Huafei, chairman of Zhongwei, who sells 50 million mobile phones per year, immediately thought of many possibilities.

For example, the saved cell phone size can be equipped with a more powerful camera, a larger screen, the best processor directly, and it is not afraid of power consumption.

Innovation, business opportunities, money, and... the hope of defeating the fruit machine!

Ren Huafei shook his fist with excitement, as if seeing the scene where Zhongwei replaced the fruit machine and became the world's most profitable mobile phone manufacturer.

Chapter 1782: Has come out

Don't look at the company as a Big Mac, don't look at the Glory series and HUAWEI's Mate and nova series that have sold an astonishing 250 million units worldwide. The annual revenue of mobile phones alone has reached the trillion level, but In fact, the mobile phone market is dominated by fruit machines!

Say the fact that an outsider is hard to imagine:

Fruit mobile phone profits account for more than 80% of the global mobile phone industry's total profits.

Yes, you read it right, it's 80%!

A company occupies 80% of the global mobile phone industry's total profits. What kind of exaggerated data is this?

It can be said that thousands of mobile phone companies around the world employ tens of millions of people, and their hard-earned profits throughout the year can't add up to a fruit machine!

Why is it so?

There is no doubt that a very important reason is: the fruit machine opened the era of smart phones. After the advent of the fourth generation of fruit, it swept the world in the blink of an eye, knocking down the old mobile phones, and pushing the fruit company to the throne of the mobile phone industry.

Even among the top five companies in the world, there is also a place for fruit companies!

This is the amazing profit brought by the overlord of the industry.

It can be said that the subsequent companies, whether it is Zhongwei, Rice, Vivo, Oppo, or something like a three-star, four-star, five-star, etc., all followed the path of the fruit machine.

In the field of others, how can it be possible to defeat the other party?

Therefore, if you want to beat the fruit machine in the mobile phone field, you must break away from the current mobile phone template and blaze a new path!

The mobile phone smart voice program, plus the all-solid-state ultra-compressed lithium battery that Li Yun said, is likely to be the key to getting rid of the shadow of the fruit machine!

"Li Yun!"

Ren Huafei thought a lot for a moment, looked at Li Yun with bright eyes, almost stood up and grabbed his shoulders and asked eagerly, "Is your lithium battery technology reliable? How long will it take to study? Three years, or Five years? Is there a feasible scientific theory and technology? Do you need me to invest in you!?"

Asking a series of questions is enough to show the urgency and desire of Mr. Ren's heart.

But no one laughed at him now, everyone in the conference room, as well as the people watching in the video, were all shocked!

For example, Ge Gil, he also thought of many things excitedly.

The current battery car generally has a battery life of 500 to 800 kilometers, and the speed cannot be increased. The replacement of the battery requires professionalism, which greatly limits the development of the battery car.

If the battery size and weight are the same, the battery life can be doubled by a hundred times, reaching an astonishing 50,000 kilometers...

To put it in an exaggeration, a car does not need to be charged at all from when it is used to scrap, and it does not need fuel, just like a perpetual motion machine!

"No." Li Yun smiled at President Ren.

"No need? What do you mean?"

"It means that the lithium battery has been researched out, it is only a short time to actually assemble it!"

"what?!"

Everyone was surprised again, this kind of lithium battery that can profoundly change the world has come out? !

"It stands to reason, it's impossible."

Su Tengyun only said lightly.

Because as usual, such a huge project must require countless researchers, including chemistry, physics, materials science, electricity, etc., and all kinds of personnel are concentrated to study, it is possible to come up with a new type of lithium battery technology.

And projects of this level will definitely be known to the world, and the degree of confidentiality cannot be that high.

unless.....

Chapter 1783: The sooner the better

"Haha, I won't explain too much about this."

Li Yun saw everyone's doubts, but did not explain too much. He only smiled and said, "I acquired this technology from a mysterious place. You will see more technologies in the future. Look forward to it, in the future. His world will become sci-fi...Of course, it may also be magical!"

Everyone looked at each other, science fiction? Magic?

There are three reasons why Li Yun revealed it.

1. In the future, Baiyun Technology will launch more "black technologies". Others are not fools. They will surely guess that these technologies are not from Baiyun Technology, but from... aliens? Future people? Super power?

In short, it is impossible for a company or even a country to continuously produce technology that surpasses the times.

