

Godly Choice 2751

Chapter 2751: Giant monster

Wang Hao swallowed, "Mom, it really is a live ammunition military training!!! Exciting!!!"

The senior sisters were also surprised. In the past, the instructors entered the arena empty-handed, but now they are all camouflage, armed with submachine guns, and various tactical equipment around their waists, including daggers, bulletproof vests, magazines, grenades, and so on.

All teachers and students have a feeling that these people are not military instructors, but predators who have just retired from the battlefield!

Everyone felt the intense crisis again.

But more amazing is yet to come!

"Rumble."

A huge truck drove from a distance and was driving on the campus avenue. Everyone turned their heads to look around, and their eyes suddenly widened.

"I'm Cao!"

"Damn!"

"My God, it's so big!"

"This, this...!"

A super-giant monster fish that was twenty to thirty meters long, several stories high, covered in scars, was tied to this special transport vehicle by Wuhuada, and slowly drove into the campus with the vehicle.

This huge strange fish is not dead yet, its eyes are wide, and its tail seems to be still struggling, but it is chained to the special transport vehicle, and a team of soldiers is holding guns and pointing at it.

Judging from the gunshot wounds on the strange fish, I am afraid that thousands of bullets have been baptized along the way, but even so, this strange fish is still alive! !

The strange fish, or monster fish, came to the gate of the track and field field. The huge and hideous body shape enveloped more than 20,000 teachers and students with an inexplicable and terrifying atmosphere.

"Classmates, this is probably the first time you have seen a monster? How is it? Does it feel shocking? There is a strong sense of crisis!"

The principal said in a passionate tone through the microphone: "This is the monster that was transported back from Penglai Island. It was defeated by our brave warriors and a patriotic organization, the Fairy Club. It was transported back by a freighter. The students can see this. The monster beast is still alive!"

The classmates exclaimed, and Li Yun was equally surprised.

Fairies?

He looked at Xiao Mingzhu in the girl group. Xiao Mingzhu seemed to have a feeling. He glanced back at him and showed a bright smile, as if saying, "How about it, unexpected?"

Li Yun was indeed surprised. Since the establishment of the Fairy Society, he has not paid much attention. He only knows that Jin Liuli led several sects of Jianghu to be stationed on Penglai Island, such as her family's Jinsheng Pavilion, Feiyao's Qinglei Valley, and some Shangguan families. And Gongjia's also joined one after another.

Unexpectedly, it was really hers now. No, it should be them. A group of girls will develop the Fairy Society and cooperate with the government to hunt down the sea monsters.

Next, the principal read the information of this monster fish according to the manuscript, how many tons, how powerful a jet of water can be sprayed, or how much power, etc.

In short, let the teachers and students of China Overseas University really feel the horror of monsters!

Li Yun picked up his mobile phone and read the news, and found that the news that the monster fish was transported from the dock to China Overseas University had been going viral. It is estimated that if there were no security guards at the school gate, many citizens would flock in to watch the news.

Then, Li Yun received another message from Xiao Mingzhu, saying that in the future the Fairy Club will continue to hunt monsters together with the government and bring back only edible monsters.

"Edible?"

When Li Yun was guessing what, Wang Hao beside him pulled him, "Brother Li, the principal calls you!"

"I?"

"Li Yun from the computer science class, please stand up!"

"?what?"

Chapter 2752: President of the Ability Association

Li Yun stood up calmly, and stared at the principal on the stage.

"You are classmate Li Yun? The wind system supernatural person? Very good, a kind of talent, worthy of being an outstanding student of our Zhonghai University!"

The principal praised him so much that he gave Li Yun a hat of an outstanding student, which made people only feel inexplicable.

However, the matter of Li Yunfeng's supernatural beings still caused a lot of surprises from teachers and students.

"I also heard about the computer science class last night. I deeply feel that the powerful power possessed by the supernatural beings will bring huge changes to the campus. Therefore, the school decided to establish the supernatural beings association. Be the president of the association!"

