

## Godly Choice 371

Chapter 371: Eat the same bun

The three steps are completed, and then the scores are integrated, and the top ranked ones have the opportunity to obtain a formal contract.

Of course, these three steps have nothing to do with Li Yun, he just took a look.

Originally, Wu Ke wanted to add an interview with the chairman of the board at the end, but Li Yun found it troublesome and rejected it.

It's not that he doesn't understand interviews. Li Yun has advanced talent management skills and superb hacking skills. Ordinary interviews can't bother him at all.

"Li Yun, I'll eat for you."

The interviewer at the front was waiting nervously, while Li Yun and Gong Qingyu at the back were sitting side by side and eating meat buns.

Moreover, Gong Qingyu took three small mouthfuls and handed the meat buns to Li Yun's mouth, with an expression that asked him to eat the buns he had just bitten, without realizing that Li Yun would bite them down. It is equivalent to kissing indirectly.

"Isn't it delicious?"

"no."

Gong Qingyu's face flushed, and he stuffed the meat buns into Li Yun's mouth, and said embarrassingly: "When I went out in the morning, Sister Xia had already prepared breakfast for me, so..."

"So?" Li Yun looked at her with a smile, and took the meat bun in Gong Qingyu's hand.

"So, so, that..." Gong Qingyu's dignified face flushed more and more, and finally forced to be helpless, closed his eyes and shouted: "So I just want to have breakfast with you!"

"Hahaha, alright alright, next time, no, tomorrow we will have the opportunity to have breakfast together!"

Gong Qingyu's shy appearance is very cute. He plays with a classical beauty and makes her show a shy expression. This anger, shy, gentle and gentle appearance gives Li Yun a full sense of accomplishment, and his heart is also full of righteousness. The pampering intent of this beautiful girl.

"Then you have to eat a little more, otherwise I can't finish four buns by myself."

Li Yun took a bite and then handed her the meat buns. Gong Qingyu pursed her mouth in dissatisfaction, but did not refuse, and obediently opened her rosy little mouth and took a small bite of the meat bun.

It was really a small bite, and she was cheating.

"Hehe, now it's your turn to eat!"

Behind her, the two maids of Spring Flower and Autumn Chrysanthemum were completely stunned. Their young lady, the eldest lady of the Gong family, one of the first-class martial arts families, actually ate a meat bun with a young man with a smile on her face!

This is incredible!

If they hadn't seen it with their own eyes, they would never believe that the girl who seemed to be in love in front of them was Gong Qingyu.

But those who come to the interview feel normal. Aren't many teenagers and girls in love so close?

It's just that men's envy is inevitable. They look at Gong Qingyu and their eyes become very hot. There is such a beautiful girl who is cold and noble in front of outsiders, and acts as a girlfriend in front of her boyfriend. Li Yun must be very happy. Bar.

"what!"

After a while, Gong Qingyu woke up to what she was doing, her cheeks flushed again, and she hurriedly sat down, acting like a lady.

Li Yun smiled and said, "Well, don't pretend to be a big lady until now, Qingyu, you have all been read."

"Huh, I blame you!"

"Well, blame me, the four buns are finally finished, come on, let's wash our hands."

Gong Qingyu followed Li Yun vigorously, looked at him for a long while, and laughed out loud again.

She never thought that one of her would be so close to a boy.

However, it doesn't feel bad at all.

Gong Qingyu felt very happy, happier than when she was hiding in the room and drawing comics.

Chapter 372: Ding, it is recommended that the host acquire it immediately

When they came back after washing their hands, Li Yun and Gong Qingyu continued to sit behind to watch the show.

As a result, Wu Ke sent him a text message, saying that after Li Yun and Gong Qingyu came back, the interviewers were obviously a lot nervous, and many people paid close attention to him.

Li Yun was speechless. Is the interviewer afraid that the chairman will be dissatisfied? Or is it afraid of making a fool of yourself in front of the daughter of Gong Qingyu?

"Qingyu, we did not participate in the interview, but it seems to have played an interview role."

"?"

"follow me."

Li Yun took her little hand, and the two of them walked to the front of the stage and took the initiative to nod with those who were interviewing, which was equivalent to walking around and asking about the topic and returning.

