

Godly Choice 3411

Chapter 3411: Dead eternity

He was really taken aback, Li Yun's scalp was numb, and he was startled by the scene in front of him.

The sky is chaotic and dark. There is no sun, moon and stars. Only the boundless chaos envelops the world, like a huge curtain that can never penetrate, covering the entire world, so that people in this world will feel heartened by looking up despair:

What kind of sky is this?

What kind of world is this?

Forever forever, the darkness that can't be penetrated.

Because the universe has died out, and everything in the world has become the most chaotic and primitive existence. For example, at the beginning of the Big Bang, there is nothing for you to explore except for the bare ground under your feet.

Everything has come to an end.

This is not a world similar to the Lotus Fairy Mansion!

Li Yun brought all the girls around him into the fairy house, but no one would feel depressed by the sky close at hand, because they all know that although the sky is low, the outside world is vast. They only You need to go out to see the vast universe.

But here, it's different.

This world is different.

Here, everything has perished.

The universe above your head is shrouded in infinite darkness and chaos. Within thousands of miles, only the ground under your feet can still let you rely on!

And that endless darkness and chaos can swallow you in the next second, swallow the ground under your feet, and let everything fall into the chaos!

"What is this... **** place?"

Fan Linglong couldn't help but scolded.

It's not that she is rude, but the world in front of her makes her feel very uncomfortable, as if being a substance, including human life, naturally rejects all chaotic and disorderly things.

Life is an orderly material body, and it constantly draws energy and matter from the outside world in order to maintain this orderly existence.

Chaos is naturally repelled by all material existence!

Therefore, Fan Linglong directly said that this is a **** place, which is correct.

All the existence in the universe, water and fire, light and electricity, atoms and electrons, grass and wood, planets and sun, everything that exists objectively will be repelled from entering this world.

Here is the end of chaos and disorder.

"The doomsday predicted in physics, that is, the end of the universe described by the second law of thermodynamics, is like this...?"

Looking up at the chaotic sky, Li Yun was shocked and sighed from the bottom of his heart.

The second law of thermodynamics is: in an isolated system, heat cannot be transferred spontaneously from a low-temperature object to a high-temperature object.

If the universe is regarded as an isolated system, one can infer a terrifying theory based on the second law of thermodynamics: the unstoppable demise of the universe.

The reason is simple. As an isolated system of the universe, all matter will eventually reach a state of uniform temperature at some point in the future.

All material motions are gradually transformed into thermal motions, eventually reaching the same temperature everywhere, which is the so-called thermal equilibrium state.

At that time, all changes in the universe will not occur, all matter is the same, hydrogen, helium, lithium, beryllium and boron, all elements in the element cycle list, all belong to the same state, and the universe is completely in a deadly eternal state.

This is the most terrifying doomsday language.

At this moment, Li Yun and Fan Qing Sheng are on top of the world where they are.

There is the eternal silence!

Chapter 3412: Epiphany

"What the **** is this place?"

Li Yun tried his best to use the voice of speaking to dispel the natural fear brought to him by the chaotic universe above his head.

Any orderly existence will reject this disorderly chaos, and will naturally terrorize them, just as life fears death. This is an instinctive reaction.

"Perhaps, this is the fairy world..."

Fan Linglong suddenly said his guess, which surprised Li Yun.

"Xianjie? There is a certain truth."

Li Yun thought: "The immortals in the immortal world have undoubtedly disappeared. Whether they are dead or in hiding is still unknown. However, the ancient times of gods must be like the sky above us, they have all been returned to chaos. And deathly silence, this, I think for sure!"

Therefore, Fan Linglong said that this is the immortal world, and her speculation is in it.

"...A very strange world."

Sage Fanqing also spoke, "I can't feel anything above my head, and I don't know if this is our universe. It's more...isolated than the Lotus Immortal Palace or the Hidden Sacred Valley."

Li Yun agreed with Qingsheng's view.

If opening up a small world is to forcibly tear open a gap in the space, then Li Yun's space ring is equivalent to opening a hole and then sewing it up, and then reach out to the space when it is used. Inside the ring, take out what's inside.

Hidden Sacred Valley and Lotus Immortal Mansion are tantamount to abruptly compressing or expanding the original space. In the Hidden Sacred Valley and Lotus Immortal Mansion, everyone feels the original cosmic space, but it is a little strange. After all, The space is stretched and compressed.