When everyone was full of shocked expressions, the principal quickly issued another order: "Please stand up for all the power users, don't be shy, don't be afraid, powers are not tools for illegal things, you have Ability is a good thing, but I also hope it can be used in the right place!"

Only then did Li Yun understand that the fully armed soldiers arrived, on the one hand for military training, and on the other hand, to prevent these supernatural beings from disobeying the management and escaping by themselves.

For example, a wind-type supernatural person like Li Yun wants to escape very easily.

With supernatural powers, most people's mentality will change. For example, Huang Guanying is an example.

"Please stand up for all the abilities in China Overseas University!" The principal said again, and the soldiers around also watched with stern eyes.

Xiao Mingzhu took the lead to stand up, and then there was another supernatural person in Jikeban, Xiong Tianze.

One by one, the supernaturalists stood up, from freshman to senior year, everyone was surprised to find that there were already more than twenty supernaturalists around!

"Very good. It's similar to what I learned. There are more than 20 people in our university who have acquired abilities early.

The principal smiled, "Maybe you are dissatisfied with the decision of freshman Li Yun to be the president of the Ability Association, but as far as I know, Li Yun has more than wind powers, he is a dual powers!"

Twenty thousand teachers and students exclaimed again.

It's a blessing to have one power at this point in time, but someone actually has two powers?

How strong should he be?

"Student Li Yun, would you like to be the president of the Supernaturalists' Association?" the principal on stage asked with a smile.

Obviously, he already knew Li Yun's identity, so he did not hesitate to recommend Li Yun as the president.

"Ding, trigger the option event, please choose from the host:

Option 1: Yes, reward justice value +100,000, all attributes +1000, golden gift bag*1, all kinds of ordinary spirit fruits that can enhance physical fitness*30 (can be used to reward members), extra reward: host in Zhonghai The prestige value in the university has been greatly improved.

Option 2: Reject, no reward.

Option 3: Reject, and recommend Xiao Mingzhu, Gong Qingyu and other women as the president, and reward a white gift bag*5"

The eyes of the 20,000 teachers and students in the audience focused on him.

Li Yun thought about it, and took a look at Xiao Mingzhu. The latter seemed to have a heart with him, and he refused directly and said, "I don't want to be any president. It's tiring to be a squad leader. You, Li Yun, should be the president. !"

Li Yun couldn't laugh or cry, Xiao Mingzhu didn't want to be, perhaps Gong Qingyu was even more unwilling.

However, they can all be brought in and appointed as a vice-chairman, so that he can be the treasurer.

"Yes, I am willing to take the post of president 'temporarily'!"

Chapter 2753: You do not deserve

Li Yun's words caused a commotion on the scene.

Although this supernaturalist association is only an organization among students, it is no different from anime clubs, Hanfu clubs, and hip-hop clubs.

but!

This is an association of supernaturalists!

Nowadays, everything that is also linked to abilities is a big hit and has attracted the attention of countless people. In a word of the capital market, it is: on the vent, even a pig can take off.

Supernatural powers and auras are new outlets. As long as anyone masters supernatural powers, they can obtain unimaginable assistance and benefits from the country. It is not a dream to improve class.

"I, I don't agree!"

Of course there will be people who object, but to Li Yun's surprise, the objector is still Huang Guanying.

He stood up with an angry expression on his face, and shouted at the principal on stage: "Principal, appointing a classmate as president for no reason is too trivial. I admit that I can't beat Li Yun. But there are more than twenty powers in the school. Isn't there any one who is better than him? Why should he be the president!?"

The scene calms down

The principal explained: "This is only temporary. You can elect another president in the future, but the Abnormalists Association is responsible for managing and supervising the supernaturalists. They cannot use the supernatural powers to do illegal things at will. This will not change."

"Since it is a temporary appointment, why can't I be the president?!" Huang Guanying said loudly, and he was quite jealous of the post of the association president.

Li Yun looks down on the president of the small association, but for ordinary abilities, this is equivalent to becoming the "leader" of China Overseas University, or a great power.

It is foreseeable that the school will allocate a dedicated activity room to the supernaturalists, as well as a considerable amount of financial support, and various resources will continue to be provided to the only supernaturalists association in China Overseas University.