Only then did Gong Qingyu understand that Li Yun was afraid that they would be too nervous, so he did this to show closeness, and there was no need to be too nervous.

"Hehe, Li Yun, you are quite good." Gong Qingyu quietly said to him.

"Nonsense, when did I be bad?"

"Huh, arrogant...Hey, look at that man."

Gong Qingyu sternly signaled, Li Yun turned his head and looked around, and found a man in his thirties sitting at a table and chair, typing on the keyboard of his notebook intently. His focused appearance was exceptionally different from the people waiting anxiously around him.

Li Yun pretended to be surprised and said: "Qingyu, do you like this kind of uncle?"

"Hate, you know what I like..." Gong Qingyu blushed, twisted Li Yun's waist, and said angrily: "You are not allowed to talk about this kind of topic in the future. You are jealous, I am still jealous."

"Sorry, I'm not good, I admit it!"

Li Yun hurriedly begged for mercy and finally coaxed his prospective girlfriend. He shouldn't make that kind of joke.

Gong Qingyu explained in a low voice: "I heard him gently say to his wife just now, don't worry about the mortgage, he will definitely find a job."

Li Yun frowned, "You pity him?"

When a person reaches middle age, he has lost his job. Gong Qingyu may not understand it. But after the death of the grandfather who adopted him, Li Yun has experienced this kind of powerlessness.

"A little bit." Gong Qingyu admitted honestly, "But what caught my attention is that he seems to be making a game, and then I prefer to play games..." Speaking of her hobbies, Gong Qingyu Xiao His face was reddened.

It is difficult for outsiders to imagine that Gong Qingyu, a classical beauty with noble and dignified temperament, actually does not like things full of ladylikeness such as piano, chess, calligraphy and painting, but anime and games that otaku loves.

Li Yun nodded, just about to say that giving him a job is nothing, the system's selection event prompt happened to sound.

"Ding, trigger the option event, please choose from the host:

Option 1: Give Feng Rongchen a job, reward justice value +1, random gift bag\*1.

Option 2: Acquire the game being written by Feng Rongchen, with no reward, the game has a high probability of being popular.

Option 3: Ignore, no reward. "

Huh?

A flash of surprise flashed in Li Yun's eyes. In the choice given by the system, the justice value added a pitiful point, but it also meant that it was right to help people in difficulty?

Everyone needs a job, but the priorities are different. If Li Yun works for Feng Rongchen, it also means that some people lose their jobs.

But the person who lost his job might find other jobs easier than Feng Rongchen, so the system gave him 1 point of justice?

Li Yun wanted to understand that, just like caring for people with disabilities, middle-aged men are also disadvantaged when looking for jobs. Helping them is tantamount to being slightly biased towards justice.

Chapter 373: Occupation eliminated

At present, Li Yun has only discovered two uses for justice values.

One is to make him have a great righteousness, which can deter evil spirits and ghosts, but it seems to be ineffective against zombies.

The second is that it has miraculous effects on cultivating certain exercises, such as the Nine Suns Heaven Scripture currently owned by Li Yun. With the blessing of justice, the power of true energy in his body can directly rise a step.

Although the purpose is still to be developed, Li Yun has to get everything righteously when he encounters a choice event!

"Qingyu, let's go and see."

A look of curiosity flashed in Li Yun's eyes. This middle-aged man who is looking for a job, will the game developed by him become popular?

Gong Qingyu didn't say much, but kept up with Li Yun's pace.

She is actually not interested in other men, just curious about the process of playing games.

The two came to Feng Rongchen's side. He didn't seem to notice, and he was still typing on the keyboard quickly.

"Eclipse, Java programming software, use Java to develop games?"

Li Yun was a little surprised. The Java language does not mean that games cannot be written, but relatively speaking, C++ and C# and some scripting languages are used in the game circle. Java is generally used to write mobile games.

But looking at Feng Rongchen, he doesn't seem to be writing a mobile game, but a game on the PC platform.

Gong Qingyu glanced at Li Yun with shining eyes. People she likes will also develop games?

But it's right to think about it. He knows hacking skills, and many other programming is analogous. It's not surprising that you can develop games.

"Uh!"