But here, this weird place was dug out of the universe alive by humans.

Then use your own way to knead this space into a new look, completely different from the previous universe!

It can be said that, except for an opening in the original time and space, this is completely different from the universe where Li Yun was before.

Here, light can even be set to travel one centimeter per second, or sound can be faster than light.

Of course, this space did not do that, it just gave Li Yun the three people's feelings.

What Li Yun entered was a world made by others with his hands!

Therefore, the sky above the head will be so chaotic and disorderly, as terrifying as the end of the world.

"Ugh."

Fan Linglong shook his head, "I used to think I was strong enough. There is no one better than me in the world. But after entering this place, I feel like a frog at the bottom of a well, knowing that the chaotic sky above my head contains supremacy. Tao Fa, but I can't see it at all, and I can't even feel anything that I can learn from my feelings. It's really...a frog in the bottom of the well!"

"Ha ha."

Li Yun couldn't help laughing, provoking Fan Linglong and giving him a roll of eyes.

Fan Qingsheng nodded. When she entered the Lotus Immortal Mansion with Li Yun for the first time, when the Immortal Mansion was activated, the spiritual energy spread to every corner of the small world, from which she could gain a lot of insights.

But here, she knew that the extraordinary sky above her head, like the power of creation, lay in the sky, but she could not get any help.

I am afraid that only the ancient immortals can gain something here.

Even stronger, just like in ancient legends, only saints can open up the universe. For example, Pangu used a sky-opening axe to slash at the chaos to separate the clear and the muddy, so...

"what happened?"

"Hey?"

"Li Yun?"

Chapter 3413: Chaos Entropy Annihilation

I don't know how long it took before Li Yun woke up from his trance, and the beautiful faces of the two women, Fan Linglong and Fanqing, appeared in front of him.

"you're awake?"

Fan Linglong asked cautiously.

"Yes... I was just now?"

"You have an epiphany!"

Fan Linglong's eyes were surprised and excited, "Neither Qingsheng nor I have any insights, but when you look up and look at it, you suddenly mutter to yourself, saying that Pangu opens the sky, entropy increases in chaos, and goes down with an axe. In fact, It is to bring changes to the world... Could it be said, what do you really realize?!"

"Ding, congratulations to the host for making the right choice, touch the stone wall and enter the chaos small world, reward aura value +50 million, colorful gift bag*3, innate physique upgrade, unlock talent: chaos entropy disappear."

The prompt of the system made Li Yun startled. Recently, he was addicted to falling in love with his confidante, and he likes to roll with several girls at night, which led to a sharp decrease in selection events, let alone the correct selection of events!

Therefore, a super generous reward for the correct choice event gave Li Yun a sense of refreshment suddenly widened!

He took another look at the so-called talent he had acquired, and he was shocked again.

"Chaos Entropy Annihilation: You have a preliminary understanding of the mystery of the universe, you have the ability to see through all material existence, and have a small probability of destroying everything that exists objectively, and you can also create all objects that can exist objectively."

"My Cao!!!"

Li Yun really jumped three feet high this time.

His eyes almost didn't stick out.

Really, it's not that Li Yun is faceless and skinless, and doesn't want to maintain his image in front of his girlfriend.

But this chaos entropy extinction talent is really too BUG!

Isn't this a talent that the Creator can have?

With chaos entropy annihilation, Li Yun still needs a fart system?

He can completely create everything that can exist objectively in the universe.

From plants, trees, fish and insects, to planets and stars, and even legendary congenital treasures, such as Tai Chi diagram, Hongmeng Purple Qi, Chaos Bead, 36-Rank Golden Lotus, Killing Spear, Good Fortune Jade Plate and so on.

Li Yun can use this chaos entropy extinction talent to create everything that exists!

Of course, a small probability.

Of course, Li Yun has no idea how to create...

"You... don't scare me!"

Fan Linglong was a little panicked. It was really the first time she saw Li Yun's gaffe-pressing her head rudely in the morning and not letting her raise her head didn't count.

"I'm fine, I just feel like... Suddenly I am invincible!!"

Li Yun was energetic, and sure enough, what he had been guessing before was correct.

If he no longer touches these ancient secrets, then the system will no longer choose events for him, and it is impossible to further unlock the seal of the congenital womb and obtain a more powerful talent!

This time, he just accidentally made a breakthrough from Pangu, swung an axe, and thought of a very magical thing:

If Pangu's opening of the sky is true, then from a scientific point of view, does Pangu's axe thrown at the chaos just impose changes on the deadly eternal universe?