It is seen that there are only more than 20 people in this association, but there will definitely be more and more superpowers in the future. By then, the president will become particularly important!

"Do you want to be the president?" Li Yun smiled faintly.

"good!"

Huang Guanying bit her scalp and showed her tiger king ability. The huge claws caused many students to exclaim. Although they had seen the school news last night, they still said that, most people are the first. Saw the power with my own eyes this time!

"Your wind power is very strong, I admit that I can't beat you!"

Before Li Yun didn't speak, Huang Guanying said first: "But dealing with monsters is not just fast. The monsters are huge in body and hard skin. You can't break the defense no matter how fast you are, and my Tiger King ability But it can kill most monsters in one move!!"

Many people nodded their heads again and again. The wind power is said to be fast, but only with bombs to deal with monsters, and if Huang Guanying's beastization can cover his whole body, his combat power will definitely increase dozens of times!

The position of president is still to be discussed!

"No." Li Yun shook his head, "Anyone can be the president, only you Huang Guanying is not worthy."

"you!"

"Also, didn't the principal say? I have another ability."

Li Yun raised his hand indifferently, and everyone was shocked to find that a white thunder appeared in his palm.

"Thunder Element Ability!"

Everyone yelled, and the sizzling thunder was brewing terrifying power. The classmates in the planning class even realized that their hair was attracted by lightning, and each hair stood up.

"I'm optimistic." Li Yun smiled slightly and threw out the Thunder in his hand.

Chapter 2754: Wind thunder

"boom!"

Lightning split the air, making a deafening sound, and banged into the head of the monster fish on the truck. The body of this tens of tons of big fish shook suddenly, and the truck shook overwhelmingly. There was a crunching sound.

Five seconds later, Da Yu's stiff body softened, and his bulging belly stopped beating, completely silent.

"died?"

"My God, it was electrocuted!"

"Oh, this fish was transported back from Penglai Island. It was still alive for several days offshore, but it was electrocuted by Li Yun's lightning power and then died?"

"What kind of offensive power is this? The Thunder System deserves to be selected by foreign media as the most powerful offensive power of all abilities, it's outrageous!"

"Hehe, in front of the Thunder Element's attack power, the beastization ability is obviously not enough."

"Can he knock off a scale of a big fish with one punch?"

After being shocked, Huang Guanying was ridiculed again. He was slapped by Li Yun's face three times in a row, causing him to completely fall to the bottom of the computer class. In addition, Li Yun possesses the two powers of wind and thunder. It's impossible to turn over!

It's completely hopeless!

"Very good, even if you look at the world, the dual abilities of wind and thunder are rare!" The principal said with a smile: "I hope that classmate Li Yun can serve as the president of the good abilities association and lead the association with his own abilities experience. Members are moving towards greater success!"

"Please come on stage, the president of the Association of Supernaturalists!"

Less than three seconds after the headmaster's voice fell, Li Yun's figure had passed a distance of tens of meters, and appeared next to him in the blink of an eye, shocking the headmaster-this was an instinctive reaction, anyone Anyone who suddenly appears around you will be shocked.

"I'm Cao!"

The 20,000 teachers and students in the audience also gave out awe-inspiring voices. At this time, they realized the terribleness of wind-type supernatural powers, and completely exceeded the reaction speed of ordinary humans. If they fight against wind-type supernatural powers, they are afraid not He didn't even see the other person's shadow, and moved his head in the next second!

The soldiers with guns also opened their eyes wide and looked at the guns in their hands, speculating whether they could touch the wind powers if they fired all the bullets.

"Cough." Li Yun coughed, concealing the fact that he was overly pretending, and said with a serious face: "Didn't the principal ask me to come?"

"Uh, yes, yes."

In front of Li Yun, the president of China Overseas University dared not neglect at all. He stood up quickly and enthusiastically pulled Li Yun to his seat. He also said with a spring breeze: "Now, the president of our Ability Association, classmate Li Yun Come to give a speech to everyone, welcome!"

Twenty thousand teachers and students were strangely silent for three seconds before applauding.