Feng Rongchen finally realized the arrival of the two. After looking back at Li Yun, his face suddenly showed an awkward expression, and he hurriedly stood up: "Um, I'm not... sorry."

"It's okay, Qingyu and I are here to take a look." Li Yun smiled and comforted him. Programmers always deal with computers, and it is normal for them to not communicate well.

Although Feng Rongchen is already married.

Li Yun pointed to his computer: "You wrote this game?"

The game debugging interface in the computer shows a small figure made up of square blocks. The small figure has no hands or five fingers, but a hoe-like thing is inserted on the rectangular arm. It should be The protagonist of this game.

In addition, the objects around the protagonist of the game are all composed of blocks.

Trees, grass, white clouds in the sky, minerals, and even lakes are small blue squares.

This is the world of cubes!

"Sorry." Feng Rongchen apologized again with embarrassment, "I am not actually a game programmer, but a system database administrator."

"Database administrator?"

Li Yun thought for a while and nodded thoughtfully: "No wonder you are looking for a job."

".....Correct."

Feng Rongchen was very embarrassed. He knew the identity of the boy in front of him and the hacking skills he possessed.

Database administrators used to be a very popular profession. In the past, every Internet company had at least three employees who were responsible for managing the company's database.

Unfortunately, the times are advancing. After the launch of cloud databases, the profession of database administrators has fallen into a very embarrassing state.

Because the data of small and medium-sized companies has all been transferred to the cloud database, and no local personnel are required to maintain it, programmers like Feng Rongchen can only lose their jobs.

Can Feng Rongchen be blamed for this? Just like the textile workers in the past, they worked diligently, but after the emergence of textile machinery and the improvement of productivity, these textile workers had to lose their jobs.

Chapter 374: my world

Feng Rongchen saw Li Yun in deep thought, thinking that his company does not need a database administrator, and quickly gritted his teeth and said:

"Mr. Li, I actually didn't come to apply for this position. When the cloud database appeared, I realized the changes it brought about very early. So I have learned the knowledge of network security by myself in my spare time. This time I am Come to apply for a network security engineer!"

Li Yun nodded slowly, but pointed to the game interface and said, "Can you introduce this game to me?"

"what?"

At this time, not only Feng Rongchen was surprised, but even the other people who had been paying attention here showed a surprised expression.

Li Yun, the chairman of a billionaire company, is interested in a game. What does this mean?

Investment, acquisition, shareholding, dividends!

Just thinking of these words is enough to make a group of migrant workers jealous. Why didn't their works be appreciated by Li Yun?

"I'm Cao, I know this person, Feng Rongchen, who is 34 years old this year!"

"34 years old...many companies have retired programmers over 35 years old, which is miserable."

"So I have decided to go home to take a public exam after another 5 years!"

"This opportunity depends on whether he can grasp it. You have to know that many people who want to start a business will not be able to ask those investors to take a look at their games or software!"

During the interview, the boss of a technology company saw my own work and wanted to invest in acquisitions. This is really a beautiful thing in the sky!

Everyone looked at him with envy, Feng Rongchen flushed with excitement, and quickly replied, "Okay, boss!"

From Mr. Li to the boss, the relationship between Li Yun and Li Yun became a lot closer.

Gong Qingyu secretly smiled and glanced at Li Yun, her beautiful eyes were full of smiles.

"This is a game I wrote in my spare time at work," Feng Rongchen reopened the game and said while operating the square figure inside: "The protagonist of the game is called Zhao Xiaoming, because Zhao Qian Sun Li, Zhao ranked first, and Xiao Ming is the name we are most familiar with.

The biggest feature of the game is that players can control Zhao Xiaoming to freely create and destroy blocks in the 3D world, such as building a tall building, and then destroying it with a TNT bomb..."

Gong Qingyu blinked, indicating that he didn't understand too much.

Li Yun understood that it was actually because Feng Rongchen was not good at words, so the introduction was a bit confusing.

"...I plan to add some monsters and survival gameplay later." Feng Rongchen's voice gradually decreased, because there is nothing to say about this game, and the gameplay is still very simple. He has a lot of ideas that he hasn't added yet.

People around started talking.

"This game is interesting."

"I don't think it will work, all the squares look uncomfortable!"

"Will players spend a lot of time building buildings?"