Second, the future battle between the Six Demon Gates and the Hidden Sacred Valley, and possibly even other countries, such as the magic of the Sakura Kingdom, etc. After these extraordinary powers appear, Baiyun Technology will receive much less attention.

In fact, the senior officials of other countries already know about it. For example, country M is still negotiating to exchange the technology of country M for the mysterious technology of the suspended pagoda-they saw that scene from the satellite.

Third, Li Yun is strong enough, not afraid of trouble.

Even if other foreign companies want to send someone to kidnap him, Li Yun can come to kill one, or two to kill a pair, see who dares to get involved!

In addition, Li Yun has also cooperated with the country to make Baiyun Technology a solid foundation. Unless there is a formal war between countries, outsiders cannot stop the rise of Baiyun Technology!

"This is the end of the meeting tonight."

Li Yun ignored their surprise and unilaterally announced the end of the meeting.

He doesn't bother to spend time here anymore. If he has this time, he might as well go shopping with Saint Fanqing. Maybe he can also go to the cinema to watch a love movie together, so that the lady is moved, and he also kisses Hu Xiaomeng in the cinema like Hu Xiaomeng. What.

"Uh?"

Everyone was stunned again. It took less than 20 minutes for the meeting to start the lithium battery project. The contract was not discussed, so the meeting ended?

This is the shortest full executive meeting they have participated in!

"... Chairman." Wu Ke was very helpless, "I think you might as well say a few more words."

"Say a few words? That's okay, then just say a few words."

Originally, Li Yun had stood up, and after hearing the words, he looked around at the crowd, and saw that his employees all had pitiful expressions, so he could only say a few more words.

"First."

Li Yun didn't sit down, and just stood up and said, "About cooperation with car companies."

The two foreigners instantly pricked their ears and listened carefully.

"My only requirement is to roll out the market as soon as possible!" Li Yun said indifferently, "I don't care what means you use, the profits are how much less, my requirement is to see the roads of all countries in the fastest time. Use cars related to Baiyun Technology!"

"How fast does it take?" Wu Ke asked immediately.

Everyone may not understand why such a requirement is required. It is clear that the field of autonomous driving is now blank, and the company has enough time to make the most profit.

But Wu Ke vaguely guessed something, those extraordinary...

"If you can sign the contract tomorrow, you can sign the contract tomorrow."

Everyone was shocked. Regarding the important contract of comprehensive strategic cooperation, the chairman wanted to sign it in just one day? !

"If you can arrange the production line the day after tomorrow, then the production line the day after tomorrow!"

Li Yun stubbornly nailed: "What I need is fast, faster, and fastest! Money is not a problem. If the 300 billion fund is not enough, I will continue to use the name of the subsidiary to raise funds!"

Chapter 1784: Give them a way to survive

The executives were silent, and they all felt Li Yun's determination.

Li Yun smiled and said, "I'm not asking you to work overtime, but I'm asking you to ignore the minutiae of the contract and let some profits do not matter. The premise is that you don't get too pitted. Partner."

Gergil and Todd looked embarrassed and quickly promised that they would never get stuck in time and would arrange for someone to come over to discuss cooperation as soon as possible.

"Second, it's about mobile phones."

Li Yun nodded to Ren Huafei, "Domestic mobile phones can be authorized, and the conditions are slightly higher than those of Zhongwei. As for foreign companies..."

Everyone held their breath.

"Let them use our intelligent voice software for all mobile phones produced in the next five years!"

Everyone was dumbfounded, this condition is a bit overbearing!

In other words, foreign mobile phone manufacturers who want to cooperate with Baiyun Technology must pay a patent fee for every mobile phone in the future.

For example, if a mobile phone is sold for 3,000 yuan, then for every one sold, a partner manufacturer needs to pay 300 yuan (assuming) to Baiyun Technology. 1.5 billion mobile phones are sold a year worldwide, if half of the phones are paid for patent fees, Baiyun Technology can make a net profit of 200 billion a year!

"Moreover." Li Yun continued: "All foreign mobile phone manufacturers that cooperate with us, our company will take 80% of the annual profits."

puff!

The executives present almost vomited blood.

"80%?! Is this too high?!" A senior executive present immediately put forward his opinion.

When the voice fell, he regretted it again.

After all, it was the first time that the chairman's decision was questioned at a meeting, and I don't know what the young chairman's character is like.

"Not high at all, at least I gave them a way to survive."

Everyone was silent, looking at him, wanting to hear the chairman's advice.