Many people are very puzzled. Their school is a 985 key university, and it is firmly ranked in the top five in the country. It is expected to compete for the top three thrones. It is also the Qingbei Nengzheng Zhonghai University in Beijing.

As the president of a key university, there are only two people in Zhonghai City who are higher than him. It is conceivable how powerful the president of Zhonghai University is.

But now in front of Li Yun, he is actually inferior? illusion?

Anyway, the more than 20,000 teachers and students speculated this way. When the principal gave way to Li Yun just now, he had a hint of respect.

"I'm talking? Uh, good."

Li Yun did not decline, sitting on the main seat facing the 20,000 teachers and students, his mood did not fluctuate much.

In any case, he has also experienced ups and downs, and he has seen this little scene.

Chapter 2755: Li Yun's speech

"Dear students, teachers, good morning everyone." Li Yun's voice spread throughout the campus via radio.

Surprised a group of teachers and students again, speaking without a script?

And still in front of so many people, can you say something reasonable and methodical?

Li Yun smiled, "I'm not very happy to be the president of the Supernaturalists' Association today, but since the principal chose me, I reluctantly agreed to it, fearful and honored."

Everyone laughed blankly, what kind of ghost adjective are these?

"Before the next president is elected, I, as the temporary president of the Association of Supernaturalists, let me talk about my views on Supervisors."

"In fact, it's a very simple sentence: supernatural beings are also human beings, a member of society, and enjoying the rights of all kinds of people, naturally they must also be restrained by society."

"In terms of rights and obligations, there is nothing special about the powers. People should not force the powers to protect the people just because they have the power. Of course, the powers can't be superior to others by this kind of power! "

"...While enjoying your rights, you must also bear certain responsibilities."

Li Yun's words made many people nod secretly, including those with supernatural powers, they actually quite agree with this view.

Especially those who do not want to expose their abilities, such as Xiong Tianze. The reason why he is unwilling to show his abilities is that he does not want to bear certain possible responsibilities, such as making him suddenly change from a student to fighting monsters on the battlefield. Xiong Tianze would definitely resist the superb warrior.

Li Yun's words are in line with his expectations: the supernatural person does not need to be responsible for ordinary people. Of course, the supernatural person cannot have any privileges. This group is just people with special powers, and the rights and obligations of ordinary people are no different.

"But in fact."

Li Yun turned around and said: "If there is any crisis, as a supernatural person who is different from ordinary people, you will definitely receive more attention. Everyone will look at you with expectant eyes. If you don't stand out to play some role, I am afraid you can no longer integrate into the original society.

So I think that people with supernatural powers can live a normal life, but they need to be ready at any time to train their superpowers, familiarize themselves with their abilities, and prepare for the future! "

This is tantamount to explaining the role of the Abnormal Society.

Ordinary people with supernatural powers will not go to the battlefield, but they need to be familiar with their abilities, just in case.

"For example—" Li Yun smiled slightly, "On campus, if any animals mutate, our Supernaturalists Association can send some people with good fighting ability to solve them, and work with school security to protect the safety of the teachers and students of Zhonghai University. In my opinion, ordinary people with supernatural powers can also become heroes!"

There was enthusiastic applause. Not to mention more than 20 supernaturalists applauded and approved this suggestion. Even some students who thought they would become supernaturalists in the future were extremely excited.

It is estimated that they all treat the tackling of monsters on campus as a special club activity.

"My speech is over, thank you everyone."

Li Yun stood up, but the principal was still applauding. He cheerfully said to him: "Student Li Yun put forward very good opinions. The school is everyone's common home, not just supernatural beings, but 20,000 teachers and students in the school. I am obligated to protect this big family. I believe that all the mutated monsters can be solved perfectly with everyone's strong physique after exercising!"

Applause rose again.

Chapter 2756: Cooking monsters

Taking advantage of the enthusiasm of the teachers and students, the principal again announced loudly: "In order for all teachers and students to have a healthy and strong body as soon as possible, the school has made a bold decision after rigorous research, careful identification, and in-depth investigation. !"