"Hey, I thought it would be an opportunity for Feng Rongchen, but now...I am not optimistic, the game is not good."

"It's so so, a bit of gameplay."

"But Baiyun Technology is not a game maker!"

The comments made Feng Rongchen sitting on pins and needles. In the end, he couldn't introduce it anymore. He could only look at Li Yun awkwardly: "Boss, uh, Mr. Li, what else do you want to know about this game?"

"Have you decided on the name of the game?"

"It's called 'Minecraft'." Feng Rongchen was a little embarrassed, "I wanted to make a free-to-build game, but it takes a lot of time. At present... it can only be done like this."

Li Yun nodded and turned to look at Gong Qingyu: "What do you think?"

Chapter 375: Acquired

Feng Rongchen suddenly became more nervous.

He seemed to see that the young boss didn't care about the game at all. He came to ask about the game, it should be to make his girlfriend happy.

In other words, whether this game has a 'money' way, the decision is not in Li Yun's hands, but the cold and classical beauty makes the decision!

"well enough?"

Gong Qingyu is not sure, "The gameplay seems to be good, but the content is so small, and the operation is not very convenient, and the game is not complete."

Feng Rongchen's heart went from heaven to hell, and then from \*\*\*\* back to heaven, repeated several times, causing sweat on his forehead.

But what surprised him was that Gong Qingyu seemed to know the game well?

Classical beauties also like to play games?

"If this game is made, would you play it?" Li Yun asked again.

"meeting."

Gong Qingyu nodded affirmatively, "The art style is very special, and the gameplay is also very special. At least I will try it. I will continue to play if I do well!"

Everyone was dumbfounded, this big and cold temperament really can play games?

"That's OK!" Li Yun finalized it directly and waved his big hand: "I decided to invest in this game!"

"If you are willing to accept investment." Li Yun added with a smile.

"Yes, yes, of course yes!!"

Feng Rongchen was trembling with excitement and almost jumped up on the spot with happiness.

These ten minutes are like a dream for him. Because he likes games, he makes games in his free time, and he will be admired by the chairman of the interviewing company. If he wants to invest in him, this kind of thing is even more rare than a pie in the sky. !

"I'm Cao, the boss really invested!"

The onlookers were too envious. Someone invested, which meant that they had stepped into the ranks of bosses from wage earners. The changes have been too great!

"Ahem!"

Wu Ke finally couldn't stand it anymore, she stood up with a clear cough, and said helplessly: "Li Yun, do you really want to invest in this...game?" He really didn't want to admit that this kind of shoddy personal work is called a project. Can barely be called a game.

"Correct."

Li Yun nodded affirmatively.

It's not a big problem whether it's popular or not, but Gong Qingyu likes it.

It's hard to buy a beautiful woman to laugh. In ancient times, there was Zhou Youwang, who played with lords. Today, there is Li Yunhao throwing a lot of money to win the palace and the little lady... ahem!

"But our company is not a game player!!" Wu Ke gritted his teeth and said word by word.

Had it not been for the public, he would have severely criticized Li Yun, saying that investment is just investment, which is too nonsense.

Feng Rongchen raised a heart to his throat again.

If Li Yun didn't invest, he would be happy for nothing.

"I'll just say, I will definitely not invest casually!"

Among the people around, there are some jealous and jealous people. They don't want to see Feng Rongchen being invested by Li Yun.

They have a bad life and don't want others to have a good life.

"What does it matter?" Li Yun shrugged indifferently. "Baowutong and Nantian Technology Group do not make games, but they all set foot in the game field."

"The two companies are huge, can we compare with them?"

"Don't worry, Baiyun Technology will be stronger than them in the future! I am planning ahead!"

Wu Ke wants to say something, but Li Yun has decided: "If it doesn't work, I use my own money to invest. You can ask HR to help me find some people and start a small company."

"This... alright."

Seeing that Li Yun was determined to do this, Wu Ke had no choice but to agree.

Forget it, just treat it as a young man's impulse, can understand and understand... But sure enough, understanding belongs to understanding, Wu Ke still wants to scold Li Yun!

Chapter 376: How much do you want to sell this game

Several HRs looked at each other. They hadn't recruited enough people at this stage, and the chairman threw them the task of recruiting game programmers.