Li Yun smiled faintly, and said: "As far as I know, all virtual commodity transactions generated on the fruit platform need to be handed over 30% to the fruit company. Note that this is not 30% of the profit, but 30% of the total amount. 30!"

what does that mean?

For another example, if a player charges 10,000 yuan in a mobile game, the fruit company will also withdraw 3,000 yuan!

This is not 30% of profits, but 30% of revenue!

Li Yun extracts 80% of the profits of foreign mobile phone manufacturers, and may even be less than 10% of revenue. That's why Li Yun said that he had left a way for foreign mobile phone manufacturers to survive and did not kill them.

"It seems that Li Yun, your goal is to make Baiyun Technology as great as the fruit company." Ren Huafei said humorously.

Li Yun laughed, "I think Baiyun Technology will be greater than Fruit Company!"

Mr. Ren's meaning is very simple. The fruit company is so overbearing because of its monopoly in the mobile phone industry, so that global companies have nothing to say and can only pinch their noses to extract 30% of the revenue of virtual goods from the fruit company.

Now that Li Yun has released such domineering conditions, Baiyun Technology must also become a giant like a fruit company in order to make people speechless and can only sign the contract with their noses.

"third."

Chapter 1785: Company outline

Li Yun continued.

At this time, everyone did not dare to look down upon this young chairman.

They seem to understand the chairman's idea.

In the physical car industry, the chairman only asks for speed and does not ask for more profits. After all, cars are entities, but autonomous driving will also involve laws and regulations. It is necessary for national departments to issue details to deal with unmanned vehicles. Rights and responsibilities in a car accident.

So this requires the use of the power of global car companies to allow them to deal with various countries.

As for the smartphone software, the chairman will earn as long as he can earn it. If foreigners don't make money for him, let domestic manufacturers release new phones, so that foreign consumers can see what the real artificial intelligence is. The time has come. Can occupy the market.

"About the new lithium battery,"

Li Yun said: "In principle, new batteries can only be produced in China, and a strict confidentiality system is implemented. The batteries produced are also given priority to domestic users, such as electrical appliances, mobile phones, cars, etc."

Gergil would like to say that we BMW also want a new type of lithium battery! !

But at this moment, the chairman of Baiyun Technology has an inexplicable and terrifying aura that makes him dare not speak at all.

"Good! This decision is good!"

Ren Huafei took the initiative to applaud. The others didn't want to understand, but they also applauded.

"Very beautiful decision."

Su Family, Su Tengyun's serious face showed a smile.

The boyfriend of his daughter is quite patriotic, and he knows what is most needed to do business in Huang Xuan.

New lithium batteries are given priority to domestic manufacturers, which is tantamount to upgrading domestic battery technology and allowing domestic products such as mobile phones, notebooks, electric cars, watches, cameras, video cameras, and so on.

After these domestic products are innovated, they will be able to easily capture the global market in the future, making electrical appliances all over the world "MADE IN CN".

How much profit is this?

It is hard to imagine that GDP can even directly soar at a rate of 30% per year. It is not a dream to catch up with and get rid of Country M!

Ren Huafei smiled and said: "I think this decision requires relevant ministries and commissions to participate in the discussion. It may give some countries the green light to let them enjoy the changes brought about by new lithium batteries!"

Then he praised: "Li Yun, you still know the company's development very well. Before I asked you to say a few words, you still pushed three things and blocked four things. Now, isn't it very good?"

Wu Ke nodded in agreement. Li Yun's remarks are completely the core program of their future work. As long as they follow the chairman's statement, there will be no problems with signing the contract and the company's development direction will be established.

It can be said that three very beautiful and very important decisions!

Li Yun shrugged, "I thought you all understood."

Many executives smiled bitterly. They thought about how to make more profits. How could the chairman have such a long-term vision...

"Okay, it's almost half past nine, so I won't be talking nonsense with you, let's get off work too."

Li Yun pulled Van Qingsheng to his feet and smiled at them: "If there is something unclear, don't come to me. See your President Wu. If President Wu can't figure it out, you should talk more with relevant ministries and commissions. The company's shareholders also have state-owned banks."

Several bank leaders who participated in the video conference all smiled bitterly. Before they were called by people from Baiyun Technology to attend the conference, they thought it was just an ordinary conference, or they wanted to invest or something.