His finger pointed at the huge dead monster beast, and the 20,000 teachers and students looked at it, and their eyes gradually became dull.

"Principal, won't you?"

"Could it be that.....?"

"Oh my God!"

"Is this delicious?"

"Oh my god!"

"Ha ha ha ha."

When everyone was stunned, the principal laughed happily: "Yes, as you think, this monster larger than a whale will enter the school cafeteria and be cooked by a professional monster chef. , The whole school's undergraduate, master and doctoral students, as well as all faculty, including military training instructors, will be able to enjoy this mutated monster fish within the next week!!"

Staff and students:"....."

They did not cheer, but were frightened.

This Nima is going to eat a huge monster fish weighing tens of tons within a week. It is simply...too abnormal, it's quite exciting to think about it.

Many foodies are beginning to drool. The monster meat has been rumored to be a noble food on the Internet. It is a lot higher than salmon, caviar, Hokkaido beef, 1982 XO, etc. .

Especially some pretending local tyrants fly to Penglai Island and take a pretending selfie next to a weird and scarred monster. The next picture is placed in the tall Penglai Island restaurant. With a low-key and full text:

The monster beasts he hunted were extremely delicious.

Grass, who doesn't know that this monster beast was killed by someone else?

Netizens scolded and watched enviously the local tyrants eating monster beast meat. It is said that it is not only delicious, but also good for health. Some local tyrants who are hollowed out by alcohol must eat every meal. I heard that they can return. The realm of seven times a night.

And now, they also have the opportunity to eat monster meat! !

The buzzing discussion lasted for three minutes before being suppressed by the principal.

After that, he announced a series of things, including arranging personnel and venues for the supernaturalists' association, precautions for eating monster meat, and a series of messy things.

In addition, the military training will be divided into three stages. The first stage is in the school, which lasts for a week, and the content is normal military training, including physical exercise and walking forward, etc.; the second stage is going to the military camp, intensive training, real shooting, etc. .

The third stage is to perform a task, and the specifics are temporarily kept secret.

"Ding, the host makes a choice, rewards justice value +100,000, all attributes +1000, golden gift bag*1, all kinds of ordinary spirit fruits that can enhance physical fitness*30 (can be used to reward

members), additional rewards: The host's prestige in China Overseas University has been greatly increased."

At eleven o'clock at noon, Li Yun received the system reward after the principal finally announced the end of his speech.

When I went to the cafeteria for lunch with Xiao Mingzhu and some other students, Li Yun read some news on the Internet.

Unsurprisingly, after the old man's speech, vigorous physical exercises were launched across the country, entertainment time was reduced, and physical education was taken as a subject for the middle and college entrance examination.

Except for a monster fish from China Overseas University, some other schools and large companies have also purchased monster meat from the remote Penglai Island as a benefit. Li Yun glanced at Baiyun Technology's senior management group, as the president. Wu Ke also put forward a similar suggestion, and said that the company canteen should mix the meat dishes with monster meat, so that every company employee can be strong and physically strong, and so on.

The world is changing every day, and a big era is about to begin.

Chapter 2757: One month later, Laohe Town

Twenty-five days later, Nanyun Province, Feiyun County, Linshan City.

After a day's journey, Li Yun and Xiao Mingzhu, along with more than 20 classmates, took a shuttle bus that seemed to have a sense of history for more than a decade and arrived at a place called Laohe Town.

"I'm Cao, so broken!?" Wang Hao couldn't help but explode when he saw Laohe Town's first glance.

Although they had been prepared for a long time, they took a plane, bus, and van along the way. They came from Zhonghai City to Nanyun Province in the hinterland of the motherland. They had already seen too many places behind the building on the road.

But seeing Laohe Town in front of me with my own eyes still shocked the classmates from Zhonghai City.

A national highway runs through the town. At a glance, there is no house in the town that is more than three stories tall, and there are no tiles. The traces left by the wind and the sun are very obvious.

There are few shops on both sides of the road, and there are barely two places to sell mobile phones. There are neither neon lights nor shiny signs that are common in the countryside.