Before Pangu fell asleep, the universe was in thermal equilibrium, and all matter had not changed. Pangu swung an axe in anger, which was tantamount to breaking through the chaos and making the universe change again.

More coincidentally and wonderfully, modern scientists also pointed out that the universe originated in a big bang 13 billion years ago.

Chapter 3414: Michisei all things

That is to say, in Li Yun's epiphany just now, Pangu's axe is actually equivalent to the big bang of the universe, all of which imposes changes on the lonely universe, thereby reducing entropy and regenerating everything.

What the ancients said, Dao produces one, one life two, two produces three, three produces everything, in a sense, it actually corresponds to the Big Bang theory and the law of entropy increase.

Everything is born from Tao, and everything is attributed to Tao, so in theory, if Li Yun's innate Tao is really Tao, then it is not surprising that he has the ability to create all things.

Unfortunately, after calming down, Li Yun found that he couldn't create any bird things at all, and he couldn't even create a very ordinary magic like turning stones into gold, let alone creating an entire universe.

"How do I feel that you are not invincible, but something else, what's wrong?!"

Fan Linglong asked again.

".....fine."

Li Yun still didn't know how to explain the system, and could only say: "I seem to have learned a very powerful spell, but the success rate is very low. It is not convenient to cast it now, so let's talk about it later."

Fan Linglong vomited and said: "Your epiphany is completely different from others, I think you should not have an epiphany.

"...Sure, hurry up and explore here,"

Li Yun looked around and found that his previous worries were unnecessary. The exit of this chaotic world was in mid-air, that is, the sky where he and the two women of Qing Sheng had fallen. It should be as long as they fly up a certain distance. Can go out directly.

Fortunately, I can go out at any time, otherwise this chaotic and disorderly world is really too depressing!

"it is good."

Sage Fanqing nodded earnestly. It didn't feel good to her. Her sanctified body seemed to naturally reject this place, even more repellent than ordinary people.

The three of them stopped chatting, and they all looked around carefully with their spiritual minds. Li Yun took out the Leap Fire God Sword, which was useless for two months, and Sage Fan Qing also took out the Thunder that Li Yun had given to Jie Lei for the upgrade. Sword, as for Fan Linglong, her technique is very special, anything can be used as a weapon.

"Let's go."

Everything is in order, Li Yun nodded towards the two women, and took the lead to walk forward with the sword.

The two women followed closely, and the three advanced in this weird world of chaos.

If you ignore the gray chaotic clouds and fog above your head, the environment here is similar to the illusion of other planets photographed by satellites. The ground is bare, not to mention the long grass, and there is not even a trace of life.

There are no dead animals or plants, nor any architectural traces created by civilization, even no wind, no water, no fire, no changes.

Except for the ground under your feet and the chaotic sky above your head, there is nothing here that can be said to represent the passage of time.

"It's weird this world."

Li Yun couldn't help but speak, if this extremely weird world does not speak again, it can suffocate people alive.

In fact, after he spoke, he obviously heard the voice of Fan Linglong's relief-luckily there was still air here, otherwise even the voice of speaking would not be able to spread.

"Who said no." Fan Linglong took the topic until her apprentice didn't like to talk, so she took the topic, "It's so strange that I don't know how to explain its strangeness!"

Li Yun pondered for a moment, looked up at the sky, and said: "First of all, I have a guess that this is a small world created by an ancient fairy who completely distorts the rules of the universe? Do you agree?"

Chapter 3415: Still world

"Evidence?" Sage Fan Qing said, her inquiry was actually to help Li Yun clarify his thoughts.

"Evidence..."

Li Yun thought for a while, "Ignore the sky above my head and treat it as an existence that we don't understand. Illusions or barriers are both. Regardless of it, I don't care about the physical rules here, and don't worry about whether it is just 300,000. Kilometers every wonderful.

Just talk about the terrain here! "

Li Yun pointed to the ground under his feet.

"terrain?"

Fan Linglong and Fan Qingsheng looked at each other. The master and apprentice squatted down together and carefully touched the soil on the ground with their slender hands.

"It's no different from ordinary soil, but it's drier." Fan Linglong judged, found another stone, stretched out his finger to poke, and pierced the stone directly, revealing the heart of the stone.

The three of them took a look, and the inside was no different from the outside stone.