Baiyun Technology is developing rapidly now, and in addition to the development of Xuanyuan Shield in cooperation with the commercial bank of Zhonghai City, it needs more manpower.

Unexpectedly, Li Yun is still not big enough, and the development is not fast enough, and he plans to start a new game business?

"How about this."

Wu Ke intends to make a quick decision and get this matter done as soon as possible.

He turned his head and looked at Feng Rongchen: "I have two plans here. One is to follow the normal investment method. We, no, the chairman pays a certain percentage of the shares, and you are responsible for recruiting people for development."

Feng Rongchen immediately retreated when he heard that he wanted to recruit people for development.

He writes games well, but wants him to be the boss...It is estimated that the company will go bankrupt within a few days.

"May I ask, how much shares can I hold?" Feng Rongchen hesitated and asked.

What he didn't know was that it was very unprofessional to talk about these commercial contracts in the public!

"Generally speaking, it is between 10% and 30%." Wu Ke did not laugh at him, explaining:

"According to the investment ratio, and the capital you have now, and then estimate the future game revenue, the final account share."

Feng Rongchen nodded, "What about the second plan?"

"Our chairman pays money and directly buys your game." Wu Ke glanced at Li Yun, "Your task afterwards is to assist us to complete the follow-up content of the game. The share may only be about 1%~5%. It still depends on the amount of investment."

"Uh, do I have a salary?"

"Of course, apart from holding shares, it is no different from ordinary employees."

"I choose the second one!"

Feng Rongchen hardly hesitated and chose to ask for money directly.

For one, he is not good at being a leader.

Second, he needs to pay off his mortgage now, and he needs a sum of money to help him in an emergency. In addition, he still has a salary while writing about his favorite games, which is very comfortable!

The crux of the problem is whether Li Yun is willing to buy it!

"How much do you plan to sell for?" Li Yun asked directly, not caring about trade secrets, he has money now.

The so-called rich and self-willed, he can handle this trivial matter in one step without making any mess.

Sell money! !

Hearing this word, everyone suddenly turned their eyes to Feng Rongchen and Li Yun.

The big pie really fell from the sky, if it could sell for a good price, it would be a big extra.

"This....."

Feng Rongchen hesitated very much. He was unwilling to sell too much. He was afraid that Li Yun would refuse to sell, so he was very entangled.

People around are talking about it.

"How much do you think this game can sell? One hundred thousand?"

"One hundred thousand!?! Are you kidding! This game is only thirty thousand at most. If I want to make it, it can be done in a week, and the cost is no more than five thousand yuan."

"What about creativity? At least it's worth three to fifty thousand."

"It's almost the price, this game hasn't been finished after all, and there is no plan."

"Thirty thousand is a lot, and there are still shares in the follow-up. Besides, he can still get his salary in the future. It doesn't matter to him that the game loses.

Feng Rongchen heard some comments, and after thinking about it, he secretly made up his mind, and his eyes on Li Yun became firm: "Boss, this game is sold to you. I only need one month's salary and 1% bonus!"

"Oh?"

Li Yun looked at him with some surprise. Feng Rongchen didn't have a big mouth to speak. The price was so low that Li Yun felt embarrassed to buy this game at such a low price.

Chapter 377: Give you a million

"Did you think carefully?" Li Yun asked him calmly.

"Yes, I have considered it clearly!"

Feng Rongchen looked at Li Yun gratefully and said, "The purpose of my coming today is to find a job. Now the boss, you give me a job, and you still let me play games... To be honest, I like game programming very much and can do this. I am very happy at work!"

"In addition, although I have worked on this game for three months, the time it takes is about half a month when converted into a working day."

"Plus creativity, so I only need one more month's salary."

After that, Feng Rongchen scratched his head embarrassedly, "The most important thing is that I am a bit tight on mortgage now, so..."

Li Yun nodded secretly, Feng Rongchen's asking price was really low, showing sincerity.

"Can."

The answer was Wu Ke, he agreed first: "Then..."

"and many more!"

Li Yun interrupted him and said to Feng Rongchen with a smile: "In fact, I am particularly optimistic about your game, so I will give you a satisfactory price."

"what?"

Feng Rongchen and the others were dumbfounded.