Except for a lot of pedestrians, everything looks too old.

Yes, there are few shops in Laohe Town, but there are a lot of people, but most people are setting up stalls. Li Yun casually took a look and found that most of the stalls were selling herbs, dried fruits, medicinal wine and other specialty products in the mountains. He hadn't seen many things before.

"Don't complain, get off when you get to the station, find the town government house here, and arrange the next work." Li Yun ordered.

But soon he was beaten in the face.

The shuttle bus stopped directly on the side of the road. At first, Li Yun and his classmates didn't know what was going on. They thought it was jammed. Who knew that the driver shouted out loudly: "It's the stop, the students got off the bus!"

"???"

A car of classmates directly covered their faces with question marks, and a boy asked in astonishment: "Just parked on the side of the road?!"

"What? Boys do you want to go to the station?" the driver said, "It's not impossible to go to the station, but it's very remote from the town. If you want to go, I'll take you there."

"Uh, forget it, let's get out of the car."

Li Yun also didn't expect the shuttle bus to stop on the road, and quickly greeted the students to get off the bus.

A group of young people with bright clothes and different temperaments from the townspeople stood on the streets of Laohe Town, forming a sharp contrast with the surrounding town residents.

It's not that people here don't have good clothes to wear, but their temperament, looks, and tanned skin are very different from those of college students from big cities.

In particular, a few girls from a good background can definitely be regarded as rare beauties in a small town.

And one of them, tall, noble, and beautiful with a sunny smile, has become the focus of attention of the residents of the nearby town.

"Hello, auntie, we are from Zhonghai City, I want to ask how the town chief is going here?"

Xiao Mingzhu showed a smile to an aunt selling fruit on the side of the road, and his friendly smile quickly won the aunt's trust.

It's a pity that the aunt's words are full of local accents, and it takes a long time to understand three or two words.

In the end, Li Yun asked a young man, and only then did he learn the information.

"Handsome guy." This young man secretly looked at Xiao Mingzhu with his eyes. It was the first time he saw such a beautiful woman, she was even more beautiful than the stars on the Internet!

"what?"

"You are from a big city?"

"Correct."

Under his enthusiasm, a group of students from the engineering class followed to the town government department, chatting with excitement along the way, treating this mission as a rare travel experience.

And it's a public travel.

Chapter 2758: Miki Village

"Then what are you doing here?" the young man asked curiously, "you don't seem to be traveling in a group, right? We Laohe has no scenic spots and can't attract so many tourists!"

"The purpose of our coming? That's a long story." Li Yun said with a smile.

After the military training began, they first trained in the school for a week, and then went to the nearby military camp for ten days of practical training. They conducted various trainings, including learning about guns, shooting, running with weights, crawling, etc. Needless to say, the hardship during the period. Anyway, after the end of the training, everyone felt like they were completely reborn.

Not to mention that everyone has become a qualified soldier, but at least some of the immature student spirit has faded, and he has become quite a soldier.

Twenty-five days later, that is now, the students of China Overseas University who participated in the training were assigned a task:

Assist in the relocation of a small town, and collectively relocate residents in remote mountainous areas to the small town.

The reason is also very simple. The wild is becoming less and less suitable for living. News of various mutant animals attacking livestock, destroying farmland, and infesting villages is endless. At first it can attract attention, but soon similar things happened all over the world, so that they no longer It's news, and it has become a huge trouble that plagues all countries.

Fortunately, according to Li Yun's previous speculation about the spread of spiritual energy, the country was ready, and soon issued a document to abandon remote villages and let villagers live in the town.

After preliminary preparations, in the past ten days, the relocation work has been carried out vigorously across the country. With the extreme shortage of personnel, the freshmen who participated in the military training were assigned the task of assisting in the relocation as the final conclusion of the military training.

Zhonghai City and Linshan City, Nanyun Province have a one-on-one agreement on poverty alleviation. Therefore, Li Yun and other talents flew to Linshan City from Zhonghai City. After bidding farewell to other students in the city, they took a bus and took a shuttle bus. Arrived in Laohe Town.