Unexpectedly, what Li Yun said in this meeting was more than an exaggeration. The final solid-state compression lithium battery was even more shocking. It was not at their level that they could make a decision. At least they had to report to the head office, or even after the big leaders discussed it. To deal with tonight.

They are sure that anyone who hears the content of this meeting will be shocked!

Chapter 1786: Xiao Xiaoyu

The executives here all smiled bitterly, they have never seen such a chairman, and the shopkeeper is much better than Li Yun.

But they didn't know that Li Yun started the company to make money, so that his relatives and confidantes can live a happy life. Naturally, how comfortable he is.

If working tirelessly for a company around the clock, Li Yun would rather Baiyun Technology go bankrupt!

"OK, the meeting is over!"

With a big wave of his hand, Li Yun was about to leave with Qingsheng.

Many executives were thoughtful. After seeing the beauty of Fan Qingsheng, they all understood. No wonder the chairman has to leave in a hurry...

"Ah, Brother Li Yun and that very beautiful woman with a nice voice... Could it be that tonight...!?"

Thinking of a certain possibility, Su Muxin pursed her mouth, and Fang Xue also started to eat the vinegar.

Li Yun pretended not to see the eyes of the executives, and just walked out two steps with Sage Fan Qing, and was stopped again.

"and many more!"

"...If you have something, let it go!"

Have something to play? Mr. Chairman, what you want to say is to let go of the fart, right? !

The corners of everyone's mouth twitched. Sure enough, it is very offensive to disturb young people on dates.

"I think it's time to give the phone's smart voice a name." Wu Ke said quickly: "This is also a habit in the industry, such as siri, Xiao Ai, etc."

"This kind of little thing..." Li Yun wanted to say that this kind of little thing doesn't matter, but seeing Wu Ke's reluctant eyes, he can only shrug his shoulders: "Then call it a mortal, the English name is human."

mortal?

"no!"

Gong Qingyu uttered through the remote video, and was the first to object: "The name Mortal is too strange, it's not catchy at all! It's not cute, it doesn't match the anime image I designed!"

Li Yun said in surprise: "You designed that cute anime character?"

"Of course~"

Gong Qingyu was very proud, "Let me think about it, I want to marry my daughter a nice name... Well, let's call it Fanyu, my nickname is Xiaoxiaoyu!"

Surprisingly, Fan Qingsheng misheard her words, "Fanyu? My last name?"

"Uh... yes!"

Gong Qingyu bit her scalp and confessed it. She could see that the saint did not object to her surname mixed with Gong Qingyu's name.

Although a little strange, the name was decided.

Mainly because the name of the milk is easy to remember, it is called Xiao Xiaoyu, cute and catchy.

After making the decision, Li Yun hurriedly said goodbye to the women in the video, and then walked away with Qingsheng, wishing that the two would fly directly from the tens of meters high building and go shopping.

The date tonight was a failure!

"what happened?"

Taking the elevator down to the first floor of the building, Saint Fan Qing looked at Li Yun curiously, and added: "In a bad mood? Was the meeting just not good?"

"No, the meeting was a success."

Li Yun held Qingsheng's soft and white little hand, feeling the warm touch of her palm, feeling warm and very comfortable in her heart, and smiled at her: "I just feel that our date is really a failure, so I actually took you to go with me. The company has a meeting, haha."

Vaguely, Li Yun seemed to see the corners of Qing Sheng's mouth bend slightly, as if to show a very faint smile.

"Huh? Qingsheng, did you laugh?"

Li Yun was taken aback and looked at her earnestly. Sure enough, he clearly saw the smile on the corner of Saint Fanqing's mouth, and the joy of joy appeared on the cold saint, who was really as beautiful as a fairy in the sky.

"Am I smiling?" Fan Qingsheng asked rhetorically.

Chapter 1787: Unintentional

If this is another girl who asks, it must be yin and yang weird or acting cute as a coquettish.

But saying this sentence from the mouth of Sage Fan Qing proved that she actually didn't even know whether she was smiling or not.

"Laughing! Qingsheng, you really laughed!"

Li Yun explained forcibly, and then curled the corners of her white mouth with his fingers, the fingertips almost touched Qingsheng's cherry lips, and gently hooked up to make her smile again.

"Sage Qing, you are so beautiful!"

Li Yun was itchy in his heart, took out his mobile phone and took a picture of Lord Saintess. After preparing, he dropped his finger to make her laugh "really".

"Um."

Sage Fanqing hummed a natural snort in his nose, revealing a lazy tone.