Feng Rongchen has already set the price, but Li Yun still voluntarily increases the price. Is it too much money?

For a time, all the people who came for the interview looked at Li Yun with fiery eyes. With such a generous boss, the bonus of this company will definitely not be low!

"Hey, let me tell you that the reward given to us by the chairman is 10 million downloads, one more month's bonus!"

The employees of Baiyun Technology spoke out like a show, which surprised the interviewees with their eyes widened.

Pioneer technology is now popular all over the world. Doesn't it mean that a few months of downloads require dozens of months of salary?

"I'll give you this number." Li Yun smiled and stretched out a finger.

"Ten, one hundred thousand?" Feng Rongchen's breath suddenly rose.

His monthly salary is sixteen thousand, which is only one hundred thousand more than a month!

After imagining that the housing loan problem can finally take a breath after getting 100,000 yuan, Feng Rongchen is so excited again, today is really his lucky day, and Li Yun is his great man!

"No, it's one million." Li Yun smiled.

"what?"

Feng Rongchen and the people around did not hear what Li Yun said clearly, or could not believe that he would actually buy a game for one million!

Wu Ke twitched the corners of his mouth, and he would never even want to understand what the young chairman thinks in his life.

"It's one million."

Li Yun nodded very affirmatively: "I am very optimistic about this game and believe that it will be popular all over the world in the future, so I decided to buy it with 1 million cash and 3% equity!"

Dividends and equity are not the same, but in general, equity will be better.

Feng Rongchen was excited at first, but quickly calmed down, shook his head and said, "No, boss, this is too much! I imagined that the highest selling price would be 100,000 yuan. In any case, one million is too much, I can't ask for it. !"

Everyone nodded their heads, buying a game that was still in the mother's womb for a million, no matter how you looked at it, it was outrageous.

"Okay, that's it!"

Li Yun patted him on the shoulder, "In the future, your job is to give me this game to do my best. One million is not too much, as long as you see this game sell for one billion in sales in the future. , Just don't regret today's decision."

Sell a billion?

Everyone laughed secretly, this is already the sales amount of many top three A-level games. It is impossible for a rough-made game to sell for one billion!

Chapter : 378 The contract is signed, Feng Rongchen is excited

"Will not."

Feng Rongchen smiled bitterly and shook his head, "Don't say one billion, even ten billion I don't regret it. One million is far beyond my work remuneration, so boss, if you want to buy it with one million, then I Don't pay dividends!"

"Creativity is priceless, say 3% is 3%, you don't think it is too low."

Li Yun ignored him, turned to look at Gong Qingyu, and smiled: "Qingyu, do you want to make money together? I am quite confident in this game."

Gong Qingyu blinked and said, "Okay, how much do I want to invest? Five million? Ten million?"

The local tyrant aura contained in this sentence forced back what Feng Rongchen wanted to say.

This group of local tyrants casually invested tens of millions of millions, perhaps for them, one million is really not much.

Feng Rongchen was moved in his heart, and only felt that after meeting a confidant, he would definitely work overtime in the future and do his best to make "Minecraft" perfect!

"It doesn't need to be that much. I'll find some more people to participate in. The initial investment of 5 million is enough, right?"

Li Yun looked at Feng Rongchen, who quickly nodded and said that this game gave him two artists and three programmers, and it took him a month to almost complete the first version.

"Ok, I understand."

Li Yun predicted that he and Gong Qingyu would each invest 1 million yuan, and his genuine girlfriend Fang Xue would naturally also participate. In addition, the personality of the little pepper Su Muxin would also be invested.

In addition, Li Yun wants his sister to put in the 50,000 yuan of the scholarship. Although this little money is pitiful, and Li Yun can use the money at any time, he knows Li Feng's character, if she earns it herself Li Feng will be even happier with the money.

Li Yun gave her some shares and let Li Feng own about 5% of the game's revenue.

But these chores can be left to Wu Ke, he can handle it!

At noon, Wu Ke drafted the contract between the interviews and formally signed it with Feng Rongchen. Li Yun only glanced at the final equity drafting.

A subsidiary company was established under Baiyun Technology. Li Yun invested two million and 300,000 yuan, accounting for 30% of the shares; Fang Xue, Gong Qingyu, and Su Muxin each invested one million yuan, each accounting for 15% of the shares.