"So you are here to help our village!" The young man suddenly realized.

"Your village?"

Xiao Mingzhu looked at him, asked in a questioning tone, and then smiled again: "Oh yes, I haven't known your name after talking for so long. My name is Xiao Mingzhu, the monitor of the computer science class. This is mine. Deputy monitor, other classmates, I'll introduce it to you later."

The planning class was divided into two teams. It was better for the squad leader and deputy squad leader to be separated, but the counselor made the decision to let Li Yun and Xiao Mingzhu lead one team, and she and several instructors lead the other team, so Li Yun took this action Still with Xiao Mingzhu.

Huang Guanying, who has the Tiger King ability, and Xiong Tianze, another ability, also followed the instructor.

"Uh, I, my surname is Lin, don't others call me Ohua."

A Hua stammered and replied.

Everyone smiled with understanding, because Xiao Mingzhu's beauty and temperament are so outstanding, ordinary men are easily embarrassed in front of her, and they don't dare to talk to her at all.

Just like in school, when the goddess suddenly asks you to chat, you will be panicked, and only later will you be annoyed by your poor performance.

Xiao Mingzhu pretended not to see him embarrassed, and then asked: "Your village is also in the relocation?"

"Yes, that's right." Ah Hua eased his breath. "Our village is called Sanmu Village. We have been notified of the relocation a month ago, but until now there are still many villagers who don't want to leave...because of the town. The place where we live is too bad, my parents don't want to move, saying that as long as the door is closed, the beasts can't get in...Uh, I think it's better to relocate. After all, I saw on the Internet that the beasts are very good. It's so powerful that the iron gate can't stop it."

Chapter 2759: Qiao Feilu

Ah Hua said a lot of information in one breath, probably because he couldn't wait to express himself in front of a beauty of Xiao Mingzhu's level.

Xiao Mingzhu has seen too many boys like this. They always make a deliberate effort to please them. In fact, they tend to be embarrassed. It is better to look at them with a slight appreciation. As long as they have more contact, they will naturally be able to make a fool of yourself. Feel his goodness.

Huh? Why do I miss this guy again.

"Um."

Xiao Mingzhu nodded, "That's right, let's go to the town chief together, and later go to your village to help you move together. Oh, yes, I heard that you have mutated animals attacking the village?"

More than 20 classmates suddenly became nervous.

They heard the news before they set off, saying that someone in Laohe Town had been eaten by a monster and hadn't been caught yet, making the town panic.

However, Keban did not worry too much about his personal safety, because with Li Yun, the president of the Association of Supernaturalists, and Xiao Mingzhu as a supernaturalist, it was easy to deal with monsters other than Penglai Island.

Besides, they also have five guns in their hands, enough to protect themselves.

"Uh, yes, yes." Ah Hua still stammered. "Not only in our village, but also in Donglin Village in the east, and Xiasha Village in the south, monsters have also appeared."

When he said this, his face was a little sad and undecided.

"There are monsters in all three villages!" Wang Hao glanced at Li Yun in a panic, and then quietly breathed a sigh of relief after seeing the deputy squad leader as steady as Mount Tai.

The other classmates were the same, and the tension began to permeate. If there were no two stable soldiers, Li Yun and Xiao Mingzhu, they would definitely be in a rush to deal with it.

Li Yun said: "Forget about this, let's talk to the people from the Township Department to see how they arrange work."

Xiao Mingzhu smiled at him and said nothing.

Because the meaning in Li Yun's words is that Ahua is only a villager after all, there will definitely be a gap between the information he knows and the official investigation, and it can only be used as a reference, not as a basis.

The group speeded up, and a team of more than twenty people came to the three-story building, which immediately attracted the attention of the staff.

Soon someone greeted us, and a middle-aged man with dark yellow skin greeted him enthusiastically: "Are you from Zhonghai City? Welcome, welcome, and come to our Laohe Town!"

Xiao Mingzhu, Li Yun, and several classmates in front of him all shook hands with him. Through dialogue, I learned that this middle-aged man is the mayor of Laohe Town. His name is Qiao Feilu. He is still less than forty this year. The last is young and strong.