Um?

Could it be that Qing Sheng admits that he is beautiful?

"Qingsheng, you are so cute~!" The excited Li Yun couldn't hold it, and kissed her white cheek.

Cute and beautiful, innocent and flawless, holy and noble, and very powerful. Such a girl is actually his girlfriend. Li Yun now finds it incredible.

"Li Yun, I am very happy today."

Holding his big hand, Saint Fan Qing and Li Yun were walking on the streets of Zhonghai City at night, with landscape trees on both sides, and cars on the road drove one after another.

In this cosmopolitan city that is calmer than the day, walking on the streets with your lover in the busy city, even if you don't say anything, you are very happy!

"What are you happy about?" Li Yun asked narrowly, "Is it because of dating me or something else?"

"It's a date."

Li Yun kept staring at her. It is a pity that Qing Sheng did not show a shy expression on his face even when it came to dating, which was quite regrettable.

"What about another reason?"

"Vatican Jade."

"Uh?"

Li Yun thought for a while, only to understand what Qing Sheng meant.

"Qingsheng, do you feel that you can participate in the decision-making of our company, so you are happy?"

"...I don't know." Fan Qingsheng shook her head lightly. She didn't know why she was happy, but instinctively told her that she was really happy when the intelligent voice software was clearly called Brahma Jade.

Li Yun hugged her and kissed her lips affectionately: "Qingsheng, why are you so cute... you don't even know how you feel!"

"Well....."

The two were intimate for a while. After the separation, Fan Qing Sheng squeezed the moistened Shuangfeng, looked at Li Yun, and said "sincerely": "Sometimes I don't know what I want or what I want to do. , The sea of consciousness is blank and clear, the memory fragments are obscured, flipped and intertwined, something seems to be spreading out in the core of the sea of consciousness, making me unable to think."

"...?"

Li Yun still barely understood the first half of this long passage, but he was completely confused at the back.

"Qingsheng, you...well."

Li Yun's mouth was gagged by Saint Fan Qing, who was tiptoe toe and raised his head. The action of the lady who offered the kiss was very jerky, and she needed Li Yun to guide her if she couldn't figure out how to do it.

"I'm fine, don't worry."

Sage Fanqing put his arms around Li Yun's neck, and said softly, there was an inexplicable brilliance in his beautiful eyes, as if the affection of an ordinary woman was endless, which made people thrilled.

"it is good."

Li Yun didn't think much about it. Even if there was something abnormal in Qingsheng's body, he still had a way to solve it. After all, the recovery pill produced by the system claimed to solve all physical problems, except for Yongning's congenital physique... Hey, he still cared! The cheating system is not external!

"It would be great if the colorful gift bag could produce a god-level recovery pill!"

Chapter 1788: Drink milk tea

I don't know how long they have been walking, Li Yun and Fan Qingsheng sat down on a grass in a spacious civic activity area, holding a cup of milk tea in their hands. Li Yun sat on the grass, and Fan Qingsheng sat in him. .

The two of them drank milk tea, watched the stars and played with their mobile phones, almost no different from ordinary couples.

"Qingsheng, do you have Weibo?" Li Yun thought of something. He had a Q to add her, but Weibo did not see Qingsheng actively interacting.

"Yes, but don't post, just watch."

"Try to post one? I'll forward it to you to increase your fans."

"send what?"

"Just post your selfie!"

Li Yun smiled and suggested: "Just like other girls who play Weibo, take selfies, chase stars, chase dramas, punch... well, don't do that in the end."

"Fisting? I don't know how to fight, but only swordsmanship and some other spells."

"Puff...hahaha!"

Li Yun held back a smile and squeezed Qingsheng's beautiful cheeks, "I said punching...well, forget it, I still don't understand it. You will understand when you play more on Weibo in the future."

"Yeah~" Fan Qingsheng's tone rose slightly, and he picked up his mobile phone to face Li Yun:

"Shall we take a group photo?"

"OK."

The two got together, their cheeks almost close, Fan Qingsheng also made a very ordinary "girl scissor hand".

It's just that the other girls' scissor hands are very lively. Her scissor hands are close to each other, similar to sword fingers, making Li Yun amused for a while, and didn't correct her.

Anyway, Qingsheng's fingers are slender and white, as tender as lush white, they look good no matter how they shoot, and they look better than professional hand models!

"Come...eggplant."

"eggplant?"