Feng Rongchen 3%, Li Feng 5%, Wu Ke symbolically holds 3% of the shares, and all the rest belong to the parent company of Baiyun Technology.

Feng Rongchen took the initiative to take over the responsibility of the project manager. He hadn't done anything similar before, only being the project team leader.

However, Li Yun said that the project team leader was enough. Feng Rongchen was responsible for making the game, and Baiyun Technology's advertising and marketing department helped to publicize the rest. Wu Ke was also instructed. The rest were trivial matters.

In order to speed up the progress of the project, Li Yun remotely discussed with several shareholders, that is, several of his confidantes, and decided to recruit more programmers to make the game as soon as possible.

—Because the three girls are very interested in this game, after all, it is the first game they invested in, so it is normal to have a sense of expectation.

"Okay, the contract is over!"

Wu Ke sorted out the documents and handed them to the secretary aside, then turned around and smiled at Feng Rongchen: "I heard that you know some programmers. You can try to push some people in. As long as they pass the interview, you can let them and You make this game together."

"Yes, Mr. Wu!"

After signing the contract, Feng Rongchen was full of red, and once again bowed deeply to Li Yun to thank Li Yun for his kindness.

Li Yun smiled, "I will work harder in the future."

"Definitely, boss!!" Feng Rongchen stepped down. Writ.

"Then I'll go first, you guys are busy."

"That's right." Li Yun walked out a few steps and turned around, "Call Wu Ke if you have a problem, don't come to me, because it's useless to find me. I'll watch the game in half a month, that's it."

"Uh, good."

"Get out of here." Wu Ke scolded with a smile.

Chapter 379: I am not a classical beauty

Li Yun and Gong Qingyu walked out of Mingyue Building side by side. It was noon when Li Yun planned to find a high-end restaurant to have lunch with Gong Qingyu.

"Li Yun."

While waiting for the driver to drive the BMW out of the underground garage, Gong Qingyu suddenly called his name.

"what happened?"

"No, nothing."

Gong Qingyu gave a chuckle, said nothing, but her little hand quietly held Li Yun's hand.

"Qingyu?" Li Yun turned his head to look at her in surprise. The latter gave him a sweet smile naughty, moved a little step closer to him, and leaned his shoulders against each other.

This kind of intimacy, Li Yun is not a fool, and he can naturally see Gong Qingyu's intentions for him.

"Qingyu!"

Li Yun was moved in his heart and couldn't help stopping her soft and slender waist.

Gong Qingyu's graceful body stiffened at first, and then he let out a cry, and his body softened, his head gently leaning on Li Yun's shoulder, just like the lovers who came and went on the street.

The two maids who had been following her to serve her were numb. They had already seen the young lady's feelings for Li Yun, but they were still surprised.

Because Gong Qingyu and Li Yun have known each other not long ago, and because Li Yun has a very close relationship with other girls, neither of them understands, is Li Yun so attractive!

Although they also agree that Li Yun is a very good boy.

"Li, Yun."

Gong Qingyu called his name in a gentle, delicate, and mischievous tone. This kind of tender and sweet voice made Li Yun's bones crumble.

He couldn't expect that Gong Qingyu, a wayward and cold girl, would speak in such a tone at this time.

"Qing, jade."

Li Yun learned her tone and also called her name.

With the addition of god-level sweet words, Li Yun's voice was deep and deep, as if it were a narration in a documentary, gorgeous and full of magnetism, it could be called a girl killer.

At least after Gong Qingyu listened, the heart of a young girl trembled slightly, attracted by Li Yun's voice.

Even the two maids behind them couldn't help blushing when they heard Li Yun's voice at the moment, and quickly lowered their heads.

This voice really kills both young and old. Loli, young girls, imperial sisters and even people, wives and young women can't resist.

"Well."

Gong Qingyu came back to his senses and looked at Li Yun with a soft gaze. After a while, he said, "Actually, what I wanted to say just now is that I am very happy this morning."

"Huh?" Li Yun looked at this classical beauty, really wanting to reach out and gently stroke her cheek, but unfortunately there were still two maids staring behind him and could only give up.

"Are you happy to be with me?" Li Yun asked with a 'shameless' smile.