Originally, he was arranged to come to Laohe Town to take charge of the fight for poverty alleviation, but he did not expect that the aura on Penglai Island suddenly stopped the poverty alleviation work. Instead, he changed to relocation work and built temporary villages so that people in remote mountain villages were relocated.

This work is undoubtedly very difficult, it requires a lot of manpower, and the difficulties encountered are countless.

The most important one is: what do the villagers eat in the relocated village?

Laohe Town is located in a remote area. Several villages in this village are located in the mountains. The villagers are used to collecting medicine, hunting, etc. in the mountains. How can they leave the environment where they live for generations? I don't want to!

"So this is the biggest problem." Qiao Feilu said distressedly: "We have done a lot of work, but still many people are willing to relocate, saying that the town secretary can't support them, and would rather die in the village than live in the town!"

Chapter 2760: move

"I'm not ready to relocate yet?" Wang Anna couldn't help but complain a little. She thought she would start work when she came to Laohe Town, and it would take a day or two at most to finish the mission and return to Zhonghai City.

This small town is really not suitable for living. Even the signal in the town is not full. I guess it is difficult to make phone calls and surf the Internet when I go to the village.

"This... we are working hard to ensure that most people are willing to relocate!" Qiao Feilu gave a wry smile.

In the face of this group of students from top universities, he dared not put on the airs of some town officials. He was not allowed to have the second-generation children from the China Shipping Municipal Department among these students. Although Qianglong did not overpower the locals, he was investigating this time. When relocating, I will definitely refer to the opinions of this group of students.

Li Yun said: "Wang Anna, don't complain. I heard that grassroots work is very complicated. Let's talk about it after we get to know it."

"Just understand, just understand!" Qiao Feilu breathed a sigh of relief, and Wang Anna was not dissatisfied. The two squad leaders and deputy squad leaders had already established prestige in the class, and everyone was convinced by what they said.

"I, I." Ah Hua raised his hand weakly, and a group of people looked at him immediately, with 30 pairs of eyes looking at him, and the ordinary Sanmu villager was very nervous, and he said after a long while. : "I came today to check the residence in the town and tell the villagers about the situation. After all, it is not easy for our village to visit the town..."

"Oh? You are from Sanmu Village?" Qiao Feilu guessed Ahua's village at once, because it was the farthest in Sanmu Village, and it took one or two hours to drive a motorcycle on the mountain road, which was very difficult!

Ahua nodded, and quickly said: "In fact, the residential area is very well built. It has water and electricity. It is better than most of the mud houses in the village. Most of the people who are not willing to relocate are those who have built bungalows. There are tens of thousands of houses built, and they are definitely not willing to move..."

"There are other bungalows in your village? Rural villas?" Wang Anna was suddenly surprised.

A Hua was a little confused. Why didn't this lady who looked at the white-skinned and good-bodied girl from a big city ever heard of a bungalow?

"Uh, haha, it's actually a misunderstanding."

Qiao Feilu explained with a smile.

It turns out that the western-style house in the countryside does not refer to the spire house of the No. 3 mansion like Gong Qingyu, but refers to the red brick and reinforced concrete house.

Anna Wang grumbled: "I said that the village with rural villas is not a poor village." In the short video, she saw that many rural villas were built very beautifully and inexpensively. It cost about one or two million. , Which is much cheaper than a five million house in a big city.

Ah Hua blushed, and said: "But I think the villagers are still reluctant to move. They usually rely on things in the mountains for food. Could it be that the town chief..."

With that, he glanced at Qiao Feilu. For Ahua, the people of the town chief were all above them. Even if they visited, they weren't all the same, and they couldn't talk together.

In short, I just don't trust and think I have no food to eat after moving in.

Qiao Feilu was indeed embarrassed, but he still said, "Don't worry, even if you don't have any income, the town's tax revenue is enough to support your meals, and the county will support you. Besides, you can also find some work in the town. In short, you won't be hungry. dead!"

Ah Hua stopped talking and didn't starve to death, but he didn't have a good life either.