In the doubtful tone of Sage Fanqing, Li Yun took a photo of two people. Although the lights at night were dim, the beauty of Sage Fanqing was enough to make this poorly taken photo exude amazing beautiful!

Li Yun wanted to kiss the beautiful and cold saint again, but this time he was pushed away by the vanguard.

"I will post on Weibo first."

Sage Fanqing glanced at him, and she felt that the book said something reasonable.

Men are very eager guys, thinking about using their hands all the time, girls must know how to refuse, and men must not be satisfied at any time, otherwise they will get too easy and will be bored.

"Send Weibo first?" Li Yun was even more tickled by this glimpse of Fan Qingsheng, and couldn't wait to ask: "Can you kiss me later?"

"Can not."

"Ah, why... why Qingsheng you are so cruel!!"

"No, just no! Besides, I'm not cruel."

"Ha ha ha ha!"

Li Yun felt that tonight is finally a bit dated.

Qing Sheng actually learned how to act like a baby, he is so happy!

After she finished posting her Weibo, Li Yun posted her Weibo account and forwarded it to her, and checked her Weibo name: Shengqingfan.

Although it was just a simple name inversion, Li Yun actually found it inexplicably nice.

"Sacred Vatican, Sacred Vatican... it's great!"

"Yunfeng Weixia?"

"My sister and two younger sisters, have you met Li Feng, and a pair of twin sisters, Caiwei and Caixia."

"Yeah~"

After Li Yun clicked the repost, he saw another reposted blog post under her Weibo, and he smiled: "Qingsheng, you said you haven't posted Weibo yet, isn't it already posted...what?!"

Li Yun was shocked!

Qingsheng's first Weibo was actually a blog post that reposted his "Zhengjianghu"!

Chapter 1789: Wonderful fate

Li Yun glanced again. Qing Sheng's first blog post was indeed forwarded to him, and it was half a year ago when the two did not know each other.

In other words, Qing Sheng reposted his Weibo only after hearing the song written by Li Yun.

"I don't remember." Fan Qingsheng thought for a moment, and finally shook his head slightly: "I read Weibo occasionally, but I don't remember when I forwarded it to you."

She talked about the events at the time, and specifically said that she was in her own bamboo forest, playing the song "Zhengjianghu" written by Li Yun.

It is strange to say that the melody of this piece is intense and powerful, and it is generally not suitable for the aesthetics of the Vatican.

But after she heard it that day, she thought it sounded good, and she practiced it several times.

"That's why my fate with Qingsheng is amazing!"

Li Yun shook her little hand and said with a smile on his face: "Qingsheng, you only occasionally go to Weibo a few times when you are in the Hidden Sacred Valley, but you can see me from the vast crowd at a glance. There is something between us. Unspeakable fate, what do you say?"

"Well, it's amazing... It's not a crowd, it's the Internet."

"Hahaha, it's almost there!"

She had a strange stubbornness, Li Yun didn't care about it, and he thought of something.

In his inventory, there is also a piano score of "Swordsman and Swordsman", which is a limited gift to the Sage of Fan Qing, which was a system reward long ago in Chapter 696.

At that time, Li Yun and her weren't even familiar with each other, so they never gave it away.

Send it now, just right!

"Piano score?"

"Like it?"

"I like everything you gave it."

"!!!"

Li Yun was shocked. Qing Sheng's love words are really great! He could hardly hear his heart and liver tremble, and there was an impulse in his heart.

So Li Yun hugged Qingsheng and kissed him.

For this beautiful saint, he is not enough to kiss her.

...

After kissing directly, the sky was dim, and the passing pedestrians changed group after group. All kinds of envious and curious eyes looked at them. Many people stopped and greeted Li Yun's blessings and had to leave. After that, the sage of Fan Qing He pushed him weakly, and opened his mouth to gasp.

Li Yun hugged her soft body, the two of them were silent for a while, enjoying the tranquility of the night.

"Your company is on the news." Fan Qingsheng, who leaned against him to rest and watched his mobile phone, said suddenly, showing her mobile phone to Li Yun.

"Oh?"

Li Yun took a look, frowned lightly, and stretched out, "It's okay, let them go and make trouble."

The news that Qing Sheng said is actually a hot search on Weibo.

And it is also ranked number one, with 50 million hot searches on Weibo.

#白云科技 offends global car companies#

Click to open it and see that there are countless bloggers-mainly those car appraisal bloggers, and some news bloggers who join in the fun. They all posted about this on Weibo.