"The terrain is nothing strange." Fan Linglong concluded.

"No, it's strange because it's not strange."

Li Yun smiled slightly, "This strange world has air, but there is no flow, which proves that the temperature in any place here is equal, and it is in a state of almost time static, but this state has never been generated naturally, but has Anyone, whether a **** or an immortal, transports the soil and air here, and uses his force to forcibly balance the temperature and the flow of objects here in an instant!"

Sage Fanqing looked around and nodded: "Yes, the dust here did not spread out and spread on the ground, but showed a trace of being blown by the wind."

She rarely said so much.

Fan Linglong didn't quite understand, "What if no one forced it to stop?"

"If not, then there should be repeated wind blowing here, just like boiling water, blowing repeatedly because of the temperature imbalance, until the temperature of all objects is the same, this chaotic breeze will stop."

"During the period, the stones here will also change due to weathering. It will not be in such a complete state!"

After Li Yun finished explaining, Fan Linglong thought about it again, and slowly said: "You mean...Although there is no time to stand still, the rules of heaven and earth here are to make all the objects become consistent in an instant, so Let all the material flow be balanced."

"That's right." Li Yun admired. Although Fan Linglong is an older generation born hundreds of years, she has lived in seclusion for a long time, but that doesn't mean that she doesn't understand modern science at all.

Moreover, it seems that Fan Linglong now has an epiphany?

"Even..." Fan Linglong raised her hand, her eyes getting brighter and brighter: "I can't change anything here because of the temperature changes caused by spells, because the rules of heat transfer here have been rewritten!?"

"I think... yes."

Heat transfer is rewritten, that is, the second law of thermodynamics is changed, heat will no longer be spontaneously spread from objects with high energy to objects with low energy, and even vice versa, from spontaneously transmitted from low-calorie objects to high-calorie objects.

This is the terrible thing about changing the rules of the small world. Li Yun can even imagine that if the master who created this world is still there, he is a complete **** here, and anyone who comes in does not even control his own life and death. were able.

Although Li Yun also has a free-to-view Lotus Immortal Mansion, compared with this small world where the rules can be changed at will, it is like the difference between smart and non-smart phones!

Chapter 3416: Research

"I will try again!"

Fan Linglong seemed to have found something interesting. He stretched out his hand and tapped it in the air. A talisman diploma appeared in the air, light and fire surrounded the surrounding area, and then floated to the sky.

The three of them watched the flames fly higher and higher, and there was no change in the slightest, until it rose into the chaotic fog of the sky, it slowly dissipated.

"Spells are not excluded here." Fan Linglong concluded, "But the effects of the spells have been reduced by at least 90%. It could have burned a large mountain with a fire talisman, but here, I am afraid that only one stone can be burned, and the changes caused. It was quickly swallowed by some kind of power!"

In the outside world, if a flame is ignited out of thin air, the surrounding air will be disturbed, and the things burned by the flame will remain hot for a long time before cooling down slowly-this is actually an example of temperature transfer , Elementary school students understand.

But in this special chaotic world, flames can burn stones, but the temperature will quickly pass, the disturbance of the air will quickly calm down, and everything will be calm again!

This world is repelling change.

"I think the answer to the second question is there." Li Yun sighed.

"What second question?"

"That's why there is no life here."

Li Yun pointed to the surrounding area. This land, as desolate as the surface of Mars, is barren than any place on the earth. There is no trace of animals and plants, just like billions of years ago, when life was not born on earth. .

"...Yes."

Fan Linglong only realized afterwards, looked around, was surprised: "Aura will respond to everything that exists, even stones can be moisturized by the aura to become jade essence, and here is full of aura, let alone a few hundred Ten thousand years, ten thousand years, is enough to make the mountains and plains full of monsters!"

"So, this world prohibits all changing things and processes from occurring, and naturally includes the birth of life."

Li Yun smiled and said: "Because according to modern theory, life is the sum of a series of chemical reactions. Life lies in movement. Without movement, it is a dead thing!"

This is why scientists on earth, when looking for life on other planets, first study whether it is suitable for life on earth.

This is not only for immigration, but also for eliminating a large number of impossible planets.

Many people may say that human beings are too superficial, do you think that life is only carbon-based? Maybe the life born on another planet is completely different from the earth!

But in fact, the basis for scientists to do this is to refer to the forms of life on earth.