But unexpectedly, Gong Qingyu's cheeks were flushed, and he nodded gently.

"Um."

Gong Qingyu's voice was soft as a feather, touching Li Yun's heart.

"I'm actually very lazy." Gong Qingyu was a little embarrassed, and her voice was much lower.

"Others say that I am a genius, beautiful, like a classical beauty, sitting in the back garden playing the piano and singing. Attract people outside the wall to stop and listen to the kind of ancient lady!"

Li Yun smiled and said, "Qingyu, you are a classical beauty."

"certainly not."

Gong Qingyu pursed her mouth and looked very cute. "My mother always let me learn those piano, chess, calligraphy and calligraphy, but also to learn female red, four books and five classics, etc.,

but besides playing the piano, I am willing to learn, and I don't bother to care about everything else. I don't want to learn!"

#### Chapter 380: The rebellious Gong Qingyu

Gong Qingyu at this time was exactly the same as a girl who was angry with her parents. With her dignified and beautiful face, she looked abnormally incompatible with her.

But it's cute.

"I'm not!"

Gong Qingyu rebelliously said: "The things my parents asked me to do, I only learned a rough idea, so I threw them away, I don't want to learn!"

"Then you fell in love with anime?"

"Animation is just a part." Gong Qingyu spit out her little pink tongue, "I like the unfettered life. I watch a movie at night and see late at night, sleep in the morning, take a nap in the afternoon and drink afternoon tea, and watch a little more at night Books, do what you want, do not want to be controlled by others."

Li Yun understood.

Gong Qingyu is a genius, and geniuses naturally have some small hobbies. In other words, geniuses are not all self-discipline.

Gong Qingyu is a genius who doesn't want to be restrained, most of the time he does his own way.

So, when she saw that Li Yun was actually better than her, she went to the product launch conference and had a live broadcast contest with Li Yun.

The result was lost.

"I still... I really don't like communicating with people." Gong Qingyu's face turned red, "I don't want to participate in normal class activities."

"That's why you said you were lazy?"

"Um."

Gong Qingyu said, "But, because of you, Li Yun, I went to the station to pick you up this morning, and I went to the roadside stall to buy buns with you, participated in the interview together, and invested in games together..."

She kept looking at Li Yun, and said affectionately and softly: "I like all this and I am very happy!"

"Qingyu!" Li Yun hugged Gong Qingyu's waist tightly and brought her graceful body close to him. Gong Qingyu raised her head slightly, her blushing mouth half-open, and her charming aura rushed over her face.

The two looked at each other with deep affection, and they were constantly communicating with each other. The two faces got closer and closer, just when they almost overlapped.

"Ahhhh! Miss, the car is coming!"

The maid named Qiu Zhiju deliberately interrupted the intimacy of the two loudly, and ended Gong Qingyu's act of giving her first kiss.

If the old lady knew about it, they would definitely not have good fruit!

Gong Qingyu recovered, her noble and dignified face was full of blush, and she hurriedly left Li Yun's embrace, almost unable to stand shyly.

"Ahem, Qingyu, let's go."

The opportunity had been missed, the atmosphere of ambiguity was gone forever, and Li Yun did not force her to kiss her.

He will live in Qingyu's house tonight, so he has a lot of opportunities.

The two had lunch. Gong Qingyu thought that Li Yun would go back to her place directly with her, but Li Yun said that he had something to do and he would not go to her house until the evening.

"Actually, it's not my home, it's the place where I live. My parents live in other provinces." Gong Qingyu corrected his statement and saw that Li Yun was indeed ill, so he had to go back alone.

However, she took away Li Yun's salute, saying that he didn't have to carry a backpack when he was busy.

Li Yun smiled and shaved her little nose before leaving, as a goodbye to Qingyu.

——Actually, he has a space ring, and the things in his backpack are just to hide.

"Brother Liao, I have arrived in Zhonghai City, how can I find you now?"

What Li Yun is going to do is also very simple. Liao Hua entrusted him to explain to a group of bigwigs and leaders the knowledge of hacker defense, by the way, try to invade to see if there are any hidden security risks in some important places.

This is not something that can be done in half a day, so Li Yun took three days off and will return to Longyang County next week.