Li Yun casually read a few related microblogs, and the blog post is nothing more than saying that Baiyun Technology is too offensive, and foreign countries are now in trouble. Top luxury car companies such as Teles, Chase, Chrys, Volvo, Kendy, etc. , All voiced through various media, condemning Baiyun Technology's atrocities, scolding Baiyun Technology's employees for being rude, and blaming Baiyun Technology's chairman for being naive and ridiculous, without knowing what business rules are like.

In any case, it is Baiyun Technology's fault!

"Popular speech is not good for you." Fan Qing said to Li Yun while sliding his green fingers on the phone screen.

"Regardless of them."

Li Yun shrugged indifferently, "Gringoes have always had a hand in turning black and white. No matter how much they make trouble, they can't make the impact of autonomous driving on their business. Let them scold them. They will always have to jump around before they die."

"Um."

Chapter 1790: go home

But some people are cheap, and the more you ignore them, the happier they dance.

After saying goodbye to Qingyu and Lianyi, as well as the two masters and servants of Qing Sheng, Li Yun returned to Longyang County in a car driven by Qian Hu himself to prepare for the college entrance examination in June.

Speaking of Li Yun still has a subordinate in Longyang County, called Zhu Dayu, but Li Yun is now less and less returning to Longyang County, and he has little contact with him. He belongs to a forgotten corner.

That night, Li Yun, her sister Li Feng, the twin sisters plucking our eyes on Caixia, and the sleepy sleeping princess Xiao Yongning, watched TV and chatted together in the living room, enjoying the warmth of family.

In the end, it didn't take long for her sister Caixia to show her mobile phone in front of Li Yun, just like Fan Qingsheng.

"Brother, your company is being scolded by many people now."

Caixia was wronged, as if her brother's company was being scolded, just like she was being scolded.

Li Feng and Caiwei also came to look around. As for Princess Yongning...her petite body has always been shrunk in Li Yun's arms, like a soft-haired kitten.

Now the family basically assumes that the little princess Yongning is Li Yun's... child bride.

It is the kind of "Jiao" who hides in the house, that is: Jinwu Zangjiao.

Coupled with the fact that the little princess Zhu Shu'e has been lethargic and can't go out for too long, Jinwu Cangjiao is even more veritable.

"Li Yun, what happened?"

The little princess curiously leaned forward to look at the mobile phone screen. She has basically learned how to live in modern society. All kinds of mobile phone and computer refrigerators can be used. Of course, if you go outside, it is easy to go wrong. For example, the little princess will definitely not take the bus. I don't know how to take the subway, and I don't understand the traffic rules.

"It's okay, it's just that some boring people are following the trend." Li Yun thought of something, rubbed the head of the little princess in Dianli, and smiled: "Yongning, do you know what it means to follow the trend?"

This petite princess, who is about the same size as Hu Xiaomeng, came from 400 years ago and could not fully integrate into modern society in about two or three months.

"Yongning knows~"

Her real name is Zhu Shu'e, and the little princess named Yongning smiled at Li Yun, brightened her mobile phone, and said that she would go online when she had nothing to do...Although most of the time she was online chatting with Li Yun.

"Is it really okay?" Li Feng drew on the screen of the phone, expressing his concern: "The current public opinion is very bad for your brother, your company. Many people are saying that Baiyun Technology is too ignorant, and it is very savage. It's a small gangster company!"

"Small gangster company?"

Li Yun raised his eyebrows and took Caixia's phone to read Weibo.

"@ Hard-to-money, tell everyone a joke: Baiyun Technology is like the fruit company. Hahaha, do you think it's funny?"

Li Yun: "..."

Laugh at your sister! Wait a few years and you will laugh again, don't bully the young man, understand?

With your vision and gloating character, you are still working hard to make money, and you deserve to be poor for a lifetime!

"@科技圈八卦汇, according to reliable sources, the chairman of Baiyun Technology held a meeting last night and asked foreign mobile phone companies to provide 80% of their profits each year."

Seeing this Weibo, Li Yun almost didn't vomit blood.

This blog post does not seem to have any personal comments, nor does it show any tendency, but the last sentence alone has already greatly moved people's nerves.

Li Yun clicked on the comments below, and it turned out to be a flurry of demons.

"Wow, awesome! Huang Xuanguo can finally collect taxes from other countries, Baiyun Technology is awesome!! [Dog Head]"