Human beings only know that life exists on the earth. To search for life on other planets, it is natural to first follow the situation of life on earth, including chemical reactions, chemical bond formation and breaking, suitable temperature for reaction, element composition and so on.

Life, according to the understanding of human beings on earth, is a collection of chemical reactions.

Chemical reactions need to occur easily between active elements, especially the large number of chemical reactions that exist in the form of life, and it is necessary to exchange elements at all times to break the chemical bonds and release energy.

Unfortunately, the active elements in the universe only occupy a small part of the periodic table, and among them, carbon-based and silicon-based are almost all of the two chemical elements that can give birth to life!

Chapter 3417: Hongmeng Ziqi

"This actually means," Li Yun said with a smile: "The second law of thermodynamics overrides the catalytic substance of aura. In a sense, science has defeated immortality!"

Sage Fanqing didn't speak, and seemed to be frightened by this outrageous inference.

Fan Linglong gave Li Yun another eye. "Who said that immortality is unscientific? Didn't you just end the world from a scientific point of view? Maybe there will be scientific cultivation in the future!"

Scientific cultivation of immortals... Obligatory cultivation of immortals for 40,000 years?

Thinking of this, Li Yun himself was unable to complain, shook his head, and continued to walk forward, saying: "Since we have basically determined that this is a world created by immortals, then it will be easy to handle. Do a few things."

The two women kept up with him.

"First, find out the most critical part of this small world!"

Li Yun glanced around, and said: "For example, what kind of array, the core of the world, the singularity of the small universe, etc., find it, maybe we can control the world, maybe."

Fan Linglong said indifferently: "What use do we want here? Except for the aura, there is nothing else, even entering here is too boring."

I want to practice enough to understand the rules of the world and realize what awesome spells, Fan Linglong feels that he has to practice for at least millions of years, and the soul and light realm can't even touch the side of immortals. As for how to modify the rules of heaven and earth, more I don't know anything about it.

"So come up with the second thing we have to do!"

Li Yun felt the aura around him, "We need to find out why the world is constantly producing aura, whether there are things like Hongmeng Ziqi, and if so, will there be ancient monsters entrenched there? We still have to be more careful."

"What is Hongmeng Purple Qi?" Fan Linglong didn't understand this, and asked curiously after hearing that the energy source of this thing continuously produced aura.

Vaguely, she felt that Li Yun knew so much better than her!

You even know such amazing things.

"this."

Sage Fanqing stretched out his wrist to the master. She wore a jade bracelet on her wrist. Fan Linglong was taken aback for a moment, then his eyes widened: "Good apprentice, is it that your hand is..."

After she met Li Yun, she didn't stare too many times, but it was all because of Li Yun this little villain who angered her.

"Well, Hongmeng Purple Qi bracelet." Fan Qingsheng explained to the master, "Just like Li Yun said, it can produce aura."

"Born out of thin air."

One more sentence from the Sage Fanqing.

Fan Linglong didn't know what to say for a while.

No wonder her apprentice trusts Li Yun so much. It turns out that Li Yun gave her so many things, from the magical medicine to the crazy Hongmeng Ziqi bracelet, all to her apprentice.

Not to mention that her stupid apprentice couldn't stand it. Fan Linglong asked herself, if she didn't know Li Yun and a man suddenly gave her a bracelet with a constant flow of energy, I'm afraid she would also be shocked by this man. Have a strong opinion, right?

In the era of the end of spiritual energy, there is nothing more important to practitioners than spiritual energy!

"This bracelet, you..." Looking at the bracelet on Apprentice Hao's wrist, Fan Linglong said with difficulty, "Is it also obtained from the Ancient Immortal Palace?"

".....almost."

Li Yun smiled slightly, "Don't tell others, no one else will do, including the girls around me."

Chapter 3418: footprint

It's not that Li Yun doesn't trust Fang Xueqing and the others. Among his confidantes, even Su Muxin, who seems to be the least reliable and plays the most crazy, if Li Yun tells her this secret, Su Muxin will never reveal half. This is true for anyone.

It's just that if they don't tell, it doesn't mean that they won't leak accidentally.

Coupled with their own strength issues, Li Yun didn't want them to be under too much pressure, so it's better not to tell them about the grandeur.

"Nonsense, of course I know!"

Fan Linglong took a deep breath and couldn't help holding the apprentice's jade hand. He looked at the bracelet on it carefully, and of course he couldn't see anything.

"If the effect of this treasure spreads out, I think...no, I can't even think about it!"

"So let's hide it."

Li Yun smiled at Sage Fanqing, and the lady of sage nodded seriously. She never took the initiative to expose her, except for telling her to Master alone in this world.

"Let's go, let's go around again." Li Yun greeted them.

The question has been raised, but none of the three have any hope of finding something.

For one thing, in addition to the current Holy Lord, people from the previous Hidden Sacred Valley and Six Doors also entered here, but I haven't heard of what happened in the rift in the spirit; secondly, the world was changed by the people who built it. The rules of the world. If the creator

deliberately concealed it and didn't need to hide it somewhere, he would put the most critical thing on the gray chaotic sky. Presumably no one would dare to fly into the sky to search.

The foggy chaos cuts off the divine mind, and the practitioner flies up and enters the chaos, regardless of front, back, left, and right. Basically, they can only wait for death.

Li Yun and the two girls didn't know how long they had been away. The world refused to change. Even Li Yun took out a pocket watch in the inventory. The second hand was still stationary, and the same was true of the mobile phone.

As the life of the three people, Li Yun can resist the static rules of this world, but the mobile phone watch as a dead thing is not in the ranks of exemption, even the movement of mechanical gears has been stopped.

"There is really nothing!"

After leaving again, I don't know how long, Li Yun, who has a good mentality, began to feel bored.

Above the head is the boundless sea of chaotic clouds, and the barren ground under your feet has no trace of life or change. The stone is stone, the soil is soil, the temperature is constant, the air does not flow, and the surrounding is quiet, stepping on The sound on the ground cannot be heard—the sound is too small and it is stopped.

"No, maybe it's not without..."

Fan Linglong refuted Li Yun's words, fixed his eyes on a slope, and stretched out his fingers: "Look!"

Sage Fanqing looked down and found that there was a row of footprints on the ground under the slope, extending from one section of the valley to the other end.

"Someone is finally there!"

Li Yun's spirits lifted up and he can see people in the deserted world. This feeling is no less than meeting old friends in another country!

"Who is it? Could it be the other saints who entered this place?"

"It's also possible that it's a person from Six Doors."

Li Yun was not too surprised. Because the world is very strange, even practitioners who can fly easily have to walk honestly after coming here, leaving footprints normal.

The three of them walked down and saw the approximate shape and size of the footprint.

"It should be a man's footsteps, a little flustered, walking very quickly."

Li Yun looked at the traces of the footprints on the soft ground, and concluded: "He should be running and stepped hard."

Chapter 3419: sound

"Don't you think it's weird?"

Fan Linglong shook her head and drove her long, black hair to follow, but compared to the outside world, even if she shook her head vigorously here, her hair only fluttered.

"It's strange." Li Yun said, "Theoretically, the people who can come here are powerful practitioners. Even if they run in a panic, they can't step on the ground too hard, but the footprints are obvious and deep. Normal walking will not have such deep footprints, and it is deep in the front and shallow in the back. It is true for running."

"Just go and see!"

Fan Linglong looked back and forth, "Should we follow the footsteps, or trace back to why he ran?"

"Let's take a look at the source first."

Li Yun made a decision. The two women had no objection. It is rare to see footprints in this world. Naturally, they have to explore and see what the other party is doing in this world and whether they see something terrible. That's why they frightened. run fast.

The three of them did not destroy their footprints, and went back five or six meters away.

It's just that Li Yun stopped suddenly, and vaguely, he seemed to hear something.

"what happened?"

"Have you heard?"

"Hear what? No, just you are talking." Fan Linglong shook her head. She has been paying attention to the surrounding situation, but found no abnormalities.

"No."

Sage Fanqing also shook his head.

Li Yun listened carefully, but didn't hear it again. He could only suspect that he had auditory hallucinations.

Just a few steps after he continued to walk out, Li Yun heard another cry of "Ah"!

This time it was very clear, and Li Yun was sure that he hadn't heard it wrong!

"Really not!"

Fan Linglong denied what he said again, and turned to look around. There was still no one. If there was any sound, it would definitely reach her ears.

"no?"

Li Yun listened again, but there was no sound again.

A weird atmosphere began to rise, and in this chaotic world, it seemed that all weird things could happen.

"Ah~~~!"

Li Yun continued to move forward, and as soon as he took a step, a sound burst into his ears, and he was frightened for a while, and the intercalary fire sword in his hand was clenched tightly.

"You still haven't heard?!"

Li Yun turned his head to look at the two women, Fan Qingsheng and Fan Linglong both shook their heads at the same time.

Li Yun looked left and looked again, but still couldn't find what was yelling.

"Listen to the sound, it should be a man calling." Li Yun calmed down. "He acted in a panic, his voice flustered, running around like a headless fly, but it was strange. Every time I stopped, the sound disappeared, and after a few more steps, the voice came again!"

It was as if there was a horn that sounded directly in Li Yun's ear.

"..."

Sage Fanqing suddenly flew up, his feet floating on the ground, his ears were level with Li Yun's, and he flew forward for a certain distance. He turned his head and nodded at Li Yun and Master: "I heard it too. "

"Uh?!"

"Could it be that....."

"I go!"

Fan Linglong also flew up, and after hearing the same sound, it suddenly dawned on him: "That's it... the sound was also still, and it just solidified at the position of Li Yun's ears. No wonder Qing Sheng and I couldn't hear it before! "

After figuring it out, Li Yun couldn't laugh or cry.

The sound was solidified in this world abruptly, like a river floating in mid-air. Only when the ears happened to be in this position, could the man yell and yell, otherwise, he would not hear it at all.

Chapter 3420: Go in

The three of Li Yun possessed mana. He was aware of the abnormalities in this world, and he had already added some mana to his voice while speaking, so as to spread it better.

But the man's panicked voice was frozen in the air, indicating that he was likely to be an ordinary person without much strength, and it was likely that he entered here by mistake. It can basically be ruled out that Liudaomen deliberately let ordinary people in. After all, Liudao. The door has been in charge of this place for tens of thousands of years, and the research on the Reiki Rift has already concluded that there is no need to send ordinary people in!

"We chase!"

Li Yun need not explain, the two women are not stupid, they can basically guess the similar situation.

Immediately, the three set off for flight, trying to trace back where the person entered.

Unfortunately, after flying for one kilometer, Li Yun saw a large piece of solid ground, and it was difficult to find footprints.

"Go the other direction!"

Li Yun yelled to the two women, and the three of them turned around and hurried along the direction of their footprints.

"The other party should have just come in." Fan Linglong said with some joy, "Unexpectedly, there are more than two entrances in this place, and there is probably a third one. I can even boldly guess that the man who yelled to escape was forced by someone. Come in! His footsteps were very eager at the beginning. It should be after running a certain distance that he discovered the abnormality of this world, so he seemed even more flustered."

The man's scream remained in the air, although it was not clear, but combined with the messy footsteps, a lot of things could be inferred.

"Before I guessed, this space and the seven gates of life and death that appeared on Penglai Island, as well as the hidden sacred valley and the six doors, may be inextricably linked, maybe... the hidden sacred valley, and the six doors. The resident is one of the gates of life and death!"

Li Yun said in a deep voice.

In fact, it is easy to guess that the ancient creations are the same characteristics of these places. In addition, the hidden sacred valley, the six gates, and the three places of Penglai Island can spontaneously generate auras, and the auras from the two cultivating schools all come from this. Judging from the chaotic world, the aura of Penglai Island may also come from here!

It's just that the aura of Penglai Island has not been used by anyone. It has been accumulated underground for many years. Therefore, Li Yun asked Fanqing Sheng to activate the jade disc fragments, and after the Biyou Palace on Penglai Island was raised, the aura accumulated for thousands of years suddenly became abrupt. Broke out!

"You mean... hold the keys cross?"

Fan Linglong quickly realized this, and her expression became suspicious.

"It's possible!"

Li Yun is a similar guess.

Judging from the last activation of the gate of life and death on Penglai Island, there are a total of seven similar gates on the earth. If the Six Gates and the Hidden Sacred Valley are one of them, then in ancient times, using great magic power to open up this chaotic world, and The creation of Penglai Island and Biyou Palace, as well as the gods and immortals in several other places, their initial idea should be to create seven keys respectively, and distribute them to seven races, families, forces, sects, or descendants. To future generations.

Let the people of future generations use the key to open the door of life and death at the right time to achieve the goals of the gods and immortals in ancient times.

As for the purpose, it is temporarily unknown. It may be a gift for future generations, or it may be the key to the return and resurrection of the gods and immortals, or even a sign of extinction. Li Yun

will never think that in myths and legends, the gods love For mortals, they think that gods must be good people.
